

ALASKA RETIREMENT MANAGEMENT BOARD

MARCH
17-18, 2022

BOARD OF TRUSTEES MEETING

Board of Trustees Meeting

Thursday, March 17, 2022

Call-In (Audio Only): 1-907-202-7104

Code: 504 463 704#

- I. 9:00 AM Call to Order**
- II. Roll Call**
- III. Public Meeting Notice**
- IV. Approval of Agenda**
- V. Public/Member Participation, Communications, and Appearances**
(Three Minute Limit)
- VI. Approval of Minutes – December 2-3, 2021**
- VII. Election of Secretary**
- VIII. 9:15 AM Staff Reports**
 - A. Retirement & Benefits Division Report**
Ajay Desai, Director, Division of Retirement & Benefits
Kevin Worley, Chief Financial Officer, Division of Retirement & Benefits
 - B. Treasury Division Report**
Pamela Leary, Director, Division of Treasury
 - C. Liaison Report**
Alysia Jones, ARMB Liaison
 - D. CIO Report**
Zachary Hanna, Chief Investment Officer
 - E. Legal Report, Ben Hofmeister, Assistant Attorney General, Dept of Law**
 - F. Fund Financial Presentation**
Ryan Kauzlarich, Assistant Comptroller, Division of Treasury
Kevin Worley, Chief Financial Officer, Division of Retirement & Benefits
- IX. 9:45 AM Trustee & Legal Reports**
 - A. Chair Report, Bob Williams**
 - B. Committee Reports**
 - 1. Audit Committee, *TBD*
 - 2. DC Plan Committee, *Bob Williams, Chair*
 - 3. Actuarial Committee, *Allen Hippler, Chair*
 - 4. Operations Committee, *TBD*
 - 5. Alaska Retiree Health Plan Advisory Board, *Lorne Bretz, ARMB Member*

BREAK @ 11:05 am (10 MINUTES)

- X. 11:15 AM Presentations**
- 11:15 – 11:25 **A. Draft June 30, 2021 Actuarial Reports**
David Kershner & Scott Young, Buck
- 11:25 – 11:35 **B. Experience Study**
David Kershner & Scott Young, Buck
- 11:35 – 11:45 **C. Actuarial Review of June 30, 2021 Valuations**
Paul Wood & Bill Detweiler, Gabriel Roeder Smith
- 11:45 – 12:00 **D. Audit of State’s Actuary**
Paul Wood & Bill Detweiler, Gabriel Roeder Smith

LUNCH @ 12:00 pm (90 MINUTES)

- 1:30– 2:30 **E. Performance Measurement - 4th Quarter**
Paul Erlendson & Steve Center, Callan LLC
- 2:30 – 3:05 **F. Risk Management**
Shane Carson, State Investment Officer

BREAK @ 3:05 pm (10 MINUTES)

- 3:15 – 4:00 **G. Fixed Income and Cash Management**
Victor Djajalie, State Investment Officer
Emily Howard, State Investment Officer

The following agenda item was moved up from Friday afternoon’s agenda.

- XI. Investment Actions**
- A. General Consultant Contract:** Callan LLC 1st Optional Renewal
- B. Real Assets Consultant Contract:** Callan LLC 1st Optional Renewal
Zachary Hanna, Chief Investment Officer

RECESS for the DAY @ 4:15 pm

Friday, March 18, 2022

[Click here to join the Microsoft Teams](#) meeting for 3/18/2022 or use the options provided below.

Video conferencing device:

Link: 260748889@t.plcm.vc

ID: 117 950 401 5

Call In (Audio Only):

Phone: 1-907-202-7104

Code: 698 300 231#

9:00 – 10:30 **H. Current Geopolitics and the ARMB portfolio**
ARMB Investment Managers & Advisors

BREAK @ 10:30 am (10 MINUTES)

10:40 – 11:25 **I. Fidelity Signals**
Jordan Alexiev, Portfolio Manager
Melissa Moesman, Account Executive

11:25 – 12:15 **J. PineBridge**
Michael Kelly, Managing Director, Head of Multi-Asset
Joy Booker, Managing Director, Client Relations

LUNCH @ 12:15 pm (75 MINUTES)

1:30 – 2:15 **K. Peer Assumptions, Risk, and Time Horizon**
Zachary Hanna, Chief Investment Officer

2:15 – 3:45 **L. Capital Market Assumptions**
Jay Kloepfer, Executive Vice President and Director, Capital Market Research
Adam Lozinski, Assistant Vice President, Capital Market Research

BREAK @ 3:45 pm (10 MINUTES)

XI. Investment Actions – *Moved up to Thursday, March 17th*

XII. 4:05 PM Unfinished Business
XIII. New Business
XIV. Other Matters to Properly Come Before the Board
XV. Public/Member Comments
XVI. Investment Advisory Council Comments
XVII. Trustee Comments
XVIII. Future Agenda Items
XIX. Adjournment

NOTE: Times are approximate, every attempt will be made to stay on schedule; however, adjustments may be made.

**State of Alaska
ALASKA RETIREMENT MANAGEMENT BOARD
MEETING**

Videoconference

**MINUTES OF
December 2-3, 2021**

Thursday, December 2, 2021

CALL TO ORDER

CHAIR ROBERT JOHNSON called the videoconference of the Alaska Retirement Management Board (ARMB) to order at 9:01 a.m.

ROLL CALL

Seven ARMB trustees were present at roll call to form a quorum.

Board Members Present

Robert Johnson, *Chair*
Bob Williams, *Vice-Chair*
Gayle Harbo, *Secretary*
Lorne Bretz
Allen Hippler
Commissioner Lucinda Mahoney (late on 12/2/21)
Dennis Moen
Donald Krohn
Commissioner Paula Vrana

Board Members Absent

Commissioner Lucinda Mahoney (absent 12/3/2021)

Investment Advisory Council Members Present

Dr. William Jennings
Dr. Jerrold Mitchell
Ruth Ryerson

Department of Revenue Staff Present

Zachary Hanna, Chief Investment Officer
Pamela Leary, Director, Treasury Division
Scott Jones, Head of Investment Operations, Performance & Analytics

Michelle Prebula, State Investment Officer
Kevin Elliot, State Investment Officer
Casey Colton, State Investment Officer
Benjamin Garrett, State Investment Officer
Victor Djajalie, State Investment Officer
Shane Carson, State Investment Officer
Mark Moon, State Investment Officer
Sean Howard, State Investment Officer
Steve Sikes, State Investment Officer
Ryan Kauzlarich, Accountant V
Hunter Romberg, Investment Data Analyst
Grant Ficek, Business Analyst
Alysia Jones, Board Liaison

Department of Administration Staff Present

Ajay Desai, Director, Division of Retirement & Benefits
Jim Puckett, Deputy Director, Division of Retirement & Benefits
Kevin Worley, Chief Financial Officer, Division of Retirement & Benefits
Roberto Aceveda, Benefits and Counseling Manager,
Emily Ricci, Health Care Policy Administrator, Division of Retirement & Benefits
Amanda Pillifant, Department of Administration
Mark Rosier, Department of Administration

ARMB Legal Counsel Present

Benjamin Hofmeister, Assistant Attorney General, Department of Law

Consultants, Invited Participants

Steve Center, Callan
Paul Erlendson, Callan
Gary Robertson, Callan
Brady O'Connell, Callan
David Kershner, Buck
Scott Young, Buck
Tonya Manning, Buck
Melissa Beedle, KPMG
Elizabeth Stuart, KPMG
Paul Wood, Gabriel Roeder Smith
Bill Detweiler, Gabriel Roeder Smith
David Lebovitz, J.P. Morgan
Jeff Shields, J.P. Morgan
Deasee Phillips, J.P. Morgan
Dave Schiller, Summit
Peter Chung, Summit
Tony Salewski, Genstar
Carson Ewanich, Genstar

Others Present

Elaine Schroeder, Public
John Hudson, Public
Mike Vieira, Public
Doug Woodby, Public
Bob Schroeder, Public
Jim Simard, Public

PUBLIC MEETING NOTICE

Board Liaison ALYSIA JONES confirmed that public meeting notice requirements had been met.

APPROVAL OF AGENDA

MS. HARBO moved to approve the agenda. MR. WILLIAMS seconded the motion.

PUBLIC/MEMBER PARTICIPATION, COMMUNICATIONS AND APPEARANCES

CHAIR JOHNSON invited MS. SCHROEDER to speak.

MS. SCHROEDER said she was an Alaska State pension beneficiary that lived in Juneau. She reminded the Board that 350Juneau had previously testified before the Board and noted that they were part of a rapidly growing international movement of people who cared about the climate crisis and the financial solidity of the pension funds.

MS. SCHROEDER explained that the international fossil fuel divestment movement had grown to become a major global influence on energy policy, with 1,485 institutions publicly committed to some form of fossil fuel divestment, representing \$39.2 trillion of assets under management.

MS. SCHROEDER noted that new divestment commitments from institutions such as Harvard University, PME and CDPQ, La Banque Postale, the City of Baltimore and the Ford and MacArthur Foundations. Other new commitments to divest included the cities of Rio de Janeiro, Glasgow, Paris, Seattle, Auckland, and Copenhagen, led by London and New York City pension funds.

MS. SCHROEDER said that they all want a healthy climate and healthy pension funds, that there were no contradictions between the two goals. She said they were asking the Board to conduct a transparent climate risk assessment and act on the findings.

MR. HUDSON spoke next stating that he was a state pension beneficiary and was a member of 350Juneau Climate Action for Alaska. He said the fossil fuel industry had argued that divestment from coal, oil and gas would cause financial harm to institutional investors, but recently, BlackRock had published a research report on the subject finding that investors had experienced neutral to positive results after divesting from fossil fuels. He said that fossil fuel divestment options had outperformed all other options in the benchmark portfolio and fossil fuel investments had consistently

underperformed the broader market over the past five years.

MR. HUDSON said the BlackRock report warned that fossil fuel reserves may become unusable in a low-carbon scenario where they would either face precipitous devaluation or become stranded. He said that evidence in the downward slide was seen in the market. He noted that in 1980, fossil fuel industries accounted for 28 percent of the stock market's value, where today, the share is less than 3 percent. He said that failure to recognize the industry's decline would be costly, that three major pension funds resisted the demands to divest and paid the price in billions of dollars over the last 10 years. He said the California State Teachers' Retirement Fund would have gained \$5.5 billion if they had divested from fossil fuels and the California Public Employee's Retirement Fund would have gained \$12 billion if they had divested.

MR. HUDSON said that investment managers had a legal responsibility to make the best financial decisions on behalf of the beneficiaries and with renewable energy growing faster than expected, and the demand for fossil fuels falling faster than expected, he said that it would be wise for the Board to consider divesting from fossil fuels and toward low-carbon energy industries.

MR. VIEIRA said that he was a teacher in the Sitka School District and currently serving as president of the Sitka Education Association and also as a member of the NEA-Alaska Saving Our Alaska Retirement Committee for several years.

MR. VIEIRA said that he was a member of the Tier 3 TRS system and was frustrated with the continued delay of the brokerage window option in the Tier 3 retirement system. He said they had been given only 32 options to invest in to take the risk and manage their entire success in retirement. He noted that the three-legged stool that most rely on is only two for them, with any option of Social Security being removed. He said the association in Sitka had been educating their members. He said they held an event in October where 40 percent of their membership registered to attend. They invited Empower to attend and presented information to help members begin to plan and be successful in retirement.

MR. VIEIRA said they had been promised that the brokerage window would be open by November 28th and promoted it and many people were eager to sign up for the state's 457 plan. He had checked with MR. PUCKETT on the date it was supposed to open, only to be told that it was not going to happen. He said that trust was broken between TRS members and the State Department of Retirement.

MR. VIEIRA said that he had friends around the country that also worked for public entities with Empower as their financial recordkeeper and they had access to brokerage windows. He urged the ARMB to have a sense of urgency to make it happen; MR. HIPPLER asked what percentage of teachers would use the brokerage window once it came online; MR. VIEIRA thought that five to 10 percent would immediately join and as the younger generation of teachers came in, he thought they would as well. He guessed that it would take three years and it would reach 50 percent.

MR. WOODYBY said that he was a state pension beneficiary in Juneau and a member of 350Juneau Climate Action for Alaska. He thanked the state's staff members for their response to his public records request in September asking for listing of all holdings in the nondirected funds at the end of

the last fiscal year. He said they had gone above and beyond his request by also sending him a list of investments they classified as fossil fuel related.

MR. WOODY explained that 350Juneau had, in September, conducted analyses of fossil fuel holdings in pension funds from 11 states with the assistance from Third Rail Economics, a financial analytics firm specializing in the energy sector. He said the data staff sent to him in September showed the proportion of fossil fuel holdings as 3.1 percent of the public equity and fixed income positions. He said that their analysis found over twice that amount at roughly 6.4 percent and the top 10 included producers in utilities such as Florida Power and Light, Berkshire Hathaway Energy, Shell International Finance, and Chevron USA. He said that 100 additional holdings that they identified were in companies on the global coal exit list. He then shared a quote from a Moody's research report released in October. He said "Across the G20, financial firms hold \$22 trillion in loans and investments subject to carbon transition risk. Financial firms are under rising regulatory and commercial pressure to support the global sustainability drive. As the race to net zero emissions accelerates, banks, insurers, and asset managers will need to ramp up climate risk assessments and set clear goals for reaching net zero in their finance emissions."

MR. SCHROEDER said that he was a resident of Juneau and an early retiree, and that the state of Alaska fixed benefit and pension had provided him with financial stability for over 20 years. He said he had testified before urging the ARMB to examine its fossil fuel holdings and other investments that prop up the declining fossil fuel extraction industry. He said he had also urged the ARMB to evaluate the climate risk posed to its whole portfolio.

MR. SCHROEDER said his testimony focused on ARMB's use of private equity. He said that the ARMB has allocated 13 to 14 percent of the total funds to private equity. That his concern with private equity was that private equity investments were opaque since disclosure and reporting requirements were much weaker than market traded equities and bonds. He said that made it near to impossible for a pension holder to know exactly how the money was invested. He also noted that private equity holdings were of short duration. He said it often bolsters failing fossil fuel industries. He said according to the New York Times, private equity had invested at least \$1.1 trillion in the energy sector with 88 percent of it going into fossil fuel companies

MR. SCHROEDER said that private equities may make money in the short term, but they were not likely to be sound in the long term as transition occurs from a carbon-based economy and society. He urged the ARMB to have staff look closer at private equity investments to see if they matched the transparency requirements, long-term investment strategy, and the emerging climate risk posture of the ARMB.

MR. SCHROEDER thanked the ARMB for providing data on investment holding and asked for similar cooperation in their examination of private equity holdings.

MR. SIMARD said that he too was a member of the 350Juneau Climate Action for Alaska, an Alaska state pension beneficiary, and a concerned grandfather. He said he had recently spoke with the Board about the risks to the retirement fund investments posed by the climate-related litigation against the fossil fuel industry. He noted that the number of climate related suits had steadily increased. He said

among the most promising were those filed by indigenous people with treaty rights to land and water resources that were impacted by climate disruptions.

MR. SIMARD said that in March, the Ontario Superior Court of Justice rejected a motion to dismiss filed by the province of Ontario in a suit filed on behalf of seven plaintiffs who alleged the provincial government violated the Canadian Charter of Rights and Freedom by failing to address climate change. He said one of the most interesting U.S. cases was brought by the State of Vermont against ExxonMobil and Shell and others, not asking for financial damages but to require producers of oil sold in Vermont to label their products as dangerous to the health of the global climate when used as they were intended. He said the suit contended that the oil producers had engaged in decades-long disinformation activities, depriving Vermont consumers of the information needed to make informed choices.

MR. SIMARD asked that the Board divest from risky and threatened oil stocks, and shift investments to renewable energy sources. He suggested that the Board be transparent about its moves, so that Alaskans could educate themselves about the economic risks.

CHAIR JOHNSON thanked the speakers.

APPROVAL OF MINUTES – 9/23-24/2021

MS. HARBO moved to approve the minutes of the September 23-24, 2021, meeting of the ARMB. MR. KROHN seconded the motion.

With no objections, the minutes were approved.

APPROVAL OF MINUTES – 10/11/2021

MS. HARBO moved to approve the minutes of the October 11, 2021, meeting of the ARMB. MR. KROHN seconded the motion.

With no objections, the minutes were approved.

ELECTION OF OFFICERS

CHAIR JOHNSON announced that he was stepping down from the office and would decline any nominations for any of the offices on the ARMB. CHAIR JOHNSON then asked for nominations.

MS. HARBO thanked CHAIR JOHNSON for his service noting that he had been a great chair. MS. HARBO nominated MR. WILLIAMS as Chair, MR. HIPPLER as Vice-Chair and herself as Secretary.

CHAIR JOHNSON said the slate had been proposed and asked if anyone else wished to step up and if there were any other proposals for alternatives to the slate proposed by MS. HARBO; MR. MOEN said that there were no objections.

MR. BRETZ seconded the nominations.

CHAIR JOHNSON accepted the second and asked if the proposed members were all agreeable to serving if elected; MR. WILLIAMS, MR. HIPPLER and MS. HARBO all agreed.

CHAIR JOHNSON asked if there were any objections to considering the nominations as a slate as opposed to position by position; no objection was noted.

A roll call vote was taken, and the proposed slate of MR. WILLIAMS as Chair, MR. HIPPLER as Vice Chair and MS. HARBO as Secretary passed unanimously.

CHAIR JOHNSON said that he would hand off the gavel to MR. WILLIAMS.

STAFF REPORTS

A. Retirement & Benefits Division Report

1. Buck Consulting Invoices

2. Member Statistics

MR. WORLEY turned attention to pages 68-70 of the PDF Board packet which was the Summary of Monthly Billings from Buck. He said the summary was at the request of the Board and the information provided was for the quarter ending September 30 and the next report would be in March for the two periods ending September 30 and December 30.

MR. WORLEY said that pages 71 through 75 of the PDF was the quarterly report as of September 30, 2021, for membership of PERS, TRS, JRS, the National Guard, SBS and Deferred Comp. He noted that prior statistics for June 30, 2021 were included for comparison.

MS. HARBO asked about the 151 partial disbursements for PERS DC members and if it meant they were taking some of the money that was contributed out, and not the full amount; MR. WORLEY said they have some provisions about partials and that they could be hardship requests. He said it would be discussed in detail in the cash flow portion of the presentation.

MR. DESAI noted that the Division of Retirement and Benefits continued to work on hybrid schedules while maintaining member services. He said they currently had 33 staff members working in office with 58 staff members teleworking full-time and 29 staff members on a hybrid teleworking schedule.

B. Treasury Division Report

MS. LEARY noted that the budget was moving through the appropriate channels, they had met with the Office of Management and Budget and believed there were no issues with the budget going into the Governor's budget. She said they were expecting that the Governor's budget would come through by mid-December and would confirm at the March meeting where they were once the budget goes through the Legislature.

MS. LEARY introduced MR. KAUZLARICH, assistant comptroller who would be providing the financial report to the Board.

C. Liaison Report

1. Disclosures Report

MS. JONES noted the first report was located on page 75 of the packet and was the third quarter financial disclosures report. She said for the third quarter there were no disclosures that required additional review or discussion.

2. Communication Report

MS. JONES noted that on the communications report, the only change from what had been provided was an email she had forwarded on 11/29 to the Board from CHAIR JOHNSON and that it would be included in the revised version. She said there were communications sent on behalf of the Board and a summary of public records requests received between September 1st and November 30th.

3. Meeting Calendar

MS. JONES said the 2022 meeting calendar was approved at the June meeting.

MR. BRETZ asked what was the course of action if a Trustee was interested in moving dates around; CHAIR WILLIAMS said he could make a request; MR. BRETZ then requested that the September date be moved out one week; MS. JONES noted that APFC's meeting was the 21st and 22nd and the Board may want to take that into consideration as they try not to overlap due to the commissioners' schedule. MR. BRETZ asked if there was an alternative date a week later or a week earlier; MR. HANNA suggested to take the discussion offline as there was much to discuss. MR. BRETZ agreed.

MS. JONES then displayed page 79 which showed a timeline of contract and review deadlines for FY2022-FY2027. She said that it was a work in progress at the request of former CHAIR JOHNSON. She said it was designed to show what needed to be completed in what fiscal year.

MS. HARBO commented that it was very helpful and thanked MS. JONES.

MR. JOHNSON said it was terrific and suggested it be placed as page 1 of future Board packets as a reminder to everyone.

CHAIR WILLIAMS noted that it lays it out so they know what was coming and why so they could be prepared for it.

D. CIO Report

MR. HANNA noted that the third quarter had been relatively mild followed by a strong performance for October and most of November. He said the market was extremely volatile with several different things driving the markets. He said the new COVID variant, increasing concerns about inflation, the upcoming debt ceiling decision, rising interest rates, and the tapering Federal Reserve were some of the culprits.

MR. HANNA said that Callan would be giving a presentation on inflation, and J.P. Morgan would

be presenting their guide to the markets. He said he was looking forward to both the presentations as they were particularly relevant with the fiscal year and actuarial experience study. He said he asked Callan to close the meeting with a presentation highlighting how institutional investors broadly think about reconciling capital market assumptions and actuarial assumptions, as food for thought for the March meeting where Callan will present on the next version of their capital market assumptions.

MR. HANNA said most of the rest of the agenda would be focused on private equity, that MR. HOWARD who manages the portfolio for the ARMB and MR. ROBERTSON from Callan would present that portion. He said that there would also be two private equity groups who would discuss how they approach growth equity and bio investing to provide more perspective on the asset class.

MR. HANNA said that item 2 of his report was the watch list. He said Man Group was the only manager currently on the watch list due to personnel changes. He said that it was expected to be resolved at some point during calendar year 2022. He noted a revision to the version of the watch list that was in the original ARMB packet. He said that Fidelity Real Estate High Income had just reached its six-year mark and had underperformed when compared to its benchmark. He said the net-of-fee performance had been 3.61 percent annualized, compared to the CMBS benchmark of 4.58 percent, a deficit of 123 basis points. He said they focus on commercial mortgage-backed securities which were debt instruments for commercial real estate. He said office properties in particular had been disproportionately impacted by COVID and most of the underperformance occurred during the March 2020 quarter. He said they were recommending the Board make a motion to put them on the watch list.

MS. HARBO so moved. MR. JOHNSON seconded the motion.

A roll call vote was taken, and the motion passed unanimously.

CHAIR WILLIAMS asked if there was any indication that the personnel changes at the Man Group were going well; MR. HANNA said that it was a thoughtful transfer within their organization. The CIO of the strategy retired and that they thought it was a significant enough of an event to put them on the watch list. He said they were not concerned about that aspect in the long run that they were being thoughtful about it.

MR. HANNA said that item 3 on the agenda included areas where he exercised CIO delegation for contracting. These included a \$50 million private equity commitment to Summit XI, a private equity partnership that focuses on growth equity investments in technology, healthcare, life sciences, and growth products and services; a \$50 million private equity commitment to Clearlake VII. He said they focus on middle market private equity and special situation investments in technology, industrials, and consumer sectors; and a contract amendment with Brandes that modestly reduced fees.

MR. HANNA said the last section of his report was a summary of the portfolio rebalancing that took place in September and October. He said it focused on risk management, bringing the portfolio back on a quarterly basis to the ARMB's established asset allocation risk profile. He said during that period they sold \$148 million in domestic equities, purchased \$61 million in international equity and \$87

million in fixed income. He said they continued to increase the active weight in international equity with additions to Baillie Gifford and Brandes. He said they also added \$100 million to the internally managed multifactor strategy which balanced out some of what they had with Scientific Beta. He said they also conducted four internal rebalance transactions over the period to equalize relative allocations across plans.

MR. HANNA said that McKinley's Healthcare Transformation strategy continued to perform well, that the annualized net performance through inception was 19.7 percent compared to the benchmark of 16.3 percent.

E. Fund Financial Presentation

MR. KAUZLARICH noted that the financial report began on page 82 of the packet, and it was for the period ending October 31st, 2021. He said that as of November 30th, PERS assets were \$25 billion, TRS assets were \$11.7 billion, JRS assets were \$295.4 million, NGNMRS assets were \$50 million, nonparticipant-directed assets totaled \$34.2 billion and fiscal year-to-date investment income for nonparticipant-directed funds was approximately \$1.5 billion. He said fiscal year-to-date net withdrawals were \$362.2 million and invested assets under internal management were \$17.6 billion.

MR. WORLEY noted that the Division of Retirement and Benefits' supplement report to Treasury's presentation began on page 110. He explained that within Treasury's report there was a column called "Net Contributions/ (Withdrawals)" and that is the net number for DRB's trusts that they administer. He said that they provide the breakdown of the revenues collected as well as the expenditures incurred by each of those trust plans.

TRUSTEE REPORTS & LEGAL REPORTS

A. Chair Report

CHAIR WILLIAMS turned the Chair report over the MR. JOHNSON.

MR. JOHNSON said the decision to not seek further reappointment or nomination was one he took seriously. He said he had thoroughly enjoyed, appreciated and was very proud of his tenure as chair for four years.

MR. JOHNSON said that since the last Board meeting, he had been involved in matters that suggest a tension between what was discussed at committees and what was discussed at the Board. He said that he wanted to remind CHAIR WILLIAMS and the Trustees to be aware of those tensions.

B. Committee Reports

1. Audit Committee

CHAIR HARBO said the Audit Committee heard a presentation from KPMG but would not go into any details as KPMG would be giving the full report themselves. She said MR. WORLEY had given a report on GASB 68/75 PERS and TRS allocation schedules, which were a work in progress and commented that they would most likely discuss them at a special meeting in mid-January.

CHAIR HARBO said that MR. WORLEY introduced MS. TRACI WALTHER, who was the new Accountant V and also the compliance officer for the Division of Retirement and Benefits.

CHAIR HARBO said that MS. HELMICK reported on audits to be completed by the Division, noting that they had audited 165 PERS employers and 58 TRS employers. She said they perform several audits each year but for FY2022 they have only one on-site audit of three employers in Fairbanks, and all other planned audits would be desk audits due to travel restrictions.

CHAIR HARBO said that MR. WORLEY spoke about the yearly financial report which was renamed the Annual Comprehensive Financial Report. She noted that there was a requirement under GASB Statement 98 that after December 15, 2021, all financial reports would have the new title.

CHAIR HARBO said they had a presentation from Maximus, a consulting firm that deals with federal funds allocated to the State of Alaska. She said the program required DRB and Treasury to indicate how federal funds were allocated to state programs.

2. DC Plan Committee

CHAIR WILLIAMS said MR. WORLEY discussed member services fees and the differences in the fees. He said the SBS, PERS DC and TRS DC all had a fee of 11 basis points where Deferred Comp had a fee of 17 basis points, which was 55.4 percent higher. He said a question was asked as to how the fees could be changed and what the impacts would be if they were changed.

CHAIR WILLIAMS said MR. PUCKETT presented a chronology of the brokerage window delays saying that there was a breakdown in the process and communication and issues with regulations. He said there was a desire to implement the portions as soon as they could be implemented, but it would be a recurring item on the agenda on the DC Committee until all employees have access.

CHAIR WILLIAMS said there was a report about educational outreach and Empower gave their update. He noted concerns about fee transparency on the website and making them more obvious so the price on what an option costs or what the fees were would be easy to see. He said that would be a recurring agenda item until that was updated.

CHAIR WILLIAMS said MS. RICCI presented on the DC Health Plan update. She had said that a lot of members were not aware that they had to retire directly into it and be employed the 12 months preceding going into it.

CHAIR WILLIAMS said MR. HANNA and MS. PREBULA had been negotiating with T. Rowe Price on ways to improve the target date funds fees and costs. He said most of the DC members were automatically put into a target date fund or were choosing a target date fund and that a large group of people were affected by it. He said T. Rowe Price gave a strong presentation about two options; one would be improving the quality with a slight reduction to fees and the other would be reducing the fees significantly. The staff was recommending Option 1.

CHAIR WILLIAMS made a motion on behalf of the Defined Contribution Committee who recommends the Alaska Retirement Management Board direct staff to amend the contract with T.

Rowe Price to implement Option No. 1, the TRP BBT plus Active structure.

MR. HANNA explained Option 2 as providing the same suite of options at the lowest cost possible and using a set of T. Rowe commingled funds rather than the separate accounts currently set up for participants. He said T. Rowe had added a lot of value historically through the use of selective active management for some of the asset classes and in terms of progression through the glide path for participants, there were some asset classes not currently offered in the existing target date offerings that have particular utility at various points in the glide path.

MR. HANNA said the recommendation of Option 1 would include a couple of additional asset classes that they thought would be useful and T. Rowe thought were useful for the target date funds, along with selective use of active management. He said the existing options had a small amount of active management and had been able to overcome the fee load and add 7 or 8 basis points of additional value beyond those fees. He said the expectation was that with some additional tools, they would be able to increase that amount of potential outperformance moving forward.

MS. HARBO said she had remembered that about 10 years ago, people in the DC program had been enrolling in more than one of the target date funds and wondered if, through education with Empower, if that had become less of a problem; CHAIR WILLIAMS said it was something they could find out and that he had remembered the same thing. He said that he looked at the target date funds as something that was immovable. He commended MR. HANNA and MS. PREBULA on the negotiation.

A roll call vote was taken, and the motion passed unanimously.

MR. BRETZ asked what the new anticipated date would be for the brokerage window; CHAIR WILLIAMS said there was a legal statutory issue.

MR. HOFMEISTER said overarching all of this was the diminishment clause in the Alaska constitution. He noted that the Alaska Supreme Court takes the diminishment clause in a liberal manner. He said that every lawyer in the Department of Law had looked at it and had concerns because the defined contribution plan replaces retirement income like Social Security. He said if a person decided to use self-directed brokerage account and loses all their money, there were no regulations in place that shows that they waived their ability to make those decisions and there would be diminishment claims in the future and that was what the Department of Law was concerned about, the liability with this option.

MR. HOFMEISTER explained that he was asked by the trustees to look back at SB 141, which was the creation of the Defined Contribution Plan. He noted a conversation between Senator Bunde and Senator Stedman where Senator Bunde asked what would happen if they provided the options through the ARMB and they lose all their money; Senator Stedman said it would be fine because they were going to set up the system where they would have limited options.

MR. HOFMEISTER said with a self-directed brokerage account, the options would be infinite. He said the Empower documents he had seen had a requirement that the people who wanted to get into a

self-directed brokerage account had to check a box that essentially says they have expertise in investment. He found that alarming.

3. Actuarial Committee

MR. HIPPLER noted that the Actuarial Committee meeting focused on the 2021 valuation results. He said an overview of the results indicated gains on asset returns due to outperformance of the market and liability gains on the pension and healthcare side. He said the pension side was due to PRPA and COLA increase variances from the projection, and on the healthcare side, the per capita claims costs were lower than expected. He said that the asset gains and the liability gains contributed to the funding ratios of the plans improving.

MR. HIPPLER said the liability gain involved a discussion of prescription incurred claims cost per member per month and that they were going to look for a more thorough explanation of the prescription claims, costs, and information as to why they spike and decline during certain times.

MR. HIPPLER said the second topic discussed at the meeting was the economic assumptions for the experience study the committee would be engaging in next year. He said the economic assumptions comprise expected nominal returns for various asset classes and projected inflation rates which would result in a real return for assets. He noted that the inflation rate was also important as they calculate the liabilities because it impacted the expected costs on the plans.

4. Operations Committee

MR. JOHNSON said MR. JONES presented an update on preparations of a SWIFT report, which reviews compliance and vulnerabilities on cybersecurity issues. He said the Department of Revenue and Treasury were embarking on a transfer of data to the Azure cloud.

MR. JOHNSON said MS. LEARY spoke of the budget which was in process and that they were searching for a comptroller. He said she also presented the recommendation from the committee to the Board to adopt some amendments to the policy and procedures manual which started on page 118 of the packet. He said the amendments were initiated by a proposal from MR. BRETZ to have a requirement for an annual review of travel costs and such. He said the specific amendment was on page 142 of the packet. He said other amendments dealt with more editorial issues.

MR. JOHNSON advanced what was approved by the committee as a recommendation to the Board to adopt the amendments to the policy and procedures manual as presented in pages 118 through 230 of the Board packet.

MR. JOHNSON advanced the motion on behalf of the committee.

CHAIR WILLIAMS noted that as a motion from the committee, it did not need a second.

A roll call vote was taken, and the motion passed unanimously.

5. Alaska Retiree Health Plan Advisory Board

MR. BRETZ noted that the retirees were seeing the additional preventive care and preauthorization

of prescriptions with a target date of 2022. He said there were a lot of things that had to happen first, and had been happening, such as membership education and documents regarding the changes, training internally and externally for the members. He said telemedicine continued to be higher than prior to 2020. He said it was currently lower than 2020, but members were continuing to utilize that more than in the past.

MR. BRETZ encouraged the use of voluntary long-term care plan, that it was a good value. He said there were currently 12,000 annual claims with expenses totaling \$20 million annually. He said the valuation on it showed that the plan was well funded. He said there had been no change in premiums since its inception in 1987.

MR. BRETZ talked about modernization of the healthcare plan and said the Division was looking at a list of items that included requests by advisors and membership. He said the Medicare Advantage plan continued to be a priority and the holdup had been the development of the network and that they hoped to have more progress on that in the new year.

MS. HARBO asked for clarification as to the long-term plan – that people had to sign up for that at retirement; MR. BRETZ said that was correct.

C. Legal Report

MR. HOFMEISTER noted that there had not been much development in terms of the law in the last few months. He said the RPEA case involving the 2014, 2016, and 2018 amendments and changes to the health plan booklet, was ongoing in the Superior Court in Anchorage, that deadlines had been moved forward in terms of dispositive motions and discovery. He said that the intention was for a trial in late January or early February.

MR. HOFMEISTER commented on the Miller v. Division of Retirement and Benefits case which dealt with the jurisdiction of the Office of Administrative Hearings which makes final decisions that are adverse to the person seeking the decision. He said per the regulations of the Division, only adverse decisions are referred to the OAH. He said Miller had received massage therapy that was paid for under the plan, but there was a realization by a third-party administrator that the billing codes were improper. A dispute ensued over billing codes which went through several layers of appeal with the third-party administrator and then the Division finally got it and decided to pay the claims but provide the appellant a letter telling her that in the future the appropriate billing codes needed to be used if future therapy sessions were going to be paid for under the plan. Miller wanted to appeal to the OAH per part of the statute, but since the Division's position was not an adverse decision, there was no need to send it to the OAH. He said due to procedural errors that occurred the case ended up in the Superior Court who agreed with the Division and affirmed the Division's decision. The case then went before the Supreme Court on November 9th and there should be a decision in 2022.

MR. HOFMEISTER then discussed Graham v. State which involved a PERS member. He said a firefighter won a jury verdict in the Superior Court for breach of contract with his employer. He claimed he should have been promoted sooner and the evidence included the increase in his PERS benefits if he would have been promoted. The jury awarded him \$100,000 in past lost wages and \$450,000 in future lost wages and benefits. The member asked the Division to have the entire

\$550,000 be considered compensation as part of one of his three years and award that to his PERS account. DRB only used the past lost wages of \$100,000.

MR. HOFMEISTER said the decision was upheld by the OAH then went to the Superior Court which affirmed the OAH decision. The member appealed to the Supreme court who affirmed the Superior Court's decision.

MR. HOFMEISTER then discussed *Best v Fairbanks North Star Borough*. He said the issue was related to subrogation. He said there was a question as to whether the plan at the Fairbanks North Star Borough, which is a self-funded plan, was actually an insurance policy under Alaska law. He said the analysis the Supreme Court went through was whether or not a self-funded plan like that of Fairbanks North Star Borough was similar to an insurance policy. The Supreme Court found that the Fairbanks North Star Borough plan was not an insurance policy for two reasons: one, because it was self-funded and two, because it was bargained for.

CHAIR WILLIAMS recessed the meeting from 10:47 a.m. until 10:54 a.m.

PRESENTATIONS

A. KPMG Audit Report

MS. BEEDLE said slide 3 and 4 showed the summary of the required communications. She said they had not yet been able to complete the audit of the National Guard System related to the census information. She noted that there was nothing pending related to PERS, TRS, JRS, DCP, SBS or the ARMB invested assets reports and had issued unmodified audit opinions for those reports. She said that National Guard would receive a qualified opinion similar to last year related to the deferred vested population, the census data, of not being able to be supported.

MS. BEEDLE noted that during their audits they did not identify any significant unusual transactions. She said for financial presentation and disclosure omissions, there were not matters to report. For non-GAAP policies, there were no matters that resulted in a material error in the financial statements. She said they did not find any actual or suspected illegal acts or acts of fraud resulting from the audit, there were no noncompliance or significant difficulties.

MS. BEEDLE noted one uncorrected audit misstatement related to the invested assets report which was the lag of the timing of the valuations that came in. She said that between the time Treasury had closed their books, there was approximately \$79 million of private equity valuations as of June 30 that were reported that did not make it into the financial statements. She said that it was consistent with past years due to the new procedures put in place by Treasury to record as much as they could.

MS. BEEDLE said there was a corrected audit misstatement during the review of the total pension liability for the National Guard System. She said they worked with management and the actuaries and found that the discount rate initially used of 7 percent for the accounting valuation was not properly supported with the asset mix that the National Guard had and that resulted in lowering the discount rate to 5.75 percent which impacted the net contributed assets that National Guard had by \$2.5 million.

MS. BEEDLE said that due to the error, they also looked to internal control deficiencies and the processes that management had in place to identify errors prior to the audit. She said they identified that there was not an adequate process in place to review the discount rate assumption for the National Guard System which resulted in a material weakness due to the size of the error. She noted that management was working with Buck and them to develop a process, so it does not happen in the future.

MS. BEEDLE said for significant accounting policies and practices, they were located in footnote 2 to the financial statements. She said there had been no changes to them over the last year and they are reviewed on an annual basis, and they found no indication that they were inappropriate during the audit.

MS. BEEDLE noted for the significant accounting estimates that they identify the total pension liability which resulted in the net pension liability or assets and the total OPEB liabilities as a significant accounting estimate due to the management judgment that was involved in determining the assumptions used to calculate the liabilities.

MS. BEEDLE noted they reviewed the assumptions, the underlying assumptions, the calculations, and the census data used to calculate them. She noted that they did find for PERS, TRS, and JRS that all of the assumptions were properly supported and reasonable.

MR. JOHNSON asked if they had run into any situations that fall outside the concept of material for the overall review that would be a concern going forward; MS. BEEDLE said they had not. She added that the data analysis they do pulls out outliers and sometimes they do a deeper dive and may expand their sampling.

B. Summary of Preliminary 2021 Valuation Results

MR. KERSHNER noted that their presentation started on page 251 of the Board packet and was the same presentation reviewed in detail at the Actuarial Committee meeting the day before. He said the June 30, 2021 valuation was used as a measurement of the plan's funded status, which compared the invested assets versus the actuarial liabilities. He said they also used the information for the most recent year to evaluate what happened during the year compared to what they expected to happen. Those results would be used to set the contribution rates for FY2024.

MR. KERSHNER said that slide 6 were the highlights of the valuation results for PERS and TRS. He noted that FY2021 was good to the plans from an asset and a liability perspective. He said the market returns were about 30 percent but did not anticipate such returns every year.

MR. KERSHNER said that because they try to minimize contribution volatility, they did not use market value of assets when they set contribution rates, instead they used a smoothed value (actuarial value) that recognized the market gains and losses over a five-year period.

MR. KERSHNER said that on the liability side they had gains for both pension and healthcare. He said pension had the largest source of gain from PRPA liabilities for those benefits. He said the change in the CPI used to generate PRPA benefits was negative, the PRPA benefits that went into

effect July 1, 2021, were zero, where they would have expected those to generate additional benefits based on the inflation assumption of 2.5 percent. That gave rise to the gains.

MR. KERSHNER noted losses on the salary side which was the first year in several that they had a larger than expected salary increases and those generated some partially offsetting losses. He said the pension gains were 1 percent of the liability and 0.6 percent to TRS.

MR. YOUNG said that for the healthcare side, there were gains primarily due to the per capita cost assumption. He explained that the starting point for what the expected cost was during the current year that was used to project future costs. To calculate that they look at the most recent two years of prior experience, weight those equally and project them to the valuation year to come up with the starting point for future costs. He said this year they found the medical portion of benefits were coming in more favorably than projected in the prior valuation. He said claims were lower than expected due to COVID-19 and people avoiding care. He noted that even after including a 4 percent additional load to the claims they use to calculate the average cost, they were still seeing a 4 to 5 percent gain.

MR. YOUNG said the prescription drug claims were close to what was expected and within 1 percent of the projections. He noted the EGWP subsidy estimate was higher than expected with an increase of almost 16 percent from 2021 to 2022.

MR. YOUNG said there was going to be some preventative care benefits added for pre-Medicare members, that will increase costs slightly, but more than offsetting that was the prescription drugs/specialty medication prior authorization program put in place. He said the expectation from Optum was that would reduce costs in 2022 and in future years and would produce a liability gain.

MR. KERSHNER said that with the assets higher than expected and the liabilities lower than expected, that contributed to funded ratios that were higher than anticipated and higher than in the previous year, had resulted in contribution rates that would be less this year compared to last year.

MR. JOHNSON asked if they were to combine the funded ratios of the healthcare and the pension plan, what were the funded ratios for the reporting period of June 30, 2021 for PERS and TRS; MR. KERSHNER said the PERS funded ratio at a year ago was 79.3 percent and had increased to 85.5 percent. He said for TRS, a year ago the combined funded ratio was 86.9 percent, and at 6/30/21 it was 92.5 percent. He noted those funded ratios reflected the smoothed value of assets, not the market value of assets.

C. Audit of State's Actuary

MR. WOOD explained that every four or five years there is an opportunity to load up all the benefits for every single participant in the Alaska plans and conduct a replication valuation, rather than just taking a small sample. He said they had looked at all the plans at June 30, 2020 to get the full valuation. He said the first thing they looked at was the evaluation of the data that was available for the performance of the valuation, the broad data provided to Buck and the steps Buck goes through to get the final data used in the valuation. He said they also looked at the recommended economic and non-economic assumptions used in the valuation. He said when they look at assumptions, they put

themselves in the spot Buck was at when the assumptions were adopted. He said in 2019 when the 2017 experience study was done, they moved from an 8 percent return to a 7.38 percent return and lowered the inflation to 3.12 percent. He said the things they considered were if it was done during a regularly scheduled experience study and was due diligence put into determining the rates. He said another thing they considered was using the assumptions, methodologies, and funding method used by the Primary Actuary in their performance of the valuation of the plans.

MR. WOOD said they also evaluate the valuation results and reconcile any discrepancies between findings, assumptions, methodology, rates, and adjustments of the Primary Actuary. He said they then assess the conclusions of the valuation report for completeness and accuracy, they discuss the peer review audit valuation results with the primary actuary, review the format of the valuation report and offer recommendations and provide a report of the work performed along with any opinions and recommendations for improvement, and present findings to the ARMB.

MR. WOOD explained that it is different from the review they perform every year because the annual review is a test life review, and the replication audit is a more in-depth study. He said they coded up all the benefits and replicated the present value of future benefits, the actuarial accrued liability, and the actuarial determined employer contribution. He said they also looked at the actuarially determined employer contribution.

MR. DETWEILER said they first looked at the valuation. He said as actuaries they do not have to audit the data that is provided, but they are required to review it to make sure it was appropriate, sufficient, consistent, and reasonable for its intended purpose. He said when they performed the annual test lives, they matched up all individual data fields that Buck used compared to the data that was provided from DRB. He said they made sure the averages and the totals of all different data fields were reasonable and consistent and then reviewed the data questions again. He said that was something Buck provided to them and they were seeing some inconsistencies from year to year, some salaries that were drastically changing, changes in service amounts. They made sure Buck was asking the appropriate data questions and doing their due diligence for that process.

MR. DETWEILER said they were very comfortable with everything they saw in all of the accounts and the data questions that Buck had asked. He said they also had to make sure their report had disclosed it all properly and that they say they were scrubbing the data, checking for consistency, reasonableness, and disclosing everything.

MR. DETWEILER moved to slide 7 and noted that as MR. WOOD had stated earlier, all the assumptions they reviewed for the June 30, 2020, valuations were based on the prior experience studies. He said they ensured the experiences studies were performed on a reasonable schedule, every four years. He said the healthcare assumptions were reviewed on an annual basis regarding the net gains and losses on the healthcare side and it was because healthcare was more volatile.

MR. DETWEILER said the inflation rate was 2.5 percent which had been adopted a couple of years ago and was reasonable at that time. He said Buck was recommending 2 percent which could be considered at the bottom range. He noted that the investment return of 7.38 percent was reasonable at the time of the experience study a few years ago and was getting towards the higher end of what

they considered to be reasonable presently.

MR. DETWEILER said individual salary increases were typically tied to recent experience - what was expected to happen in the next few years. The total payroll growth of 2.75 percent was high compared to the experience they had seen, and Buck was recommending that it be lowered for the next experience study. He noted that the model Buck was using for healthcare cost trends was appropriate, that it was what a lot of large state plans used. He said one thing they had brought up previously was the EGWP assumption, that Buck was assuming that the subsidy would continue forever and stay flat. He said they believed that it could decline in the future and subsidies would not be as high as expected. He noted it as a risk associated with the assumption.

MR. WOOD said the risk happens if their payroll doesn't grow at 2.75 percent, and you end up with a percentage of pay that's increasing over time, putting pressure on the calculated rate that the state would have to make. He said Buck's recommendation of moving that down to 2.25 was going to change the pattern of future contributions, but that it helps offset some of that risk that is inherent in a level percent of pay funding situation.

MR. DETWEILER moved on to slide 9 to touch on the demographic assumptions, which showed what the chances are each year that participants would retire, terminate from employment, and death and disability. He said they were comfortable with the assumptions adopted a few years ago and they had not changed. He said the most important demographic assumptions was mortality which was based on the RP-2014 tables published by the Society of Actuaries. He said the Society of Actuaries had since finalized public-sector-specific mortality tables, which broke out several more categories - teacher-specific tables, general-employee-specific tables, and public-safety-specific tables. He said they expected Buck to look at the tables compared to experience going forward to ensure they are appropriate for the ARMB.

MR. DETWEILER said slide 10 was the ARMB Replication Audit results for PERS DB and said the first numbers showed the present value of benefits, which was the complete liability, projected salaries, and service for active members – the total expected benefits to be paid broken out between pension and medical. He said below that was the actuarial accrued liability since the June 30, 2020 valuation date for each member. He said normal cost represented what was expected to be accrued in the next year. He said they subtracted AVA, which were the smoothed assets, to get the unfunded liability and funded ratio. He said the bottom showed the actuarially determined employer contribution which was the FY2023 rate recently adopted. He said Buck's numbers were on the left of the chart and GRS' numbers were on the right. He said the numbers represented how much money was needed in the plan to make sure it was properly funded. He said they were really happy to see the results as close as they were.

MR. DETWEILER explained that actuaries use different systems with slightly different programming which resulted in the numbers not matching up exactly. He said 5 percent or closer is considered a reasonable and comfortable match.

CHAIR WILLIAMS said the numbers were not matching up exactly and asked if it was because they were applying slightly different assumptions or what was causing the differences; MR. WOOD said

there could be minor differences in programming the benefits, or an ancillary benefit that they may have programmed differently, or there could be a different interpretation of the best way to value it. He noted that there could also be some slight differences in the timing of the assumptions.

MR. DETWEILER added differences in the timing of a small rounding in the calculation can change a number as much as a full percent.

MR. WOOD said the TRS DB had a very good match, that overall, the present value of benefits was less than 2 percent and the ultimate contribution rates was within 6 basis points.

MR. JOHNSON said that the previous slide showed PERS with a normal cost at 5.89 percent and TRS was only 1.99 percent. He then asked if that was one where there was more subjectivity in the assessment – were more factors involved that would suggest that kind of range; MR. WOOD said the normal cost could be very contentious. He said when they have decrement timing and they calculate the present value of future salaries, in the very last year, Buck assumes that everyone decrements or leaves the population at the very beginning of the year, but still allows for a full year of salary in that year, which creates a difference between the normal cost that GRS calculates, where they assume that the person did not leave until the middle of the year and only a portion of salary was included, as opposed to leaving immediately and a full year of salary being included.

MR. DETWEILER said the present value of benefits on the medical side, going from PERS to TRS DB had shrunk quite a bit. He said they could tell a very specific group that was causing the 2.83 percent – it was Tier 3 members with between five and 10 years of service and that was one of the test lives they were going to request from Buck to compare to make sure they were comfortable with how Buck was valuing them as compared to GRS.

MR. WOOD stated that for JRS their present value of benefits number was a bit lower than Buck's, but in the ballpark, and indicated that they were getting the right amount of contributions coming into the plan. He said NGNMRS was extremely well funded.

MR. DETWEILER said in summary, the results they would consider to be within a reasonable range. The match on the present value of benefits was within 1 percent, a very close match they considered as being highly successful. He said they believed Buck was taking the assumptions the Board had adopted and the benefits that were expected to be paid based on the statutes and creating liabilities that were appropriate to fund the plans appropriately.

MR. DETWEILER said they were in a unique situation where they were also the review actuary, and they get the present value of benefits per individual and were able to match up the individual present value of benefits person by person to what Buck got. He likened it to having all the participants in a giant football stadium and as they review each year, they select random people from different sections, but it's difficult with that many people to pinpoint where the differences might be. He said that's when they go to Buck and request individual test lives, so they can see why some of the numbers were not at the 100 percent threshold.

MR. DETWEILER said slide 18 showed the evaluation of results of individual present value of

benefits of every person Buck valued. He said the inactives and annuitants were easier to value because they knew exactly what they were being paid or expected to get paid going forward. He said with actives, they were further off.

MR. DETWEILER said they had performed both a test life audit in the past and a full replication audit. He said they believed their results were within a reasonable range of Buck and it was their opinion that the liabilities that Buck were calculating, based on the assumptions adopted and the statutes, that they were providing the Board with an accurate and reasonable contributions that need to go into the plan to ensure it was properly funded.

MR. DETWEILER said they had requested additional test lives from Buck and would be looking at those to try to pinpoint any issues to see if there was something in their report that they were not understanding about how they were valuing people or if it was just a slight difference in opinion about how they should be valued.

MR. JOHNSON asked about the range of reasonableness and if they were at a point where the ranges were so broad that they were not particularly useful; MR. WOOD said the ranges may be broad, but put in an exercise such as this, they know exactly what the assumptions were going to be. He said in terms of apples-to-apples comparison, there was no range, they did exactly what Buck did and were able to replicate it and align the replication. He said Buck's ranges came into play more in the assumption-setting process.

CHAIR WILLIAMS recessed the meeting from 11:50 a.m. until 1:22 p.m.

D. Performance Measurement, 3rd Quarter

MR. ERLENDSON started his presentation on slide 2. He said the upper left showed the real growth in GDP. He said two years ago the range would have been from plus 5 to minus 5 instead of from plus 40 to minus 40. He said they changed it because of the second quarter of 2020 when the real GDP collapsed by 30 percent within two months. He said the third quarter GDP increased 35 percent and is part of what was currently driving inflation.

MR. ERLENDSON noted the upper right panel showed the commodity-based portion of the PPI (producer price index). He said the PPI represented the cost of goods that go into the things people buy and the things people buy was reflected in the CPI (consumer price index) and wages. He said many sellers of goods and services had been restrained from raising their prices and passing through their costs. He said if people try to get in front of higher prices, they would drive prices up.

MR. ERLENDSON moved to slide 5. He noted that the stock market is not the economy but was a part of the economy that people could own. He said there were a lot of things in the private markets that normal people cannot buy, but institutions could. He said the economy seized up in March and April of 2020 when 22 million jobs were lost due to COVID. He said job growth needed to take place because absent the stimulus, people needed to go back to work and much of the recovery of the stock market was because more people had more money than they had before.

MR. ERLENDSON said slide 6 showed the employment landscape and noted that leisure and

hospitality lost the most jobs. He said that recently, people had been retiring and leaving the workforce entirely, that there were 10.4 million job openings at the end of September, 6.5 million people hired for new jobs, but 6.2 million people left, so only a net gain of 300,000 jobs. He said for the year ended September, there were 73 million people who were hired with 68 million who left.

MR. ERLENDSON said that during that time there was a lot of stimulus, both economic and medical support for people, that were no longer available. He said that as the supply of goods and services go up, that would moderate any potential future inflation.

MR. JOHNSON asked if the figures were reflective of different people moving in and moving out of the workforce or could it be five times more action going on than what was being reflected; MR. ERLENDSON said the separations of 6.2 million over the last year included people who had been laid off, decided to quit, take a new job somewhere else as well as people who decided they were done. He said 4.4 million of the 6.2 were people that permanently left the workforce. He said the participation rate of people from the age of 18 into the 60's as a workforce had been trending lower for years. He said some are either going to college or getting new training so they would be considered temporarily out of the workforce, but a number of people that were older had decided to leave permanently.

MR. ERLENDSON moved to slide 8 which showed what the Federal Reserve looked at when they decided to raise rates and when they thought inflation was a problem. He said the chart showed the personal consumption expenditures index that was the measure of inflation that was used by the Federal Reserve. He said there were different types of inflation, that medical inflation was different than housing, food or fuel and there were dozens of measures of inflation. He said part of the reason the Federal Reserve continued to say that they did not see a permanent increase in inflation was because their target, the dotted line on the chart, was at 2 percent. He said that over the last 13 or 14 years, it had rarely touched that level. He said the big spike on the right of the chart was due to supply chain disruptions, and fewer people in the workforce, which meant it was more expensive to buy goods and services. He noted the CPI-U was up 6.2 percent and a large part of that was driven by the composition of the index which was shown on slide 10.

MR. ERLENDSON said the categories shown on slide 10 were used within the measures of inflation calculated by CPI-U. He noted that Food, Housing and Transportation were up. He said the driver for transportation was used and new cars. He said if a person was not buying a car their inflation rate was not 6.2 percent. He said they need to be mindful of what the metrics were actually measuring and why the Federal Reserve denies inflation is permanent. He said at some point, people will stop buying cars and prices would come down or the supply would increase, and the price will come down.

MR. ERLENDSON said the Federal Reserve thought it would take longer for prices to come down which was why they had been supporting the economy by buying \$80 billion in Treasury securities every month for the last year or so, and then another \$40 billion a month in mortgage-backed securities. He said that was almost 8 percent of the GDP. He said they were going to start pulling back by \$10 billion a month fewer in treasuries, and \$5 billion in mortgages. He said one way to beat inflation was to drive up interest rates, that higher interest rates could squeeze inflation down as it would reduce economic activity.

MR. ERLENDSON noted that on slide 11 the categories listed on the left were the ones that drove 70 percent of what was happening in the benchmark, and the standout in the middle was private transportation – cars and gasoline, so as that moderates, inflation should go down.

MR. ERLENDSON then skipped to slide 16 – Callan Periodic Table of Investment Returns, which showed what was going on in the capital markets over various time periods. He said as of December 1st, REITs were up over 15.5 percent and large cap equities in the S&P 500 were up 21.7 Small cap stocks up 12.4 at the end of September and were still positive at about 9.5 percent. He said there were two things that were getting problematic, emerging markets, down over 3 percent year-to-date, part of which was inflationary forces in the markets which were more pronounced because greater portions of their economies were based on expenditures for food, housing and energy and part of it was due to inflation.

MR. ERLENDSON said the index took into account what had happened to returns in that market when it was a U.S. investor out to sell in the local currency. He said the majority of the decline was because of the strengthening dollar. He said other economies were looking at it so there could be a lot of potential inflation-dampening effects of rising rates and as rates start to rise, it would make the U.S. Treasury market less appealing. He said that part of the reason there had been such a great market in the U.S. was because there was a lot of foreign capital that was looking for higher returns and they win in the currency trade because the dollar increases in value, which meant when they sold their dollar assets, they would get more of their own currency units.

CHAIR WILLIAMS said he loved the Callan periodic table and asked if they had one for institutional investors that goes from July 1 to June 30th; MR. CENTER said they could create one.

MR. HIPPLER asked where China was listed on the periodic table; MR. ERLENDSON said it would be in emerging markets.

MR. ERLENDSON noted that China was the third largest economy and that a lot of the emerging markets were dependent on manufacturing raw materials, that commodities had been driven by China as a buyer of commodities as well as finished goods. He said that China was outsourcing to Indonesia and Vietnam, and they had been buying materials back and putting them into their own products to ship elsewhere.

CHAIR WILLIAMS asked it if was accurate that a lot of U.S. domestic companies still had a lot of exposure to China; MR. CENTER said that was true. He said when strategies were marketed as ex-China, what it meant was they did not participate in the Chinese stock market. He noted that it was nearly impossible to fully guard from any exposure to the Chinese market but avoiding direct investment in China was what strategies were targeting. He said it was popular 30 years ago to avoid Japan because the Japanese market was going to crash.

MR. ERLENDSON said it was almost 50 percent of the non-U.S. index and people were saying that they needed to be in Japan but instead of a cap-weighted index, they did a GDP-weighted index.

MR. CENTER said that while they had seen non-U.S., ex-China products come to market, they were not proposing or suggesting them to their client base, they did not believe it made sense as an institutional investor to exclude China from the opportunity set in the non-U.S. equities.

MR. ERLENDSON moved on to slide 26 which showed a chart that showed rolling 10-year returns for a broad universe of public pension funds. He said the gray area was measuring the rolling historical 10-year returns for public pension funds from the 10th percentile to the 90th, capturing the variability. He said the 10-year average return for public pension funds was around 10 percent. He noted that a lot of changes had been made with the program in terms of getting rid of strategies that were not adding value after fees, simplifying the structure, and putting more in the hands of the entities and strategies that would add value and reduce fees.

MR. ERLENDSON said their concerns going forward as a firm were that they believed that inflation was not sustainable where it was, but there were pockets of activity driving the measures and that interest rates would likely go up. He said that the fund had done well, and they did not see anything that was a matter of concern.

MR. CENTER said slides 28, 29 and 30 were performance dashboards that they had inserted as snapshots of the performance for the pension plans. He said the top left chart on slide 28 for PERS, TRS and JRS showed the performance was above median and ahead of the target over all time periods for the pension plans and the top right chart showed the standard deviation, which was below median. He said the maximum drawdown at the bottom left-hand corner compared favorably versus other pension plans, meaning the largest loss over these periods was a lower percentage than what the typical peer pension plan experienced. He said the Sharpe ratio, a measure of risk-adjusted performance, was quite strong and in the top quartile across all time periods.

MR. CENTER said slide 29 was similar for the healthcare plans and slide 30 was for the military plan that had a unique asset allocation with historically higher allocation to fixed income, a lower allocation to alternatives which resulted in less risk.

MR. CENTER said slide 31 showed the new asset allocation targets as approved the beginning of the quarter, stating that asset allocation was in line with targets, slightly overweight to fixed income and slightly underweight to real assets.

MR. CENTER said slide 32 showed the real assets portfolio which was 12 percent of the portfolio as of the end of the quarter and was high relative to other public pension plans. He said the allocation to fixed income was below median but still higher than it had been previously. He noted that the key driver was the allocation to real assets and “other alternatives” which was mostly private equity.

MR. CENTER said slide 35 showed the maximum drawdown period, noting they looked at three-, five- and 10-year periods and all had the same maximum drawdown of 11.9 percent. He moved on to slide 37 saying that it showed the drivers of relative performance over the last quarter and last trailing 12 months. He said the table at the top was for the last quarter and the key drivers of performance were the cumulative performance of the managers that added 82 basis points of performance relative to the target benchmark. He noted other drivers were the private equity portfolio and the fixed income

portfolio. He said they had received additional return figures for the real assets portfolio, and it was higher than what they had included in the preliminary figures and expected the numbers to improve. He said given the team kept asset allocation close to targets, it was not much of a driver of the performance.

MR. ERLENDSON said that they used passive strategies, so the active managers run the rest of the money that contributed to the outperformance. He said they had gone through a big consolidation a while ago and kept the ones they had the confidence in, and the strong performance suggested that was a good plan.

CHAIR WILLIAMS asked if he was suggesting they move the return expectation to 70 percent; MR. ERLENDSON said no; CHAIR WILLIAMS said that it seemed odd to hear that they were still waiting for some things to come in from September 30, that it was like a late reaction; MR. CENTER said they report the private equity numbers on a lag and they do not get revised. He said they also report real assets portfolio on a lag. He said alternative investments take a while to report their performance. He said that as allocation to alternatives grows, the timeliness of the data that was used to create the reports was difficult to gather on a timely basis, so they had elected to report them on a lag.

MR. CENTER said slide 38 showed the PERS long-term total fund performance from inception to September 30, 2021, noting that the plan outperformed the target benchmark for the quarter and overall looked very good since inception.

MR. ERLENDSON commented that the charts show performance compared to peers. He said that over the 30 years, they were down in the third quartile but ahead of the benchmark which suggested that during that time, they were positioned more conservatively than most other funds.

MR. CENTER said that overall, the domestic equity portfolio was a blend of passive strategies and factor driven strategies and that over the past 12 months it did add value. He said slide 42 showed that they were ahead of Russell 3000 benchmark by 25 basis points, that it did lag its indices over longer time periods. He said much was driven by recent performance from factor-driven strategies. He said the bright spot in the public equity portfolio had been small cap shown on slide 47 – up 57 percent, with a 9 percent excess return relative to the index. He said it was a passively invested strategy invested in the S&P 600 index which outperformed Russell 2000 index over the last 12 months and over the long term ahead of its benchmark.

MR. CENTER said global equities on slide 49 were both developed markets and emerging markets and ahead of its benchmark over all time period, about 1.3 percent ahead of the index over the last 12 months, 30 basis points ahead over the last quarter.

MR. CENTER said slide 50 was the cumulative performance of the developed market portfolio which was 40 percent active, 40 percent passive and 20 percent factor-based, adding 3 percent over the last 12 months and outperformed its index for all time periods.

MR. CENTER said emerging markets on slide 52 was a blend of passive and factor-based strategies

and outperformed its index and added 60 basis points relative to the MSCI Emerging Markets index.

MR. CENTER said slide 53 showed two emerging markets portfolios. The factor-based Scientific Beta portfolio that outperformed the MSCI Emerging Markets portfolio by 3 percent.

MR. CENTER said fixed income was on slide 54 noting that it was ahead of its benchmark over all time periods. He said the fixed income aggregate portfolio on slide 55 was down 90 basis points – right in line with the Bloomberg Aggregate index and 70 percent of the fixed income portfolio. He said the remaining 30 percent was divided between opportunistic, fixed income and alternative fixed income, which was private debt.

MR. CENTER said the opportunistic portfolio shown on slide 56 included alternative equity which was the McKinley Healthcare Transformation Fund, the tactical allocation strategies were about 60 percent of the portfolio which was made up of PineBridge and Fidelity which were up 20 percent over the last 12 months. He said the alternative beta program was 20 percent of the opportunistic portfolio and managed by Man Group which was designed to be a liquid substitute for hedge funds, and it was up 4 percent for the last 12 months.

MR. CENTER said slide 59 showed cash flow for the PERS DC Plan which was positive for the quarter. He said the TRS DC Plan on slide 60 showed 65 percent allocated to the asset allocation fund and ended the quarter with \$80 million in assets and cash flow positive. He said the Deferred Comp Plan on page 63 was cash flow negative and had \$1.2 billion in assets as of the end of the quarter with 23 percent of the plan invested in the asset allocation funds and the remainder split between the passive and active options.

MR. JOHNSON asked if the brokerage plan was in place, how would it affect the analysis; MR. CENTER said the charts would have another piece of the pie that would be allocated to self-directed brokerage. He said they don't track the performance of the self-directed brokerage window because the participants invest in eligible mutual funds or ETF and there would be no way for that to be tracked. He said they would track the percentage and dollar value allocated to them. He said that because there were so many options for the participants to invest in, there was no way for them to track the return.

CHAIR WILLIAMS said that there could be some sort of analysis; MR. CENTER said that may be something available from Empower because Callan does not track the individual purchases and sales, it would be something the individual participants would do.

MR. CENTER said that slide 66 and 67 looked at asset allocation options. He said the Target 2010 Trust was designed for participants that were retiring in 2021 and should be a fairly low-risk portfolio. He said it did have a negative return for the quarter and its benchmark was also down 0.2. He said asset allocation funds had all done well and that the more recent vintages as shown on slide 67, had done very well.

MR. CENTER said slide 68 showed passive strategies overall and said the passive funds were all matched with their benchmarks. He said active options on 69 also had no areas of concern. He said

the international equity fund, which was a blend of Brandes, and Baillie Gifford had a slight underperformance of the quarter, but very strong performance over the last three-year periods.

E. Private Equity Annual Plan

MR. HOWARD said slide 2 was a reminder of the primary role of the annual private equity review, which was to report on the status of the ARMB's private equity investments. He said slide 4 showed an overview of private equity investment and why fund sponsors invest in private equity. He said private equity as a whole has had a strong performance relative to public markets in recent years and over longer time periods.

MR. HOWARD said private equity had several unique characteristics. He said they were a larger and more diverse investment, but generally less efficient as companies but provided opportunities for value creation. He said most private equity groups aim to partner with their portfolio companies to create value by making operational and financial improvements and then sell the companies at increased valuations. He said that the main negative characteristics of private equity were illiquidity, fees were high relative to other asset classes, and market data was incomplete.

MR. HOWARD said slide 6 had information on the private equity structure. He said ARMB invested in private equity funds through two advisors, Abbott and Pathway. The investments were made through limited partnerships. He said the bottom diagram showed how private equity funds drawdown structure worked. He said at year zero, the ARMB makes a commitment of capital to a fund, the commitment is then drawn down when the general partner makes underlying portfolio company investments. He said the investment period was typically the first four to six years of the fund's life, the capital is returned as investments are sold. He said slide 7 gave a broad overview of the types of strategies included in private equity.

MR. HOWARD said slide 8 showed private equity, compared to other asset classes, had shown a wide performance dispersion response. He noted upper quartile funds had significantly outperformed lower quartile funds, that the dispersion made manager selection a critical component of implementation of the plan. He said diversification was also an important component. He said the goal was to build a well-diversified portfolio with high-quality partnerships.

MR. HOWARD said the next three market slides showed trends over time to get a sense of growth and health of the private markets. He said slide 9 reflected the amount of money committed to private equity funds by year. He said this year fundraising was on pace to return to the upper trajectory they had seen over the past decade, and they expected to see that trend continue as plans increased the allocations to private equity.

MR. HOWARD said slide 10 showed the number of investments and the amount of money invested in portfolio companies. He said the second half of the year had a strong recovery in deal activity. He moved to slide 11, noting the exit activity showing a staggering amount of capital had been returned to investors.

MR. HIPPLER asked if the past performance of managers have a correlation to future performance;

MR. HOWARD said there was much more so in private equity; MR. HIPPLER then asked when they allocate a certain percentage of assets to private equity, how much additional off-balance-sheet commitments did they have; MR. HOWARD said the current unfunded commitment was about \$1.6 billion. He said not all of that would be called, but what the model was trying to predict was when it was going to be called and predicting when they would receive the cash flows back.

CHAIR WILLIAMS asked was the estimated exit value like projecting out into the future – was it slow to capture; MR. HOWARD said those were the announced but not closed exits.

MR. HOWARD said slide 12 was the ARMB portfolio performance. He said overall the portfolio had performed well in the second quartile with a 13.6 percent IRR, compared to 12.2 for the Cambridge private equity median. He said the private equity policy had an expectation that the private equity portfolio would outperform the public equity blend by 2 percent net of fees. He said the ARMB's 10-year time-weighted return was 18 percent, compared to 11.1 percent for the benchmark blend, an outperformance of 6.9 percent. He noted that the chart showed within the last year, distributions surpassed contributions, which was reflective of the maturity of the program.

MR. HOWARD said slide 13 showed the public market equivalent returns (PMEs). He said a second way of measuring relative performance against public markets was by comparing against the public market equivalent returns. He said it was the best way to measure inception relative to performance. He said over the 10-year period, ARMB's portfolio had a 17.5 percent IRR compared to the PME IRR of 11.3 percent. He said since inception, the portfolio had outperformed the PME by over 5 percent, equivalent to \$3.7 billion of additional fund value.

MR. HOWARD said slide 14 showed the ARMB's private equity cash flows. He said the strong exit activity has ARMB's portfolio on pace to return over \$1 billion to the retirement systems. He said overall the portfolio had been a significant cash generator over the past five years providing net cash inflows of \$429 million.

MR. HOWARD said slide 15 showed the portfolio was well diversified by strategy. He said the targets were 25 percent to venture capital, 45 percent to buyout and 30 percent to special situations. He said staff expected diversification to remain in line with long-term targets. He noted that the ARMB's private equity guidelines had a soft target of no more than 25 percent exposure to a given industry and software had exceeded the guideline for several years and was at 30 percent. He noted that software was viewed as being inherently diversified since it's exposed to the end market that it services rather than a narrow set of risk drivers. He said software had been a tailwind behind the portfolio over recent years, especially through the pandemic, but they did continue to monitor the exposure and, in the future, may recommend an increase to the industry guidelines for software.

MR. HOWARD said slide 17 showed the commitment target for 2020 was \$600 million and during the year \$571 million was committed to 59 investments, \$176 million by Abbott, \$195 million by Pathway, and \$200 million directly. He said the co-investment program that was started in 2016 had made 13 investments totaling \$31 million and delivered strong performance and significant cost savings to the portfolio.

MR. HOWARD said slide 18 showed the pacing model that's purpose was to project forward commitments needed to achieve ARMB's targeted allocation to private equity. He said slide 19 showed the output of the pacing model and the recommendation for forward commitments. He said for 2021, staff was recommending a commitment target for the next year of \$700 million, split equally between Abbott, Pathway, and staff.

MR. HOWARD said private equity played an important role in achieving ARMB's return target, that despite the increase in flow of capital into private equity, they still expected the asset class to deliver a meaningful return premium over public markets. He said as the asset class grows, they would continue to work with Abbott and Pathway to look for opportunities to drive performance and cost improvements. He said staff's recommendation was that the ARMB approve Resolution 2021-12, which adopts the Private Equity Annual Tactical Plan as presented.

MS. HARBO moved to approve Resolution 2021-12. MR. BRETZ seconded the motion.

A roll call vote was taken, and the motion passed unanimously.

CHAIR WILLIAMS recessed the meeting from 2:55 P.m. until 3:07 p.m.

F. Private Equity Manager Review

MR. ROBERTSON said the portfolio had increased 64 percent in the fiscal year, noting the Cambridge private equity index was up 56 percent and the Russell 3000 was up 44 percent. He said slide 2 was a timeline of the portfolio showing the progression of the 23 years the portfolio had been active. He noted the difference in how the IRR benchmarks compared to the return multiple (TVPI), stating the reason for that was the IRRs were very sensitive to what happened earlier in the portfolio's life.

MR. ROBERTSON said that they had been through a series of increases and each time they made an increase, there was a ramp-up period that diminished returns a bit, but they were currently at a 14 percent target. He said looking at the table in the middle of slide 3 that plan increased 26 percent over the fiscal year, up \$7 billion. He said there was a 2 percent increase in the private equity target so between the total plan growth and the target increase, the target increased by \$1.5 billion, or 47 percent.

MR. ROBERTSON referred to slide 4 showing that in a 12-month period in the total private equity line of the chart, the portfolio grew \$1.8 billion or 53 percent over the year.

MR. ROBERTSON said with their model, they've discovered when a plan grows like yours and is at target, the model like to have about 50 percent uncalled relative to the private equity target. The plan is currently at 35 percent, so if you take the next year's \$700 million commitment, it would get back up to 50.

MR. ROBERTSON moved on to slide 5 stating that they were in a virtuous cycle of rising valuations and liquidity noting that any aspect of private equity, such as fundraising, investments, distributions,

credit available had been strong.

MR. ROBERTSON said they had two external managers, Abbot and Pathway. He said the left table showed the position of last year by all key measures, cumulative cash flows and valuation and then where they were at the end of the fiscal year, then they subtract the changes.

MR. ROBERTSON said the distributed to paid in or DPI was 106. He explained they paid in \$6.4 billion, they distributed \$6.8 billion, then divide those two and for every dollar paid in they get \$1.06 back.

MR. ROBERTSON said the RVPI was the residual value or net asset value of the portfolio, noting that comparing what was paid in, they've got 79 cents on the dollar of value that's unrealized in the portfolio and if they add those two together, for every dollar that was put in, they've gotten the dollar back with 85 cents of profit, both realized and unrealized together.

MR. ROBERTSON said the target for the committed column was 6, and they were a little over target, he said paid in was very close to the committed target. He said the during the course of the year, 41 percent was invested of what was started with uncalled. He said if they did not make another dollar, and in the next couple of years they did not make any more commitments, the managers would deploy that in about two years, so they needed to commit the additional \$700 million this year to keep that going.

MR. ROBERTSON said the metrics chart on the right showed the portfolio had distributed almost a billion in cash back to the plan last year, stating that the distributions came from the starting NAV which was \$3.3 billion. He said they got 29.3 percent of the NAV back. He said \$985 million had to be reinvested during the year so \$602 million went back in but they got to keep \$383 million of net distribution.

MR. ROBERTSON said the NAV started at \$3.3 billion, and went up to \$5.1 billion, a 53 percent change over time. He said Abbot and Pathway were very close to that, Abbott was at 68 percent increase and Pathway had a 62 percent increase, and that showed a very good quality of earnings.

MR. ROBERTSON said bullet point 9 showed the IRR was 13.6 percent which was above the median of 50. He said the TVPI in bullet point 10 was 1.85, putting them at a 36th percentile.

MR. ROBERTSON moved to slide 6 showing the gross distributions for FY2021 as 909,784, the previous highest year of gross distributions was in 2018 and it was not quite 600 for a 52 percent increase. He said the net distributions were at 405,376, and the previous high was 202, so it almost doubled any prior year. He said the previous high NAV increase was 408,795 in 2017, but the current year was up to \$1.7 billion with a 300 percent increase over any other NAV increase. He added that the total appreciation number, which was the net cash distributions plus the NAV increase was effectively a 64 percent rate of return for the portfolio.

MR. ROBERTSON said the bottom table showed changes from previous highs. He said gross distributions were higher on a percentage basis in 2007, but the plan recycled almost all as paid-in

capital.

MR. ROBERTSON said slide 7 showed the diversification. He said there was a fair amount of venture capital mostly coming from Abbot, and overall, the combined tech and software was 41 percent. He said the tech sector was driving a lot of the large gains and the international and geographic diversification reflected the opportunity set.

MR. ROBERTSON said that Abbot was changing their president, Jonathan Roth who would be retiring at the end of 2022 and Len Pangburn had been nominated to be the new president by the managing directors. He said they had discussed this with Abbot and were very comfortable with the change.

MR. ROBERTSON said that the total portfolio and both Abbott and Pathway were spot on as far as the paid in relative to uncalled for the year. He said all three were exactly 41 percent. He said their gross distribution yields were 31 percent and their net distributions were a little better. He said the total portfolio was 11 percent. He said the NAV increases were 55 percent and the portfolio was 53 percent. He said Abbot was looking like 68 percent and the total portfolio was 64 percent.

MR. ROBERTSON said looking at bullet 10 on slide 9 showed Abbott's IRR was 12, placing them at the 50th percentile, and slightly below the median by about 10 basis points, 12.2 percent. He said bullet 11 showed their TVPI multiple was at the 36th percentile versus the median of 1.53 and an upper of 2.12.

MR. ROBERTSON said slide 12 reflected diversification, where most of the venture capital appreciation was. He said it was NAV-based with lots of unrealized appreciation.

MR. ROBERTSON said slide 14 for Pathway was similar to the Abbott discussion. He said the paid-in rate off of the uncalled was 41 percent. He said the key metrics showed the total portfolio at 29 for both, with a net cash yield close to 13, the total portfolio was 11, but a little less of a NAV increase. He said they were at 50 versus 53 for the total portfolio and they ended up at 62 versus 64 for the total portfolio.

MR. ROBERTSON said the benchmarking showed the IRR was at the 44th percentile, above the median. He said the vintage chart on slide 15 showed a steady performance with three first quartile years very strong, 15 years for the second quartile with nothing below median years.

MR. ROBERTSON said slide 16 showed the strategy benchmarking. He said slide 17 showed more of a buyout orientation. He said software and technology combined was the biggest total tech exposure, that Abbot was at 40.

MR. ROBERTSON moved on to slide 18 which showed the Treasury portfolio. He said it had been going for about 14 calendar years, invested in 12 vintage years. He said committed changes were less than 200 and paid-in was 28 percent. He said in the last five years, over 51 percent of the capital commitments had been made and had not been paid in yet. He said the amount paid in versus committed was 64 percent. He said in the total portfolio, the other two managers were over 80 percent.

MR. ROBERTSON said the portfolio had gross distributions of 27 percent, slightly less than the total portfolio's 29 percent. He said the NAV increase was 56 percent with an overall uplift of 61 percent versus 64 percent for the total portfolio. He said they had the largest NAV increase, noting that the largest from Pathway or Abbott was 56 percent. He said they also had the largest TVPI gain, up 32 percent.

MR. ROBERTSON moved to bullet point 11 stating that the goal was to gradually increase the number of partnership investments within a vintage year to five or more. He said from a benchmark standpoint, the portfolio was above median IRR, 48th percentile, and the TVPI was 44th percentile.

CHAIR WILLIAMS said the total portfolio appreciation was \$349 million, 61 percent, up from 4 million, 1 percent last year and asked if it was because it was at different spots on the J-curve; MR. ROBERTSON said that as he had mentioned, it was a young portfolio and the shifts in cash flows were very dynamic from year to year and to keep in mind that the total portfolio was only up 10 percent last year.

MR. ROBERTSON moved to slide 19 showing the Cambridge Vintage Year Peer Group Benchmark. He said there were two years below median. He noted that they had a bit more volatility in the historical portfolio and he expected that to smooth out. He said in 2014 there were only two funds and one of them was a distressed-related fund in the middle of a bull market, the opportunity set did not really develop. He said in 2015 there was an energy fund in that time frame, but the majority of it was due to large senior debt credit fund that was placed in there.

MR. ROBERTSON moved to slide 20 commenting that it was all second quartile and he had broken out the percentage that added up to 72 percent. He said there were a lot of different kinds of return drivers helping it along. He said they had very good diversification – software technology driving the good returns and write-ups, and the opportunity set was going to be a little more domestic for the portfolio.

MR. ROBERTSON then moved to slide 22, the summary. He said the portfolio was mature, it had a very good performance and a strong cash flow. He said overall they were at the 36th percentile, they had very high-quality general partners across the board. He said they were very well-positioned for the future with a lot of depth spread across different industries and geographies. He said it was a unique period of time where valuations were at the end of a business cycle, but given pent-up demand, cash in people's hands and all the large stimulus projects, it was like they were at the beginning of a business cycle in an economic regard.

G. Cybersecurity

MR. WOOD noted that they put the highest level of importance upon data security and started his presentation on the policies that they had in place – disaster incidents, training, monitoring and access controls.

MR. WOOD said that that when they talk about assets and data, they think of infrastructure assets,

and they divide assets into different classes. Class 1 assets – their policies are defined by assets that contain confidential participant data and class 2 assets do not have confidential client data. He said they also had standards and procedures they go through when assets reach their end of life. He said they also have types with their change management – type A changes would be something that would be a routine change, such as Microsoft releasing patches. Type B would be nonroutine service such as a switch that failed in their Chicago office that had to be fixed. He said they took an assessment of the hardware across the firm and took a proactive stance and changed the switch in the Denver office.

MR. WOOD said that they have a matrix that lays out the risks such as a data security breach to a piece of paper with a social security number on it left on a desk. He said they try to think of every instance that could lead to problems in the future.

MR. WOOD said that in terms of configuration standards, that applied to how they configure their workstations. He said they have PCs in their office and also have access to virtual machines, so if they cannot access a PC, they still have access to the virtual files.

MR. WOOD said the main goal of their disaster recovery was to support the continuation for services for their clients and to ensure they have an organized approach to address any issues that may come up. He said they maintain a business resumption plan that would support continuation of services to GRS clients and provide for an organized approach to addressing and managing a security incident, natural disaster, or infrastructure failure. He noted that when the pandemic hit and things shut down, they focused on how to continue to provide services to their clients, they followed their plan to a “T”, and it worked. Their plan allowed for them to be successful during a trying period.

MR. WOOD said they had a disaster recovery plan for all infrastructure, so if something happened to the infrastructure necessary to a server, or a breach of data they had a set standard on how to deal with those issues. He said their headquarters in Michigan and their office in Florida both serve as a redundant backup for each other. He said they also have two colocation sites that are secured 24/7 with generator backups and employees working remotely run backups as well.

MR. WOOD said that every one of their employees, during the onboarding process were trained in several security policies which is a condition of employment. He said they also have to attend training each year on the GRS consulting policies and information security policies. He said they have online data security training, HIPAA training, employee acknowledgments, and ad hoc training as needed where they will discuss an issue and figure out the best way forward and how to keep it from happening again.

MR. WOOD said they have third-party monitoring by a security operations center (SOC) that provides vulnerability management. He said they monitor their systems on a 24/7 basis and if they discover any sort of issue, they are immediately notified of it and the issue would be dealt with immediately.

MR. WOOD said they also perform a third-party network penetration test and a social engineering assessment to see if outside people can get into their network. He said they had been testing them for years with phishing attempts. He said if someone does click on a phishing link, that person would

then get additional counselling and training. MR. WOOD said they have firewalls and antivirus software that is monitored by a third party and notifies them if there is any sort of event or equipment failure.

MR. WOOD said they have access controls such as strong passwords, auto locking of personal computers based on user activity. He said individual computers do not contain confidential data, and all their network equipment was physically secured as well through standard controls and permissions.

MR. WOOD said they hired a firm for a SOC 2 Type II report, entitled “Suitability of the Design and Operating Effectiveness of Controls Relevant to Security Availability, and Confidentiality. He said they had received their third annual SOC 2 Type II report and it reported zero deficiencies.

MR. WOOD said their client portal is set up with everything being encrypted using SSL certificates and very strong passwords with a minimum of 15 characters and access is limited to U.S. and Canada only. He said if anyone outside those two countries tried to access the site, GRS would immediately be notified and locked down so they would not have any breaches.

MR. WOOD said their client portal GRS Advantage contained GRS publications like news scans where a research group scans all the news articles that pertain to the public sector and aggregates them into a single publication. He said that their research articles could be found under Insights and Perspectives. He also noted they added a benchmarking software, GRS Trend Line, so if someone wanted to look up what the average inflation rate was across the public sector, the information would be there.

CHAIR WILLIAMS asked if that was something that was available to the Trustees; MR. WOOD said they could set that up.

MR. WOOD said that every GRS team member had the ability to work remotely which allowed for uninterrupted service to clients. He said the ability to work remotely had been in place for several years and transition to full remote work through the pandemic was seamless. He said they have security protocols set up such as two-factor authentication and VPN’s through either a virtual machine or remote desktop directly to a PC at the office.

MR. KROHN asked if the server locations were also used by other people putting their servers in the buildings; MR. WOOD said he thought that was the case; MR. KROHN asked if the people who build the servers were employees or contractors; MR. WOOD said they were employees of GRS; MR. KROHN asked if there was a separate security system on the outside perimeter of the cage that the servers were in, outside the building that the servers were secured in; MR. WOOD said that he would find out.

MR. JOHNSON asked what the percentage of overhead costs was attributed to the IT side for security issues and what did he think the percentage component of a bid for services of IT cybersecurity protection was attributed to that; MR. WOOD said he was not sure, but the SOC audits were not cheap. He added that he has noticed an extreme focus on policies and insurance in a lot of the bids

they had been responding to.

H. Executive Session

CHAIR WILLIAMS said there was a request to go into Executive Session and asked for a motion to go into Executive Session to consider the matter related to a specific manager. He said the request for the Executive Session included all Trustees, IAC members, MR. ERLENDSON, MR. CENTER, MR. HANNA, MS. LEARY, MS. PREBULA, MR. MOON, MR. KAUZLARICH, MR. HOFFMEISTER, MR. JONES, and MS. JONES. CHAIR WILLIAMS then asked if there was anyone opposed. With no response, he said that after the break, they would go into Executive Session, and this would be the close of the public portion of the meeting. The public session would resume at 9:00am tomorrow morning.

CHAIR WILLIAMS recessed the public portion of the meeting at 4:32 p.m.

Friday, December 3, 2021

CALL BACK TO ORDER

CHAIR WILLIAMS reconvened the meeting at 9:00 a.m. He said that the Executive Session concluded at 5:02 p.m. and no action was taken.

I. J.P. Morgan Market Insights

MR. HANNA invited DAVID LEOVITZ and JEFF SHIELDS with J.P. Morgan to present highlights from their Guide to the Markets.

MR. LEOVITZ shared slide 3 which was their PMI heat map which takes into account both manufacturing and services and where green meant good and red meant not so good. He said with headlines around Omicron and concerns about another round of the virus, there have been concerns where to go from here. He said that no one knows how effective vaccines would be and how virulent the virus actually was. He said they would learn that in the coming weeks and that would help to broaden the direction of travel for the global economy. He said the underlying fundamentals of the global economy were solid and that any pause caused by the virus would be just that, a pause rather than a broader pullback. He said the reason for that was the consumers' financial position remained very solid. He said that manufacturing activity which was low would continue to grow as supply chain issues were sorted out. He said the third thing was business investment, he believed that business investment spending would continue to grow in 2022.

MR. LEOVITZ commented on inflation. He said that the fed had finally admitted that inflation was not as transitory as they once thought. He said he thought they would go through a period that was stickier than expected, but not similar to the 1970's which was characterized by structurally higher inflation. He said that inflation was being driven by the parts of the economy that were hit the hardest during the pandemic, like hotel room prices, air fares, car prices. He said they don't believe that inflation was going to be a long-run problem because of forces they view that have weighted on inflation over the past 35 years remain in place, such as globalization, technological adoption, income inequality and demographics. He said as long as those forces remain in play, they believed it would

be difficult for inflation to accelerate over the course of the longer term.

MR. LEBOVITZ said the things to watch when it came to gauging inflation was home prices in the U.S. and how the prices were on fire, that homes were not on the market long and were sold at well above asking price. He said housing tends to show up in the official inflation statistics with a bit of a lag. He said the next issue was the supply chains, that delivery times continued to sit near an all-time high which has corresponded with a substantial increase in input prices, and raw material costs. He said that companies were passing along higher costs to the end consumer in the form of higher wages and higher transportation costs.

MR. LEBOVITZ moved to slide 6. He said payroll growth was disappointing, that unemployment rate fell to 4.25 percent and wage growth had accelerated to its fastest since the early 1980's. He said the thing that was impeding the labor market supply was that people were not being forced to go back to work, that they were still sitting on elevated cash balances, so until they run out of cash, they will stay on the sidelines. He said skill mismatch was a problem, 80 percent of the jobs in the U.S. labor market were in services and 20 percent were in manufacturing. He said you can't put a bartender in an assembly line job. He said childcare was also an issue.

MR. LEBOVITZ said the Fed interest rate forecast on slide 7 was a bit too friendly, that the idea that headline PCE was at 2.2 percent by the end of next year was a stretch. He thought it would be closer to 2.5 or 3 percent. He said they thought inflation would come back down closer to 2 percent by the end of 2022. He said chairman Powell announced that inflation was not transitory and would taper faster by the end of the year and conclude sometime around the middle of next year. MR. LEBOVITZ said they would find it difficult to raise rates if that happened. He said he believed that the feds would be able to hike the rate by late 2022 or early 2023 but the idea that they finish tapering and then immediately hike the rates – he did not think they would move that quickly.

MR. LEBOVITZ said they thought the short end would remain anchored but believed that as global growth improved it would allow the long end of the curve to drift higher. He said a key element to the curve was the continued rise in vaccination rates and broad immunity to the pandemic. He said as long as there was a large population globally who were not vaccinated, there would be more mutations of the virus. He said they believe that over time we would move past the virus, but the reality was that it would continue to evolve and continue to mutate as long as it had hosts to infect with no immunity or vaccination against the virus. He said they were looking at higher long rates next year -- 2.25 on the 10-year by the end of 2022 was a reasonable assumption.

MR. LEBOVITZ moved to slide 10. He explained the position of the diamonds relative to the X axis represented the correlation of each of the sectors to the S&P 500 and the position of the diamonds relative to the Y axis represented the average yield over the past 12 months.

MR. LEBOVITZ said when it came to navigating the traditional bond market, if it's about having a core allocation, they think moving away from U.S. Treasuries makes sense and they see opportunities to invest in things like investment grade corporates. He said they were comfortable going into high yield and EM debt, but they want to maintain a higher quality bias. He said he did not believe in silver bullets, but if there was a silver bullet from an income generation perspective, it would be core

real assets. He said the green diamonds in the center of the chart were real estate, infrastructure, and transportation on the top left. He said core real assets were for clients who want something like a high yield bond but don't want to take on that amount of equity risk.

MR. LEBOVITZ moved to slide 11 and said the chart on the left-hand side showed that cap rate spreads remained above their long-run average, that some of it had to do with the level of Treasury yields but core real estate looked cheap. He said the chart on the right showed that not all sectors had been created equal in the wake of COVID. He said in terms of sectors, the industrial sector had continued to plumb new lows from a vacancy rate perspective, multi-family housing had gone full circle, office space shot higher, and retail moved higher as well but appeared to be turning around.

MR. JOHNSON asked if there was a wave of long lease terminations coming for office spaces as leases expire; MR. LEBOVITZ said that there were lease terms coming up for expiration, but they did not see it as a repeat of what was seen during the financial crisis. He said the office was not going away, but the nature of office needs has changed. He thought that offices were going to transition into a place where people go to collaborate. He said there was a tremendous amount of new business formation during the pandemic and those new businesses would need homes.

MR. LEBOVITZ said that the nature of offices was changing as well as the nature of retail and those changes lent themselves to more opportunistic value-added approach to real estate investing.

MR. LEBOVITZ moved on to slide 12 saying that infrastructure had long been the darling of the European institutional investment community and was gaining traction in the U.S. He noted the chart on the right showed household utility spending, that households in the U.S had 2.5 percent of their total spending going to utility bills. He said those were usually the last bills that stop being paid when you fall on hard times and that the pandemic confirmed that.

MR. LEBOVITZ moved on to slide 13 and explained that transportation was a big focus for J.P. Morgan and their clients, especially shipping. He said he thought about the orderbook as a share of the total fleet, that it was back down below 10 percent after being north of 50 percent in 2008 and 2009. He said transportation was one of the few asset classes that had benefited from the pandemic and everything that had gone on from a supply chain and a shipping perspective. He said the ships were getting older and in need of replacing which was representative of a fairly significant investment opportunity going forward.

MR. LEBOVITZ moved on to the next slide regarding private credit. He said that there was a lot of cov-lite issuance, and EBITDA adjustments – very borrower-friendly behavior. He said he saw a chart the other day that looked at the share of cov-lite issuance for middle market direct lenders versus broadly syndicated leveraged loans and the spread between the two was 80 percent points – 7 percent of middle market direct lending was cov-lite and 90 percent of broadly syndicated leveraged loans are cov-lite. He said the quality of loans had improved since late 2019, early 2020 and that during periods of market stress, private credit, and direct lending, performed more like investment grade as opposed to high yield or leveraged loans.

MR. LEBOVITZ said the next slide showed the equity side. He said earnings growth had been

spectacular, that they had accounted for all the return seen as multiples, have actually declined year-to-date. He said they estimate, for calendar year 2021, S&P 500 earnings per share would grow by close to 70 percent for the year as a whole. He said that two-thirds of the earnings growth seen this year was driven by margin expansion.

MR. LEOVITZ moved to slide 17. He said he believed capital spending would accelerate and be focused on things such as automation. At some point companies would get rid of some of their employees and put an iPad in their place. He said that there would be increased focus on productivity, efficiency, and automation and in conjunction with pass-through of higher input costs, that would allow companies to defend their margins.

MR. LEOVITZ said that for the portfolios, they want to own the part of the market where earnings could do all the heavy lifting, those sectors and industries that have earning streams that were most sensitive to the underlying pace of economic growth. He said what the chart showed was the correlation of each sector's earnings to the pace of real GDP. He said the five most sensitive sectors were a blend of value and growth, such as industrials and financials, traditional value sectors, then there was tech, healthcare and communication services, traditional growth sectors. He said it was not about value or growth, but value and growth.

MR. LEOVITZ said he believed that private equity should be a structural allocation in portfolios because it provided different underlying exposures when compared to the public markets. A greater orientation towards technology and healthcare. He said to help clients achieve their long-run return goals, they thought that allocating growthier parts of the capital markets has transitioned from being optional to being essential. He said he thought there would be an emerging opportunity in some of the more cyclical parts of the private markets going forward.

MR. LEOVITZ said that the U.S. was a net borrower of dollars from the rest of the world and that had actually gotten worse during the pandemic. He said he believed that next year would be more about global growth, that they would see emerging markets come online and more synchronized global growth environment and that the dollar could trend lower over the course of 2022.

MR. LEOVITZ said the next chart on slide 21 was international equities, he said he thought there was a structural opportunity in places like the emerging markets. He said one of the things he liked to tell clients was when it came to the United States, we like the idea of owning growth and renting value and when we think about international markets, we like the idea of owning the United States but renting markets like Europe and Japan, he said he believed that from a tactical perspective they could do well in 2022.

MR. LEOVITZ moved to the chart on slide 23, he said the red dots represented the peak-to-trough decline for the S&P 500 each year back to 1980 and the gray bars were the full calendar year return. He said the peak-to-trough decline in 2021 had been 5 percent or a third of the average drawdown that had been seen over the course of the past four decades. He said the volatility had come back and that was normal, the environment seen for the better part of 2021 was not normal. He said they thought the volatility could persist but that the markets were resilient, that 75 percent of the time since 1980, despite falling by more than 14 percent during the course of the year, the S&P 500 had gone on

to finish the year in positive territory.

MR. LEOVITZ moved to slide 24 and said the most intelligent thing he's heard anyone say about crypto was that if you're going to own it, you need to be prepared for the price to go to zero. He said it was not clear what the role of crypto plays in a portfolio and it was incredibly difficult to size given allocation. He said Bitcoin was only worth what somebody was willing to pay for it, so he had no idea what the expected return for that asset should be. He said the correlations were very unstable over time, that sometimes it acts like risk assets and sometimes it acts like more defensive assets and that made forecasting to correlation or covariance effectively next to impossible. He said the volatility of Bitcoin was multiple times that of the S&P 500, very unstable. He said that even if they were to use historical data to size the allocation, they would end up with wildly different recommended allocations, depending on the look-back window used.

MR. ERLANDSON asked if they could give a sense of J.P. Morgan's view about the use of artificial intelligence when it came to investment management of institutional money; MR. LEOVITZ said that there were things that could be automated and things that cannot. He said he's skeptical of the robo advisor phenomenon. He said that most individuals want a one-on-one conversation. He said a human element is extremely important. He said when it came to underlying technicals of money management, they had success automating things such as trading treasuries. He said they found that it was possible to do it in a relatively frictionless way with a higher degree of accuracy than a human trader could do. He said he did not think that computers would be able to make portfolio management decisions or discuss the strategies and help people think about the way that they fit to portfolios, but he did see room for continued growth in terms of automation and technology in the investment management space.

MR. SHIELDS said that they were predicting they would get back to the historical million people visits per day and most likely would break through that number. He said they were now one of the largest Fintech businesses in the world and were balancing the act every day using new technologies but also remaining true to the person-to-person discussions that are still important to consumers.

MR. HIPPLER referred to slide 10 and asked how would they reduce volatility to offset the volatility in equities and other assets, given that the interest rate or the yield of those assets was so low. MR. LEOVITZ said he thought of treasuries as a hedge rather than an investment at this point, that in order to maintain some defense in one's portfolio, we see opportunity in things like scrutinized paper. He said one could pick up a little bit of incremental yield without adding significantly to your overall duration or your portfolio's overall duration,

J. Private Equity/Growth Equity: Introduction to Summit Partners

MR. SCHILLER said that he was the Chief Investor Relations Officer at Summit. He introduced MR. CHUNG, the Chief Executive Officer of Summit and said he would be presenting.

MR. CHUNG gave a brief overview of the firm through slides and explained that it was started in 1984 with a foundational belief in profitable growth as the most reliable source of superior risk-adjusted returns through market and economic cycles. He said since inception they had a 32 percent

net IRR to investors over 38 years and a 2.4 times cumulative multiple money on their mature funds. He said that track record had allowed them to develop deep sector expertise in their three key industry sectors – technology, healthcare and growth products and services which included business services, financial technology, financial services, and high-growth consumer.

MR. CHUNG said another of their competitive advantages was their ability to create proprietary investment ideas. He said they were known as a pioneer and innovator in the direct sourcing of investments which meant they do not rely on investment bankers or other intermediaries to bring them investment ideas.

MR. CHUNG said they had the ability to improve the performance of their companies and enhance the value of those investments. They achieved that through their platform of four teams, which were built to serve the needs of growth companies. He said profitable growth was the driver of their returns and everything they do as an organization was focused on that belief on behalf of their investors.

MR. CHUNG explained that growth equity was an investment category that sits between early-stage venture capital and traditional private equity or leveraged buyouts. He said when they find companies, they look to protect their investors capital by investing in a senior equity security and exercising governance rights through a board seat. They take control and minority positions, but when they buy control, they are prudent in the use of leverage to finance those transactions. He said that process is made more intelligent and automated through their technology platform called Alpha5. He explained that it was a cloud-based, 21st century enterprise software platform that they built and maintained with their staff of software developers used only for their purposes.

MR. CHUNG said they look for profitable, category-leading companies with strong teams and when they find those companies, they are in a privileged position to create investment opportunities, which they structure carefully using senior equity securities and controlled leverage.

MR. CHUNG explained that they work actively to enhance the value of those companies through their value enhancement platform and as they see the opportunity to realized gains, they do so on a regular and disciplined basis. He said that almost 90 percent of the companies they invested in were profitable at the time of their initial investment. He said they were a lead investor in 93 percent of the investments and serve on the board of almost every company they invest in. He said that in terms of capital preservation, almost 80 percent of the investments that they've made from their funds were structured with a preferred equity instrument. He said that had allowed them to protect their investors' capital even in situations where the investments do not perform as planned.

MR. CHUNG said that 45 percent of the deals in their recent funds had no leverage at the time of their initial investment and noted the average senior leverage ration was just over three times trailing EBITDA.

MR. CHUNG said their teams were designed to support the needs of growth companies and they believed those resources were integral to their investment and value enhancement processes. He said they had an in-house operations team, an in-house talent and recruiting team, they recently built a technology and data science team and an in-house capital markets team which executes capital markets transactions on a turnkey basis for their portfolio companies.

MR. CHUNG noted that they had recently hired subject matter experts in fields like digital marketing, revenue optimization, and data science who were all involved in their due diligence process all the way through the life cycle of their investments.

MR. CHUNG explained that slide 9 showed the global investment team totaling 44 people, with 13 managing directors in the growth equity fund, averaging 17 years with Summit, a very stable and tenured partnership.

MR. ERLERSON asked what their view was of private equity – was it a fool’s errand or stroke of genius for DC pension plans; MR. CHUNG said there had been such a heightened level of interest in private equity. He said that was something they did not control. He said if they do their jobs well and put together a highly curated portfolio of category-leading, profitable companies, they would deliver on their promise to their investors to do their best to create superior risk-adjusted returns.

MR. HOWARD asked if they could talk about how their process had changed with the growth of capital in private equity and how that affected their sourcing; MR. CHUNG said that the influx of capital into their asset class was not a new thing, that it happened in the late 90’s and in the mid 2000’s and was happening today as well. He said one of the ways they’ve had to adjust their process was to become more agile, so they operate a 24/7 investment committee operation. He said that allowed them to assemble deal-by-deal investment committees that were gathering the best minds in the firm around each investment opportunity. He said ten years ago they adjusted their sourcing model and moved to thematic idea generation and the Alpha5 technology platform. He said today, their sourcing idea generation was as or more productive than it had ever been. He stated 95 percent of investments made in 2021 were sourced directly by a Summit professional. He said they’ve found that the innovations and investments made in their sourcing and idea generation were serving them well in terms of creating truly differentiated idea generation.

MR. JOHNSON asked what controls they would have as a public pension board with respect to investments in private equity firms where at least the ideas being generated going forward would be similar to what their proxy policies might be on the public side – was there any measure of control that they could expect to have; MR. CHUNG said the typical avenue for those types of controls were through side letter agreements as part of the subscription documents in each fund. He said the other control would be to conduct due diligence on Summit and for them to be transparent about the categories that they were targeting.

CHAIR WILLIAMS asked how they decide when to apply leverage or not, what were the determining factors, and being the lead investor, having board representation, was that something that has wide open opportunities or did they have to hunt to find them; MR. CHUNG said that as far as board representation was concerned, it typically was not an issue, more often than not, they were being invited into the companies.

MR. CHUNG said the if the business was an attractive candidate but was not growing organically fast enough to produce the return, they may use leverage to enhance the return from the equity, or they may use the leverage to finance acquisitions to provide the extra layer of growth to get to the

target returns.

MR. HANNA asked MR. CHUNG to take them through the lifecycle of one of their investments – starting with idea generation, sourcing, and value creation, and ultimately exit. MR. CHUNG shared several examples with the group.

CHAIR WILLIAMS recessed the meeting from 10:43 a.m. until 10:55 a.m.

K. Private Equity/Buyout: Introduction to Genstar

MR. SALEWSKI explained that Genstar was founded in 1988 and was based in San Francisco, it started out as a holding company in the 1970's and 1980's that focused on the building material space. he said that company sold, and the co-CEO's kept the name and launched one of the early West Coast private equity funds and firms.

MR. SALEWSKI said they were a middle-market-focused private equity firm and defined that as companies with \$50 million to \$100 million of cash flow, of EBITDA, where they can write checks from \$200 to over a billion dollars of equity. He said they look for strong businesses where they think they can upgrade the management teams and support them. He said they feel that if they have a great company with an outstanding management team, they could drive scale through new go-to-market sales strategies and through acquisitions. He said they double or even triple the size of the companies they invest in over a three-to-five-year period and those companies go on to bigger and better things after their ownership.

MR. SALEWSKI said they focus on four sectors - financial services, software, industrials, and healthcare. He said that the multisector approach was important because there were different times in a cycle where they want to be overweighted or under weighted in sectors and that gives them the flexibility to do that. He said they also partner with about 30 former C-level executives and CEO's who sit alongside of them to help identify companies – they sit on the board, and they introduce them to executives. He noted that they are a control investor which allowed them to be the majority shareholder so they could move quickly and drive the changes they identify. He said they've had a strong consistent profile of returns; six out of their seven funds were in the top quartile, and they had been rated one of the top three fund complexes in the world by HEC-Dow Jones measurements on an annual basis. He said they were a very focused firm, they do one private equity fund at a time, one buyout fund at a time. He said they were 100 percent owned by active partners in the firm.

MR. SALEWSKI moved to slide 3 which showed the five partners of the firm. He said slide 4 showed the entire investment team.

MR. SALEWSKI moved to slide 5 that showed the strategic advisory board and explained that they were the 30-former c-level executive and CEO's he mentioned previously. He said they had been with the firm anywhere from eight to 10 years and they were on two to four companies. He said they were a key part of their value creation model as they introduce them to executives and help develop themes, they sit on boards and were a great interface between the management teams on the board and the financial investors.

MR. SALEWSKI explained their investment model located on slide 7.. He said they start with a thesis within their four main sectors, they identify all the companies they think would be interesting and track them over a long period of time. Then they engage with those leadership teams and ask them if Genstar came in, what would they do differently, would they hire more salespeople, would they execute on more acquisitions, would they change their board and what types of activities would they have on their wish list to help accelerate growth; He said they find that there would be more value that they believe they could create with the infusion of Genstar and the expertise and talent that they bring. He then explained a few of the companies they bought, such as Mercer Advisors, a wealth management platform with \$40 billion of assets that started out with only \$4 billion of assets. He said Cetera was an independent broker/dealer which focused on serving wealth managers that doubled in size over the last three years since they owned it.

MR. SALEWSKI said that despite their growth in fund size and small growth in terms of firm size, they had been able to continue to deliver repeated strong performance with a very simple model that all came down to execution and the people who execute on it.

MR. HOWARD asked if he would take them through an example of the different verticals for a couple of the investments in sourcing all the way through to exit; MR. SALEWSKI reminded them that he had mentioned that Genstar had started in the building materials and industrial space. He said the first sector was the industrial vertical in 1988. Then in the mid 90's one of the team members mentioned that industrial space was interesting, and they could apply some of the same change management themes to healthcare. He said for them, healthcare was drug discovery and they looked at companies that provided drug trials or centralized data collection in drug trials.

MR. SALEWSKI said they joke about a parallel across their sectors. He said it was the classic picks-and-shovels approach to the gold rush where they were not betting on gold, but the people that would need blue jeans, picks, and axes to find the gold. He said the tools and services approach really exists across all of their sectors.

MR. SALEWSKI then walked through an example.

MR. HOWARD asked if he would talk about how the top-level decision was made as far as allocating to those sectors; MR. SALEWSKI said it was a bottoms-up process that they fund, since when they invest in their funds, they are 10-to-12-year closed-end vehicles. He said they were long-dated funds, so in spite of micro cycles within each of the sectors, they look to underwrite the companies for three to seven years, knowing that as they deploy the capital, it would be a 10-year journey.

MR. SALEWSKI said they look at each of the sectors, they have equivalent efforts in each and see what the best opportunities were. He said unless there were more liquid funds, they could not tweak that allocation forward and backward over the course of a fund, so they look at balanced funds within them. He said they do regression analysis and all of their sectors performed equally.

CHAIR WILLIAMS asked if the defined exit vision was on a timeline; MR. SALEWSKI said that they underwrite for a five-year plan which contains what the organic growth would look like, what the acquisition growth could look like, what the profile looked like in terms of how it was valued in

the marketplace. He said they look to accelerate growth which leads to higher exit multiples. He said they steer them into higher value parts of their marketplace to steer for a higher exit value and then they look to build an organized and an inorganic plan, and an acquisition plan for that. He said in that five year period, there was an 18-month window of true value creation out of the gate and they pushed the teams to hit the accelerator hard and drive the change levers, and hire the talent needed within the first 18 to 24 months; CHAIR WILLIAMS asked if they adjust their timeline a bit based on things that happen within that time frame if they see a way to get a lot more value; MR. SALEWSKI said that was correct, that every quarter, alongside of their mark-to-market valuation analysis, they do a different analysis for their internal purposes that they do not share externally.

MR. SALEWSKI said their management team sees external validation of their value creation, they will tell them that it may be early in the hold period, but it's a good time to exit, so they exit, but other times they may hold longer. He said when they hit the return goals, that is when they have the exit discussions.

MR. HOWARD asked how they were able to maintain the process as the fund sizes grew; MR. SALEWSKI said it was something they monitored closely. He said their team had gotten a little bigger with a few more advisors which works out to an equation that they back into the fund size that they think makes sense for the team that they have. He said they will only raise a fund that they believe the team they have could manage.

L. Understanding Returns for Public DB Plans

MR. HANNA explained that Callan recently released a white paper that was in the Board packet that bridged the gap between actuarial assumption and the capital market assumptions. He then invited MR. O'CONNELL of Callan to explain.

MR. O'CONNELL said that during his investment consulting career, at only one point in his career was the average funded status near or above 100 percent. He said the average funded status for public pension plans had been below 100 which made room for improvement in terms of having assets on hand to pay liabilities.

MR. O'CONNELL said that people often point towards disappointing investment returns as the reason for most public pension plans being underfunded which was the case in 2008. He said that slide 1 of the presentation was the range of returns that Callan's peer public pension plans had returned historically over the long run. He said it showed a distribution of returns for the 10th percentile down to the 90th percentile over three different time horizons - 10, 20 and 30 years. He said over the long periods of time, public pension plans had been able to exceed the actuarial discount rate and often exceeded the return forecast that Callan had projected at the beginning of those periods. He said that looking at the 10-year period, it looked really good, it did not include the Global Financial Crisis, but when looking back at the 20-year time horizon, it included the COVID market downturn as well as the Global Financial Crisis, so the returns look more modest.

MR. O'CONNELL said the 30-year time horizon that is commonly used as a minimum time period for a long-term investor included the three major market disruptions – the dot-com bubble, the Global Financial Crisis and the COVID disruption. He said the historical picture from the return standpoint

of what public plans had experienced, the range of returns was narrow, but all relatively good, and the median public plan had produced returns that had exceeded common actuarial discount rates.

MR. O'CONNELL noted they had a good asset return experience for public pension plans but faced challenges going forward, such as what did they expect from the future. He said they assumed that the public pension plan would invest 60 percent of assets in global equities, 25 percent in fixed income, 10 percent in real estate, and 5 percent in private equity. He said Callan's best forecast over the next 10 years was that creates a median expected return of about 6 percent. He said they showed that in good outcomes, they expected a return of twice that, 13.4 percent at the 10th percentile and in a very bad set of outcomes over a 10-year time horizon, an average return that could be negative. He noted that it was a modest return forecast because interest rates were low, equity valuations were high and there had been a lot of liquidity in the market that had driven up prices on a lot of assets and that made it harder to achieve the returns experience in the past going forward.

MR. O'CONNELL said the past presents a very different picture from what they expect in the future and that FY2021, which a lot of public plans use to measure their financials, was one of the best they had seen in a long time and had done a lot to improve public pension plan funded status. He said a lot of stakeholders and people involved in the public pension world were taken aback when they raised the issue of the kind of tough sledding that may be ahead for public plan fiduciaries. He said the graph on page 3 was a good illustration of the challenge faced over time by public plan trustees and stakeholders of how to justify the difference between the two lines. He said the dark blue line was data they got from NASRA which represented the public plan median discount rate over time. He said they started tracking that information in 2000 when 8 percent was the standard discount rate. He said the green line was Callan's estimate of the return forecast for the typical pension plan at each given time period and was down to 7 percent.

MR. O'CONNELL said the graph on page 4 was a histogram where they plotted the median public plan return for different fiscal years going back to the mid 70's. He said it showed that in 2021 the median public plan was up over 25 percent, that returns like that had not been seen since the mid 80's. He said those returns were driven by public pension plans being invested largely in bonds, more so than today and the bonds benefitting from interest rates coming down in a steep manner.

MR. O'CONNELL said there was great variability in the returns seen from year to year and the experience in any given year was going to be vastly different from the actuarial discount rate and the return forecast that Callan expected for a 10-year time horizon. He noted that it was important when digesting results in any fiscal year to put it in the broader context of what the long-term experience had been.

MR. O'CONNELL said that if they were to look at other consultants or use an average of return forecast for the coming 10 years, there would be a similar phenomenon, where the forecast for future returns was more modest than what the discount rate was. He said slide 5 showed different factors that they thought public plan fiduciaries and stakeholders should consider when trying to understand the how to reconcile the differences between the two. He said the issue of time horizon, when actuaries discuss the return on asset discount rate assumption, they viewed that as a long-term assumption, and their time horizon tends to be longer than what Callan uses. He said actuaries

typically operate for 20-year time periods and often 30-year periods. Callan's forecasts are the 10-year time horizon and is the best time period for fiduciaries to make decisions because it is more reflective of current market conditions.

MR. O'CONNELL said he looked at the long-term averages – how public plans had done over very long time periods and how they had done in exceeding their actuarial discount rate. He said because the median was much better on average than the actuarial discount rate, most public plans would be able to look at a higher historical return.

MR. O'CONNELL said they should look at inflation expectations used by consultants and actuaries. He noted that actuaries over the past several years had brought their inflation expectations down, that in the past they had used long-term averages of inflation. He said it would be interesting to see how actuary and consultant inflation forecasts change now that there has been an increase. He said that historically, actuaries had higher inflation expectations than consultants and that going forward, inflation would be what it is, and that the best way to reconcile the numbers would be to look at real or after-inflation returns and try to bridge the gap between the actuary's real discount rate less their inflation assumption against the consultant's return forecast above inflation so they eliminate the difference in the two numbers that comes from having inflation forecasts differ.

MR. O'CONNELL said that they did think it was important to make changes to the actuarial assumptions based on advice from the actuary, but infrequently and not making significant changes if possible. He said the assumptions the actuary used in valuing the liabilities could have a big impact on the overall financial picture. He said the investment consultant forecast takes into consideration market conditions that are more relevant and up to date, reflecting current market conditions. He said they want to avoid trying to move either the discount rate to match the consultant forecast or set the asset allocation so that they can reach the actuarial discount rate.

MR. O'CONNELL said the last factor was how they use active management in particular in the publicly traded asset classes. He said Callan's capital market forecast for public market asset classes did not include a premium for value added from active management. He said for alternatives they do private equity, real estate, and hedge funds and incorporate some value added from active management. He said for most public plans, over 50 percent of their assets were invested in non-U.S. equities and fixed income, so they do not factor into the 6 percent forecast how well or poorly they would do implementing with active management.

MR. O'CONNELL said one way to justify the difference between the 6 percent forecast and the 7 percent discount rate was to understand how they used active management in the past and how much active management the plan had in publicly traded asset classes and what the history had been of adding value with active management. He said the average investor should expect the index minus actively managed fees, so the best investors could expect to achieve a premium from active management, or alpha. He noted that they had incorporated alpha estimates into Callan's return forecasts. He said that it had never been an objective to make the actuarial discount rate and the consultant return forecast match. He said they were two different numbers with two different functions.

CHAIR WILLIAMS said that he thought MR. O'CONNELL was saying not to give any indication of what they should expect for returns for next year, but what kind of climate and what they should expect over the next 10 or 12 years; MR. O'CONNELL said that was correct; CHAIR WILLIAMS asked if he were to sum up in a few sentences why they should be less optimistic over the future than what they had in the past; MR. O'CONNELL said they need to find new ways to achieve the success that they had experienced in the past. He said they must work a bit harder to find investments that are less transparent, less liquid, and harder to understand that might play a bigger role in the portfolio going forward.

MR. JOHNSON asked if there were any takeaways from the high volatility this week to go into the longer-term forecasting – were there lessons to be learned; MR. O'CONNELL said that he thought the big lesson would be that it was impossible to forecast, with any degree of accuracy, how assets would perform over a short period of time. He said he also thought that public pension plans had the benefit of being long-term investors so the liability stream was long and there was a big pool of assets that could be invested in a way where they could ignore the short-term market disruptions.

MR. HIPPLER asked him to clarify if he thought of 6 percent return was a nominal return rather than a real return; MR. O'CONNELL confirmed that was the case; MR. HIPPLER asked if the average 10-year return for public fund assets over the last 40 years 9 percent and was expected to go down to 6 percent; MR. O'CONNELL said the average median return for their clients was 8.65 for 30 years and that they thought the average public plan, based on generic asset allocation would be close to 6 percent going forward.

UNFINISHED BUSINESS - None.

NEW BUSINESS – None

OTHER MATTERS TO PROPERLY COME BEFORE THE BOARD - None.

PUBLIC/MEMBER COMMENTS - None

INVESTMENT ADVISORY COUNCIL COMMENTS

DR. MITCHELL commented that the presentations over the past two days were enlightening, and he particularly liked the presentation from MR. O'CONNELL. He said that they were not going to radically change their market manager lineup just because of a one-year, two-year or even three-year forecast. He said that private equity had done very well for the fund and congratulated the Board for allowing it to evolve and the staff for doing such a great job in choosing managers, monitoring them, and staying on top of private equity.

CHAIR WILLIAMS said that MS. RYERSON could not be with them but did email some comments. He said she congratulated the new Board leadership and echoed many of the comments about CHAIR JOHNSON running the meetings so efficiently. She said she also very much appreciated his thoughts about spreading leadership responsibilities around to more Trustees. She said that in the long run, it made the Board a much stronger one overall to have more Trustees involved in leadership, both of the Board and of the Committees. She gave kudos to the format of the Summit presentation, she

thought that better information was exchanged thought the Q & A session and open discussion rather than simply reviewing a slide deck.

DR. JENNINGS said he thought it was a good meeting, that the educational sessions marked in blue on the agenda were useful things to make efforts to include. He said he found the manager perspectives useful. He said he thought there was a need for dialogue and discussion, interaction on the actuarial assumptions and encouraged working through staff to the leanings and insights to the various actuaries ahead of time might expedite the process.

CHAIR WILLIAMS said that the determinations would be made by June and asked if DR. JENNINGS felt that it had to be addressed earlier; DR JENNINGS said he felt like it needed more than one discussion, that there would be multiple iterations as opposed to waiting to see what would be presented in March. He said he thought some conversations prior to March might facilitate the process.

MR. HANNA said that he fully agreed. He said the experience study that was performed every four years was a significant amount of work for Trustees and the actuaries. He said they had a tentative meeting scheduled in April that was always on the schedule, and that staff was more than willing to firm up those dates.

TRUSTEE COMMENTS

MS. HARBO gave thanks to MR. JOHNSON for his service to the members and beneficiaries, first as legal counsel to the PERS and TRS Boards and the Alaska State Pension Investment Board, then the ARMB and finally as a Trustee and then chairman of the Board. She noted that she was happy he was going to remain as a Trustee on the Board. She also thanked the staff at Treasury and DRB for their service.

MR. MOEN also thanked MR. JOHNSON for his service and congratulated CHAIR WILLIAMS.

MR. JOHNSON said that he looked forward to the future of the ARMB under the leadership of CHAIR WILLIAMS, VICE-CHAIR HIPPLER, AND MS. HARBO as Secretary. He said he had enjoyed his time as chair and vice-chair two years prior and was very proud to have served with the Board. He said it was critical to maintain focus going forward.

CHAIR WILLIAMS said he had always found the Board to be one of the most competent, thoughtful, and professional boards with deep, important issues, important discussions, and was honored to get to work with great staff.

FUTURE AGENDA ITEMS - None.

ADJOURNMENT

There being no objection and no further business to come before the board, the meeting was adjourned at 12:27 p.m. on December 3, 2021, on a motion made by MS. HARBO and seconded by MR. JOHNSON.

Chair of the Board of Trustees
Alaska Retirement Management Board

ATTEST:

Corporate Secretary

Note: An outside contractor recorded the meeting and prepared the summary minutes. For in-depth discussion and more presentation details, please refer to the recording of the meeting and presentation materials on file at the ARMB office.

ALASKA RETIREMENT MANAGEMENT BOARD
STAFF REPORT
Division of Retirement & Benefits Report
March 17, 2022

Summary of Monthly Billings / Buck Global LLC

Attached is the requested summary schedule of invoices by quarter related to actuarial services provided by the Division's consulting actuary, Buck Global LLC.

Included on this schedule is the quarter ended September 30, 2021, and the quarter ended December 31, 2021.

Items listed on the left side of the schedule represent regular and non-regular services provided under our current contract.

The associated costs of each service are charged to the System or Plan noted on the column headings.

ALASKA RETIREMENT MANAGEMENT BOARD

SUBJECT: Summary of Monthly Billings -
Buck Global LLC
DATE: March 17, 2022

ACTION: _____
INFORMATION: **X**

BACKGROUND:

AS 37.10.220(a)(8) prescribes that the Alaska Retirement Management Board (Board) “coordinate with the retirement system administrator to have an annual actuarial valuation of each retirement system prepared to determine system assets, accrued liabilities, and funding ratios....”

As part of the oversight process, the Board has requested that the Division of Retirement and Benefits provide quarterly summary updates to review services provided and costs incurred for actuarial valuations and other systems’ requests.

STATUS:

Attached are the summary totals for the six months ended December 31, 2021 with comparative totals from the prior fiscal year.

ALASKA RETIREMENT MANAGEMENT BOARD

STAFF REPORT

Division of Retirement & Benefits Report March 17, 2022

Retirement System Membership Activity as of December 31, 2021

Attached are the membership statistics for the quarter ending

- December 31, 2021

There is a net increase in active members from last quarter, all in DCR members:

- PERS Tier 1-3 active members decreased from 9,798 to 9,586, or a decrease of 212.
- PERS DCR active members increased from 24,686 to 25,388, or an increase of 702.
- PERS active members had a net increase of 490.

- TRS Tier 1-2 active members decreased from 3,435 to 3,430, or a decrease of 5.
- TRS DCR active members increased from 6,194 to 6,622, or an increase of 428.
- TRS active members had a net increase of 423.

Retiree counts have changed in the following manner:

- PERS retirees increased from 37,028 to 37,123, or an increase of 95 (all tiers).
- TRS retirees decreased from 13,551 to 13,511, or a decrease of 40 (all tiers).

Benefits And Retirement System (BEARS) Project Update

Project Background:

With a capital appropriation in FY19, the Division of Retirement and Benefits (DRB) began implementing a multi-year project to modernize IT and work processes to drive efficiency, accuracy, and security associated with its core business and services. This integrated, enterprise-wide system supports all our core business functions for pension and health plans of all tiers including demographic information as a single source of truth. The system will be an enterprise-level retirement information system solution providing many modern tools to enable the state to maintain and improve service to members. The system will integrate core business processes, facilitate consistency, and enable additional oversight and accountability.

To achieve these goals, DRB contracted with a Project Management consulting firm, Linea, to assist in enterprise-wide system selection plans and roadmaps, participate in a deeper dive in business process analysis and workflow design. Additionally, the firm assisted division staff with developing the requirements of the RFP for soliciting and securing a vendor solution for modernizing DRB's enterprise platform. as well as a firm to deliver an enterprise-wide solution.

In April 2020, DRB awarded Sagitec Solutions, a global technology solutions company, the contract to develop a new enterprise system. The total price of this agreement is \$24,866,060.00 for implementation plus a one-year warranty period. The original bid was \$36,855,381.00 with a total savings of \$11,989,321.00, which is a 32.5% reduction in the original proposed cost. Since contract award, Sagitec has been working closely with DRB staff and Linea to analyze DRB's needs, review all requirements, and design and develop the modules that will comprise the enterprise-wide system.

Benefits And Retirement System (BEARS) Project Update (continued)

Status Update:

Since the September 2021 update on the BEARS modernization project, DRB has had several accomplishments and met several milestones. The project is currently on-time, on-budget, and is expected to be completed by December 4, 2023.

Accomplishments include:

- Completion of Pilot 1 testing
- Program Modules: In-depth analysis, design, and development of program modules including Retirement Benefits, Disability Benefits, Active and Retiree Death, Insurance, and Withdrawals. These modules are scheduled to be included in Pilot 2 testing later this year
- Data Conversion: Taking place in conjunction with module design and development, as it requires that the data source be mapped correctly for accessibility within the new module design
 - Person demographics, organization, and financial transactions are 100% complete
 - Membership, indebtedness, and enrollment and contribution data conversion is underway, with 5 of the remaining 7 modules at 70% or higher completed
- Budget and Spending by Vendor (as of February 24, 2022):

Health Plans				
HB 113	House Rules by Request of the Governor	(H) L&C, HSS, FIN	This legislation aims to reduce the cost of health care and improve care quality by addressing the lack of transparent data that is a hallmark of the health care industry today. This bill creates an All-Payer Claims Database (APCD) housed within the Division of Insurance. The APCD could be used to analyze health care cost, quality, and utilization data to aid in advising and making recommendations to policy makers and consumers on health care programs and policies. **Companion bill to SB 93	Has not been scheduled for a hearing.
SB 30	Senator Begich	(S) HSS, L&C, FIN	This legislation requires the AlaskaCare health plans to provide coverage for colorectal cancer screenings.	Withdrawn by Sponsor.
SB 41	Senator Hughes	(S) L&C, FIN	This legislation requires health care providers and insurers to publicly disclose network pricing agreements. It further requires commercial insurers to establish a cash incentive program to encourage commercially insured individuals to obtain care from lower cost network providers. The bill does not apply these requirements to the AlaskaCare health plans, but directs the Division of Retirement and Benefits to conduct an analysis to evaluate whether the	Referred to (S) L&C

Alaska Russian Investments

- Introduction
- Status and Sanctions
- Market Overview
- ARMB Investments
- Actions by Institutional Investors
- Fiduciary Standards
- Q&A

Unprecedented Global Sanctions

Category	Significant Sanctions (1,274 sanctions since February 2022)
Banks and Financial Services	<ul style="list-style-type: none">• Russian Central Bank restrictions imposed by US, UK, Canada and EU• Swift ban enacted on seven Russian banks• Sanctions imposed on Sberbank and VTB Bank, Russia's largest banks• US persons prohibited from investing in new debt or equity issuance from certain OFAC Russian institutions
Oil and Gas	<ul style="list-style-type: none">• US bans import of Russian energy products including oil, liquified natural gas, and coal
Corporate	<ul style="list-style-type: none">• Over 300 companies have withdrawn from Russia including Boeing, Airbus, Visa, Mastercard, FedEx, UPS, Apple, Netflix, and McDonalds• Google, Meta (Facebook), and TikTok have blocked Russian state media channels• BP, Shell, Exxon, and Equinor are divesting from billions in oil and gas developments
Other	<ul style="list-style-type: none">• US bans Russian aircraft from US airspace• Foreign-held asset freeze and travel bans for some politicians, officials, oligarchs and family members

International Equity in Russia

- Most institutional investors invest in a diverse basket of global securities.
- The Morgan Stanley All-Country World Index Investable Market Index (MSCI ACWI IMI) is a common institutional index that incorporates 99% of globally publicly traded equities.
- The index is diversified across 48 countries – 23 developed and 25 emerging market– and includes roughly 9,300 securities.
- The index is a reasonable proxy for many institutional investor portfolios:

#	Country	MSCI ACWI IMI	#	Country	MSCI ACWI IMI	#	Country	MSCI ACWI IMI
1	United States	58.3%	11	India	1.6%	21	Saudi Arabia	0.4%

Health Care	0.2%	99.8%
Real Estate	0.2%	100.0%

Current Status of Russian Equity Investments

- Russian equities decreased by 53% in value in February.
- Trading halted on February 25th for all Russian-listed equities.
- There is currently no way to buy or sell Russian equities on an exchange.
- Valuations are now highly speculative since they are no longer provided by the market.
- All major stock indexes are taking Russian securities out this month and passive index funds are holding Russian securities at low-to-no-value.

Treasury Russian Equity Investments – 1/31/22

ARMB Russian equity investments – 0.25% of \$43 billion in assets:

Defined Benefit Retirement Systems – 0.28% of \$33.9 billion in assets

- 0.28% of the retirement funds had Russian equity exposure on 1/31/22 (\$93.5 million).
- 7 investment managers – 3 active, 4 passive/index.
- All ARMB international investment managers except for Baillie Gifford

Participant Directed – 0.15% of \$9.0 billion in assets

- 0.15% of participant directed assets had Russian equity exposure on 1/31/22 (\$13.4 million).
- 4 investment managers – 2 managers active, 2 passive/index funds.
- All DC investments with international exposure including the target date and balanced funds
- All of the Russian exposure is through commingled funds where the ARMB is not the direct fiduciary for the funds.

Treasury has directed a halt to the purchase of Russian securities at this time due to market uncertainty.

What are others doing?

States

- Based on a survey administered by The Pennsylvania Treasurer, on 3/4/22, there were a total of 27 states who are currently looking into or currently freezing state money or pension funds going to Russian companies, investments or oligarchs
- Other actions taken by other states include the following:
 - Looking into or currently banning state agencies from doing business with Russian state-owned firms and subcontractors
 - Blocking Russian businesses and nonprofits from acquiring property in their state for 1 year
 - Looking into or ending sister state relationship with Russia
 - Officially condemned Russia's invasion
 - Welcoming refugees
 - Calling on businesses to ban Russian made goods

Norway Sovereign Wealth Funds

- Norway announced that they are divesting from Russia
- Russian assets at the end of 2021 made up 0.2% of Norway fund (\$3 billion in total)
- Recognize that divestment takes time because they want to ensure sales are not made to sanctioned individuals/entities

Guiding Statutes for Investing

- Prudent Investor Rule Summary

- In addition to other considerations, a fiduciary shall exercise the judgment and care under the circumstances then prevailing that an institutional investor of ordinary prudence, discretion, and intelligence exercises in the management of large investments.

- ARMB Statutes

- AS 37.10.071(c) – In exercising investment, custodial, or depository powers or duties under this section, **the fiduciary of a state fund shall apply the prudent investor rule and exercise the fiduciary duty in the sole financial best interest of the fund** entrusted to the fiduciary. Among beneficiaries of a fund, the fiduciaries shall treat beneficiaries with impartiality.
- AS 37.10.210(a) – Consistent with standards of prudence, the board has the fiduciary obligation to manage and invest these assets in a manner that is sufficient to meet the liabilities and pension obligations of the systems, plan, program, and trusts.

Questions or Comments?

HOUSE BILL NO. 396

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTY-SECOND LEGISLATURE - SECOND SESSION

BY THE HOUSE STATE AFFAIRS COMMITTEE

Introduced: 3/9/22

Referred: State Affairs, Finance

A BILL

FOR AN ACT ENTITLED

1 **"An Act restricting certain investments of state funds in certain Russian entities; and**
2 **providing for an effective date."**

3 **BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:**

4 * **Section 1.** The uncoded law of the State of Alaska is amended by adding a new section
5 to read:

6 RUSSIA DIVESTMENT; DIVESTMENT EXEMPTIONS, IMMUNITY, AND
7 INDEMNIFICATION; NOTICE. (a) Notwithstanding any other provision of law, the
8 commissioner or a fiduciary of a fund subject to AS 37 may not invest in and shall cause the
9 fund to divest ownership, if any, in the publicly traded securities of Russian entities.
10 Divestment of an ownership interest in a Russian entity shall occur within 90 days after the
11 entity is identified as a Russian entity under (c) of this section. If a fund has investments
12 managed by an outside investment manager, the fiduciary shall, within 90 days after the entity
13 is identified as a Russian entity under (c) of this section, direct the investment manager not to
14 invest in and to divest, within 90 days after receiving the direction, ownership, if any, in the

1 publicly traded securities of a company identified under this section as a Russian entity.

2 (b) If an investment in a fund under (a) of this section is managed as a commingled
3 investment or other business structure in which the fund is not the sole owner of the
4 investment interest or if the investment is an index fund, the provisions of (a) of this section
5 do not apply. The commissioner shall require that, within 90 days after the commissioner
6 identifies a Russian entity under (c) of this section, the fiduciary submit letters to the
7 managers of commingled investments requesting the managers to consider removing the
8 Russian entity from the commingled investment.

9 (c) The commissioner shall

10 (1) identify Russian entities and create and regularly update a list of Russian
11 entities;

12 (2) provide each Russian entity identified under this subsection written notice
13 and an opportunity to comment in writing.

14 (d) On or before January 31, 2023, the commissioner shall advise the president of the
15 senate, the speaker of the house of representatives, and the United States presidential special
16 envoy for Russia of the Russian entities identified under (c) of this section.

17 (e) For actions taken or inaction done, in good faith, in compliance with this section,
18 the commissioner or a fiduciary, or an agent, attorney, trustee, officer, employee, staff
19 member, custodian, research firm, or investment manager under contract of the commissioner
20 or the fiduciary, or a board member is

21 (1) exempt from a conflicting state statutory or common law obligation,
22 including an obligation with respect to choice of an asset manager, investment fund, or
23 investment for the securities portfolio of the public fund;

24 (2) immune from liability under state or local law;

25 (3) indemnified and held harmless by the state from claims, demands, suits,
26 actions, damages, judgments, costs, charges, and expenses, including costs and attorney fees,
27 and against all liability, losses, and damages of any nature that the commissioner or the
28 fiduciary, or the agent, attorney, trustee, officer, employee, staff member, custodian, research
29 firm, or investment manager under contract of the commissioner or the fiduciary, or the board
30 member may, at any time, sustain because of a decision to restrict, reduce, or eliminate an
31 investment made in compliance with this section; and

1 (4) immune from adverse licensing actions under AS 08.

2 (f) Not later than 30 days after the enactment of this Act, the Department of Law shall
3 submit written notice to the Attorney General of the United States describing this Act.

4 (g) The commissioner may adopt regulations under AS 44.62 to carry out the
5 purposes of this section.

6 (h) In this section,

7 (1) "commissioner" means the commissioner of revenue;

8 (2) "Russian entity" means

9 (A) all Russian sovereign debt; or

10 (B) an entity identified by the Office of Foreign Assets Control of the
11 United States Department of the Treasury as

12 (i) being owned or controlled by, or having acted or purported
13 to act for or on behalf of, the government of Russia; or

14 (ii) operating or having operated in the financial services sector
15 of the economy of the Russian Federation.

16 * **Sec. 2.** Section 1 of this Act is repealed January 1, 2024.

17 * **Sec. 3.** This Act takes effect immediately under AS 01.10.070(c).

ALASKA RETIREMENT MANAGEMENT BOARD

STAFF REPORT

Fund Financials – Cash Flow Report March 17, 2022

Ryan Kauzlarich, Assistant State Comptroller, Department of Revenue

As of January 2022 month-end, total plan assets were as follows: PERS - \$24.8 billion, TRS - \$11.6 billion, JRS - \$292.6 million, NGNMRS - \$49.2 million, SBS - \$5.0 billion, DCP - \$1.2 billion. Total non-participant directed plans totaled \$33.9 billion, and participant-directed plans totaled \$9.0 billion. Total assets were \$42.9 billion.

Year-to-date income was \$1.2 billion, and the plans experienced a net withdrawal of \$587.9 million. Total assets were up 1.55% year-to-date.

Internally managed assets totaled \$17.1 billion.

As of month-end, all plans were within their asset allocations bands.

Kevin Worley, Chief Financial Officer, Division of Retirement and Benefits

Presented is the Division of Retirement and Benefits (DRB) Supplement to the Treasury Division's Financial Report as of January 31, 2022.

DRB's supplement report expands on the ARMB Financial Report column "Net Contributions (Withdrawals)" located on pages 1 and 2. DRB reports the summary totals of actual employee and employer, State of Alaska, and other revenue items, as well as benefit payments, refunds & disbursements, and combined administrative & investment expenditures. DRB's supplement report presents cash inflows and outflows for the 7-months ended January 31, 2022 (page 1) and for the month of January 2022 (page 2).

Also presented are participant-directed distributions by plan and by type for the year-to-date period on page 3. This page includes Tier information on the defined benefit refunds, and vested percentage on defined contribution distributions.

"Notes for the DRB Supplement to the Treasury Report" includes information for the pension and healthcare plans. Additional information regarding other income is also presented on pages 4 and 5.

Notes for the DRB Supplement to the Treasury Report

January 2022

This report is the DRB supplement to the Treasury Division's Financial Report. It expands the "Net Contributions/(Withdrawals)" column into contributions and expenditures. It shows contributions received from both employees and employers, contributions from the State of Alaska, and other non-investment income. This report also expands expenditures into benefits, refunds & disbursements, and administrative & investment expenditures.

The net amount of total contributions and total expenditures, presented as "Net Contributions/(Withdrawals)", agrees with the same column in the Treasury Division's Report. Page one shows the year-to-date totals for the first seven months of Fiscal Year 2022, while page two shows only the month of January 2022.

Highlights – On page one, for the seven months ending January 31, 2022:

- PERS DB Pension – Average employer and employee contributions of \$38.9 million per month; benefit payments of approximately \$79.4 million per month; refunds average \$726 thousand; and administrative and investment expenditures of \$766 thousand per month (DOR and DRB).
- PERS DB Healthcare – Average employer contributions of \$5.6 million per month; benefit payments of approximately \$40.1 million per month; other income of \$15.2 million from OptumRx EGWP Subsidies; \$14 million from OptumRx pharmacy rebate (most recently received in November for 3rd Qtr 2021); \$285 thousand from Aetna pharmacy rebate (most recently received in December for 2nd Qtr 2021); \$20.7 million from EGWP coverage gap discount plan (CGDP) (most recently received in January for 3rd Qtr 2021); and average administrative and investment expenditures of \$1.1 million per month (DOR and DRB).
- PERS DC Pension – Average employer and employee contributions of \$16.5 million per month; participant disbursements average \$8.1 million per month; and average administrative and investment expenditures of \$623 thousand per month (DOR and DRB).
- PERS DCR Health – For HRA, RMP, and OD&D, only employer contributions average \$5.9 million per month on behalf of participating employees; benefit payments of approximately \$181 thousand per month. Currently, 15 benefits are being paid from the Occupational Death & Disability plans, 104 retirees are participating in RMP, and 136 retirees are participating in HRA. Other income of \$36.7 thousand from OptumRx EGWP Subsidies; \$22 thousand from OptumRx pharmacy rebate (most recently received in November for 3rd Qtr 2021); \$32 thousand from EGWP coverage gap discount plan (CGDP) (most recently received in January for 3rd Qtr 2021); and administrative and investment expenditures were approximately \$31 thousand per month (DOR and DRB).
- TRS DB Pension - Average employer and employee contributions of \$4.1 million per month; benefit payments of approximately \$42.8 million per month; refunds average \$131 thousand; and average administrative and investment expenditures of \$361 thousand per month (DOR and DRB).
- TRS DB Healthcare – Average employer contributions of \$1.6 million per month; benefit payments of approximately \$12.9 million per month; other income of \$5.3 million from OptumRx EGWP Subsidies; \$4.4 million from OptumRx pharmacy rebate (most recently received in November for 3rd Qtr 2021); \$122 thousand from Aetna pharmacy rebate (most recently received in December for 2nd Qtr 2021); \$6.8 million from EGWP coverage gap discount plan (CGDP) (most recently received in January for 3rd Qtr 2021); and average administrative and investment expenditures of \$686 thousand per month (DOR and DRB).

- TRS DC Pension – Average employer and employee contributions of \$5 million per month; participant disbursements average \$2.7 million per month; and average administrative and investment expenditures of \$227 thousand per month (DOR and DRB).
- TRS DCR Health – For HRA, RMP, and OD&D only, employer contributions average \$1.2 million per month on behalf of participating employees; benefit payments of approximately \$37 thousand per month. Currently, 1 benefit is being paid from the Occupational Death & Disability plans, 25 retirees are participating in RMP, and 38 retirees are participating in HRA. Other income of \$3.8 thousand was received from monthly OptumRx EGWP Subsidies; \$3 thousand from OptumRx pharmacy rebate (most recently received in November for 3rd Qtr 2021); and administrative and investment expenditures were approximately \$11 thousand per month (DOR and DRB).
- JRS Pension – Average employer and employee contributions of \$775 thousand per month; benefit payments of approximately \$1.2 million per month; and average administrative and investment expenditures of \$12 thousand per month (DOR and DRB).
- JRS Healthcare – Average employer contributions of \$58 thousand per month; benefit payments of approximately \$115 thousand per month. Other income of \$44.9 thousand from OptumRx EGWP Subsidies; \$32 thousand from OptumRx pharmacy rebate (most recently received in November for 3rd Qtr 2021); \$61.6 thousand from EGWP coverage gap discount plan (CGDP) (most recently received in January for 3rd Qtr 2021); and average administrative and investment expenditures of \$7 thousand per month (DOR and DRB).
- NGNMRS – A combination of lump-sum and monthly benefit payments of \$120 thousand per month; and average administrative and investment expenditures of \$25 thousand per month (DOR and DRB).
- SBS – Average employer and employee contributions and transfers in of \$14.4 million per month. Participant disbursements average of \$26.1 million per month; and average administrative and investment expenditures of \$689 thousand per month (DOR and DRB).
- Deferred Compensation – Average member-only contributions and transfers in of \$4.1 million per month; participant disbursements average of \$7.6 million per month; and average administrative and investment expenditures of \$225 thousand per month (DOR and DRB).

Highlights – On page two, activity for the one month of January 2022 only:

- PERS DB Healthcare – Other Income of \$14.6 million from OptumRx EGWP Subsidy and EGWP Coverage GAP Discount Plan
- TRS DB Healthcare – Other Income of \$4.9 million from OptumRx EGWP Subsidy and EGWP Coverage GAP Discount Plan
- JRS DB Healthcare – Other Income of \$45.0 thousand from OptumRx EGWP Subsidy and EGWP Coverage GAP Discount Plan
- All other funds – Nothing significant to report.

If you have any questions or comments, please let me know.

ALASKA RETIREMENT MANAGEMENT BOARD

SUBJECT: Participant-Directed Plans
Empower Brokerage Option

ACTION: X

DATE: March 17-18, 2022

INFORMATION: _____

BACKGROUND

For several years, Defined Contribution members have expressed an interest in the ARMB offering a self-directed brokerage (SDB), and have occasionally contacted ARMB trustees and staff requesting the ARMB implement one. At the direction of the board, the Division of Retirement and Benefits and Treasury staff worked together to identify objective criteria for an SDB, a vendor was selected, and at the September 2020 ARMB meeting, an action item was approved to implement the Empower brokerage platform in the Alaska Supplemental Annuity Plan, the Defined Contribution Retirement Plans, and the Deferred Compensation Plan.

STATUS

As part of the preparations for implementation of the SDB, Department of Law and Ice Miller, Division of Retirement & Benefits outside counsel, were both consulted. In an internal memo distributed to the ARMB trustees, Department of Law attorneys cited several factors including legal decisions issued subsequent to the ARMB's decision to implement a SDB. Both *Metcalfe v. State* from April 2, 2021, and the *Hughes v Northwestern* from on January 24, 2022, raise concerns with the implementation of the SDB. The case of *Metcalfe v. State* reinforces the State's constitutional guarantee regarding employee retirement systems in terms of diminishment, and potentially increases the risk that any losses in the SDB may be subject to claims of diminishment or breach of fiduciary duty. Similarly, *Hughes v Northwestern* raises questions about State's ability to delegate fiduciary responsibilities in an SDB. As a result of their analysis of the SDB, and the impact of these two relatively new additions to case law, both Ice Miller, and the Department of Law attorneys do not recommend that the ARMB move forward with the SDB implementation.

RECOMMENDATION

The Alaska Retirement Management Board direct staff not to move forward with implementing a Brokerage platform for members of the Alaska Supplemental Annuity Plan, the Defined Contribution Retirement Plans, and the Deferred Compensation Plan.

REPORT ON ALASKA RETIREE HEALTH PLAN ADVISORY BOARD MEETING FEBRUARY 10, 2022

The advisory board facilitates engagement and coordination between the State's retirement systems' members, the ARMB, and the Commissioner regarding the administration of the retiree health plan. Following are items discussed at the February 10, 2022 meeting and other important Health Plan updates.

Website

The Division of Retirement and Benefits is updating the look and feel of their webpages. The new webpages are designed to be more intuitive so retirees can get online and quickly find what they need. This will improve service. The new site will launch this spring.

Network

Aetna has been able to expand provider network in Alaska by 444 in 2021 for a total of 4,099 providers.

Adding GCIT Network Benefits

Currently, the Plan covers Gene-based, Cellular, and other Innovative Therapies (GCIT) services under the medical plan from both network and non-network providers and facilities. These therapies are so new that Aetna and most network providers have not previously established an agreed-upon price for these services.

The AlaskaCare Plan currently has an individual lifetime medical benefit maximum limit of \$2 million. Prescription drug expenses do not apply to the lifetime maximum. GCIT services paid through the medical benefit move retiree plan members closer to exhausting their lifetime maximum. Other plans have seen charges nearing \$12 million for one course of treatment. AlaskaCare Plan has not incurred charges of this size.

Implementing the Aetna GCIT network and patient support program is intended to provide members with appropriate logistical and clinical support. While at the same time, add cost controls for emerging high-cost treatments, to reduce member and plan risk. The changes would ensure that the therapies are covered through network providers who have been manufacturer-approved to administer the drugs and who have agreed to contractual pricing terms for the therapies

Settlement

The Division has reached a settlement agreement with the Retired Public Employees of Alaska, Inc. (RPEA) in both the Medical and Dental, Vision, and Audio (DVA) cases. Many of the settlement terms focus on maintaining and enhancing the current process the Division uses to consider changes to the health plans. Several of the settlement terms include Division recommendations regarding the structure and make-up of the Board to add an RPEA member seat to the board and subcommittees where the board establishes or updates regulations impacting the retiree health plan.

The Division will draft administrative regulations to formalize the process currently employed to review proposed changes to the retiree health plans. These regulations will be reviewed with the appropriate RHPAB subcommittee, and the public will have at least 60 days to comment on any resulting proposed regulations.

These changes are intended to improve communication with plan members and reduce avoidable legal expenses.

Purpose of the Valuations

Purpose of the 2021 Valuations

- Measure each plan's funded status as of June 30, 2021
- Compare *actual* FY21 experience (assets and liabilities) to *expected* experience based on the assumptions used in the 2020 valuations
- Provide the basis for FY24 contribution rates

2021 Valuation Highlights (PERS and TRS)

Highlights of 2021 Valuation Results (PERS and TRS)

- Asset performance
 - FY21 asset returns **exceeded** the 7.38% expected return
 - ❑ Market returns were approximately 30%
 - ❑ Due to 5-year asset smoothing, actuarial returns were approximately 12%
- Liability experience
 - Liabilities are **less** than expected. Overall liability gains/(losses) and the more significant gain/(loss) amounts are:

Source	PERS		TRS	
	<u>Pension</u>	<u>Healthcare</u>	<u>Pension</u>	<u>Healthcare</u>
PRPA/COLA increases	\$155M		\$82M	
Salary increases	\$(17)M		\$(29)M	
Per capita claims cost		\$272M		\$97M
Plan changes		\$62M		\$22M
Overall gains/(losses)	\$161M	\$384M	\$56M	\$131M
- as % of 6/30/21 liability	1.0%	5.6%	0.7%	5.4%

The result:

- Funded ratios are up
- Contribution rates are down

Highlights of 2021 Valuation Results (cont'd)

- Key reasons for the \$272M (PERS) and \$97M (TRS) per capita claims cost gains:
 - Medical costs are lower than projected (4% lower for Pre-Medicare / 5% lower for Medicare)
 - EGWP subsidy provided by Optum increased by 16% from \$1,003 for 2021 to \$1,168 for 2022

	Medical			Prescription Drugs (Rx)		
	Pre-Medicare	Medicare Parts A & B	Medicare Part B Only	Pre-Medicare	Medicare	EGWP
Fiscal 2022 valuation age 65 per capita cost						
- Expected	16,358	1,705	5,628	3,647	3,591	(1,078)
- Actual	15,708	1,619	5,341	3,695	3,560	(1,168)
- Dollar (Gain) / Loss	(650)	(86)	(287)	48	(31)	(90)
- Percentage (Gain) / Loss	-4.0%	-5.0%	-5.1%	1.3%	-0.9%	8.3%

Note: The actual per capita costs in this table are before reflecting the impact of plan changes shown on the next slide.

Highlights of 2021 Valuation Results (cont'd)

- Two healthcare plan changes will be effective January 1, 2022:
 - Preventive benefits are being added for pre-Medicare members
 - Prior authorization of certain specialty medications is being implemented
- The estimated impact of these changes was provided by Segal
- Adjustments to the 6/30/21 valuation per capita costs to reflect these plan changes are as follows:

	Medical			Prescription Drugs (Rx)		
	Pre-Medicare	Medicare Parts A & B	Medicare Part B Only	Pre-Medicare	Medicare	EGWP
Fiscal 2022 valuation age 65 per capita cost						
- Prior to plan changes	15,708	1,619	5,341	3,695	3,560	(1,168)
- Impact of plan changes	1.4%	0.0%	0.0%	-8.7%	-2.4%	-3.2%
- After plan changes	15,926	1,619	5,341	3,375	3,474	(1,131)

Note: Figures in this table may differ due to rounding.

COVID-19 Impact – Medical Incurred Claims

Per Member Per Month (PMPM)

U65 Retiree Plan Medical PMPM Cost

O65 Retiree Plan Medical PMPM Cost

- Material decrease in PMPM cost during March – June of 2020 due to COVID-19
- Fiscal 2021 PMPM medical cost was lower than pre-COVID levels, so a 4% load was added to the Fiscal 2021 medical claims used in the per capita claims cost development to better reflect expected long-term costs

COVID-19 Impact – Rx Incurred Claims

Per Member Per Month (PMPM)

U65 Retiree Plan Rx PMPM Cost

O65 Retiree Plan Rx PMPM Cost

- Observed a spike in prescription drug claims in March 2020 (see next slide for details)
- Fiscal 2021 PMPM Rx cost not impacted by COVID like medical

Details on March 2020 Spike in Rx Claims

- Because of COVID-19, Alaska permitted early refill of medications and members also increased utilization of home delivery and Retail 90 prescriptions

	Non-EGWP	EGWP
From Optum's Q1 2020 report (Q1 2020 vs Q1 2019):		
- Increase in overall plan paid PMPM trend	11.2%	21.9%
- Increase in Rx Count	20.1%	11.5%
- Increase in Rx Count due to COVID-19 (Refill Too Soon exception)	3.0%	3.5%
- Home delivery rate change (from 11.6% to 11.4% & 14.9% to 16.8%)	-0.2%	1.9%
From Optum's Q1 2021 report (Q1 2021 vs Q1 2020):		
- Home delivery rate change (from 11.4% to 11.5% & 16.8% to 18.3%)	0.1%	1.5%
- Retail 90 rate (from 34.7% to 34.8% & 35.2% to 35.6%)	0.1%	0.4%

2021 Valuation Projections

2021 Valuation Projections - Background

- Because of the unusually large FY21 market asset gains, the pension trusts are currently projected to be 100% funded by FY37 (PERS) and by FY32 (TRS) – much sooner than prior years' projections
- When the pension trusts are projected to be 100% funded, we still have non-zero unfunded liability layered amortization amounts
 - These positive amortization amounts generate Additional State Contributions in years *after* the pension trusts are projected to be 100% funded → this leads to pension trust funded ratios *greater* than 100%
- Now or at some point in the future, the ARMB may want to consider modifying the 25-year layered amortization method such that all remaining layered amortization amounts are eliminated when a trust reaches a funded status of 100%, thereby avoiding funding the trust above 100%*.

* The healthcare trusts are currently more than 100% funded. If the ARMB were to implement this change, the healthcare unfunded liability amortization amounts (which are negative) would also be eliminated. However, this does not impact the current projections.

2021 Valuation Projections – Background (cont'd)

- To illustrate the impact of this potential change, we have included two alternative projections for the PERS and TRS pension trusts:
 - Alternative 1 – Current state (no changes to future unfunded liability amortization amounts)
 - Alternative 2 – Eliminate all remaining unfunded liability amortization amounts once the trust is projected to be 100% funded
- We considered each of these alternatives under two asset return scenarios*:
 - Scenario A – Market return of 7.38% in all years
 - Scenario B – Market return of 7.38% in all years except FY33 return of -10% (i.e., in the year after TRS is projected to be 100% funded)

* The impact of potential adverse asset returns (Scenario B) on future PERS contributions is not as significant as it is for TRS. Accordingly, projections for PERS are shown for Scenario A only.

2021 Valuation Projections – Background (cont'd)

- Why make the change?
 - Avoids funding the pension trust above 100%
 - ❑ *Without* the change, the FY39 funded ratio of the TRS pension trust is projected to be **115%** assuming expected asset returns in all years – see Alternative 1A on slide 68
 - ❑ *With* the change, the FY39 funded ratio of the TRS pension trust is projected to be **100%** assuming expected asset returns in all years – see Alternative 2A on slide 68
- Why not make the change?
 - If TRS experiences an adverse market return in FY33
 - ❑ The amortization amounts from the FY21 market gain are *negative*. If these negative amortization amounts are maintained (Alternative 1), they will mitigate against the *positive* amortization amounts from the FY33 adverse market return
 - ❑ Contributing the higher amounts in FY33-FY39 (Alternative 1) will lead to a higher projected FY39 funded ratio → see Alternative 1B (**92%**) vs Alternative 2B (**77%**) on slide 68

2021 Valuation Projections – Background (cont'd)

Summary of FY24-FY62 TRS employer contributions and Additional State Contributions (ASC's) (\$000's):

Asset Return Scenario	Alternative 1			Alternative 2		
	<u>Employer</u>	<u>ASC's</u>	<u>Total</u>	<u>Employer</u>	<u>ASCs</u>	<u>Total</u>
A - Expected Returns	\$446,193	\$1,182,244	\$1,628,437	\$338,616	\$629,575	\$968,191
B - FY33 Return of -10%	\$794,741	\$2,617,898	\$3,412,639	\$950,338	\$3,064,566	\$4,014,904

Projected TRS pension funded ratios in FY39:

Asset Return Scenario	Alternative 1	Alternative 2
A – Expected Returns	115%	100%
B – FY33 Return of -10%	92%	77%

With expected returns each year:

- Employer contributions and ASC's thru FY62 are **lower under Alternative 2** (\$968M vs \$1,628M) because the positive pension amortization amounts after FY32 have been eliminated.

With adverse return in FY33:

- Employer contributions and ASC's are **lower under Alternative 1** (\$3,413M vs \$4,015M) because the negative pension amortization amounts from the FY21 asset gain are maintained, which will offset the positive amortization amounts from the FY33 asset loss.

2021 Valuation Projections – Assumptions

- All experience after 6/30/21 matches valuation assumptions
- 0% active plan population growth overall, all new hires enter the DCR plans
- DCR contribution rates as of 6/30/21 assumed to remain constant
- Active rehire assumption grades to zero uniformly over 20 years
- Normal Cost percentage load for administrative expenses assumed to remain constant
- Additional State Contributions were allocated 100% to pension each year
- The FY23 contribution rates adopted by the ARMB in October 2021 are reflected
- The healthcare Normal Cost was assumed to be deposited to the healthcare trusts in FY24 and later
- The percentage of total PERS DB/DCR payroll attributable to the State's employees based on the June 30, 2021 data (approximately 50%) was assumed to remain constant in all years

Note: The 2020 valuation projections are shown for comparison purposes, and reflect SB 55 that was implemented effective July 1, 2021. See Section 3.1 of the June 30, 2020 valuation reports for the 2020 valuation projection assumptions.

PERS Projections

PERS – State-as-an-Employer Contributions

(\$millions)

Under 2021 Valuation Alternative 1A, State-as-an-Employer Contributions continue to increase after the pension trust is projected to reach a funded status of 100%.

Under 2021 Valuation Alternative 2A, State-as-an-Employer Contributions are reduced to the Normal Cost after the pension trust is projected to reach a funded status of 100%.

PERS – Additional State Contributions

(\$millions)

Under 2021 Valuation Alternative 1A, Additional State Contributions continue after the pension trust is projected to reach a funded status of 100%.

Under 2021 Valuation Alternative 2A, Additional State Contributions are zero after the pension trust is projected to reach a funded status of 100%.

PERS – Total State Contributions

State-as-an-Employer contributions and Additional State Contributions thru FY39 are **lower under Alternative 2A vs Alternative 1A** because the positive amortization amounts after FY37 are eliminated under Alternative 2A.

Total State contributions thru FY62 are **also lower under Alternative 2A vs Alternative 1A**.

PERS – Projected Funded Ratios of Pension Trust

(based on Actuarial Value of Assets)

TRS Projections

TRS – Additional State Contributions

(\$millions)

All 2021 valuation alternative scenarios are the same through FY32.

The increases after FY33 under Alternatives 1B and 2B are due to the adverse FY33 market return.

Additional State Contributions are projected to be **zero** after FY39 with expected returns each year (Alternatives 1A and 2A).

Additional State Contributions are projected to be **non-zero** after FY39 with adverse FY33 returns (Alternatives 1B and 2B).

TRS – Additional State Contribution Projection Summary

(\$millions)

Fiscal Year	Additional State Contributions				
	2020 Valuation	2021 Valuation Alternative 1A	2021 Valuation Alternative 2A	2021 Valuation Alternative 1B	2021 Valuation Alternative 2B
2023	145.6	91.0	91.0	91.0	91.0
2024	152.9	90.2	90.2	90.2	90.2
2025	158.8	77.0	77.0	77.0	77.0
2026	162.7	61.7	61.7	61.7	61.7
2027	166.6	63.0	63.0	63.0	63.0
2028	170.8	64.5	64.5	64.5	64.5
2029	175.0	65.9	65.9	65.9	65.9
2030	179.6	67.4	67.4	67.4	67.4
2031	184.4	69.1	69.1	69.1	69.1
2032	189.3	70.8	70.8	70.8	70.8
2033	194.4	72.7	0.0	72.7	0.0
2034	199.6	74.5	0.0	89.8	0.2
2035	205.1	76.7	0.0	112.1	19.8
2036	210.6	78.8	0.0	133.8	38.7
2037	216.5	81.0	0.0	155.0	57.1
2038	222.5	83.3	0.0	175.6	74.9
2039	228.7	85.6	0.0	180.5	77.0
Sub-Total	3,163.1	1,273.2	720.6	1,640.1	988.3
2040-2062	0.0	0.0	0.0	1,068.9	2,167.3
Total	3,163.1	1,273.2	720.6	2,709.0	3,155.6

Comparing Alternatives 1A and 2A (expected returns each year):

- Additional State Contributions thru FY39 are **lower under Alternative 2A vs Alternative 1A** because the positive amortization amounts after FY32 are eliminated.

Comparing Alternatives 1B and 2B (adverse return in FY33):

- Additional State Contributions thru FY39 are **lower under Alternative 2B vs Alternative 1B** because the positive amortization amounts after FY32 are eliminated.
- If we also consider FY40-FY62, Additional State Contributions in these years are **lower under Alternative 1B vs Alternative 2B** because the negative amortization amounts from the FY21 asset gain are maintained.

TRS – Projected Funded Ratios of Pension Trust

(based on Actuarial Value of Assets)

All 2021 valuation alternative scenarios are the same through FY32

Healthcare Sensitivities

Healthcare Sensitivities - Background

- The PERS and TRS healthcare trusts are currently more than 100% funded, and have been so for the last few years due to several reasons
 - Favorable claims experience
 - Implementation of EGWP in 2019
 - New prescription drug contract with Optum in 2019
 - Plan changes made effective in 2022
 - Favorable asset returns
 - Contributing the healthcare Normal Cost per Alaska statutes
- If the healthcare Normal Cost continues to be deposited to the healthcare trust, the funded status of each healthcare trust is expected to continue to increase absent future adverse experience or changes in plan provisions and/or actuarial assumptions
- We have illustrated how the projected funded ratios of the healthcare trusts would change if the increases in healthcare costs during each of the next 2 years are*:
 - 5% higher than the valuation trend rate assumption
 - 10% higher than the valuation trend rate assumption

* Assuming no other gains/losses, and no changes in plan provisions and/or actuarial assumptions

Actuarial Certification

Actuarial Certification

The purpose of this presentation is to provide the ARMB Actuarial Committee with June 30, 2021 valuation results and projections for discussion at the March 16, 2022 meeting. This presentation should be considered part of the June 30, 2021 actuarial valuation report services.

The data, assumptions, methods, and plan provisions used to determine the results shown in this presentation are as shown in the draft June 30, 2021 actuarial valuation reports. The draft June 30, 2021 actuarial valuation reports include details related to potential risks associated with the plans (ASOP 51), and information regarding our use of models (ASOP 56).

Where presented, references to “funded ratio” and “unfunded actuarial accrued liability” typically are measured on an actuarial value of assets basis. It should be noted that the same measurements using market value of assets would result in different funded ratios and unfunded actuarial accrued liabilities. Moreover, the funded ratio presented is appropriate for evaluating the need and level of future contributions but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e., purchase annuities) all or a portion of its liabilities.

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the economic and demographic assumptions, increases or decreases expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions or applicable law.

The results were prepared under the direction of David Kershner and Scott Young, both of whom meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein. These results have been prepared in accordance with all applicable Actuarial Standards of Practice.

27	Draft Actuarial Review Report to Buck	2/28/22			GRS	
28	Monthly Audit Discussion with GRS / Buck	3/9/22			GRS / Buck	
29	Actuarial Committee Meeting - 6/30/21 valuation results (full), projections, draft valuation reports, demographic assumptions for experience study	3/16/22			All	Juneau. Deadline for meeting materials is 2/25. Also include updated economic assumptions.
30	Monthly Audit Discussion with GRS / Buck	4/20/22			GRS / Buck	
31	Actuarial Committee Meeting - follow-up to March meeting (if needed)	4/28/22			All	Teleconference.
32	Monthly Audit Discussion with GRS / Buck	5/18/22			GRS / Buck	
33	Actuarial Committee Meeting - final valuation reports, follow-up discussion on assumptions for experience study	6/15/22			All	Anchorage. Deadline for meeting materials is 5/27.

Note: All deadline and completion dates are specific to PERS/TRS.

State of Alaska

Public Employees' Retirement System

Actuarial Valuation Report
As of June 30, 2021

January 2022

DRAFT

January 26, 2022

State of Alaska

The Alaska Retirement Management Board

The Department of Revenue, Treasury Division

The Department of Administration, Division of Retirement and Benefits

P.O. Box 110203

Juneau, AK 99811-0203

Certification of Actuarial Valuation

Dear Members of The Alaska Retirement Management Board, The Department of Revenue and The Department of Administration:

This report summarizes the annual actuarial valuation results of the State of Alaska Public Employees' Retirement System (PERS) as of June 30, 2021 performed by Buck Global, LLC (Buck).

The actuarial valuation is based on financial information provided in the financial statements audited by KPMG LLP, member data provided by the Division of Retirement and Benefits, and medical enrollment data provided by the healthcare claims administrator (Aetna), as summarized in this report. The benefits considered are those delineated in Alaska statutes effective June 30, 2021. The actuary did not verify the data submitted, but did perform tests for consistency and reasonableness.

All costs, liabilities and other factors under PERS were determined in accordance with generally accepted actuarial principles and procedures. An actuarial cost method is used to measure the actuarial liabilities which we believe is reasonable. Buck is solely responsible for the actuarial data and actuarial results presented in this report. This report fully and fairly discloses the actuarial position of PERS as of June 30, 2021.

PERS is funded by Employer, State, and Member Contributions in accordance with the funding policy adopted by the Alaska Retirement Management Board (Board) and as required by Alaska state statutes. The funding objective for PERS is to pay required contributions that remain level as a percent of total PERS compensation. The Board has also established a funding policy objective that the required contributions be sufficient to pay the Normal Costs of active plan members, plan expenses, and amortize the Unfunded Actuarial Accrued Liability (UAAL) as a level percentage of total PERS compensation over a closed 25-year period as required by Alaska state statutes. The closed 25-year period was originally established effective June 30, 2014. Effective June 30, 2018, the Board adopted a 25-year layered UAAL amortization method as described in Section 5.2. The UAAL amortization continues to be on a level percent of pay basis. The compensation used to determine required contributions is the total compensation of all active members in PERS, including those hired after July 1, 2006 who are members of the Defined Contribution Retirement (DCR) Plan. This objective is currently being met and is projected to continue to be met. Absent future gains/losses, actuarially determined contributions are expected to remain level as a percent of pay and the overall funded status (on a combined pension/healthcare basis) is expected to increase to 100% in FY26 (the funded status of the pension trust is expected to increase to 100% in FY38).

SB 55 was effective July 1, 2021. Under SB 55:

- The State-as-an-Employer contributes the full actuarial contribution rate based on the DB/DCR payroll of its employees (which is approximately 50% of the total PERS DB/DCR payroll).
- Non-State employers continue to contribute 22% of their DB/DCR payroll.
- The Additional State Contributions are based on the excess of the DB actuarial contribution rate and the DB contributions made by non-State employers.

The Board and staff of the State of Alaska may use this report for the review of the operations of PERS. Use of this report for any other purpose or by anyone other than the Board or staff of the State of Alaska may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the report for that purpose. Because of the risk of misinterpretation of actuarial results, you should ask Buck to review any statement you wish to make on the results contained in this report. Buck will not accept any liability for any such statement made without the review by Buck.

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the actuarial assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions or applicable law. In particular, retiree group benefits models necessarily rely on the use of approximations and estimates and are sensitive to changes in these approximations and estimates. Small variations in these approximations and estimates may lead to significant changes in actuarial measurements. An analysis of the potential range of such future differences is beyond the scope of this valuation.

In our opinion, the actuarial assumptions used are reasonable, taking into account the experience of the plan and reasonable long-term expectations, and represent our best estimate of the anticipated long-term experience under the plan. The actuary performs an analysis of plan experience periodically and recommends changes if, in the opinion of the actuary, assumption changes are needed to more accurately reflect expected future experience. The last full experience analysis was performed for the period July 1, 2013 to June 30, 2017. Based on that experience study, the Board adopted new assumptions effective beginning with the June 30, 2018 valuation to better reflect expected future experience. Based on our annual analysis of recent claims experience, changes were made to the per capita claim cost rates effective June 30, 2021 to better reflect expected future healthcare experience. A summary of the actuarial assumptions and methods used in this actuarial valuation is shown in Sections 5.2 and 5.3. We certify that the assumptions and methods described in Sections 5.2 and 5.3 of this report meet the requirements of all applicable Actuarial Standards of Practice.

Governmental Accounting Standards Board (GASB) Statement No. 67 (GASB 67) was effective for PERS beginning with fiscal year ending June 30, 2014, and Statement No. 74 (GASB 74) was effective for PERS beginning with fiscal year ending June 30, 2017. Separate GASB 67 and GASB 74 reports as of June 30, 2021 have been prepared. We have also prepared the member data tables shown in Section 4 of this report for the Statistical Section of the ACFR, as well as the summary of actuarial assumptions and analysis of financial experience for the Actuarial Section of the ACFR. Please see our separate GASB 67 and GASB 74 reports for other information needed for the ACFR.

Assessment of Risks

Actuarial Standard of Practice No. 51 (ASOP 51) applies to actuaries performing funding calculations related to a pension plan. ASOP 51 does not apply to actuaries performing services in connection with other post-employment benefits, such as medical benefits. Accordingly, ASOP 51 does not apply to the healthcare portion of PERS. See Section 6 of this report for further details regarding ASOP 51.

Use of Models

Actuarial Standard of Practice No. 56 (ASOP 56) provides guidance to actuaries when performing actuarial services with respect to designing, developing, selecting, modifying, using, reviewing, or evaluating models. Buck uses third-party software in the performance of annual actuarial valuations and projections. The model is intended to calculate the liabilities associated with the provisions of the plan using data and assumptions as of the measurement date under the funding methods specified in this report. The output from the third-party vendor software is used as input to internally developed models that apply applicable funding methods and policies to the derived liabilities and other inputs, such as plan assets and contributions, to generate many of the exhibits found in this report. Buck has an extensive review process in which the results of the liability calculations are checked using detailed sample life output, changes from year to year are summarized by source, and significant deviations from expectations are investigated. Other funding outputs and the internal models are similarly reviewed in detail and at a higher level for accuracy, reasonability, and consistency with prior results. Buck also reviews the third-party model when significant changes are made to the software. This review is performed by experts within Buck who are familiar with applicable funding methods, as well as the manner in which the model generates its output. If significant changes are made to the internal models, extra checking and review are completed. Significant changes to the internal models that are applicable to multiple clients are generally developed, checked, and reviewed by multiple experts within Buck who are familiar with the details of the required changes.

Additional models used in valuing health benefits are described later in the report.

COVID-19

The potential impact of the ongoing COVID-19 pandemic on costs and liabilities was considered and an adjustment was made in setting the medical per capita claims cost assumption. FY20 medical claims were adjusted for a COVID-19 related decline in claims during the last four months (March – June) of FY20. FY21 medical claims were adjusted for a COVID-19 related decline in those claims during the fiscal year. A more detailed explanation on these adjustments is shown in Section 5.2.

This report was prepared under my supervision and in accordance with all applicable Actuarial Standards of Practice. I am a Fellow of the Society of Actuaries, an Enrolled Actuary, a Fellow of the Conference of Consulting Actuaries, and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

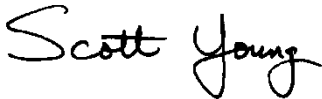

I am available to discuss this report with you at your convenience. I can be reached at 602-803-6174.

Respectfully submitted,

David J. Kershner, FSA, EA, MAAA, FCA
Principal

The undersigned actuary is responsible for all assumptions related to the average annual per capita health claims cost and the health care cost trend rates, and hereby affirms his qualification to render opinions in such matters in accordance with the Qualification Standards of the American Academy of Actuaries.

Scott Young, FSA, EA, MAAA, FCA
Director
Buck

DRAFT

Executive Summary

Overview

The State of Alaska Public Employees' Retirement System (PERS) provides pension and postemployment healthcare benefits to eligible participants. The Commissioner of the Department of Administration is responsible for administering the plan. The Alaska Retirement Management Board has fiduciary responsibility over the assets of the plan. This report presents the results of the actuarial valuation of PERS as of the valuation date of June 30, 2021.

Purpose

An actuarial valuation is performed on the plan annually as of the end of the fiscal year. The main purposes of the actuarial valuation detailed in this report are:

1. To determine the Employer/State contribution necessary to meet the Board's funding policy for the plan;
2. To disclose the funding assets and liability measures as of the valuation date;
3. To review the current funded status of the plan and assess the funded status as an appropriate measure for determining future actuarially determined contributions;
4. To compare actual and expected experience under the plan during the last fiscal year; and
5. To report trends in contributions, assets, liabilities, and funded status over the last several years.

The actuarial valuation provides a "snapshot" of the funded position of PERS based on the plan provisions, membership data, assets, and actuarial methods and assumptions as of the valuation date.

Actuarial projections are also performed to provide a long-term view of the expected future funded status and contribution patterns (see Section 3). The future funded status and contribution patterns would be different than those shown in Section 3 if future experience does not match the actuarial assumptions used in the projections.

Retiree group benefits models necessarily rely on the use of approximations and estimates, and are sensitive to changes in these approximations and estimates. Small variations in these approximations and estimates may lead to significant changes in actuarial measurements.

Funded Status

Where presented, references to "funded ratio" and "unfunded actuarial accrued liability" typically are measured on an actuarial value of assets basis. It should be noted that the same measurements using market value of assets would result in different funded ratios and unfunded accrued liabilities. Moreover, the funded ratio presented is appropriate for evaluating the need and level of future contributions but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e. purchase annuities) for a portion or all of its liabilities.

Funded Status as of June 30 (\$'s in 000's)**2020****2021****Pension**

a. Actuarial Accrued Liability	\$ 15,279,525	\$ 15,419,975
b. Valuation Assets	<u>9,713,710</u>	<u>10,466,709</u>
c. Unfunded Actuarial Accrued Liability, (a) - (b)	\$ 5,565,815	\$ 4,953,266
d. Funded Ratio based on Valuation Assets, (b) ÷ (a)	63.6%	67.9%
e. Fair Value of Assets	\$ 9,469,161	\$ 11,912,309

Funded Ratio History (Based on Valuation Assets)

The key reasons for the change in the funded status are explained below. The funded status for healthcare benefits is not necessarily an appropriate measure to confirm that assets are sufficient to settle health plan obligations as there are no available financial instruments for purchase. Future experience is likely to vary from assumptions, so there is potential for actuarial gains or losses.

1. Investment Experience

The actuarial asset value was reinitialized to equal fair value of assets as of June 30, 2014. Beginning in FY15, the asset valuation method recognizes 20% of the investment gain or loss each year, for a period of five years. The FY21 investment return based on fair value of assets was approximately 30.0% compared to the expected investment return of 7.38% (net of investment expenses). This resulted in a market asset gain of approximately \$3,834 million. Due to the recognition of investment gains and losses over a 5-year period, the FY21 investment return based on actuarial value of assets was approximately 11.6%, which resulted in an actuarial asset gain of approximately \$734 million.

2. Salary Increases

Salary increases for continuing active members during FY21 were higher than expected based on the valuation assumptions, resulting in a liability loss of approximately \$17 million.

3. Demographic Experience

Section 4 provides statistics on active and inactive participants. The number of active participants decreased 10.4% from 11,033 at June 30, 2020 to 9,888 at June 30, 2021 due to active members exiting the plan during the year (due to retirement, termination, death, and disability) and the closure of the plan to new entrants as of July 1, 2006. The average age of active participants increased from 53.21 to 53.51 and average credited service increased from 18.38 to 18.96 years.

The number of benefit recipients increased 1.6% from 37,106 to 37,717 and their average age increased from 70.77 to 71.17. The number of vested terminated participants decreased 3.6% from 5,327 to 5,135. Their average age increased from 53.52 to 53.92.

The overall effect of the demographic experience during FY21 was a liability gain of approximately \$4.3 million (pension) and a liability gain of approximately \$30.3¹ million (healthcare).

4. COLA / PRPA Experience

The cost-of-living increases (COLA) for benefit recipients during FY21 were less than expected based on the valuation assumptions, resulting in a liability gain of approximately \$6 million. The postretirement pension adjustments (PRPA) were also less than expected, resulting in a liability gain of approximately \$149 million.

5. Retiree Medical Claims Experience

As described in Section 5.2, recent medical claims experience and changes in healthcare enrollment data provided to us for the June 30, 2021 valuation generated a liability gain of approximately \$272 million. Reduced claims during FY21, largely attributable to medical claims impacted by COVID-19, generated a liability gain of approximately \$21 million.

¹ Includes the effects of changes in dependent coverage elections and Medicare Part B only experience.

6. Changes in Methods Since the Prior Valuation

There were no changes in actuarial methods since the prior valuation.

7. Changes in Assumptions Since the Prior Valuation

Healthcare claim costs are updated annually as described in Section 5.2. The amounts included in the Normal Cost for administrative expenses were updated based on the last two years of actual administrative expenses paid from plan assets. There were no other changes in actuarial assumptions since the prior valuation.

8. Changes in Benefit Provisions Since the Prior Valuation

Starting in 2022, prior authorization will be required for certain specialty medications for all participants, and certain preventive benefits for pre-Medicare participants will now be covered by the plan. These changes created an actuarial gain of approximately \$62 million.

Under SB 55 that was effective July 1, 2021: (i) The State-as-an-Employer contributes the full actuarial contribution rate based on the DB/DCR payroll of its employees (which is approximately 50% of the total PERS DB/DCR payroll); (ii) Non-State employers continue to contribute 22% of their DB/DCR payroll; (iii) the Additional State Contributions are based on the excess of the DB actuarial contribution rate and the DB contributions made by non-State employers.

There have been no other changes in benefit provisions valued since the prior valuation.

Projections

Absent future asset (and/or liability) losses, changes in plan provisions or actuarial assumptions, the \$3,834 million FY21 market asset gain has a significant impact on the projections shown in Section 3. For example, the pension trust is currently projected to reach a funded status of 100% in FY38. Based on the 2020 valuation projections, the funded status of the pension trust was projected to be only 85% in FY38.

Once the pension trust is projected to reach of funded status of 100%, it may be reasonable to assume that all remaining pension unfunded liability layered amortization amounts should be reduced to zero. Since the healthcare trust is currently more than 100% funded, the healthcare unfunded liability amortization amounts would also be reduced to zero if the Board decides to implement this change (this does not impact the projections shown in Section 3.6 since the healthcare Normal Cost is assumed to be contributed as a minimum in all years after FY23 per Alaska state statutes).

We have shown the table of projected figures in Section 3.6 two ways:

- a) Section 3.6A – No changes to the pension unfunded liability layered amortization amounts. In this case, Additional State Contributions totaling approximately \$59 million are projected for FY38-FY39, even though the pension trust is projected to be 100% funded in FY38.
- b) Section 3.6B – Eliminate the pension unfunded liability layered amortization amounts when the pension trust is projected to be 100% funded. In this case, the Additional State Contributions are projected to be zero after FY37.

The pros and cons of these two methods can be discussed further upon request.

In both cases, the pension Normal Cost is assumed to be contributed as a minimum based on Alaska state statutes. (The healthcare trust is currently over 100% funded, so the healthcare Normal Cost is also assumed to be contributed as a minimum based on Alaska state statutes.)

Sections 3.3 through 3.5 are based on the projections shown in Section 3.6A.

Comparative Summary of Contribution Rates

Pension	Actual FY 2023	Estimated FY 2024
a. Normal Cost Rate Net of Member Contributions	2.37%	2.14%
b. Past Service Cost Rate	<u>16.01%</u>	<u>14.38%</u>
c. Total Employer/State Contribution Rate, (a) + (b), not less than (a) ¹	18.38%	16.52%
Healthcare	Actual FY 2023	Estimated FY 2024
a. Normal Cost Rate	2.84%	2.50%
b. Past Service Cost Rate	<u>(4.94%)</u>	<u>(7.45%)</u>
c. Total Employer/State Contribution Rate, (a) + (b), not less than (a) ¹	2.84%	2.50%
Total	Actual FY 2023	Estimated FY 2024
a. Normal Cost Rate Net of Member Contributions	5.21%	4.64%
b. Past Service Cost Rate	<u>16.01%</u>	<u>14.38%</u>
c. Total Employer/State Contribution Rate, (a) + (b) ¹	21.22%	19.02%
d. Board Adopted Total Employer/State Contribution Rate	18.38% ²	TBD
e. Defined Contribution Retirement (DCR) Rate Paid by Employers	<u>6.41%</u>	<u>6.63%</u>
f. Board Adopted Total Rate, Including DCR Rate Paid by Employers, (d) + (e)	24.79%	TBD

Contribution rates are based on total (DB and DCR) payroll. The contribution rates shown above for FY24 are estimated assuming no actuarial gains/losses during FY22 and FY23. Actual FY24 contribution rates will be adopted by the Board in September 2022 reflecting FY22 asset experience.

Contribution rates include Employer contribution rates as limited by Alaska state statutes and the Additional State Contribution required under SB 125.

¹ Beginning with the June 30, 2014 valuation, contribution rates for FY17 and beyond are determined using new methodology in accordance with 2014 legislation under HB 385 and SB 119, 2014 Alaska Laws, which changed the amortization methodology to a closed 25-year period as a level percentage of pay, and eliminated the time lag on the contribution rate calculation by using a 2-year "roll-forward" approach assuming 0% population growth. Investment gains and losses are recognized over a 5-year period beginning in FY15. Beginning with the June 30, 2018 valuation, the UAAL amortization was changed as described in Section 5.2.

² The FY23 contribution rates adopted by the Board in October 2021 were 18.38% for Pension and 0.00% for Healthcare.

Summary of Actuarial Accrued Liability Gain/(Loss) and Other Changes During the Year

The following table summarizes the sources of change in the total Employer/State contribution rate as of June 30, 2020 and June 30, 2021 based on DB and DCR payroll combined:

	Pension	Healthcare	Total
1. Total Employer/State Contribution Rate as of June 30, 2020	20.54%	3.57%	24.11%
2. Change due to:			
a. Health Claims Experience	N/A	(0.12)%	(0.12)%
b. Salary Increases	0.05%	N/A	0.05%
c. Investment Experience	(1.06)%	0.00%	(1.06)%
d. Demographic Experience and Miscellaneous ¹	(0.54)%	(0.26)%	(0.80)%
e. Actual vs Expected Contributions	(0.06)%	0.00%	(0.06)%
f. Assumption/Method Changes	0.00%	0.00%	0.00%
g. Plan Changes	<u>0.00%</u>	<u>(0.03)%</u>	<u>(0.03)%</u>
h. Total Change, (a) + (b) + (c) + (d) + (e) + (f) + (g)	(1.61)%	(0.41)%	(2.02)%
3. Total Employer/State Contribution Rate as of June 30, 2021, (1) + (2)(h)	18.93%	3.16%	22.09%

The following table shows the FY21 gain/(loss) on actuarial accrued liability as of June 30, 2021 (\$'s in 000's):

	Pension	Healthcare	Total
Retirement Experience	\$ (7,211)	\$ 7,125	\$ (86)
Termination Experience	(7,963)	(10,409)	(18,372)
Disability Experience	6,650	10,858	17,508
Active Mortality Experience	14,401	(745)	13,656
Inactive Mortality Experience	(1,576)	2,684	1,108
Salary Increases	(17,126)	N/A	(17,126)
Rehires (Net of Rehire Load)	15,067	14,045	29,112
Transfers between Peace/Fire and Others	(1,706)	(161)	(1,867)
COLA Increases	5,956	N/A	5,956
PRPA Increases	149,186	N/A	149,186
Benefit Payments Different than Expected	19,147	21,107	40,254
Per Capita Claims Cost	N/A	272,205	272,205
Medical and Prescription Drug Plan Changes	N/A	61,807	61,807
Medicare Part B Only Experience	N/A	5,743	5,743
Changes in Dependent Coverage Elections	N/A	15,017	15,017
Programming Changes ²	(512)	N/A	(512)
Miscellaneous ³	<u>(13,480)</u>	<u>(15,552)</u>	<u>(29,032)</u>
Total	\$ 160,833	\$ 383,724	\$ 544,557

¹ Includes the effects of census data changes between the two valuations.

² Includes adjustments to (a) the 10% COLA to apply immediately for all disabled members, and (b) the PRPA increases for Peace Officer/Firefighters who retire from occupational disability.

³ Includes the effects of various data changes that are typical when new census data is received for the annual valuation, as well as other items that do not fit neatly into any of the other categories. The pension amount includes a loss of \$10,900 for unexpected beneficiaries and QDRO's based on last year's data, and the healthcare amount includes a loss of \$10,592 for changes in spouses' dates of birth in the data.

The rehire gain/(loss) amount shown on the previous page is the difference between (i) the increase in Actuarial Accrued Liability at June 30, 2021 due to rehires during the most recent plan year, and (ii) the load that was added to the June 30, 2020 Normal Cost based on the rehire load assumption used in the June 30, 2020 valuation. The development of the FY21 rehire gain/(loss) amount is shown in the table below (\$'s in 000's):

	Pension	Healthcare	Total
1. Increase/(Decrease) in Actuarial Accrued Liability at June 30, 2021 due to Rehires	\$ 7,095	\$ (1,523)	\$ 5,572
2. June 30, 2020 Normal Cost Rehire Load, with interest to June 30, 2021	\$ 22,162	\$ 12,522	\$ 34,684
3. Rehire Gain/(Loss), (2) - (1)	\$ 15,067	\$ 14,045	\$ 29,112

Section 2.2: Changes in Fair Value of Assets During FY21 (\$'s in 000's)

Fiscal Year 2021	Pension	Healthcare	Total
1. Fair Value of Assets as of June 30, 2020	\$ 9,469,161	\$ 7,813,511	\$ 17,282,672
2. Additions:			
a. Employee Contributions	\$ 70,614	\$ 0	\$ 70,614
b. Employer Contributions	312,538	68,191	380,729
c. State Assistance Contributions	203,585	0	203,585
d. Interest and Dividend Income	132,757	109,764	242,521
e. Net Appreciation / Depreciation in Fair Value of Investments	2,688,309	2,206,395	4,894,704
f. Employer Group Waiver Plan	0	52,545	52,545
g. Other	537	596	1,133
h. Total Additions	\$ 3,408,340	\$ 2,437,491	\$ 5,845,831
3. Deductions:			
a. Medical Benefits	\$ 0	\$ 440,234	\$ 440,234
b. Retirement Benefits	921,899	0	921,899
c. Refund of Contributions	8,107	0	8,107
d. Investment Expenses	26,954	21,768	48,722
e. Administrative Expenses	8,232	4,859	13,091
f. Total Deductions	\$ 965,192	\$ 466,861	\$ 1,432,053
4. Fair Value of Assets as of June 30, 2021	\$ 11,912,309	\$ 9,784,141	\$ 21,696,450
5. Approximate Fair Value Investment Return Rate during FY21 Net of Investment Expenses	30.1%	30.0%	30.0%

Section 2.3: Development of Actuarial Value of Assets (\$'s in 000's)

The actuarial value of asset was set equal to the fair value as of June 30, 2014 and the 20% corridor was eliminated. Investment gains and losses after June 30, 2014 are recognized 20% per year over 5 years.

	Pension	Healthcare	Total
1. Deferral of Investment Gain / (Loss) for FY21			
a. Fair Value of Assets as of June 30, 2020	\$ 9,469,161	\$ 7,813,511	\$ 17,282,672
b. Contributions	586,737	68,191	654,928
c. Employer Group Waiver Plan	0	52,545	52,545
d. Benefit Payments	930,006	440,234	1,370,240
e. Administrative Expenses	8,232	4,859	13,091
f. Actual Investment Return (net of investment expenses)	2,794,649	2,294,987	5,089,636
g. Expected Return Rate (net of investment expenses)	7.38%	7.38%	7.38%
h. Expected Return, Weighted for Timing	690,867	564,881	1,255,748
i. Investment Gain / (Loss) for the Year, (f) - (h)	2,103,782	1,730,106	3,833,888
2. Actuarial Value as of June 30, 2021			
a. Fair Value as of June 30, 2021	\$ 11,912,309	\$ 9,784,141	\$ 21,696,450
b. Deferred Investment Gain / (Loss)	1,445,600	1,202,986	2,648,586
c. Actuarial Value as of June 30, 2021, (a) - (b)	10,466,709	8,581,155	19,047,864
3. Ratio of Actuarial Value of Assets to Fair Value of Assets	87.9%	87.7%	87.8%
4. Approximate Actuarial Value Investment Return Rate during FY21 Net of Investment Expenses	11.6%	11.7%	11.6%

The tables below show the development of the gains/(losses) to be recognized in the current year (\$'s in 000's):

Pension

Section 3: Projections

Section 3.1: Projection Assumptions and Methods

Key Assumptions

- 7.38% investment return (net of investment expenses) on the Fair Value of Assets in all future years.
- The Actuarial Value of Assets was re-initialized to Fair Value as of June 30, 2014. The Actuarial Value of Assets after June 30, 2014 reflects the deferred gains and losses generated by the smoothing method. The current deferred amount is recognized in the first four years of the projections.
- Actuarial assumptions and methods as described in Section 5. No actuarial gains/losses are assumed after June 30, 2021.
- The actuarially calculated contribution rate using a two-year roll-forward approach is adopted each year.
- Projections assume a 0% increase in the total active member population. All new members are expected to enter the DCR plan.
- Contribution rates are determined as a percent of total DB and DCR payroll.
- The DCR contribution rate determined as of June 30, 2021 is assumed to remain constant in all future years.
- The active rehire assumption shown in Section 5 is assumed to grade to zero on a uniform basis over 20 years.
- The Normal Cost is increased by the administrative expenses shown in Section 5. For future years, the percent increase is assumed to remain constant.
- The % of total DB/DCR payroll represented by the State's employees based on the June 30, 2021 data was assumed to remain constant in all future years.
- In Section 3.6B, we assumed all remaining pension unfunded liability layered amortization amounts would be zero after the pension trust is projected to reach a funded status of 100%.

Section 3.2: Membership Projection

Projected Active Member Count

Projected DB and DCR Payroll

Projected Inactive Member Count

Section 3.3: Projected Employer/State Contribution Rates

Based on Total DB and DCR Payroll

Section 3.4: Projected Employer/State Contribution Amounts

Section 3.5: Projection of Funded Ratios

Section 5: Basis of the Actuarial Valuation

Section 5.1: Summary of Plan Provisions

Effective Date

January 1, 1961, with amendments through June 30, 2021. Chapter 82, 1986 Session Laws of Alaska, created a two-tier retirement system. Members who were first hired under PERS before July 1, 1986 (Tier 1) are eligible for different benefits than members hired after June 30, 1986 (Tier 2). Chapter 4, 1996 Session Laws of Alaska created a third tier for members who were first hired after June 30, 1996 (Tier 3). Chapter 9, 2005 Session Laws of Alaska, closed the plan to new members hired after June 30, 2006.

Administration of Plan

The Commissioner of Administration or the Commissioner's designee is the administrator of the system. The Attorney General of the state is the legal counsel for the system and shall advise the administrator and represent the system in legal proceedings.

Prior to June 30, 2005, the Public Employees' Retirement Board prescribed policies and adopted regulations and performed other activities necessary to carry out the provisions of the system. The Alaska State Pension Investment Board, Department of Revenue, Treasury Division was responsible for investing PERS funds.

On July 27, 2005, Senate Bill 141, enacted as Chapter 9, 2005 Session laws of Alaska, replaced the Public Employees' Retirement Board and the Alaska State Pension Investment Board with the Alaska Retirement Management Board.

Employers Included

Currently there are 151 employers participating in PERS, including the State of Alaska and 150 political subdivisions and public organizations. Two additional political subdivisions participate in PERS for healthcare benefits only.

Membership

PERS membership is mandatory for all permanent full-time and part-time employees of the State of Alaska and participating political subdivisions and public organizations, unless they are specifically excluded by Alaska Statute or employer participation agreements. Employees participating in the University of Alaska's Optional Retirement Plan or other retirement plans funded by the State are not covered by PERS. Elected officials may waive PERS membership.

Certain members of the Alaska Teachers' Retirement System (TRS) are eligible for PERS retirement benefits for their concurrent elected public official service with municipalities. In addition, employees who work half-time in PERS and TRS simultaneously are eligible for half-time PERS and TRS credit.

Senate Bill 141, signed into law on July 27, 2005, closes the plan effective July 1, 2006, to new members first hired on or after July 1, 2006.

Credited Service

Permanent employees who work at least 30 hours a week earn full-time credit; part-time employees working between 15 and 30 hours a week earn partial credit based upon the number of hours worked. Members receiving PERS occupational disability benefits continue to earn PERS credit while disabled. Survivors who are receiving occupational death benefits continue to earn PERS service credit while occupational survivor benefits are being paid.

Members may claim other types of service, including:

- part-time State of Alaska service rendered after December 31, 1960, and before January 1, 1976;
- service with the State, former Territory of Alaska, or U.S. Government in Alaska before January 1, 1961;
- past Peace Officer, correctional officer, fire fighter, and special officer service after January 1, 1961;
- military service (not more than five years may be claimed);
- temporary service after December 31, 1960;
- elected official service before January 1, 1981;
- Alaska Bureau of Indian Affairs service;
- past service rendered by employees who worked half-time in PERS and TRS simultaneously;
- leave without pay service after June 13, 1987, while receiving Workers' Compensation;
- Village Public Safety Officer service; and
- service as a temporary employee of the legislature before July 1, 1979, but this service must have been claimed no later than July 1, 2003, or by the date of retirement, if sooner (not more than ten years may be claimed).

Except for service before January 1, 1961, with the State, former Territory of Alaska, or U.S. Government in Alaska, contributions are required for all past service.

Past employment with participating political subdivisions that occurred before the employers joined PERS is creditable if the employers agree to pay the required contributions.

At the election of certain PERS members, certain service may be credited in the same fashion as members in TRS.

Members employed as dispatchers or within a state correctional facility may, at retirement, elect to convert their dispatcher or correctional facility service from "all other" service to Peace Officer/Firefighter service and retire under the 20-year retirement option. Members pay the full actuarial cost of conversion.

Employer Contributions

PERS employers contribute the amounts required, in addition to employees' contributions, to fund the benefits of the system.

The normal cost rate is a uniform rate for all participating employers (less the value of members' contributions).

The past service rate is a uniform rate for all participating employers to amortize the unfunded past service liability with payments that are a level percentage of payroll amount over a closed 25-year period starting June 30, 2014. Effective June 30, 2018, each future year's unfunded service liability is separately amortized on a level percent of pay basis over 25 years.

Employer rates cannot be less than the normal cost rate.

Pursuant to AS 39.35.255 effective July 1, 2008 and subsequently amended on July 1, 2021, each non-state PERS employer will pay a simple uniform contribution rate of 22% of non-state member payroll and

the State as an employer will pay the total contribution rate, adopted by the Board, of State member payroll.

Additional State Contributions

Pursuant to AS 39.35.280 effective July 1, 2008, the State shall contribute an amount (in addition to the State contribution as an employer) that, when combined with the total employer contributions, will be sufficient to pay the total contribution rate adopted by the Board.

Member Contributions

Mandatory Contributions: Peace Officer/Firefighter members are required to contribute 7.5% of their compensation; all Others contribute 6.75%. Those all Others who have elected to have their service calculated under TRS rules contribute 9.76% of their compensation. Members' contributions are deducted from gross wages before federal income taxes are withheld.

Contributions for Claimed Service: Member contributions are also required for most of the claimed service described above.

Voluntary Contributions: Members may voluntarily contribute up to 5% of their salary on an after-tax basis. Voluntary contributions are recorded in a separate account and are payable to the:

- a. member in lump sum payment upon termination of employment;
- b. member's beneficiary if the member dies; or
- c. member in a lump sum, life annuity, or payments over a designated period of time when the member retires.

Interest: Members' contributions earn 4.5% interest, compounded semiannually on June 30 and December 31.

Refund of Contributions: Terminated members may receive refunds of their member contribution accounts which includes their mandatory and voluntary contributions, indebtedness payments, and interest earned. Terminated members' accounts may be attached to satisfy claims under Alaska Statute 09.38.065, federal income tax levies, and valid Qualified Domestic Relations Orders.

Reinstatement of Contributions: Refunded accounts and the corresponding PERS service may be reinstated upon reemployment in PERS prior to July 1, 2010. Interest accrues on refunds until paid in full or members retire.

Retirement Benefits

Eligibility

- a. Members, including deferred vested members, are eligible for normal retirement at age 55 or early retirement at age 50 if they were hired before July 1, 1986 (Tier 1), and age 60 or early retirement at age 55 if they were hired on or after July 1, 1986 (Tiers 2 & 3). Additionally, they must have at least:
 - (i) five years of paid-up PERS service;
 - (ii) 60 days of paid-up PERS service as employees of the legislature during each of five legislative sessions and they were first hired by the legislature before May 30, 1987;
 - (iii) 80 days of paid-up PERS service as employees of the legislature during each of five legislative sessions and they were first hired by the legislature after May 29, 1987;
 - (iv) two years of paid-up PERS service and they are vested in TRS; or
 - (v) two years of paid-up PERS service and a minimum three years of TRS service to qualify for a public service benefit.

- b. Members may retire at any age when they have:
 - (i) 20 paid-up years of PERS Peace Officer/Firefighter service; or
 - (ii) 30 paid-up years of PERS "all other" or "elected official" service.

Benefit Type

Lifetime benefits are paid to members. Eligible members may receive normal, unreduced benefits when they (1) reach normal retirement age and complete the service required; or (2) satisfy the minimum service requirements under the "20 and out" or "30 and out" provisions. Members may receive early, actuarially reduced benefits when they reach early retirement age and complete the service required.

Members may select a joint and survivor option. Members who entered PERS prior to July 1, 1996 may also select a 66-2/3 last survivor option or a level income option. Under these options and early retirement, benefits are actuarially adjusted so that members receive the actuarial equivalents of their normal benefit amounts.

Benefit Calculations

Retirement benefits are calculated by multiplying the average monthly compensation (AMC) times credited PERS service times the percentage multiplier. The AMC is determined by averaging the salaries earned during the five highest (three highest for Peace Officer/Firefighter members or members hired prior to July 1, 1996) consecutive payroll years. Members must earn at least 115 days of credit in the last year worked to include it in the AMC calculation. PERS pays a minimum benefit of \$25.00 per month for each year of service when the calculated benefit is less.

The percentage multipliers for Peace Officer/Firefighter members are 2% for the first ten years of service and 2.5% for all service over ten years.

The percentage multipliers for all Others are 2% for the first ten years, 2.25% for the next ten years, and 2.5% for all remaining service earned on or after July 1, 1986. All service before that date is calculated at 2%.

Indebtedness

Members who terminate and refund their PERS contributions are not eligible to retire unless they return to PERS employment and pay back their refunds plus interest or accrue additional service which qualifies them for retirement. PERS refunds must be paid in full if the corresponding service is to count toward the minimum service requirements for retirement. Refunded PERS service is included in total service for the purpose of calculating retirement benefits. However, when refunds are not completely paid before retirement, benefits are actuarially reduced for life. Indebtedness balances may also be created when a member purchases qualified claimed service.

Reemployment of Retired Members

Retirement and retiree healthcare benefits are suspended while retired members are reemployed under PERS. During reemployment, members earn additional PERS service and contributions are withheld from their wages. A member who retired with a normal retirement benefit can elect to waive payment of PERS contributions. The waiver allows the member to continue receiving the retirement benefit during the period of reemployment. Members who elect the waiver option do not earn additional PERS service. The Waiver Option first became effective July 1, 2005 and applies to reemployment periods after that date. The Waiver Option is not available to members who retired early or under the Retirement Incentive Programs (RIPs). The Waiver Option is no longer available after June 30, 2009.

Members retired under the Retirement Incentive Programs (RIPs) who return to employment will:

- a. forfeit the three years of incentive credits that they received;
- b. owe PERS 150% of the benefits that they received for state and political subdivision members, and 110% for school district employees, under the 1996-2000 RIP, which may include costs for

health insurance, excluding amounts that they paid to participate for the 1986 and 1989 RIPs. Under prior RIPs, the penalty is 110% of the benefits received; and

- c. be charged 7% interest from the date that they are reemployed until their indebtedness is paid in full or they retire again. If the indebtedness is not completely paid, future benefits will be actuarially reduced for life.

Employers make contributions to the unfunded liability of the plan on behalf of rehired retired members at the rate the employer is making contributions to the unfunded liability of the plan for other members.

Postemployment Healthcare Benefits

Major medical benefits are provided to retirees and their surviving spouses by PERS for all employees hired before July 1, 1986 (Tier 1) and disabled retirees. Employees hired after June 30, 1986 (Tier 2) and their surviving spouses with five years of credited service (or ten years of credited service for those first hired after June 30, 1996 (Tier 3)) must pay the full monthly premium if they are under age sixty and will receive benefits paid by PERS if they are over age sixty. Tier 3 Members with between five and ten years of credited service must pay the full monthly premium regardless of their age. Tier 2 and Tier 3 Members with less than five years of credited service are not eligible for postemployment healthcare benefits. Tier 2 Members who are receiving a conditional benefit and are age eligible are eligible for postemployment healthcare benefits. In addition, Peace Officers and their surviving spouses with twenty-five years of Peace Officer membership service, Other employees and their surviving spouses with thirty years of membership service, and any disabled member receive benefits paid by PERS, regardless of their age or date of hire.

Medical, prescription drug, dental, vision and audio coverage is provided through the AlaskaCare Retiree Health Plan. Health plan provisions do not vary by retirement tier or age, except for Medicare coordination. Participants in dental, vision, and audio coverage pay a full self-supporting rate and those benefits are not included in this valuation.

Starting in 2022, prior authorization will be required for certain specialty medications for all participants. There is no change to the medications that are covered by the plan.

Starting in 2022, certain preventive benefits for pre-Medicare participants will now be covered by the plan.

Surviving spouses continue coverage only if a pension payment form that provided survivor benefits was elected. Alternate payees (i.e. individuals who are the subject of a domestic relations order or DRO) are allowed to participate in the plan, but must pay the full cost.

Where premiums are required prior to age 60, the valuation bases this payment upon the age of the retiree.

Participants in the defined benefit plan are covered under the following benefit design:

Plan Feature	Amounts
Deductible (single/family)	\$150 / \$450
Coinsurance (most services)	20%
Outpatient surgery/testing	0%
Maximum Out-of-Pocket (single/family, excluding deductible)	\$800 / \$2,400
Rx Copays (generic/brand/mail-order), does not apply to OOP max	\$4 / \$8 / \$0
Lifetime Maximum	\$2,000,000

The plan coordinates with Medicare on a traditional Coordination of Benefits Method. Starting in 2019, the prescription drug coverage is through a Medicare Part D EGWP arrangement.

Disability Benefits

Monthly disability benefits are paid to permanently disabled members until they die, recover, or become eligible for normal retirement. Members are appointed to normal retirement on the first of the month after they become eligible.

Occupational Disability

Members are not required to satisfy age or service requirements to be eligible for occupational disability. Monthly benefits are equal to 40% of their gross monthly compensation on the date of their disability. Members on occupational disability continue to earn PERS service until they become eligible for normal retirement. Peace Officer/Firefighter members may elect to retain the disability benefit formula for the calculation of their normal retirement benefits.

Non-occupational Disability

Members must be vested (five paid up years of PERS service) to be eligible for non-occupational disability benefits. Monthly benefits are calculated based on the member's average monthly compensation and PERS service on the date of termination from employment because of disability. Members do not earn PERS service while on non-occupational disability.

Death Benefits

Monthly death benefits may be paid to a spouse or dependent children upon the death of a member. If monthly benefits are not payable under the occupational and non-occupational death provisions, the designated beneficiary receives the lump sum benefit described below.

Occupational Death

When an active member (vested or non-vested) dies from occupational causes, a monthly survivor's pension may be paid to the spouse. The pension equals 40% of the member's gross monthly compensation on the date of death or disability, if earlier. If there is no spouse, the pension may be paid to the member's dependent children. On the member's normal retirement date, the benefit converts to a normal retirement benefit. The normal benefit is based on the member's salary on the date of death and service, including service accumulated from the date of the member's death to the normal retirement date. Survivors of Peace Officer/Firefighter members receive the greater of 50% of the member's gross monthly compensation on the date of death or disability, or 75% of the member's monthly normal retirement benefit (including service projected to Normal Retirement). If the member is unmarried with no children, a refund of contributions is payable to the estate.

Death after Occupational Disability

When a member dies while occupationally disabled, benefits are paid as described above in Occupational Death.

Non-Occupational Death

When a vested member dies from non-occupational causes, the surviving spouse may elect to receive a monthly 50% joint and survivor benefit or a lump sum benefit. The monthly benefit is calculated on the member's average monthly compensation and PERS service at the time of termination or death.

Lump Sum Non-Occupational Death Benefit

Upon the death of a member who has less than one year of service, the designated beneficiary receives the member's contribution account, which includes mandatory and voluntary contributions, indebtedness payments, and interest earned. If the member has more than one year of PERS service or is vested, the beneficiary also receives \$1,000 and \$100 for each year of PERS service.

Death After Retirement

When a retired member dies, the designated beneficiary receives the member's contribution account, less any benefits already paid and the member's last benefit check. If the member selected a survivor option at retirement, the eligible spouse receives continuing, lifetime monthly benefits.

Postretirement Pension Adjustments

Postretirement pension adjustments (PRPAs) are granted annually to eligible benefit recipients when the consumer price index (CPI) for urban wage earners and clerical workers for Anchorage increases during the preceding calendar year. PRPAs are calculated by multiplying the recipient's base benefit including past PRPAs, but excluding the Alaska COLA, times:

- a. The lesser of 75% of the CPI increase in the preceding calendar year or 9%, if the recipient is at least age 65 or on PERS disability; or
- b. The lesser of 50% of the CPI increase in the preceding calendar year or 6%, if the recipient is at least age 60, or under age 60 if the recipient has been receiving benefits for at least five years.

Ad hoc PRPAs, up to a maximum of 4%, may be granted to eligible recipients who were first hired before July 1, 1986 (Tier 1) if the CPI increases and the funded ratio is at least 105%.

In a year where an ad hoc PRPA is granted, eligible recipients will receive the higher of the two calculations.

Alaska Cost-of-Living Allowance (COLA)

Eligible benefit recipients who reside in Alaska receive an Alaska COLA equal to 10% of their base benefits or \$50, whichever is more. The following benefit recipients are eligible:

- a. members who first entered PERS before July 1, 1986 (Tier 1) and their survivors;
- b. members who first entered PERS after June 30, 1986 (Tiers 2 & 3) and their survivors if they are at least age 65; and
- c. all disabled members.

Changes in Benefit Provisions Valued Since the Prior Valuation

Starting in 2022, prior authorization will be required for certain specialty medications for all participants, and certain preventive benefits for pre-Medicare participants will now be covered by the plan.

Under SB 55 that was effective July 1, 2021: (i) The State-as-an-Employer contributes the full actuarial contribution rate based on the DB/DCR payroll of its employees (which is approximately 50% of the total PERS DB/DCR payroll); (ii) Non-State employers continue to contribute 22% of their DB/DCR payroll; (iii) the Additional State Contributions are based on the excess of the DB actuarial contribution rate and the DB contributions made by non-State employers.

There were no other changes in benefit provisions since the prior valuation.

Section 5.2: Description of Actuarial Methods and Valuation Procedures

The funding method used in this valuation was adopted by the Board in October 2006. Changes in methods were adopted by the Board in January 2019 based on the experience study for the period July 1, 2013 to June 30, 2017. The asset smoothing method used to determine valuation assets was changed effective June 30, 2014.

Benefits valued are those delineated in Alaska State statutes as of the valuation date. Changes in State statutes effective after the valuation date are not taken into consideration in setting the assumptions and methods.

Actuarial Cost Method

Liabilities and contributions shown in the report are computed using the Entry Age Normal Actuarial Cost Method, level percent of pay.

Effective June 30, 2018, the Board adopted a layered UAAL amortization method: Layer #1 equals the sum of (i) the UAAL at June 30, 2018 based on the 2017 valuation, plus (ii) the FY18 experience gain/loss. Layer #1 is amortized over the remainder of the 25-year closed period that was originally established in 2014¹. Layer #2 equals the change in UAAL at June 30, 2018 due to the experience study and EGWP implementation. Layer #2 is amortized over a separate closed 25-year period starting in 2018. Future layers will be created each year based on the difference between actual and expected UAAL occurring that year, and will be amortized over separate closed 25-year periods. The UAAL amortization continues to be on a level percent of pay basis. State statutes allow the contribution rate to be determined on payroll for all members, defined benefit and defined contribution member payroll combined.

Projected pension and postemployment healthcare benefits were determined for all active members. Cost factors designed to produce annual costs as a constant percentage of each member's expected compensation in each year from the assumed entry age to the assumed retirement age were applied to the projected benefits to determine the normal cost (the portion of the total cost of the plan allocated to the current year under the method). The normal cost is determined by summing intermediate results for active members and determining an average normal cost rate which is then related to the total payroll of active members. The actuarial accrued liability for active members (the portion of the total cost of the plan allocated to prior years under the method) was determined as the excess of the actuarial present value of projected benefits over the actuarial present value of future normal costs.

The actuarial accrued liability for retired members and their beneficiaries currently receiving benefits, terminated vested members and disabled members not yet receiving benefits was determined as the actuarial present value of the benefits expected to be paid. No future normal costs are payable for these members.

The actuarial accrued liability under this method at any point in time is the theoretical amount of the fund that would have been accumulated had annual contributions equal to the normal cost been made in prior years (it does not represent the liability for benefits accrued to the valuation date). The unfunded actuarial accrued liability is the excess of the actuarial accrued liability over the actuarial value of plan assets measured on the valuation date.

Under this method, experience gains or losses, i.e., decreases or increases in accrued liabilities attributable to deviations in experience from the actuarial assumptions, adjust the unfunded actuarial accrued liability.

¹ Layer #1 is referred to as "initial amount" in Sections 1.2 and 1.3.

Valuation of Assets

The actuarial asset value was reinitialized to equal Fair Value of Assets as of June 30, 2014. Beginning in FY15, the asset valuation method recognizes 20% of the gain or loss each year, for a period of five years. All assets are valued at fair value. Assets are accounted for on an accrued basis and are taken directly from financial statements audited by KPMG LLP.

Changes in Methods Since the Prior Valuation

There were no changes in the asset or valuation methods since the prior valuation.

Valuation of Retiree Medical and Prescription Drug Benefits

This section outlines the detailed methodology used in the internal model developed by Buck to calculate the initial per capita claims cost rates for the PERS postemployment healthcare plan. Note that the methodology reflects the results of our annual experience rate update for the period from July 1, 2020 to June 30, 2021.

Base claims cost rates are incurred healthcare costs expressed as a rate per member per year. Ideally, claims cost rates should be derived for each significant component of cost that can be expected to require differing projection assumptions or methods (i.e., medical claims, prescription drug claims, administrative costs, etc). Separate analysis is limited by the availability and historical credibility of cost and enrollment data for each component of cost. This valuation reflects non-prescription claims separated by Medicare status, including eligibility for free Part A coverage. Prescription costs are analyzed separately as in prior valuations. Administrative costs are assumed in the final per capita claims cost rates used for valuation purposes, as described below. Analysis to date on Medicare Part A coverage is limited since Part A claim data is not available by individual, nor is this status incorporated into historical claim data.

Benefits

Medical, prescription drug, dental, vision and audio coverage is provided through the AlaskaCare Retiree Health Plan and is available to employees of the State and subdivisions who meet retirement criteria based on the retirement plan tier in effect at their date of hire. Health plan provisions do not vary by retirement tier or age, except for Medicare coordination for those Medicare-eligible. Dental, vision and audio claims (DVA) are excluded from data analyzed for this valuation because those are retiree-pay all benefits where rates are assumed to be self-supporting. Buck relies upon rates set by a third-party for the DVA benefits. Buck reviewed historical rate-setting information and views contribution rate adjustments made are not unreasonable.

Administration and Data Sources

The plan was administered by Wells Fargo Insurance Services (acquired by HealthSmart, in January 2012) from July 1, 2009 through December 31, 2013 and by Aetna effective January 1, 2014.

Claims incurred for the period from July 2019 through June 2021 (FY20 through FY21) were provided by the State of Alaska from reports extracted from their data warehouse, which separated claims by Medicare status. Monthly enrollment data for the same period was provided by Aetna.

Aetna also provided census information identifying Medicare Part B only participants. These participants are identified when hospital claims are denied by Medicare; Aetna then flags that participant as a Part B only participant. Buck added newly identified participants to our list of Medicare Part B only participants. Buck assumes that once identified as Part B only, that participant remains in that status until we are notified otherwise.

Aetna provided a snapshot file as of July 1, 2021 of retirees and dependents that included a coverage level indicator. The monthly enrollment data includes double coverage participants. These are participants whereby both the retiree and spouse are retirees from the State and both are reflected with Couple coverage in the enrollment. In this case, such a couple would show up as four members in the

monthly enrollment (each would be both a retiree and a spouse). As a result, the snapshot census file was used to adjust the total member counts in the monthly enrollment reports to estimate the number of unique participants enrolled in coverage. Based on the snapshot files from the last two valuations, the total member count in the monthly enrollment reports needs to be reduced by approximately 13% to account for the number of participants with double coverage.

Aetna does not provide separate experience by Medicare status in standard reporting so the special reports mentioned above from the data warehouse were used this year to obtain that information and incorporate it into the per capita rate development for each year of experience (with corresponding weights applied in the final per capita cost).

Methodology

Buck projected historical claim data to FY22 for retirees using the following summarized steps:

1. Develop historical annual incurred claim cost rates – an analysis of medical costs was completed based on claims information and enrollment data provided by the State of Alaska and Aetna for each year in the experience period of FY20 through FY21.
 - Costs for medical services and prescriptions were analyzed separately, and separate trend rates were developed to project expected future medical and prescription costs for the valuation year (e.g. from the experience period up through FY22).
 - Because the reports provided reflected incurred claims, no additional adjustment was needed to determine incurred claims to be used in the valuation.
 - An offset for costs expected to be reimbursed by Medicare was incorporated beginning at age 65. Alaska retirees who do not have 40 quarters of Medicare-covered compensation do not qualify for Medicare Part A coverage free of charge. This is a relatively small and closed group. Medicare was applied to State employment for all employees hired after March 31, 1986. For the “no-Part A” individuals who are required to enroll in Medicare Part B, the State is the primary payer for hospital bills and other Part A services. Claim experience is not available separately for participants with both Medicare Parts A and B and those with Part B only. For Medicare Part B only participants, a lower average claims cost was applied to retirees covered by both Medicare Part A and B vs. retirees covered only by Medicare Part B based upon manual rate models that estimate the Medicare covered proportion of medical costs. To the extent that no-Part A claims can be isolated and applied strictly to the appropriate closed group, actuarial accrued liability will be more accurate.
 - Based on census data received from Aetna, less than 1% of the current retiree population was identified as having coverage only under Medicare Part B. We assume that 5% of actives hired before April 1, 1986 and current retirees who are not yet Medicare eligible will not be eligible for Medicare Part A.
 - Based upon a reconciliation of valuation census data to the snapshot eligibility files provided by Aetna as of July 1, 2020, and July 1, 2021, Buck adjusted member counts used for duplicate records where participants have double coverage; i.e. primary coverage as a retiree and secondary coverage as the covered spouse of another retiree. This is to reflect the total cost per distinct individual/member which is then applied to distinct members in the valuation census.
 - Buck understands that pharmacy claims reported do not reflect rebates. Based on actual pharmacy rebate information provided by Optum, rebates were assumed to be 19.5% of prescription drug claims for FY20, 16.2% of pre-Medicare, and 14.3% of Medicare prescription drug claims for FY21.
2. Develop estimated EGWP reimbursements – Segal provided estimated 2022 EGWP subsidies, developed with the assistance of OptumRx. These amounts are applicable only to Medicare-eligible participants.

3. Adjust for claim fluctuation, anomalous experience, etc. – explicit adjustments are often made for anticipated large claims or other anomalous experience. FY19 and FY20 experience were compared to assess the impact of COVID-19 and whether an adjustment to FY20 claims was indicated for use in the June 30, 2020 valuation. A material decrease in medical claims during March 2020 to June 2020 was experienced due to COVID-19. Therefore, an adjustment was made for those months to adjust for the decrease that is not expected to continue in future years. There was an observed spike in prescription drug claims in March 2020; however, the FY20 prescription drug experience appears reasonable to use without adjustment for COVID-19. To adjust for the decrease in medical claims due to COVID-19 during the last 4 months of FY20, the per capita cost during the first 8 months was used as the basis for estimating claims that would have occurred in the absence of COVID-19. FY21 experience was also thoroughly reviewed to assess the impact of COVID-19 and whether an adjustment to FY21 claims was appropriate for use in the June 30, 2021 valuation. FY21 medical per capita claims were noticeably lower than expected, so a 4% load was added to the FY21 medical claims used in the per capita claims cost development to better reflect future expected long-term costs of the plan. Total prescription drug claims experience for FY21 was reasonable and consistent with FY19 and FY20 experience. Therefore no adjustment was made to FY21 prescription drug claims. Due to group size and demographics, we did not make any additional large claim adjustments. We do blend both Alaska plan-specific and national trend factors as described below. Buck compared data utilized to lag reports and quarterly plan experience presentations provided by the State and Aetna to assess accuracy and reasonableness of data.
4. Trend all data points to the projection period – project prior years' experience forward to FY22 for retiree benefits on an incurred claim basis. Trend factors derived from historical Alaska-specific experience and national trend factors are shown in the table in item 5 below.
5. Apply credibility to prior experience – adjust prior year's data by assigning weight to recent periods, as shown at the right of the table below. The Board approved a change in the weighting of experience periods beginning with the June 30, 2017 valuation as outlined below. Note also that for FY20 to FY21 medical and both years of prescription drugs we averaged projected plan costs using Alaska-specific trend factors and national trend factors, assigning 75% weight to Alaska-specific trends and 25% to national trends. For FY21 to FY22 medical we applied 100% weight to national trends because the Alaska-specific trends were impacted by COVID-19:

Alaska-Specific and National Average Weighted Trend from Experience Period to Valuation Year			
Experience Period	Medical	Prescription	Weighting Factors
FY20 to FY21	6.3% Pre-Medicare / 5.2% Medicare	7.6%	50%
FY21 to FY22	8.1% Pre-Medicare / 4.8% Medicare	8.0%	50%

Trend assumptions used for rate development are assessed annually and as additional/improved reporting becomes available, we will incorporate into rate development as appropriate.

6. Starting in 2022, prior authorization will be required for certain specialty medications. There is no change to the medications that are covered by the plan. Segal provided an estimate of the impact of this change to the DB retiree health plan cost for calendar year 2022. The DB base claims costs for pre-Medicare prescription drug, Medicare prescription drug, and EGWP were adjusted to reflect this change. Additionally, starting in 2022, certain preventive benefits for pre-Medicare participants will now be covered by the plan. Segal provided an estimate of the impact of this change to the DB retiree health plan cost for calendar year 2022. The DB base claims cost for pre-Medicare medical was adjusted to reflect this change.
7. Develop separate administration costs – no adjustments were made for internal administrative costs. Third party retiree plan administration fees for FY22 are based upon total fees projected to 2022 by Segal based on actual FY21 fees. The annual per participant per year administrative cost rate for medical and prescription benefits is \$493.

Healthcare Reform

Healthcare Reform legislation passed on March 23, 2010 included several provisions with potential implications for the State of Alaska Retiree Health Plan liability. Buck evaluated the impact due to these provisions.

Because the State plan is retiree-only, and was in effect at the time the legislation was enacted, not all provisions of the health reform legislation apply to the State plan. Unlimited lifetime benefits and dependent coverage to age 26 are two of these provisions. We reviewed the impact of including these provisions, but there was no decision made to adopt them, and no requirement to do so.

Because Transitional Reinsurance fees are only in effect until 2016, we excluded these for valuation purposes.

The Further Consolidated Appropriations Act, 2020 passed in December 2019 repealed several healthcare-related taxes, including the Cadillac Tax.

The Tax Cuts and Jobs Act passed in December 2017 included the elimination of the individual mandate penalty and changed the inflation measure for purposes of determining the limits for the High Cost Excise Tax to use chained CPI. It is our understanding the law does not directly impact other provisions of the ACA. While the nullification of the ACA's individual mandate penalty does not directly impact employer group health plans, it could contribute to the destabilization of the individual market and increase the number of uninsured. Such destabilization could translate to increased costs for employers. We have considered this when setting our healthcare cost trend assumptions and will continue to monitor this issue.

We have not identified any other specific provisions of healthcare reform or its potential repeal that would be expected to have a significant impact on the measured obligation. We will continue to monitor legislative activity.

Data

In accordance with actuarial standards, we note the following specific data sources and steps taken to value retiree medical benefits:

The Division of Retirement and Benefits provided pension valuation census data, which for people currently in receipt of healthcare benefits was supplemented by coverage data from the healthcare claims administrator (Aetna).

Certain adjustments and assumptions were made to prepare the data for valuation:

- All records provided with retiree medical coverage on the Aetna data were included in this valuation and we relied on the Aetna data as the source of medical coverage for current retirees and their dependents.
- Some records in the Aetna data were duplicates due to the double coverage (i.e. coverage as a retiree and as a spouse of another retiree) allowed under the plan. Records were adjusted for these members so that each member was only valued once. Any additional value of the double coverage (due to coordination of benefits) is small and reflected in the per capita costs.
- Covered children included in the Aetna data were valued until age 23, unless disabled. We assumed that those dependents over 23 were only eligible and valued due to being disabled.
- For individuals included in the pension data expecting a future pension, we valued health benefits starting at the same point that the pension benefit is assumed to start.

We are not aware of any other data issues that would be expected to have a material impact on the results and there are no unresolved matters related to the data.

The chart below shows the basis of setting the per capita claims cost assumption, which includes both PERS and TRS.

A. Fiscal 2020

	Medical		Prescription Drugs (Rx)	
	Pre-Medicare	Medicare	Pre-Medicare	Medicare
1. Incurred Claims	\$ 229,531,664	\$ 89,497,345	\$ 64,442,660	\$ 188,022,328
2. Adjustments for Rx Rebates	0	0	(12,566,319)	(36,664,354)
3. Net incurred claims	\$ 229,531,664	\$ 89,497,345	\$ 51,876,341	\$ 151,357,974
4. Average Enrollment	19,354	44,965	19,354	44,965
5. Claim Cost Rate (3) / (4)	11,860	1,990	2,680	3,366
6. Trend to Fiscal 2022	1.149	1.103	1.162	1.162
7. Fiscal 2022 Incurred Cost Rate (5) x (6)	\$ 13,630	\$ 2,195	\$ 3,116	\$ 3,912

B. Fiscal 2021

1. Incurred Claims	\$ 196,566,470	\$ 86,512,435	\$ 60,691,609	\$ 207,822,858
2. Adjustments for Rx Rebates and COVID (Medical only)	7,862,659	3,460,497	(9,832,041)	(29,718,669)
3. Net incurred claims	\$ 204,429,129	\$ 89,972,933	\$ 50,859,568	\$ 178,104,189
4. Average Enrollment	18,106	47,025	18,106	47,025
5. Claim Cost Rate (3) / (4)	11,291	1,913	2,809	3,787
6. Trend to Fiscal 2022	1.081	1.048	1.080	1.080
7. Fiscal 2022 Incurred Cost Rate (5) x (6)	\$ 12,205	\$ 2,005	\$ 3,034	\$ 4,090

C. Incurred Cost Rate by Fiscal Year

1. Fiscal 2020 A.(7)	13,630	2,195	3,116	3,912
2. Fiscal 2021 B.(7)	12,205	2,005	3,034	4,090

D. Weighting by Fiscal Year

1. Fiscal 2020	50%	50%	50%	50%
2. Fiscal 2021	50%	50%	50%	50%

E. Fiscal 2022 Incurred Cost Rate

1. Rate at Average Age C x D	\$ 12,918	\$ 2,100	\$ 3,075	\$ 4,001
2. Average Aging Factor	0.822	1.271	0.832	1.124
3. Rate at Age 65 (1) / (2)	\$ 15,708	\$ 1,652	\$ 3,695	\$ 3,560

F. Development of Part A&B and Part B Only Cost from Pooled Rate Above

1. Part A&B Average Enrollment	46,602
2. Part B Only Average Enrollment	423
3. Total Medicare Average Enrollment B(4)	47,025
4. Cost ratio for those with Part B only to those with Parts A&B	3.300
5. Factor to determine cost for those with Parts A&B (2) / (3) x (4) + (1) / (3) x 1.00	1.021
6. Medicare per capita cost for all participants: E(3)	\$ 1,652
7. Cost for those eligible for Parts A&B: (6) / (5)	\$ 1,619
8. Cost for those eligible for Part B only: (7) x (4)	\$ 5,341

1. Rate at Age 65	\$ 15,708
2. Adjustment factor for plan changes	1.39%
3. Adjusted Rate at Age 65 (1) x [1 + (2)]	\$ 15,926

	Medical		Prescription Drugs (Rx)	
	Pre-Medicare	Medicare	Pre-Medicare	Medicare
1. Rate at Age 65	\$ 15,708	\$ 1,619	\$ 3,695	\$ 3,560
2. Adjustment factor for plan changes	1.39%	0.00%	-8.67%	-2.41%
3. Adjusted Rate at Age 65 (1) x [1 + (2)]	\$ 15,926	\$ 1,619	\$ 3,375	\$ 3,474

Following the development of total projected costs, a distribution of per capita claims cost was developed. This was accomplished by allocating total projected costs to the population census used in the valuation. The allocation was done separately for each of prescription drugs and medical costs for the Medicare eligible and pre-Medicare populations. The allocation weights were developed using participant counts by age and assumed morbidity and aging factors. Results were tested for reasonableness based on historical trend and external benchmarks for costs paid by Medicare.

Below are the results of this analysis:

**Distribution of Per Capita Claims Cost by Age
for the Period July 1, 2021 through June 30, 2022**

Age	Medical and Medicare Parts A & B	Medical and Medicare Part B Only	Prescription Drug	Medicare EGWP Subsidy
45	\$ 9,719	\$ 9,719	\$ 2,062	\$ 0
50	10,996	10,996	2,449	0
55	12,441	12,441	2,908	0
60	14,076	14,076	3,133	0
65	1,619	5,341	3,474	1,131
70	1,877	6,192	3,836	1,249
75	2,176	7,178	4,235	1,379
80	2,402	7,925	4,130	1,345

Section 5.3: Summary of Actuarial Assumptions

The demographic and economic assumptions used in the June 30, 2021 valuation are described below. Unless noted otherwise, these assumptions were adopted by the Board in January 2019 based on the experience study for the period July 1, 2013 to June 30, 2017.

Investment Return

7.38% per year, net of investment expenses.

Salary Scale

Salary scale rates based upon the 2013-2017 actual experience (see Table 1).

Inflation – 2.50% per year.

Productivity – 0.25% per year.

Payroll Growth

2.75% per year (inflation + productivity).

Total Inflation

Total inflation as measured by the Consumer Price Index for urban and clerical workers for Anchorage is assumed to increase 2.50% annually.

Mortality (Pre-Commencement)

Mortality rates based upon the 2013-2017 actual experience.

RP-2014 employee table, benefit-weighted, rolled back to 2006, and projected with MP-2017 generational improvement.

Deaths are assumed to result from occupational causes 75% of the time for Peace Officer/Firefighters, and 40% of the time for Others.

Mortality (Post-Commencement)

Mortality rates based upon the 2013-2017 actual experience.

91% of male and 96% of female rates of RP-2014 healthy annuitant table, benefit-weighted, rolled back to 2006, and projected with MP-2017 generational improvement.

Turnover

Select and ultimate rates based upon the 2013-2017 actual experience (see Tables 2a and 2b).

Disability

Incidence rates based upon the 2013-2017 actual experience (see Table 3).

Post-disability mortality in accordance with the RP-2014 disabled table, benefit-weighted, rolled back to 2006, and projected with MP-2017 generational improvement. Disabilities are assumed to be occupational 75% of the time for Peace Officer/Firefighters, and 40% of the time for Others.

Retirement

Retirement rates based upon the 2013-2017 actual experience (see Tables 4a and 4b).

Deferred vested members are assumed to retire at their earliest unreduced retirement date.

The modified cash refund annuity is valued as a three-year certain and life annuity.

Spouse Age Difference

Males are assumed to be three years older than their wives. Females are assumed to be two years younger than husbands.

Percent Married for Pension

For Others, 75% of male members and 70% of female members are assumed to be married. For Peace Officer/Firefighters, 85% of male members and 60% of female members are assumed to be married.

Dependent Spouse Medical Coverage Election

Applies to members who do not have double medical coverage. For Others, 65% of male members and 60% of female members are assumed to be married and cover a dependent spouse. For Peace Officer/Firefighters, 75% of male members and 50% of female members are assumed to be married and cover a dependent spouse.

Dependent Children

- Pension: None
- Healthcare: Benefits for dependent children have been valued only for members currently covering their dependent children. These benefits are only valued through the dependent children's age 23 (unless the child is disabled).

Contribution Refunds

For Others, 5% of terminating members with vested benefits are assumed to have their contributions refunded.

For Peace Officers/Firefighters, 10% of terminating members with vested benefits are assumed to have their contributions refunded.

100% of those with non-vested benefits are assumed to have their contributions refunded.

Imputed Data

Data changes from the prior year which are deemed to have an immaterial impact on liabilities and contribution rates are assumed to be correct in the current year's client data. Non-vested terminations with appropriate refund dates are assumed to have received a full refund of contributions. Active members with missing salary and service are assumed to be terminated with status based on their vesting percentage.

Active Rehire Assumption

The Normal Cost used for determining contribution rates and in the projections includes a rehire assumption to account for anticipated rehires. The Normal Cost shown in the report includes the following assumptions (which were developed based on the five years of rehire loss experience through June 30, 2017). For projections, these assumptions were assumed to grade to zero uniformly over a 20-year period.

- Pension: 18.77%
- Healthcare: 17.09%

Re-Employment Option

All re-employed retirees are assumed to return to work under the Standard Option.

Active Data Adjustment

No adjustment was made to reflect participants who terminate employment before the valuation date and are subsequently rehired after the valuation date.

Alaska Cost-of-Living Adjustments (COLA)

Of those benefit recipients who are eligible for the Alaska COLA, 70% of Others and 65% of Peace Officers/Firefighters are assumed to remain in Alaska and receive the COLA.

Postretirement Pension Adjustment (PRPA)

50% and 75% of assumed inflation, or 1.25% and 1.875% respectively, is valued for the annual automatic PRPA as specified in the statute.

Expenses

The investment return assumption is net of investment expenses.

The Normal Cost as of June 30, 2021 was increased by the following amounts for administrative expenses (for projections, the percent increase was assumed to remain constant in future years):

- Pension: \$7,625,000
- Healthcare: \$5,531,000

Part-Time Status

Part-time employees are assumed to earn 1.00 years of credited service per year for Peace Officer/Firefighter and 0.75 years of credited service per year for Other members.

Service

Total credited service is provided by the State. This service is assumed to be the only service that should be used to calculate benefits. Additionally, the State provides claimed service (including Bureau of Indian Affairs Service). Claimed service is used for vesting and eligibility purposes as described in Section 5.1.

Final Average Earnings

Final Average Earnings is provided on the data for active members. This amount is used as a minimum in the calculation of the average earnings in the future.

Per Capita Claims Cost

Sample claims cost rates adjusted to age 65 for FY22 medical and prescription drugs are shown below. The prescription drug costs reflect the plan change to require prior authorization for certain specialty medications. The pre-Medicare medical cost reflects the coverage of additional preventive benefits.

	Medical	Prescription Drugs
Pre-Medicare	\$ 15,926	\$ 3,375
Medicare Parts A & B	\$ 1,619	\$ 3,474
Medicare Part B Only	\$ 5,341	\$ 3,474
Medicare Part D – EGWP	N/A	\$ 1,131

Members are assumed to attain Medicare eligibility at age 65. All costs are for the 2022 fiscal year (July 1, 2021 – June 30, 2022).

The EGWP subsidy is assumed to increase in future years by the trend rates shown on the following pages. No future legislative changes or other events are anticipated to impact the EGWP subsidy. If any legislative or other changes occur in the future that impact the EGWP subsidy (which could either increase or decrease the plan's Actuarial Accrued Liability), those changes will be evaluated and quantified when they occur.

Third Party Administrator Fees

\$493 per person per year; assumed to increase at 4.5% per year.

Medicare Part B Only

We assume that 5% of actives hired before April 1, 1986 and current retirees who are not yet Medicare eligible will not be eligible for Medicare Part A.

Healthcare Cost Trend

The table below shows the rate used to project the cost from the shown fiscal year to the next fiscal year. For example, 6.3% is applied to the FY22 pre-Medicare medical claims costs to get the FY23 medical claims costs.

	Medical Pre-65	Medical Post-65	Prescription Drugs / EGWP
FY22	6.3%	5.4%	7.1%
FY23	6.1%	5.4%	6.8%
FY24	5.9%	5.4%	6.4%
FY25	5.8%	5.4%	6.1%
FY26	5.6%	5.4%	5.7%
FY27-FY40	5.4%	5.4%	5.4%
FY41	5.3%	5.3%	5.3%
FY42	5.2%	5.2%	5.2%
FY43	5.1%	5.1%	5.1%
FY44	5.1%	5.1%	5.1%
FY45	5.0%	5.0%	5.0%
FY46	4.9%	4.9%	4.9%
FY47	4.8%	4.8%	4.8%
FY48	4.7%	4.7%	4.7%
FY49	4.6%	4.6%	4.6%
FY50+	4.5%	4.5%	4.5%

For the June 30, 2014 valuation and later, the updated Society of Actuaries' Healthcare Cost Trend Model is used to project medical and prescription drug costs. This model estimates trend amounts that are projected out for 80 years. The model has been populated with assumptions that are specific to the State of Alaska.

Aging Factors

Age	Medical	Prescription Drugs
0 – 44	2.0%	4.5%
45 – 54	2.5%	3.5%
55 – 64	2.5%	1.5%
65 – 74	3.0%	2.0%
75 – 84	2.0%	-0.5%
85 – 94	0.3%	-2.5%
95+	0.0%	0.0%

Retired Member Contributions for Medical Benefits

Currently contributions are required for PERS members who are under age 60 and have less than 30 years of service (25 for Peace Officer/Firefighter). Eligible Tier 1 members are exempt from contribution requirements. Annual FY22 contributions based on monthly rates shown below for calendar 2022 are assumed based on the coverage category for current retirees. The composite rate shown is used for current active and inactive members in Tier 2 or 3 who are assumed to retire prior to age 60 with less than 30 years of service and who are not disabled. For dependent children, we value 1/3 of the annual retiree contribution to estimate the per child rate based upon the assumed number of children in rates where children are covered.

Coverage Category	Calendar 2022 Annual Contribution	Calendar 2022 Monthly Contribution	Calendar 2021 Monthly Contribution
Retiree Only	\$ 8,448	\$ 704	\$ 704
Retiree and Spouse	\$ 16,896	\$ 1,408	\$ 1,408
Retiree and Child(ren)	\$ 11,940	\$ 995	\$ 995
Retiree and Family	\$ 20,388	\$ 1,699	\$ 1,699
Composite	\$ 12,552	\$ 1,046	\$ 1,046

Trend Rate for Retired Member Medical Contributions

The table below shows the rate used to project the retired member medical contributions from the shown fiscal year to the next fiscal year. For example, 0.0% is applied to the FY22 retired member medical contributions to get the FY23 retired member medical contributions.

Trend Assumptions	
FY22	0.0%
FY23+	4.0%

Graded trend rates for retired member medical contributions are consistent with the rates used for the June 30, 2020 valuation. Actual FY22 retired member medical contributions are reflected in the valuation.

Healthcare Participation

100% of system paid members and their spouses are assumed to elect healthcare benefits as soon as they are eligible. 20% of non-system paid members and their spouses are assumed to elect healthcare benefits as soon as they are eligible.

Changes in Assumptions Since the Prior Valuation

Healthcare claim costs are updated annually as described in Section 5.2. The amounts included in the Normal Cost for administrative expenses were changed from \$7,223,000 to \$7,625,000 for pension, and from \$4,934,000 to \$5,531,000 for healthcare (based on the most recent two years of actual administrative expenses paid from plan assets).

Section 6: Actuarial Standard of Practice No. 51

Funding future retirement benefits prior to when those benefits become due involves assumptions regarding future economic and demographic experience. These assumptions are applied to calculate actuarial liabilities, current contribution requirements, and the funded status of the plan. However, to the extent future experience deviates from the assumptions used, variations will occur in these calculated values. These variations create risk to the plan. Understanding the risks to the funding of the plan is important.

Actuarial Standard of Practice No. 51 (ASOP 51)¹ requires certain disclosures of potential risks to the plan and provides useful information for intended users of actuarial reports that determine plan contributions or evaluate the adequacy of specified contribution levels to support benefit provisions.

Under ASOP 51, risk is defined as the potential of actual future measurements deviating from expected future measurements resulting from actual future experience deviating from actuarially assumed experience.

It is important to note that not all risk is negative, but all risk should be understood and accepted based on knowledge, judgement, and educated decisions. Future measurements may deviate in ways that produce positive or negative financial impacts to the plan.

In the actuary's professional judgment, the following risks may reasonably be anticipated to significantly affect the pension plan's future financial condition and contribution requirements.

- Investment Risk – potential that the investment return will be different than the 7.38% expected in the actuarial valuation
- Contribution Risk – potential that the contribution actually made will be different than the actuarially determined contribution
- Long-Term Return on Investment Risk – potential that changes in long-term capital market assumptions or the plan's asset allocation will create the need to update the long-term return on investment assumption
- Longevity Risk – potential that participants live longer than expected compared to the valuation mortality assumptions
- Salary Increase Risk – potential that future salaries will be different than expected in the actuarial valuation
- Inflation Risk – potential that the consumer price index (CPI) for urban wage earners and clerical workers for Anchorage is different than the 2.5% assumed in the valuation
- Other Demographic Risk – potential that other demographic experience will be different than expected

The following information is provided to comply with ASOP 51 and furnish beneficial information on potential risks to the plan. **This list is not all-inclusive**; it is an attempt to identify the more significant risks and how those risks might affect the results shown in this report.

Note that ASOP 51 does not require the actuary to evaluate the ability or willingness of the plan sponsor to make contributions to the plan when due, or to assess the likelihood or consequences of potential future changes in law. In addition, this valuation report is not intended to provide investment advice or to provide guidance on the management or reduction of risk.

¹ ASOP 51 does not apply to the healthcare portion of the plan. Accordingly, all figures in this section relate to the pension portion.

Assessment of Risks

Investment Risk

Plan costs are very sensitive to the market return.

- Any return on assets lower than assumed will increase costs.
- The plan uses an actuarial value of assets that smooths gains and losses on market returns over a five-year period to help control some of the volatility in costs due to investment risk.
- Historical experience of actual returns is shown in Section 2.4 of this report. This historical experience illustrates how returns can vary over time.

Contribution Risk

There is a risk to the plan when the employer's and/or State's actual contribution amount and the actuarially determined contribution differ.

- If the actual contribution is lower than the actuarially determined contribution, the plan may not be sustainable in the long term.
- Any underpayment of the contribution will increase future contribution amounts to help pay off the additional Unfunded Actuarial Accrued Liability associated with the underpayment(s).
- As long as the Board consistently adopts the actuarially determined contributions, this risk is mitigated due to Alaska statutes requiring the State to contribute additional funds necessary to pay the total contributions adopted by the Board.

Long-Term Return on Investment Risk

Inherent in the long-term return on investment assumption is the expectation that the current rate will be used until the last benefit payment of the plan is made. There is a risk that sustained changes in economic conditions, changes in long-term future capital market assumptions, or changes to the plan's asset allocation will necessitate an update to the long-term return on investment assumption used.

- Under a lower long-term return on investment assumption, less investment return is available to pay plan benefits. This may lead to a need for increased employer contributions.
- The liabilities will be higher at a lower assumed rate of return because future benefits will have a lower discount rate applied when calculating the present value.
- A 1% decrease in the long-term return on investment assumption will increase actuarial accrued liability by approximately 11%.
- This risk may be increased due to the plan being closed to new entrants. As the plan continues to mature, the magnitude of negative cash flow discussed in the Plan Maturity Measures later in this section will grow, thereby creating a need for more liquid assets that may not garner the same long-term return as currently assumed.

Longevity Risk

Plan costs will be increased as participants are expected to live longer.

- Benefits are paid over a longer lifetime when life expectancy is expected to increase. The longer duration of payments leads to higher liabilities.
- Health care has been improving, which affects the life expectancy of participants. As health care improves, leading to longer life expectancies, costs to the plan could increase.

- The mortality assumption for the plan mitigates this risk by assuming future improvement in mortality. However, any improvement in future mortality greater than that expected by the current mortality assumption would lead to increased costs for the plan.
- The Postretirement Pension Adjustments and Alaska Cost-of-Living Allowance increase longevity risk because members who live longer than expected will incur more benefit payment increases than expected and therefore increase costs.

Salary Increase Risk

Plan costs will be increased if actual salary increases are larger than expected.

- Higher-than-expected salary increases will produce higher benefits.
- The higher benefits may be partially offset by increased employee contributions due to higher salaries.
- If future payroll grows at a rate different than assumed, contributions as a percentage of payroll will be affected.

Inflation Risk

Plan costs will be increased if the actual CPI for Anchorage is greater than the 2.5% assumed in the valuation.

- Retirement benefits will be greater than expected if the CPI is greater than the assumed rate, which will increase costs.
- This risk is mitigated by the 75% and 50% of CPI provisions and the 9% and 6% maximums.
- This risk is also mitigated by the age and time in payment requirements to receive an increase.
- Inflation risk may be associated with the interaction of inflation with other assumptions, but this is not significant as a standalone assumption, and therefore is considered as part of the associated assumption risk instead of being discussed here.

Other Demographic Risk

The plan is subject to risks associated with other demographic assumptions (e.g., retirement, termination, and retired members remaining in Alaska assumptions). Differences between actual and expected experience for these assumptions tend to have less impact on the overall costs of the plan. The demographic assumptions used in the valuation are re-evaluated regularly as part of the four-year experience studies to ensure the assumptions are consistent with long-term expectations.

Historical Information

Monitoring certain information over time may help understand risks faced by the plan. Historical information is included throughout this report. Some examples are:

- Funded Ratio History shown in the Executive Summary illustrates how the plan's funded status (comparison of actuarial accrued liabilities to actuarial value of assets) has changed over time.
- Section 1.6 shows historical analysis of financial experience including how contribution rates have changed over time.
- Section 2.4 shows the volatility of asset returns over time.
- Section 4 includes various historical information showing how member census data has changed over time.

Plan Maturity Measures

There are certain measures that may aid in understanding the significant risks to the plan.

Ratio of Retired Liability to Total Liability (\$'s in \$000's)	June 30, 2020	June 30, 2021
1. Retiree and Beneficiary Accrued Liability	\$ 10,472,466	\$ 10,774,140
2. Total Accrued Liability	\$ 15,279,525	\$ 15,419,975
3. Ratio, (1) ÷ (2)	68.5%	69.9%

A high percentage of liability concentrated on participants in pay status indicates a mature plan (often a ratio above 60% - 65%). Because the plan was closed to new entrants in 2006, we expect the percentage in item #3 to continue to increase over time. An increasing percentage may indicate a need for a less risky asset allocation, which may lead to a lower long-term return on asset assumption and increased costs. Higher percentages may also indicate greater investment risk as benefit payments may be greater than contributions creating an increased reliance on investment returns. This ratio should be monitored each year in the future.

Ratio of Cash Flow to Assets (\$'s in \$000's)	FYE June 30, 2020	FYE June 30, 2021
1. Contributions	\$ 504,029	\$ 586,737
2. Benefit Payments	<u>895,523</u>	<u>930,006</u>
3. Cash Flow, (1) - (2)	\$ (391,494)	\$ (343,269)
4. Fair Value of Assets	\$ 9,469,161	\$ 11,912,309
5. Ratio, (3) ÷ (4)	(4.1%)	(2.9%)

When this cash flow ratio is negative, more cash is being paid out than deposited in the trust. Negative cash flow indicates the trust needs to rely on investment returns to cover benefit payments and / or may need to invest in more liquid assets to cover the benefit payments. More liquid assets may not generate the same returns as less liquid assets, which can increase the investment risk. Currently, the low magnitude of the ratio implies there may already be enough liquid assets to cover the benefit payments, less investment return is needed to cover the shortfall, or only a small portion of assets will need to be converted to cash. Therefore, the investment risk is likely not amplified at this time. However, due to the plan being closed, we expect this measure to become increasingly negative over time. This maturity measure should be monitored in the future.

Contribution Volatility (\$'s in \$000's)	June 30, 2020	June 30, 2021
1. Fair Value of Assets	\$ 9,469,161	\$ 11,912,309
2. DB/DCR Payroll	\$ 2,373,078	\$ 2,406,757
3. Asset to Payroll Ratio, (1) ÷ (2)	399.0%	495.0%
4. Accrued Liability	\$ 15,279,525	\$ 15,419,975
5. Liability to Payroll Ratio, (4) ÷ (2)	643.9%	640.7%

Plans that have higher asset-to-payroll ratios experience more volatile employer contributions (as a percentage of payroll) due to investment return. For example, a plan with an asset-to-payroll ratio of 10% may experience twice the contribution volatility due to investment return volatility than a plan with an asset-to-payroll ratio of 5%. Plans that have higher liability-to-payroll ratios experience more volatile employer contributions (as a percentage of payroll) due to changes in liability. For example, if an assumption change increases the liability of two plans by the same percent, the plan with a liability-to-payroll ratio of 10% may experience twice the contribution volatility than a plan with a liability-to-payroll ratio of 5%.

Glossary of Terms

Actuarial Accrued Liability

Total accumulated cost to fund pension or postemployment benefits arising from service in all prior years.

Actuarial Cost Method

Technique used to assign or allocate, in a systematic and consistent manner, the expected cost of a pension or postemployment plan for a group of plan members to the years of service that give rise to that cost.

Actuarial Present Value of Projected Benefits

Amount which, together with future interest, is expected to be sufficient to pay all future benefits.

Actuarial Valuation

Study of probable amounts of future pension or postemployment benefits and the necessary amount of contributions to fund those benefits.

Actuary

Person who performs mathematical calculations pertaining to pension and insurance benefits based on specific procedures and assumptions.

GASB 67 and 68

Governmental Accounting Standards Board Statement Number 67 amends Number 25 effective for the fiscal year beginning after June 15, 2013 and defines new financial reporting requirements for public pension plans.

Governmental Accounting Standards Board Statement Number 68 amends Number 27 effective for fiscal years beginning after June 15, 2014 and defines new accounting and financial reporting requirements for employers sponsoring public pension plans.

GASB 74 and 75

Governmental Accounting Standards Board Statement Number 74 amends Number 43 effective for the fiscal year beginning after June 15, 2016 and defines new financial reporting requirements for public postemployment benefit plans.

Governmental Accounting Standards Board Statement Number 75 amends Number 45 effective for fiscal years beginning after June 15, 2017 and defines new accounting and financial reporting requirements for employers sponsoring public postemployment benefit plans.

Normal Cost

That portion of the actuarial present value of benefits assigned to a particular year in respect to an individual participant or the plan as a whole.

Rate Payroll

Members' earnings used to determine contribution rates.

Unfunded Actuarial Accrued Liability (UAAL)

The portion of the actuarial accrued liability not offset by plan assets.

Valuation Payroll

Members' earnings used to determine Normal Cost and Actuarial Accrued Liability.

Vested Benefits

Benefits which are unconditionally guaranteed regardless of employment.

Certification of Actuarial Valuation

Dear Members of The Alaska Retirement Management Board, The Department of Revenue and The Department of Administration:

This report summarizes the annual actuarial valuation results of the State of Alaska Public Employees' Retirement System Defined Contribution Retirement (PERS DCR) Plan as of June 30, 2021 performed by Buck Global, LLC (Buck).

The actuarial valuation is based on financial information provided in the financial statements audited by KPMG LLP, member data provided by the Division of Retirement and Benefits, and medical enrollment data provided by the healthcare claims administrator (Aetna), as summarized in this report. The benefits considered are those delineated in Alaska statutes effective June 30, 2021. The actuary did not verify the data submitted, but did perform tests for consistency and reasonableness.

All costs, liabilities and other factors under PERS DCR were determined in accordance with generally accepted actuarial principles and procedures. An actuarial cost method is used to measure the actuarial liabilities which we believe is reasonable. Buck is solely responsible for the actuarial data and actuarial results presented in this report. This report fully and fairly discloses the actuarial position of PERS DCR as of June 30, 2021.

PERS DCR is funded by Employer Contributions in accordance with the funding policy adopted by the Alaska Retirement Management Board (Board). The funding objective for PERS DCR is to pay required contributions that remain level as a percent of PERS DCR compensation. The Board has also established a funding policy objective that the required contributions be sufficient to pay the Normal Costs of active plan members, plan expenses, and amortize the Unfunded Actuarial Accrued Liability as a level percent of PERS DCR compensation over closed layered 25-year periods. This objective is currently being met and is projected to continue to be met as required by the Alaska State statutes. Absent future gains/losses, actuarially determined contributions are expected to remain level as a percent of pay and the overall funded status is expected to remain at or above 100%.

The Board and staff of the State of Alaska may use this report for the review of the operations of PERS DCR. Use of this report for any other purpose or by anyone other than the Board or staff of the State of Alaska may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods or inapplicability of the report for that purpose. Because of the risk of misinterpretation of actuarial results, you should ask Buck to review any statement you wish to make on the results contained in this report. Buck will not accept any liability for any such statement made without the review by Buck.

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the actuarial assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions or applicable law. In particular, retiree group benefits models necessarily rely on the use of approximations and estimates and are sensitive to changes in these approximations and estimates. Small variations in these approximations and estimates may lead to significant changes in actuarial measurements. An analysis of the potential range of such future differences is beyond the scope of this valuation.

In our opinion, the actuarial assumptions used are reasonable, taking into account the experience of the plan and reasonable long-term expectations, and represent our best estimate of the anticipated long-term experience under the plan. The actuary performs an analysis of plan experience periodically and recommends changes if, in the opinion of the actuary, assumption changes are needed to more accurately reflect expected future experience. The last full experience analysis was performed for the period July 1, 2013 to June 30, 2017. Based on that experience study, the Board adopted new assumptions effective beginning with the June 30, 2018 valuation to better reflect expected future experience. Based on our annual analysis of recent claims experience, changes were made to the per capita claims cost rates effective June 30, 2021 to better reflect expected future healthcare experience. A summary of the actuarial assumptions and methods used in this actuarial valuation is shown in Sections 4.2 and 4.3. We certify that the assumptions and methods described in Sections 4.2 and 4.3 of this report meet the requirements of all applicable Actuarial Standards of Practice.

Governmental Accounting Standards Board (GASB) Statement No. 74 (GASB 74) was effective for PERS DCR beginning with fiscal year ending June 30, 2017, and GASB 75 was effective beginning with fiscal year ending June 30, 2018. Separate GASB 74 and GASB 75 reports have been prepared.

Assessment of Risks

Actuarial Standard of Practice No. 51 (ASOP 51) applies to actuaries performing funding calculations related to a pension plan. ASOP 51 does not apply to actuaries performing services in connection with other post-employment benefits, such as medical benefits. Accordingly, ASOP 51 does not apply to the retiree medical portion of PERS DCR. We also believe ASOP 51 does not apply to the occupational death & disability portion of PERS DCR. Therefore, information related to ASOP 51 is not included in this report. However, it may be beneficial to review the ASOP 51 information provided in the PERS valuation report for information on risks that may also relate to the occupational death & disability benefits provided by this plan.

Use of Models

Actuarial Standard of Practice No. 56 (ASOP 56) provides guidance to actuaries when performing actuarial services with respect to designing, developing, selecting, modifying, using, reviewing, or evaluating models. Buck uses third-party software in the performance of annual actuarial valuations and projections. The model is intended to calculate the liabilities associated with the provisions of the plan using data and assumptions as of the measurement date under the funding methods specified in this report. The output from the third-party vendor software is used as input to an internally developed model that applies applicable funding methods and policies to the derived liabilities and other inputs, such as plan assets and contributions, to generate many of the exhibits found in this report. Buck has an extensive review process in which the results of the liability calculations are checked using detailed sample life output, changes from year to year are summarized by source, and significant deviations from expectations are investigated. Other funding outputs and the internal model are similarly reviewed in detail and at a higher level for accuracy, reasonability, and consistency with prior results. Buck also reviews the third-party model when significant changes are made to the software. This review is performed by experts

within Buck who are familiar with applicable funding methods, as well as the manner in which the model generates its output. If significant changes are made to the internal model, extra checking and review are completed. Significant changes to the internal model that are applicable to multiple clients are generally developed, checked, and reviewed by multiple experts within Buck who are familiar with the details of the required changes.

Buck used manual rate models to determine relative plan values for the defined benefit (DB) retiree medical plan and the DCR retiree medical plan, and to reflect the different Medicare coordination methods between the two plans. The manual rate models are intended to provide benchmark data and pricing capabilities, calculate per capita costs, and calculate actuarial values of different commercial health plans. Buck relied on the models, which were developed using industry data by actuaries and consultants at OptumInsight.

COVID-19

The potential impact of the ongoing COVID-19 pandemic on costs and liabilities was considered and an adjustment was made in setting the medical per capita claims cost assumption. FY20 medical claims were adjusted for a COVID-19 related decline in claims during the last four months (March – June) of FY20. FY21 medical claims were adjusted for a COVID-19 related decline in those claims during the fiscal year. A more detailed explanation on these adjustments is shown in Sections 4.2 and 4.3 and in the valuation report for the DB plan.

This report was prepared under my supervision and in accordance with all applicable Actuarial Standards of Practice. I am a Fellow of the Society of Actuaries, an Enrolled Actuary, a Fellow of the Conference of Consulting Actuaries, and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

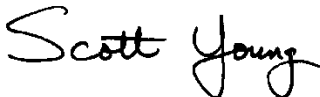

I am available to discuss this report with you at your convenience. I can be reached at 602-803-6174.

Respectfully submitted,

Principal
Buck

The undersigned actuary is responsible for all assumptions related to the average annual per capita health claims cost and the health care cost trend rates, and hereby affirms his qualification to render opinions in such matters in accordance with the Qualification Standards of the American Academy of Actuaries.

Scott Young, FSA, EA, MAAA, FCA
Director
Buck

Executive Summary

Overview

The State of Alaska Public Employees' Retirement System Defined Contribution Retirement (PERS DCR) Plan provides occupational death & disability and retiree medical benefits to eligible members hired after June 30, 2006 or who have elected participation in this plan. The Commissioner of the Department of Administration is responsible for administering the plan. The Alaska Retirement Management Board has fiduciary responsibility over the assets of the plan. This report presents the results of the actuarial valuation of PERS DCR as of the valuation date of June 30, 2021.

Purpose

An actuarial valuation is performed on the plan annually as of the end of the fiscal year. The main purposes of the actuarial valuation detailed in this report are:

1. To determine the Employer contribution necessary to meet the Board's funding policy for the plan;
2. To disclose the funding assets and liability measures as of the valuation date;
3. To review the current funded status of the plan and assess the funded status as an appropriate measure for determining actuarially determined contributions;
4. To compare actual and expected experience under the plan during the last fiscal year; and
5. To report trends in contributions, assets, liabilities, and funded status over the last several years.

The actuarial valuation provides a "snapshot" of the funded position of PERS DCR based on the plan provisions, membership data, assets, and actuarial methods and assumptions as of the valuation date.

Funded Status

Where presented, references to "funded ratio" and "unfunded actuarial accrued liability" typically are measured on an actuarial value of assets basis. It should be noted that the same measurements using market value of assets would result in different funded ratios and unfunded accrued liabilities. Moreover, the funded ratio presented is appropriate for evaluating the need and level of future contributions but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e. purchase annuities) for a portion or all of its liabilities.

Funded Status as of June 30 (\$'s in 000's)	2020	2021
Occupational Death & Disability		
a. Actuarial Accrued Liability	\$ 10,634	\$ 11,740
b. Valuation Assets	<u>43,029</u>	<u>53,075</u>
c. Unfunded Actuarial Accrued Liability, (a) - (b)	\$ (32,395)	\$ (41,335)
d. Funded Ratio based on Valuation Assets, (b) ÷ (a)	404.6%	452.1%
e. Fair Value of Assets	\$ 42,091	\$ 60,145
f. Funded Ratio based on Fair Value of Assets, (e) ÷ (a)	395.8%	512.3%

Funded Status as of June 30 (\$'s in 000's)		2020	2021
Retiree Medical			
a.	Actuarial Accrued Liability	\$ 150,701	\$ 168,472
b.	Valuation Assets	<u>144,747</u>	<u>180,536</u>
c.	Unfunded Actuarial Accrued Liability, (a) - (b)	\$ 5,954	\$ (12,064)
d.	Funded Ratio based on Valuation Assets, (b) ÷ (a)	96.0%	107.2%
e.	Fair Value of Assets	\$ 141,569	\$ 204,555
f.	Funded Ratio based on Fair Value of Assets, (e) ÷ (a)	93.9%	121.4%
Total			
a.	Actuarial Accrued Liability	\$ 161,335	\$ 180,212
b.	Valuation Assets	<u>187,776</u>	<u>233,611</u>
c.	Unfunded Actuarial Accrued Liability, (a) - (b)	\$ (26,441)	\$ (53,399)
d.	Funded Ratio based on Valuation Assets, (b) ÷ (a)	116.4%	129.6%
e.	Fair Value of Assets	\$ 183,660	\$ 264,700
f.	Funded Ratio based on Fair Value of Assets, (e) ÷ (a)	113.8%	146.9%

The key reasons for the change in the funded status are explained below. The funded status for healthcare benefits is not necessarily an appropriate measure to confirm that assets are sufficient to settle health plan obligations as there are no available financial instruments for purchase. Future experience is likely to vary from assumptions so there is potential for actuarial gains or losses.

1. Investment Experience

The approximate FY21 investment return based on fair value of assets was 29.6% compared to the expected investment return of 7.38% (net of investment expenses of approximately 0.29%). This resulted in a gain of approximately \$43,414,000 to the plan from investment experience. The asset valuation method recognizes 20% of this gain (\$8,683,000) this year and an additional 20% in each of the next 4 years. In addition, 20% of the FY17 investment gain, 20% of the FY18 investment loss, 20% of the FY19 investment loss, and 20% of the FY20 investment loss were recognized this year. The approximate FY21 asset return based on actuarial value of assets was 11.3% compared to the expected asset return of 7.38% (net of investment expenses).

2. Salary Increases

Salary increases for continuing active members during FY21 were higher than anticipated based on the valuation assumptions, resulting in a liability loss of approximately \$8,000.

3. Demographic Experience

The number of active members increased 4.4% from 22,923 at June 30, 2020 to 23,933 at June 30, 2021. The average age of active members increased from 41.21 to 41.26 and average credited service increased from 4.66 to 4.93 years.

The demographic experience gains/losses are shown on page 4.

4. Retiree Medical Claims Experience

Please refer to the State of Alaska Public Employees' Retirement System (PERS) Defined Benefit Plan Actuarial Valuation Report as of June 30, 2021 for a full description of the assumptions and costs of the retiree medical plan. Adjustments to these costs and assumptions are described in this report.

The recent claims experience described in Section 4.2 of this report (Section 5.2 of the PERS report) created an actuarial gain of approximately \$7,066,000.

5. Changes in Methods Since the Prior Valuation

There were no changes in actuarial methods since the prior valuation.

6. Changes in Assumptions Since the Prior Valuation

Healthcare claim costs are updated annually as described in Section 4.2. The amounts included in Normal Cost for administrative expenses were updated based on the last two years of actual administrative expenses paid from plan assets. There were no other changes in actuarial assumptions since the prior valuation.

7. Changes in Benefit Provisions Since the Prior Valuation

Starting in 2022, prior authorization will be required for certain specialty medications. This change created an actuarial gain of approximately \$2,029,000. There have been no other changes in benefit provisions valued since the prior valuation.

Comparative Summary of Contribution Rates

Occupational Death & Disability	FY 2023	FY 2024

June 30, 2019	FY22	0.68% / 0.31%	1.07%	1.75% / 1.38%
June 30, 2020	FY23	0.68% / 0.30%	1.10%	1.78% / 1.40%
June 30, 2021	FY24	TBD	TBD	TBD

Summary of Actuarial Accrued Liability Gain/(Loss)

The following table shows the FY21 gain/(loss) on actuarial accrued liability as of June 30, 2021 (\$'s in 000's):

	Occupational Death & Disability	Retiree Medical	Total
Retirement Experience	\$ 0	\$ (521)	\$ (521)
Termination Experience	(90)	2,669	2,579
Disability Experience	3,346	341	3,687
Active Mortality Experience	1,900	104	2,004
Inactive Mortality Experience	(21)	432	411
Salary Increases	(8)	N/A	(8)
New Entrants	(89)	(1,320)	(1,409)
Rehires	(47)	(3,068)	(3,115)
Transfers Between P/F and Others	(31)	(52)	(83)
Benefit Payments Different than Expected	145	209	354
Per Capita Claims Costs	N/A	7,066	7,066
Prescription Drug Plan Changes	N/A	2,029	2,029
Miscellaneous ¹	(362)	1,560	1,198
Total	\$ 4,743	\$ 9,449	\$ 14,192

¹ Includes the effects of various data changes that are typical when new census data is received for the annual valuation, as well as other items that do not fit neatly into any of the other categories.

Section 2.2: Changes in Fair Value of Assets During FY21 (\$'s in 000's)

Fiscal Year 2021	Occupational Death & Disability	Retiree Medical	Total
1. Fair Value of Assets as of June 30, 2020	\$ 42,091	\$ 141,569	\$ 183,660
2. Additions:			
a. Member Contributions	\$ 0	\$ 0	\$ 0
b. Employer Contributions	5,334	18,559	23,893
c. Interest and Dividend Income	626	2,120	2,746
d. Net Appreciation/(Depreciation) in Fair Value of Investments	12,678	42,913	55,591
e. Employer Group Waiver Plan	0	60	60
f. Other	2	7	9
g. Total Additions	\$ 18,640	\$ 63,659	\$ 82,299
3. Deductions:			
a. Medical Benefits	\$ 0	\$ 237	\$ 237
b. Death & Disability Benefits	431	0	431
c. Investment Expenses	123	414	537
d. Administrative Expenses	32	22	54
e. Total Deductions	\$ 586	\$ 673	\$ 1,259
4. Fair Value of Assets as of June 30, 2021	\$ 60,145	\$ 204,555	\$ 264,700
5. Approximate Fair Value Investment Return Rate during FY21 Net of Investment Expenses	29.6%	29.6%	29.6%

Section 2.3: Development of Actuarial Value of Assets (\$'s in 000's)

The actuarial value of assets and the fair value were \$0 at June 30, 2006. Investment gains and losses are recognized 20% per year over 5 years. In no event may valuation assets be less than 80% or more than 120% of fair value as of the current valuation date.

	Occupational Death & Disability	Retiree Medical	Total
1. Investment Gain/(Loss) for FY21			
a. Fair Value as of June 30, 2020	\$ 42,091	\$ 141,569	\$ 183,660
b. Contributions	5,334	18,559	23,893
c. Employer Group Waiver Plan	0	60	60
d. Benefit Payments	431	237	668
e. Administrative Expenses	32	22	54
f. Actual Investment Return (net of investment expenses)	13,183	44,626	57,809
g. Expected Return Rate (net of investment expenses)	7.38%	7.38%	7.38%
h. Expected Return	3,282	11,113	14,395
i. Investment Gain/(Loss) for the Year (f) - (h)	9,901	33,513	43,414
2. Actuarial Value as of June 30, 2021			
a. Fair Value as of June 30, 2021	\$ 60,145	\$ 204,555	\$ 264,700
b. Deferred Investment Gain/(Loss)	7,070	24,019	31,089
c. Preliminary Actuarial Value as of June 30, 2021, (a) - (b)	53,075	180,536	233,611
d. Upper Limit: 120% of Fair Value as of June 30, 2021	72,174	245,466	317,640
e. Lower Limit: 80% of Fair Value as of June 30, 2021	48,116	163,644	211,760
f. Actuarial Value at June 30, 2021, (c) limited by (d) and (e)	53,075	180,536	233,611
3. Ratio of Actuarial Value of Assets to Fair Value of Assets	88.2%	88.3%	88.3%
4. Approximate Actuarial Value Investment Return Rate during FY21 Net of Investment Expenses	11.4%	11.3%	11.3%
5. Actuarial Value Allocation ¹			
a. Peace Officer / Firefighter	\$ 15,959	\$ 20,163	\$ 36,122
b. Others	37,116	160,373	197,489
c. All Members	\$ 53,075	\$ 180,536	\$ 233,611

¹ Occupational death & disability allocated using fair value of assets. Retiree medical allocated based on retiree medical actuarial accrued liability.

The tables below show the development of the gains/(losses) to be recognized in the current year (\$'s in 000's):

Occupational Death & Disability				
Fiscal Year Ending	Asset Gain / (Loss)	Gain / (Loss) Recognized in Prior Years	Gain / (Loss) Recognized This Year	Gain / (Loss) Deferred to Future Years

Total and average annual earnings ("valuation pay") are the annualized earnings for the fiscal year ending on the valuation date.

Section 3.5: Active Member Payroll Reconciliation

Payroll Field	Payroll Data (000's)
a) DRB actual reported salaries FY21 in employer list	\$ 1,427,348
b) DRB actual reported salaries FY21 in valuation data	1,357,501
c) Annualized valuation data	1,530,905
d) Valuation payroll as of June 30, 2021	1,603,885
e) Rate payroll for FY22	1,548,116

- a) Actual reported salaries from DRB employer listing showing all payroll paid during FY21, including those who were not active as of June 30, 2021
- b) Payroll from valuation data for people who are in active status as of June 30, 2021
- c) Payroll from (b) annualized for both new entrants and part-timers
- d) Payroll from (c) with one year of salary scale applied to estimate salaries payable for the upcoming year
- e) Payroll from (d) with the part-timer annualization removed

Section 4: Basis of the Actuarial Valuation

Section 4.1: Summary of Plan Provisions

Effective Date

July 1, 2006, with amendments through June 30, 2021.

Administration of Plan

The Commissioner of Administration or the Commissioner's designee is the administrator of the Plan. The Attorney General of the state is the legal counsel for the Plan and shall advise the administrator and represent the Plan in legal proceedings.

The Alaska Retirement Management Board prescribes policies, adopts regulations, invests the funds, and performs other activities necessary to carry out the provisions of the Plan.

Employers Included

Currently there are 151 employers participating in PERS DCR, including the State of Alaska, and 150 political subdivisions and public organizations.

Membership

An employee of a participating employer who first enters service on or after July 1, 2006, or a member of the defined benefit plan who works for an employer who began participation on or after July 1, 2006, and meets the following criteria is a member in the Plan:

- Permanent full-time or part-time employees of the State of Alaska, participating political subdivisions or public organizations. An employee must be regularly scheduled to work 30 or more hours per week to be considered full-time by the PERS. An employee must be regularly scheduled to work 15 or more hours per week but less than 30 hours to be considered a part-time employee for PERS purposes.
- Elected state officials.
- Elected municipal officials who are compensated and receive at least \$2,001.00 per month.

Members can convert to PERS DCR if they are an eligible non-vested member of the PERS defined benefit plan whose employer consents to transfers to the defined contribution plan and they elect to transfer his or her account balance to PERS DCR.

Member Contributions

Other than the member-paid premiums discussed later in this section, there are no member contributions for the occupational death & disability and retiree medical benefits.

Retiree Medical Benefits

- Member must retire directly from the plan to be eligible for retiree medical coverage. Normal retirement eligibility is the earlier of a) 25 years of service as a peace officer or firefighter and 30 years of service for any other employee or b) Medicare eligible and 10 years of service.
- No subsidized retiree medical benefits are provided until normal retirement eligibility. The member's and any covered dependent's premium is 100% until the member is Medicare eligible. Upon the member's Medicare-eligibility, the required contribution will follow the service-based schedule shown below.
- Coverage cannot be denied except for failure to pay premium.
- Members who are receiving disability benefits or survivors who are receiving monthly survivor benefits are not eligible until the member meets, or would have met if he/she had lived, the normal retirement eligibility requirements.
- The following is a summary of the medical benefit design adopted in July 2016. The plan description below is used for valuation purposes and indicates participant cost-sharing. Please refer to the benefit handbook for more details.

Plan Design Feature	In-Network ¹	Out-of-Network ^{1 2}
Deductible (single / family)	\$300 / \$600	
Medical services (participant share)	20%	40%
Emergency Room Copay (non-emergent use)	\$100	\$100
Medical Out-of-Pocket Maximum (single / family, including deductible)	\$1,500 / \$3,000	\$3,000 / \$6,000
Medicare Coordination	Exclusion	Exclusion
Pharmacy	No Deductible	No Deductible
Retail Generic (per 30-day fill)	20% \$10 min / \$50 max	40%
Retail Non-Formulary Brand (per 30-day fill)	25% \$25 min / \$75 max	
Retail Formulary Brand (per 30-day fill)	35% \$80 min / \$150 max	
Mail-Order Generic	\$20 copay	40%
Mail-Order Non-Formulary Brand	\$50 copay	
Mail-Order Formulary Brand	\$100 copay	
Pharmacy Out-of-Pocket Max (single / family)	\$1,000 / \$2,000	
Medicare Pharmacy Arrangement	Retiree Drug Subsidy / Employer Group Waiver Plan effective 1/1/2019	
Wellness / Preventative	100% covered, not subject to deductible	20%, after deductible

¹ Section 1.1 of the AlaskaCare Defined Contribution Retiree Benefit Plan states that this health plan shall be updated from time to time to reflect changes in benefits, including annual adjustments to the premium, deductible, coinsurance, medical out-of-pocket limit, and prescription drug out-of-pocket limit.

² OON applies only to non-Medicare eligible participants.

- Buck used manual rate models to determine relative plan values for the defined benefit (DB) retiree medical plan and the DCR retiree medical plan outlined above. We applied the ratio of the DCR retiree medical plan value to the DB retiree medical plan value to the per capita costs determined for each of pre/post-Medicare medical and pharmacy benefits to estimate corresponding values for the DCR retiree medical plan design. These factors are noted in Section 4.3. We further adjusted the Medicare medical manual rate to reflect the Medicare coordination method adopted. The estimated 2022 reimbursements under EGWP were provided by Segal Consulting (who worked with the EGWP administrator, Optum, to develop those estimates). We reflect estimated discounts and pharmacy rebates in the defined benefit medical cost so no further adjustment was needed for the DCR retiree medical plan. The medical network differential is reflected in the relative plan value adjustments.
- Starting in 2022, prior authorization will be required for certain specialty medications. There is no change to the medications that are covered by the plan.
- The retiree medical plan's coverage is supplemental to Medicare. Medicare coordination is described in the DCR Plan Handbook, referred to in the industry as exclusion coordination: Medicare payment is deducted from the Medicare allowable expense and plan parameters are applied to the remaining amount. Starting in 2019, the prescription drug coverage is through a Medicare Part D EGWP arrangement.
- The premium for Medicare-eligible retirees will be based on the member's years of service. The percentage of premium paid by the member is as follows:

Years of Service	Percent of Premium Paid by Member
< 15	30%
15 – 19	25%
20 – 24	20%
25 – 29	15%
30+	10%

- The premium for dependents who are not eligible for Medicare aligns with the member's subsidy. While a member is not Medicare-eligible, premiums are 100% of the estimated cost.
- Members have a separate defined contribution Health Reimbursement Arrangement account, which is not reflected in this valuation, that can be used to pay for premiums or other medical expenses.
- For valuation purposes, retiree premiums were assumed to equal the percentages outlined in the table above times the age-related plan costs. Future premiums calculated and charged to DCR participants will need to be determined reflecting any appropriate adjustments to the defined benefit (DB) plan data because current DB premiums were determined using information based upon enrollment with members who have double coverage.
- Coverage will continue for surviving spouses of covered retired members.

Occupational Disability Benefits

- Benefit is 40% of salary at date of disability.
- For Peace Officer and Firefighters there is a Disability Benefit Adjustment such that:
 - The disability benefit is increased by 75% of the cost of living increase in the preceding calendar year or 9%, whichever is less.
 - At the time the disabled member retires, the retirement benefit will be increased by a percentage equal to the total cumulative percentage that has been applied to the disability benefit. Monthly annuity payments are made from the member's contribution balance until the fund is exhausted, at which the plan pays all remaining payments.
- For Others, there is no increase in the occupational disability benefit after commencement.
- Member earns service while on occupational disability.
- Benefits cease when the member becomes eligible for normal retirement at Medicare-eligible age and 10 years of service, or at any age with 30 years of service for Others members or 25 years of service for Peace Officer/Firefighter members.
- Peace Officer/Firefighter members may select the defined contribution account or the monthly benefit payable as if they were retiring under Tier 3 (service continues during disability, final average salary is as of date of disability), but with payments first made from the member's DC account until it's exhausted.
- No subsidized retiree medical benefits are provided until normal retirement eligibility. The member's premium is 100% of the estimated cost until they are Medicare eligible. Medicare-eligible premiums follow the service-based schedule above.

Occupational Death Benefits

- Benefit is 40% of salary for Others members and 50% of salary for Peace Officer/Firefighter members.
- Survivor's Pension Adjustment: A survivor's pension is increased by 50% of the cost of living increase in the preceding calendar year or 6%, whichever is less, if the recipient is at least age 60 on July 1, or under age 60 if the recipient has been receiving PERS benefits for at least 5 years as of July 1.
- Benefits cease when the member would have become eligible for normal retirement.
- The period during which the survivor is receiving benefits is counted as service credit toward retiree medical benefits.
- No subsidized retiree medical benefits are provided until the member would have been eligible for normal retirement. The surviving spouse's premium is 100% of the estimated cost until the member would have been Medicare eligible. Medicare-eligible premiums follow the service-based schedule above.

Changes Since the Prior Valuation

Starting in 2022, prior authorization will be required for certain specialty medications. There have been no other changes in PERS DCR benefit provisions valued since the prior valuation.

Section 4.2: Description of Actuarial Methods and Valuation Procedures

The funding method used in this valuation was adopted by the Board in October 2006, and was modified as part of the experience study for the period July 1, 2013 to June 30, 2017. The asset smoothing method used to determine valuation assets was implemented effective June 30, 2006.

Benefits valued are those delineated in Alaska State statutes as of the valuation date. Changes in State statutes effective after the valuation date are not taken into consideration in setting the assumptions and methods.

Actuarial Cost Method

Liabilities and contributions shown in the report are computed using the Entry Age Normal Actuarial Cost Method, level percent of pay. Each year's difference between actual and expected unfunded actuarial accrued liability is amortized over 25 years as a level percentage of expected payroll.

Cost factors designed to produce annual costs as a constant percentage of each member's expected compensation in each year for death & disability benefits and retiree medical benefits, from the assumed entry age to the last age with a future benefit were applied to the projected benefits to determine the normal cost (the portion of the total cost of the plan allocated to the current year under the method). The normal cost is determined by summing intermediate results for active members and determining an average normal cost rate which is then related to the total DCR Plan payroll of active members. The actuarial accrued liability for active members (the portion of the total cost of the plan allocated to prior years under the method) was determined as the excess of the actuarial present value of projected benefits over the actuarial present value of future normal costs.

The actuarial accrued liability for beneficiaries and disabled members currently receiving benefits (if any) was determined as the actuarial present value of the benefits expected to be paid. No future normal costs are payable for these members.

The actuarial accrued liability under this method at any point in time is the theoretical amount of the fund that would have been accumulated had annual contributions equal to the normal cost been made in prior years (it does not represent the liability for benefits accrued to the valuation date). The unfunded actuarial accrued liability is the excess of the actuarial accrued liability over the actuarial value of plan assets measured on the valuation date.

Under this method, experience gains or losses, i.e., decreases or increases in accrued liabilities attributable to deviations in experience from the actuarial assumptions, adjust the unfunded actuarial accrued liability.

Valuation of Assets

Effective June 30, 2006, the asset valuation method recognizes 20% of the investment gain or loss in each of the current and preceding four years. This method was phased in over five years. Fair Value of Assets was \$0 as of June 30, 2006. All assets are valued at fair value. Assets are accounted for on an accrued basis and are taken directly from financial statements audited by KPMG LLP. Valuation assets are constrained to a range of 80% to 120% of the fair value of assets.

Changes in Methods Since the Prior Valuation

There were no changes in the asset or valuation methods since the prior valuation.

Valuation of Retiree Medical and Prescription Drug Benefits

The methodology used for the valuation of the retiree medical benefits is described in Section 5.2 of the State of Alaska Public Employees' Retirement System Defined Benefit Plan Actuarial Valuation Report as of June 30, 2021.

Starting in 2022, prior authorization will be required for certain specialty medications. There is no change to the medications that are covered by the plan. Segal provided an estimate of the impact of this change to the DB retiree health plan cost for calendar year 2022. The DB base claims costs for pre-Medicare prescription drug, Medicare prescription drug, and EGWP were adjusted to reflect this change. Those base claims costs were used for the DCR valuation with further adjustments as noted below. Additionally, starting in 2022, certain common preventive benefits will be covered for the DB plan. However, preventive benefits are already covered under the DCR plan so no adjustment is needed for that change. Therefore, the base claims cost for the DB plan prior to reflecting the addition of preventive benefits was used for the DCR valuation with further adjustments as noted below.

Due to the lack of experience for the DCR retiree medical plan, base claims costs are based on those described in the actuarial valuation as of June 30, 2021 for the Defined Benefit (DB) retiree medical plan covering TRS and PERS. The DB rates were used with some adjustments. The claims costs were adjusted to reflect the differences between the DCR medical plan and the DB medical plan. These differences include network steerage, different coverage levels, different Medicare coordination for medical benefits, and an indexing of the retiree out-of-pocket dollar amounts. To account for higher initial copays, deductibles and out-of-pocket limits, projected FY22 claims costs were reduced 3.1% for medical claims, and 8.9% for prescription drugs. In addition, to account for the difference in Medicare coordination, projected FY22 medical claims costs for Medicare eligible retirees were further reduced 29.5%.

To adjust for the decrease in medical claims due to COVID-19 during the last 4 months of FY20, the per capita cost during the first 8 months was used as the basis for estimating claims that would have occurred in the absence of COVID-19. FY21 experience was also thoroughly reviewed to assess the impact of COVID-19 and whether an adjustment to FY21 claims was appropriate for use in the June 30, 2021 valuation. FY21 medical per capita claims were noticeably lower than expected, so a 4% load was added to the FY21 medical claims used in the per capita claims cost development to better reflect future expected long-term costs of the plan.

No implicit subsidies are assumed. Employees projected to retire with 30 years of service (25 years of service for Peace/Fire) prior to Medicare are valued with commencement deferred to Medicare eligibility because those members will be required to pay the full plan premium prior to Medicare. Explicit subsidies for disabled and normal retirement are determined using the plan-defined percentages of age-related total projected plan costs, again with no implicit subsidy assumed.

The State transitioned to an Employer Group Waiver Program (EGWP) for DCR participants effective January 1, 2019. The estimated 2022 reimbursements under EGWP were provided by Segal Consulting (who worked with the EGWP administrator, Optum, to develop those estimates).

Healthcare Reform

Healthcare Reform legislation passed on March 23, 2010 included several provisions with potential implications for the State of Alaska Retiree Health Plan liability. Buck evaluated the impact due to these provisions.

Because the State plan is retiree-only, not all provisions are required. Unlimited lifetime benefits and dependent coverage to age 26 are two of these provisions. The adopted DCR plan does not place lifetime limits on benefits, but does restrict dependent child coverage.

The Further Consolidated Appropriations Act, 2020 passed in December 2019 repealed several healthcare-related taxes, including the Cadillac Tax.

The Tax Cuts and Jobs Act passed in December 2017 included the elimination of the individual mandate penalty and changed the inflation measure for purposes of determining the limits for the High Cost Excise Tax to use chained CPI. It is our understanding the law does not directly impact other provisions of the ACA. While the nullification of the ACA's individual mandate penalty does not directly impact employer group health plans, it could contribute to the destabilization of the individual market and increase the number of uninsured. Such destabilization could translate to increased costs for employers. We have considered this when setting our healthcare cost trend assumptions and will continue to monitor this issue.

We have not identified any other specific provisions of healthcare reform or its potential repeal that would be expected to have a significant impact on the measured obligation. We will continue to monitor legislative activity.

Section 4.3: Summary of Actuarial Assumptions

The demographic and economic assumptions used in the June 30, 2021 valuation are described below. Unless noted otherwise, these assumptions were adopted by the Board in January 2019 based on the experience study for the period July 1, 2013 to June 30, 2017.

Investment Return

7.38% per year, net of investment expenses.

Salary Scale

Salary scale rates based upon the 2013-2017 actual experience (see Table 1).

Inflation – 2.50% per year.

Productivity – 0.25% per year.

Payroll Growth

2.75% per year (inflation + productivity).

Total Inflation

Total inflation as measured by the Consumer Price Index for urban and clerical workers for Anchorage is assumed to increase 2.50% annually.

Mortality (Pre-Commencement)

Mortality rates based upon the 2013-2017 actual experience.

100% (male and female) of RP-2014 employee table, benefit-weighted, rolled back to 2006, and projected with MP-2017 generational improvement.

Deaths are assumed to result from occupational causes 75% of the time for Peace Officer/Firefighters, and 40% of the time for Others.

Mortality (Post-Commencement)

Mortality rates based upon the 2013-2017 actual experience.

91% of male and 96% of female rates of RP-2014 healthy annuitant table, benefit-weighted, rolled back to 2006, and projected with MP-2017 generational improvement.

Turnover

Select and ultimate rates based upon the 2013-2017 actual experience (see Tables 2a and 2b).

Disability

Incidence rates based upon the 2013-2017 actual experience (see Table 3).

Disabilities are assumed to be occupational 75% of the time for Peace Officer/Firefighters, and 40% of the time for Others. For Peace Officer/Firefighters, members are assumed to take the monthly annuity 100% of the time.

Post-disability mortality in accordance with the RP-2014 disabled table, benefit-weighted, rolled back to 2006, and projected with MP-2017 generational improvement.

Retirement

Retirement rates based upon the 2013-2017 actual experience (see Table 4).

Spouse Age Difference

Males are assumed to be three years older than their wives. Females are assumed to be two years younger than husbands.

Percent Married for Occupational Death & Disability

For Others, 75% of male members and 70% of female members are assumed to be married. For Peace Officer/Firefighters, 85% of male members and 60% of female members are assumed to be married.

Dependent Spouse Medical Coverage Election

Applies to members who do not have double medical coverage. For Others, 65% of male members and 60% of female members are assumed to be married and cover a dependent spouse. For Peace Officer/Firefighters, 75% of male members and 50% of female members are assumed to be married and cover a dependent spouse.

Part-Time Status

Part-time employees are assumed to earn 1.00 years of credited service per year for Peace Officer/Firefighter and 0.75 years of credited service per year for Other members.

Peace Officer / Firefighter Occupational Disability Retirement Benefit Commencement

The occupational disability retirement benefit is assumed to be first payable from the member's DC account and the retirement benefit payable from the occupational death & disability trust will commence five years later.

Per Capita Claims Cost

Sample claims cost rates (before base claims cost adjustments described below) adjusted to age 65 for FY22 medical and prescription drugs are shown below. The prescription drug costs reflect the plan change to require prior authorization for certain specialty medications.

	Medical	Prescription Drugs
Pre-Medicare	\$ 15,708	\$ 3,375
Medicare Parts A & B	\$ 1,619	\$ 3,474
Medicare Part D – EGWP	N/A	\$ 1,131

Members are assumed to attain Medicare eligibility at age 65. All costs are for the 2022 fiscal year (July 1, 2021 – June 30, 2022).

The EGWP subsidy is assumed to increase in future years by the trend rates shown on the following pages. No future legislative changes or other events are anticipated to impact the EGWP subsidy. If any legislative or other changes occur in the future that impact the EGWP subsidy (which could either increase or decrease the plan's Actuarial Accrued Liability), those changes will be evaluated and quantified when they occur.

Third Party Administrator Fees

\$493 per person per year; assumed to increase at 4.5% per year.

Base Claims Cost Adjustments

Due to higher initial copays, deductibles, out-of-pocket limits and member cost sharing compared to the DB medical plan, the following cost adjustments are applied to the per capita claims cost rates above:

- 0.969 for the pre-Medicare plan.
- 0.674 for both the Medicare medical plan and Medicare coordination method (3.1% reduction for the medical plan and 29.5% reduction for the coordination method).
- 0.911 for the prescription drug plan.

Administrative Expenses

Beginning with the June 30, 2018 valuation, the Normal Cost is increased for administrative expenses expected to be paid from plan assets during the year. The amounts included in the June 30, 2021 Normal Cost, which are based on the average of actual administrative expenses during the last two fiscal years, are \$16,000 for occupational death & disability and \$24,000 for retiree medical.

Healthcare Cost Trend

The table below shows the rate used to project the cost from the shown fiscal year to the next fiscal year. For example, 6.3% is applied to the FY22 pre-Medicare medical claims costs to get the FY23 medical claims costs.

	Medical Pre-65	Medical Post-65	Prescription Drugs / EGWP
FY22	6.3%	5.4%	7.1%
FY23	6.1%	5.4%	6.8%
FY24	5.9%	5.4%	6.4%
FY25	5.8%	5.4%	6.1%
FY26	5.6%	5.4%	5.7%
FY27-FY40	5.4%	5.4%	5.4%
FY41	5.3%	5.3%	5.3%
FY42	5.2%	5.2%	5.2%
FY43	5.1%	5.1%	5.1%
FY44	5.1%	5.1%	5.1%
FY45	5.0%	5.0%	5.0%
FY46	4.9%	4.9%	4.9%
FY47	4.8%	4.8%	4.8%
FY48	4.7%	4.7%	4.7%
FY49	4.6%	4.6%	4.6%
FY50+	4.5%	4.5%	4.5%

For the June 30, 2014 valuation and later, the updated Society of Actuaries' Healthcare Cost Trend Model is used to project medical and prescription drug costs. This model estimates trend amounts that are projected out for 80 years. The model has been populated with assumptions that are specific to the State of Alaska.

Aging Factors

Age	Medical	Prescription Drugs
0 – 44	2.0%	4.5%
45 – 54	2.5%	3.5%
55 – 64	2.5%	1.5%
65 – 74	3.0%	2.0%
75 – 84	2.0%	-0.5%
85 – 94	0.3%	-2.5%
95+	0.0%	0.0%

Retiree Medical Participation

Decrement Due to Disability		Decrement Due to Retirement	
Age	Percent Participation	Age	Percent Participation*
< 56	75.0%	55	50.0%
56	77.5%	56	55.0%
57	80.0%	57	60.0%
58	82.5%	58	65.0%
59	85.0%	59	70.0%
60	87.5%	60	75.0%
61	90.0%	61	80.0%
62	92.5%	62	85.0%
63	95.0%	63	90.0%
64	97.5%	64	95.0%
65+	100.0%	65+	Years of Service
		< 15	75.0%
		15 – 19	80.0%
		20 – 24	85.0%
		25 – 29	90.0%
		30+	95.0%

* Participation assumption is a combination of (i) the service-based rates for retirement from employment at age 65+ and (ii) the age-based rates for retirement from employment before age 65. These rates reflect the expected plan election rate that varies by reason for decrement, duration that a member may pay full cost prior to Medicare eligibility, and availability of alternative and/or lower cost options, particularly in the Medicare market. This assumption is based on observed trends in participation from a range of other plans.

Imputed Data

Data changes from the prior year which are deemed to have immaterial impact on liabilities and contribution rates are assumed to be correct in the current year's client data. Non-vested terminations with appropriate refund dates are assumed to have received a full refund of contributions. Active members with missing salary and service are assumed to be terminated with status based on their vesting percentage.

Changes in Assumptions Since the Prior Valuation

The amounts included in the Normal Cost for administrative expenses were changed from \$1,000 to \$16,000 for occupational death & disability, and from \$20,000 to \$24,000 for retiree medical (based on the most recent two years of actual administrative expenses paid from plan assets). The per capita claims cost assumption is updated annually.

Glossary of Terms

Actuarial Accrued Liability

Total accumulated cost to fund pension or postemployment benefits arising from service in all prior years.

Actuarial Cost Method

Technique used to assign or allocate, in a systematic and consistent manner, the expected cost of a pension or postemployment plan for a group of plan members to the years of service that give rise to that cost.

Actuarial Present Value of Projected Benefits

Amount which, together with future interest, is expected to be sufficient to pay all future benefits.

Actuarial Valuation

Study of probable amounts of future pension or postemployment benefits and the necessary amount of contributions to fund those benefits.

Actuary

Person who performs mathematical calculations pertaining to pension and insurance benefits based on specific procedures and assumptions.

GASB 74 and 75

Governmental Accounting Standards Board Statement Number 74 amends Number 43 effective for the fiscal year beginning after June 15, 2016 and defines new financial reporting requirements for public postemployment benefit plans. Governmental Accounting Standards Board Statement Number 75 amends Number 45 effective for fiscal years beginning after June 15, 2017 and defines new accounting and financial reporting requirements for employers sponsoring public postemployment benefit plans.

Normal Cost

That portion of the actuarial present value of benefits assigned to a particular year in respect to an individual participant or the plan as a whole.

Rate Payroll

Members' earnings used to determine contribution rates.

Unfunded Actuarial Accrued Liability (UAAL)

The portion of the actuarial accrued liability not offset by plan assets.

Valuation Payroll

Members' earnings used to determine Normal Cost and Actuarial Accrued Liability.

Vested Benefits

Benefits which are unconditionally guaranteed regardless of employment.

Certification of Actuarial Valuation

Dear Members of The Alaska Retirement Management Board, The Department of Revenue and The Department of Administration:

This report summarizes the annual actuarial valuation results of the State of Alaska Teachers' Retirement System (TRS) as of June 30, 2021 performed by Buck Global, LLC (Buck).

The actuarial valuation is based on financial information provided in the financial statements audited by KPMG LLP, member data provided by the Division of Retirement and Benefits, and medical enrollment data provided by the healthcare claims administrator (Aetna), as summarized in this report. The benefits considered are those delineated in Alaska statutes effective June 30, 2021. The actuary did not verify the data submitted, but did perform tests for consistency and reasonableness.

All costs, liabilities, and other factors under TRS were determined in accordance with generally accepted actuarial principles and procedures. An actuarial cost method is used to measure the actuarial liabilities which we believe is reasonable. Buck is solely responsible for the actuarial data and actuarial results presented in this report. This report fully and fairly discloses the actuarial position of TRS as of June 30, 2021.

TRS is funded by Employer, State, and Member Contributions in accordance with the funding policy adopted by the Alaska Retirement Management Board (Board) and as required by Alaska state statutes. The funding objective for TRS is to pay required contributions that remain level as a percent of total TRS compensation. The Board has also established a funding policy objective that the required contributions be sufficient to pay the Normal Costs of active plan members, plan expenses, and amortize the Unfunded Actuarial Accrued Liability (UAAL) as a level percentage of total TRS compensation over a closed 25-year period as required by Alaska state statutes. The closed 25-year period was originally established effective June 30, 2014. Effective June 30, 2018, the Board adopted a 25-year layered UAAL amortization method as described in Section 5.2. The UAAL amortization continues to be on a level percent of pay basis. The compensation used to determine required contributions is the total compensation of all active members in TRS, including those hired after July 1, 2006 who are members of the Defined Contribution Retirement (DCR) Plan. This objective is currently being met and is projected to continue to be met. Absent future gains/losses, actuarially determined contributions are expected to remain level as a percent of pay and the overall funded status (on a combined pension/healthcare basis) is expected to increase to 100% in FY24 (the funded status of the pension trust is expected to increase to 100% in FY33).

The Board and staff of the State of Alaska may use this report for the review of the operations of TRS. Use of this report for any other purpose or by anyone other than the Board or staff of the State of Alaska may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the report for that purpose. Because of the risk of misinterpretation of actuarial results, you should ask Buck to review any statement you wish to make on the results contained in this report. Buck will not accept any liability for any such statement made without the review by Buck.

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the actuarial assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions or applicable law. In particular, retiree group benefits models necessarily rely on the use of approximations and estimates and are sensitive to changes in these approximations and estimates. Small variations in these approximations and estimates may lead to significant changes in actuarial measurements. An analysis of the potential range of such future differences is beyond the scope of this valuation.

In our opinion, the actuarial assumptions used are reasonable, taking into account the experience of the plan and reasonable long-term expectations, and represent our best estimate of the anticipated long-term experience under the plan. The actuary performs an analysis of plan experience periodically and recommends changes if, in the opinion of the actuary, assumption changes are needed to more accurately reflect expected future experience. The last full experience analysis was performed for the period July 1, 2013 to June 30, 2017. Based on that experience study, the Board adopted new assumptions effective beginning with the June 30, 2018 valuation to better reflect expected future experience. Based on our annual analysis of recent claims experience, changes were made to the per capita claim cost rates effective June 30, 2021 to better reflect expected future healthcare experience. A summary of the actuarial assumptions and methods used in this actuarial valuation is shown in Sections 5.2 and 5.3. We certify that the assumptions and methods described in Sections 5.2 and 5.3 of this report meet the requirements of all applicable Actuarial Standards of Practice.

Governmental Accounting Standards Board (GASB) Statement No. 67 (GASB 67) was effective for TRS beginning with fiscal year ending June 30, 2014, and Statement No. 74 (GASB 74) was effective for TRS beginning with fiscal year ending June 30, 2017. Separate GASB 67 and GASB 74 reports as of June 30, 2021 have been prepared. We have also prepared the member data tables shown in Section 4 of this report for the Statistical Section of the ACFR, as well as the summary of actuarial assumptions and analysis of financial experience for the Actuarial Section of the ACFR. Please see our separate GASB 67 and GASB 74 reports for other information needed for the ACFR.

Assessment of Risks

Actuarial Standard of Practice No. 51 (ASOP 51) applies to actuaries performing funding calculations related to a pension plan. ASOP 51 does not apply to actuaries performing services in connection with other post-employment benefits, such as medical benefits. Accordingly, ASOP 51 does not apply to the healthcare portion of TRS. See Section 6 of this report for further details regarding ASOP 51.

Use of Models

Actuarial Standard of Practice No. 56 (ASOP 56) provides guidance to actuaries when performing actuarial services with respect to designing, developing, selecting, modifying, using, reviewing, or evaluating models. Buck uses third-party software in the performance of annual actuarial valuations and projections. The model is intended to calculate the liabilities associated with the provisions of the plan using data and assumptions as of the measurement date under

the funding methods specified in this report. The output from the third-party vendor software is used as input to internally developed models that apply applicable funding methods and policies to the derived liabilities and other inputs, such as plan assets and contributions, to generate many of the exhibits found in this report. Buck has an extensive review process in which the results of the liability calculations are checked using detailed sample life output, changes from year to year are summarized by source, and significant deviations from expectations are investigated. Other funding outputs and the internal models are similarly reviewed in detail and at a higher level for accuracy, reasonability, and consistency with prior results. Buck also reviews the third-party model when significant changes are made to the software. This review is performed by experts within Buck who are familiar with applicable funding methods, as well as the manner in which the model generates its output. If significant changes are made to the internal models, extra checking and review are completed. Significant changes to the internal models that are applicable to multiple clients are generally developed, checked, and reviewed by multiple experts within Buck who are familiar with the details of the required changes.

Additional models used in valuing health benefits are described later in the report.

COVID-19

The potential impact of the ongoing COVID-19 pandemic on costs and liabilities was considered and an adjustment was made in setting the medical per capita claims cost assumption. FY20 medical claims were adjusted for a COVID-19 related decline in claims during the last four months (March – June) of FY20. FY21 medical claims were adjusted for a COVID-19 related decline in those claims during the fiscal year. A more detailed explanation on these adjustments is shown in Section 5.2.

This report was prepared under my supervision and in accordance with all applicable Actuarial Standards of Practice. I am a Fellow of the Society of Actuaries, an Enrolled Actuary, a Fellow of the Conference of Consulting Actuaries, and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

I am available to discuss this report with you at your convenience. I can be reached at 602-803-6174.

Respectfully submitted,

David J. Kershner, FSA, EA, MAAA, FCA
Principal
Buck

The undersigned actuary is responsible for all assumptions related to the average annual per capita health claims cost and the health care cost trend rates, and hereby affirms his qualification to render opinions in such matters in accordance with the Qualification Standards of the American Academy of Actuaries.

Scott Young, FSA, EA, MAAA, FCA
Director
Buck

DRAFT

Executive Summary

Overview

The State of Alaska Teachers' Retirement System (TRS) provides pension and postemployment healthcare benefits to teachers and other eligible participants. The Commissioner of the Department of Administration is responsible for administering the plan. The Alaska Retirement Management Board has fiduciary responsibility over the assets of the plan. This report presents the results of the actuarial valuation of TRS as of the valuation date of June 30, 2021.

Purpose

An actuarial valuation is performed on the plan annually as of the end of the fiscal year. The main purposes of the actuarial valuation detailed in this report are:

1. To determine the Employer/State contribution necessary to meet the Board's funding policy for the plan;
2. To disclose the funding assets and liability measures as of the valuation date;
3. To review the current funded status of the plan and assess the funded status as an appropriate measure for determining future actuarially determined contributions;
4. To compare actual and expected experience under the plan during the last fiscal year; and
5. To report trends in contributions, assets, liabilities, and funded status over the last several years.

The actuarial valuation provides a "snapshot" of the funded position of TRS based on the plan provisions, membership data, assets, and actuarial methods and assumptions as of the valuation date.

Actuarial projections are also performed to provide a long-term view of the expected future funded status and contribution patterns (see Section 3). The future funded status and contribution patterns would be different than those shown in Section 3 if future experience does not match the actuarial assumptions used in the projections.

Retiree group benefits models necessarily rely on the use of approximations and estimates, and are sensitive to changes in these approximations and estimates. Small variations in these approximations and estimates may lead to significant changes in actuarial measurements.

Funded Status

Where presented, references to "funded ratio" and "unfunded actuarial accrued liability" typically are measured on an actuarial value of assets basis. It should be noted that the same measurements using market value of assets would result in different funded ratios and unfunded accrued liabilities. Moreover, the funded ratio presented is appropriate for evaluating the need and level of future contributions but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e. purchase annuities) for a portion or all of its liabilities.

Funded Status as of June 30 (\$'s in 000's)		2020	2021
Pension			
a. Actuarial Accrued Liability	\$	7,447,036	\$ 7,471,887
b. Valuation Assets		<u>5,587,064</u>	<u>5,910,369</u>
c. Unfunded Actuarial Accrued Liability, (a) - (b)	\$	1,859,972	\$ 1,561,518
d. Funded Ratio based on Valuation Assets, (b) ÷ (a)		75.0%	79.1%
e. Fair Value of Assets	\$	5,444,799	\$ 6,731,481
f. Funded Ratio based on Fair Value of Assets, (e) ÷ (a)		73.1%	90.1%
Healthcare			
a. Actuarial Accrued Liability	\$	2,489,675	\$ 2,439,603
b. Valuation Assets		<u>3,021,283</u>	<u>3,267,737</u>
c. Unfunded Actuarial Accrued Liability, (a) - (b)	\$	(531,608)	\$ (828,134)
d. Funded Ratio based on Valuation Assets, (b) ÷ (a)		121.4%	133.9%
e. Fair Value of Assets	\$	2,953,461	\$ 3,723,031
f. Funded Ratio based on Fair Value of Assets, (e) ÷ (a)		118.6%	152.6%
Total			
a. Actuarial Accrued Liability	\$	9,936,711	\$ 9,911,490
b. Valuation Assets		<u>8,608,347</u>	<u>9,178,106</u>
c. Unfunded Actuarial Accrued Liability, (a) - (b)	\$	1,328,364	\$ 733,384
d. Funded Ratio based on Valuation Assets, (b) ÷ (a)		86.6%	92.6%
e. Fair Value of Assets	\$	8,398,260	\$ 10,454,512
f. Funded Ratio based on Fair Value of Assets, (e) ÷ (a)		84.5%	105.5%

Funded Ratio History (Based on Valuation Assets)

The key reasons for the change in the funded status are explained below. The funded status for healthcare benefits is not necessarily an appropriate measure to confirm that assets are sufficient to settle health plan obligations as there are no available financial instruments for purchase. Future experience is likely to vary from assumptions so there is potential for actuarial gains or losses.

1. Investment Experience

The actuarial asset value was reinitialized to equal fair value of assets as of June 30, 2014. Beginning in FY15, the asset valuation method recognizes 20% of the investment gain or loss each year, for a period of five years. The FY21 investment return based on fair value of assets was approximately 30.1% compared to the expected investment return of 7.38% (net of investment expenses). This resulted in a market asset gain of approximately \$1,856 million. Due to the recognition of investment gains and losses over a 5-year period, the FY21 investment return based on actuarial value of assets was approximately 11.6%, which resulted in an actuarial asset gain of approximately \$354 million.

2. Salary Increases

Salary increases for continuing active members during FY21 were higher than expected based on the valuation assumptions, resulting in a liability loss of approximately \$29 million.

3. Demographic Experience

Section 4 provides statistics on active and inactive participants. The number of active participants decreased 10.4% from 3,789 at June 30, 2020 to 3,396 at June 30, 2021 due to active members exiting the plan during the year (due to retirement, termination, death, and disability) and the closure of the plan to new entrants as of July 1, 2006. The average age of active participants increased from 51.92 to 52.14 and average credited service increased from 19.76 to 20.31 years.

The number of benefit recipients increased 2.1% from 13,689 to 13,972, and their average age increased from 71.85 to 72.26. The number of vested terminated participants decreased 4.8% from 764 to 727. Their average age increased from 52.37 to 52.68.

The overall effect of the demographic experience during FY21 was a liability loss of approximately \$7 million (pension) and a liability gain of approximately \$3¹ million (healthcare).

4. COLA / PRPA Experience

The cost-of-living increases (COLA) for benefit recipients during FY21 were less than expected based on the valuation assumptions, resulting in a liability gain of approximately \$0.3 million. The postretirement pension adjustments (PRPA) were also less than expected, resulting in a liability gain of approximately \$81 million.

5. Retiree Medical Claims Experience

As described in Section 5.2, recent medical claims experience and changes in healthcare enrollment data provided to us for the June 30, 2021 valuation generated a liability gain of approximately \$97 million. Reduced claims during FY21, largely attributable to medical claims impacted by COVID-19, generated a liability gain of approximately \$11 million.

¹ Includes the effects of changes in dependent coverage elections and Medicare Part B only experience.

6. Changes in Methods Since the Prior Valuation

There were no changes in actuarial methods since the prior valuation.

7. Changes in Assumptions Since the Prior Valuation

Healthcare claim costs are updated annually as described in Section 5.2. The amounts included in the Normal Cost for administrative expenses were updated based on the last two years of actual administrative expenses paid from plan assets. There were no other changes in actuarial assumptions since the prior valuation.

8. Changes in Benefit Provisions Since the Prior Valuation

Starting in 2022, prior authorization will be required for certain specialty medications for all participants, and certain preventive benefits for pre-Medicare participants will now be covered by the plan. These changes created an actuarial gain of approximately \$22 million. There have been no other changes in benefit provisions valued since the prior valuation.

Projections

Absent future asset (and/or liability) losses, changes in plan provisions or actuarial assumptions, the \$1,856 million FY21 market asset gain has a significant impact on the projections shown in Section 3. For example, the pension trust is currently projected to reach a funded status of 100% in FY33. Based on the 2020 valuation projections, the funded status of the pension trust was projected to be only 80% in FY33.

Once the pension trust is projected to reach a funded status of 100%, it may be reasonable to assume that all remaining pension unfunded liability layered amortization amounts should be reduced to zero. Since the healthcare trust is currently more than 100% funded, the healthcare unfunded liability amortization amounts would also be reduced to zero if the Board decides to implement this change (this does not impact the projections shown in Section 3.6 since the healthcare Normal Cost is assumed to be contributed as a minimum in all years after FY23 per Alaska state statutes).

We have shown the table of projected figures in Section 3.6 two ways:

- a) Section 3.6A – No changes to the pension unfunded liability layered amortization amounts. In this case, Additional State Contributions totaling approximately \$553 million are projected for FY33 through FY39, even though the pension trust is projected to be 100% funded by FY33.
- b) Section 3.6B – Eliminate the pension unfunded liability layered amortization amounts when the pension trust is projected to be 100% funded. In this case, the Additional State Contributions are projected to be zero after FY32.

The pros and cons of these two methods can be discussed further upon request.

In both cases, the pension Normal Cost is assumed to be contributed as a minimum based on Alaska state statutes. (The healthcare trust is currently over 100% funded, so the healthcare Normal Cost is also assumed to be contributed as a minimum based on Alaska state statutes.)

Sections 3.3 through 3.5 are based on the projections shown in Section 3.6A.

Comparative Summary of Contribution Rates

Pension	Actual FY 2023	Estimated FY 2024
a. Normal Cost Rate Net of Member Contributions	2.24%	2.05%
b. Past Service Cost Rate	<u>15.66%</u>	<u>12.90%</u>
c. Total Employer/State Contribution Rate, (a) + (b), not less than (a) ¹	17.90%	14.95%
Healthcare	Actual FY 2023	Estimated FY 2024
a. Normal Cost Rate	2.72%	2.41%
b. Past Service Cost Rate	<u>(7.93)%</u>	<u>(11.03)%</u>
c. Total Employer/State Contribution Rate, (a) + (b), not less than (a) ¹	2.72%	2.41%
Total	Actual FY 2023	Estimated FY 2024
a. Normal Cost Rate Net of Member Contributions	4.96%	4.46%
b. Past Service Cost Rate	<u>15.66%</u>	<u>12.90%</u>
c. Total Employer/State Contribution Rate, (a) + (b) ¹	20.62%	17.36%
d. Board Adopted Total Employer/State Contribution Rate	17.90% ²	TBD
e. Defined Contribution Retirement (DCR) Rate Paid by Employers	<u>6.72%</u>	<u>7.03%</u>
f. Board Adopted Total Rate, Including DCR Rate Paid by Employers, (d) + (e)	24.62%	TBD

Contribution rates are based on total (DB and DCR) payroll. The contribution rates shown above for FY24 are estimated assuming no actuarial gains/losses during FY22 and FY23. Actual FY24 contribution rates will be adopted by the Board in September 2022 reflecting FY22 asset experience.

Contribution rates include Employer contribution rates as limited by Alaska state statutes and the Additional State Contribution required under SB 125.

¹ Beginning with the June 30, 2014 valuation, contribution rates for FY17 and beyond are determined using new methodology in accordance with 2014 legislation under HB 385 and SB 119, 2014 Alaska Laws, which changed the amortization methodology to a closed 25-year period as a level percentage of pay, and eliminated the time lag on the contribution rate calculation by using a 2-year "roll-forward" approach assuming 0% population growth. Investment gains and losses are recognized over a 5-year period beginning in FY15. Beginning with the June 30, 2018 valuation, the UAAL amortization was changed as described in Section 5.2.

² The FY23 contribution rates adopted by the Board in October 2021 were 17.90% for Pension and 0.00% for Healthcare.

Summary of Actuarial Accrued Liability Gain/(Loss) and Other Changes During the Year

The following table summarizes the sources of change in the total Employer/State contribution rate as of June 30, 2020 and June 30, 2021 based on DB and DCR payroll combined:

	Pension	Healthcare	Total
1. Total Employer/State Contribution Rate as of June 30, 2020	21.73%	3.30%	25.03%
2. Change due to:			
a. Health Claims Experience	N/A	(0.11)%	(0.11)%
b. Salary Increases	0.25%	N/A	0.25%
c. Investment Experience	(1.95)%	0.00%	(1.95)%
d. Demographic Experience and Miscellaneous ¹	(0.68)%	(0.23)%	(0.91)%
e. Actual vs Expected Contributions	(0.03)%	0.00%	(0.03)%
f. Assumption/Method Changes	0.00%	0.00%	0.00%
g. Plan Changes	<u>0.00%</u>	<u>(0.02)%</u>	<u>(0.02)%</u>
h. Total Change, (a) + (b) + (c) + (d) + (e) + (f) + (g)	(2.41)%	(0.36)%	(2.77)%
3. Total Employer/State Contribution Rate as of June 30, 2021, (1) + (2)(h)	19.32%	2.94%	22.26%

The following table shows the FY21 gain/(loss) on actuarial accrued liability as of June 30, 2021 (\$'s in 000's):

	Pension	Healthcare	Total
Retirement Experience	\$ 4,502	\$ (2,282)	\$ 2,220
Termination Experience	(7,088)	(2,979)	(10,067)
Disability Experience	(103)	220	117
Active Mortality Experience	311	(2,709)	(2,398)
Inactive Mortality Experience	(5,089)	269	(4,820)
Salary Increases	(29,192)	N/A	(29,192)
Rehires (Net of Rehire Load)	3,085	3,476	6,561
COLA Increases	293	N/A	293
PRPA Increases	81,362	N/A	81,362
Benefit Payments Different than Expected	14,033	10,592	24,625
Per Capita Claims Cost	N/A	96,861	96,861
Medical and Prescription Drug Plan Changes	N/A	21,763	21,763
Medicare Part B Only Experience	N/A	1,278	1,278
Changes in Dependent Coverage Elections	N/A	9,126	9,126
Programming Changes ²	(227)	N/A	(227)
Miscellaneous ³	<u>(6,320)</u>	<u>(4,278)</u>	<u>(10,598)</u>
Total	\$ 55,567	\$ 131,337	\$ 186,904

¹ Includes the effects of census data changes between the two valuations.

² Includes the adjustment to the COLA for Tier 2 disabilities to commence immediately.

³ Includes the effects of various data changes that are typical when new census data is received for the annual valuation, as well as other items that do not fit neatly into any of the other categories.

The rehire gain/(loss) amount shown on the previous page is the difference between (i) the increase in Actuarial Accrued Liability at June 30, 2021 due to rehires during the most recent plan year, and (ii) the load that was added to the June 30, 2020 Normal Cost based on the rehire load assumption used in the June 30, 2020 valuation. The development of the FY21 rehire gain/(loss) amount is shown in the table below (\$'s in 000's):

	Pension	Healthcare	Total
1. Increase/(Decrease) in Actuarial Accrued Liability at June 30, 2021 due to Rehires	\$ 3,917	\$ (817)	\$ 3,100
2. June 30, 2020 Normal Cost Rehire Load, with interest to June 30, 2021	\$ 7,002	\$ 2,659	\$ 9,661
3. Rehire Gain/(Loss), (2) - (1)	\$ 3,085	\$ 3,476	\$ 6,561

Section 2.2: Changes in Fair Value of Assets During FY21 (\$'s in 000's)

Fiscal Year 2021	Pension	Healthcare	Total
1. Fair Value of Assets as of June 30, 2020	\$ 5,444,799	\$ 2,953,461	\$ 8,398,260
2. Additions:			
a. Employee Contributions	\$ 33,342	\$ 0	\$ 33,342
b. Employer Contributions	28,430	24,700	53,130
c. State Assistance Contributions	134,976	0	134,976
d. Interest and Dividend Income	75,824	41,567	117,391
e. Net Appreciation / Depreciation in Fair Value of Investments	1,534,132	835,912	2,370,044
f. Employer Group Waiver Plan	0	18,355	18,355
g. Other	<u>273</u>	<u>247</u>	<u>520</u>
h. Total Additions	\$ 1,806,977	\$ 920,781	\$ 2,727,758
3. Deductions:			
a. Medical Benefits	\$ 0	\$ 141,137	\$ 141,137
b. Retirement Benefits	499,942	0	499,942
c. Refund of Contributions	1,487	0	1,487
d. Investment Expenses	15,420	8,238	23,658
e. Administrative Expenses	<u>3,446</u>	<u>1,836</u>	<u>5,282</u>
f. Total Deductions	\$ 520,295	\$ 151,211	\$ 671,506
4. Fair Value of Assets as of June 30, 2021	\$ 6,731,481	\$ 3,723,031	\$ 10,454,512
5. Approximate Fair Value Investment Return Rate during FY21 Net of Investment Expenses	30.1%	29.9%	30.1%

Section 2.3: Development of Actuarial Value of Assets (\$'s in 000's)

The actuarial value of asset was set equal to the fair value as of June 30, 2014 and the 20% corridor was eliminated. Investment gains and losses after June 30, 2014 are recognized 20% per year over 5 years.

	Pension	Healthcare	Total
1. Deferral of Investment Gain / (Loss) for FY21			
a. Fair Value of Assets as of June 30, 2020	\$ 5,444,799	\$ 2,953,461	\$ 8,398,260
b. Contributions	196,748	24,700	221,448
c. Employer Group Waiver Plan	0	18,355	18,355
d. Benefit Payments	501,429	141,137	642,566
e. Administrative Expenses	3,446	1,836	5,282
f. Actual Investment Return (net of investment expenses)	1,594,809	869,488	2,464,297
g. Expected Return Rate (net of investment expenses)	7.38%	7.38%	7.38%
h. Expected Return, Weighted for Timing	394,184	214,344	608,528
i. Investment Gain / (Loss) for the Year, (f) - (h)	1,200,625	655,144	1,855,769
2. Actuarial Value as of June 30, 2021			
a. Fair Value as of June 30, 2021	\$ 6,731,481	\$ 3,723,031	\$ 10,454,512
b. Deferred Investment Gain / (Loss)	821,112	455,294	1,276,406
c. Actuarial Value as of June 30, 2021, (a) - (b)	5,910,369	3,267,737	9,178,106
3. Ratio of Actuarial Value of Assets to Fair Value of Assets	87.8%	87.8%	87.8%
4. Approximate Actuarial Value Investment Return Rate during FY21 Net of Investment Expenses	11.6%	11.7%	11.6%

The tables below show the development of the gains/(losses) to be recognized in the current year (\$'s in 000's):

Pension				
Fiscal Year Ending	Asset Gain / (Loss)	Gain / (Loss) Recognized in Prior Years	Gain / (Loss) Recognized This Year	Gain / (Loss) Deferred to Future Years

Section 3: Projections

Section 3.1: Projection Assumptions and Methods

Key Assumptions

- 7.38% investment return (net of investment expenses) on the Fair Value of Assets in all future years.
- The Actuarial Value of Assets was re-initialized to Fair Value as of June 30, 2014. The Actuarial Value of Assets after June 30, 2014 reflects the deferred gains and losses generated by the smoothing method. The current deferred amount is recognized in the first four years of the projections.
- Actuarial assumptions and methods as described in Section 5. No actuarial gains/losses are assumed after June 30, 2021.
- The actuarially calculated contribution rate using a two-year roll-forward approach is adopted each year.
- Projections assume a 0% increase in the total active member population. All new members are expected to enter the DCR plan.
- Contribution rates are determined as a percent of total DB and DCR payroll.
- The DCR contribution rate determined as of June 30, 2021 is assumed to remain constant in all future years.
- The active rehire assumption shown in Section 5 is assumed to grade to zero on a uniform basis over 20 years.
- The Normal Cost is increased by the administrative expenses shown in Section 5. For future years, the percent increase is assumed to remain constant.
- In Section 3.6B, we assumed all remaining pension unfunded liability layered amortization amounts would be zero after the pension trust is projected to reach a funded status of 100%.

Section 3.2: Membership Projection

Projected Active Member Count

Projected DB and DCR Payroll

Projected Inactive Member Count

Section 3.3: Projected Employer/State Contribution Rates

Based on Total DB and DCR Payroll

Section 3.4: Projected Employer/State Contribution Amounts

Section 3.5: Projection of Funded Ratios

Section 3.6A: Table of Projected Actuarial Results (\$'s in 000's)

Fiscal Year End	Valuation Amounts on July 1 (Beginning of FY)				Cash Flow Amounts during Following 12 Months								Deferred Asset Gain / (Loss)

Section 5: Basis of the Actuarial Valuation

Section 5.1: Summary of Plan Provisions

Effective Date

July 1, 1955, with amendments through June 30, 2021. Chapter 97, 1990 Session Laws of Alaska, created a two-tier retirement system. Members who were first hired under TRS before July 1, 1990 (Tier 1) are eligible for different benefits than members hired after June 30, 1990 (Tier 2). Chapter 9, 2005 Session Laws of Alaska, closed the plan to new members hired after June 30, 2006.

Administration of Plan

The Commissioner of Administration or the Commissioner's designee is the administrator of the system. The Attorney General of the state is the legal counsel for the system and shall advise the administrator and represent the system in legal proceedings.

Prior to June 30, 2005, the Teachers' Retirement Board prescribed policies and adopted regulations and performed other activities necessary to carry out the provisions of the system. The Alaska State Pension Investment Board, Department of Revenue, Treasury Division was responsible for investing TRS funds.

On July 27, 2005, Senate Bill 141, enacted as Chapter 9, 2005 Session laws of Alaska, replaced the Teachers' Retirement Board and the Alaska State Pension Investment Board with the Alaska Retirement Management Board.

Employers Included

Currently, there are 56 employers participating in TRS, including the State of Alaska, 52 school districts, and three other eligible organizations.

Membership

Membership in TRS is mandatory for the following employees hired before July 1, 2006:

- certificated full-time and part-time elementary and secondary teachers, certificated school nurses, and certificated employees in positions requiring teaching certificates;
- positions requiring a teaching certificate as a condition of employment in the Department of Education and Early Development and the Department of Labor and Workforce Development;
- University of Alaska full-time and part-time teachers, and full-time administrative employees in positions requiring academic standing if approved by the TRS administrator;
- certain full-time or part-time teachers of Alaska Native language or culture who have elected to be covered under TRS;
- members on approved sabbatical leave under AS 14.20.310;
- certain State legislators who have elected to be covered under TRS; and
- a teacher who has filed for worker's compensation benefits due to an on-the-job assault and who, as a result of the physical injury, is placed on leave without pay.

Employees participating in the University of Alaska's Optional Retirement Plan or other retirement plans funded by the State are not covered by TRS.

Employees who work half-time in TRS and Public Employees' Retirement System (PERS) simultaneously are eligible for half-time TRS and PERS credit.

Senate Bill 141, signed into law on July 27, 2005, closes the plan effective July 1, 2006 to new members first hired on or after July 1, 2006.

Credited Service

TRS members receive a year of membership credit if they work a minimum of 172 days during the school year (July 1 through June 30 of the following year). Fractional credit is determined based on the number of days worked. Part-time members who work at least 50% of full-time receive membership credit for each day in proportion to full-time service. Credit is granted for all Alaskan public school service.

Members may claim other types of service, including:

- Outside teaching service in out-of-state schools or Alaska private schools (not more than ten years may be claimed);
- Military service (not more than five years of military service or ten years of combined outside and military service may be claimed);
- Alaska Bureau of Indian Affairs (BIA) service;
- Retroactive Alaskan service that was not creditable at the time it occurred, but later became creditable because of legislative change;
- Unused sick leave credit after members retire; and
- Leave of absence without pay.

Except for retroactive Alaska service that occurred before July 1, 1955, and unused sick leave, contributions are required for all claimed service.

Members receiving TRS disability benefits continue to earn TRS credit while disabled.

Survivors who are receiving occupational death benefits continue to earn TRS service credit while occupational survivor benefits are being paid.

Employer Contributions

TRS employers contribute the amounts required, in addition to employees' contributions, to fund the benefits of the system.

The normal cost rate is a uniform rate for all participating employers (less the value of members' contributions).

The past service rate is a uniform rate for all participating employers to amortize the unfunded past service liability with payments that are a level percentage of payroll amount over a closed 25-year period starting June 30, 2014. Effective June 30, 2018, each future year's unfunded service liability is separately amortized on a level percent of pay basis over 25 years.

Employer rates cannot be less than the normal cost rate.

Pursuant to AS14.25.070 effective July 1, 2008, each TRS employer will pay a simple uniform contribution rate of 12.56% of member payroll.

Additional State Contributions

Pursuant to AS14.25.085 effective July 1, 2008, the State shall contribute an amount (in addition to the State contribution as an employer) that, when combined with the employer contribution of 12.56%, will be sufficient to pay the total contribution rate adopted by the Board.

Member Contributions

Mandatory Contributions: Members are required to contribute 8.65% of their base salaries. Members' contributions are deducted from gross salaries before federal income taxes are withheld.

Contributions for Claimed Service: Member contributions are also required for most of the claimed service described above.

1% Supplemental Contributions: Members who joined the system before July 1, 1982 and elected to participate in the supplemental contributions provision are required to contribute an additional 1% of their salaries. Supplemental contributions are deducted from gross salaries after federal income taxes are withheld. Under the supplemental provision, an eligible spouse or dependent child will receive a survivor's allowance or spouse's pension if the member dies (see below). Supplemental contributions are only refundable upon death (see below).

Interest: Members' contributions earn 4.5% interest, compounded annually on June 30.

Refund of Contributions: Terminated members may receive refunds of their member contribution accounts which includes their mandatory contributions, indebtedness payments, and interest earned. Terminated members' accounts may be attached to satisfy claims under Alaska Statute 09.38.065, federal income tax levies, and valid Qualified Domestic Relations Orders.

Reinstatement of Contributions: Refunded accounts and the corresponding TRS service may be reinstated upon reemployment in TRS prior to July 1, 2010. Interest accrues on refunds until paid in full or members retire.

Retirement Benefits

Eligibility

- a. Members, including deferred vested members, are eligible for normal retirement at age 55 or early retirement at age 50 if they were hired before July 1, 1990 (Tier 1), and age 60 or early retirement at age 55 if they were hired on or after July 1, 1990 (Tier 2). Additionally, they must have at least:
 - (i) eight years of paid-up membership service;
 - (ii) 15 years of paid-up creditable service, the last five years of which are membership service, and they were first hired under TRS before July 1, 1975;
 - (iii) five years of paid-up membership service and three years of paid-up Alaska Bureau of Indian Affairs service;
 - (iv) 12 years of combined part-time and full-time paid-up membership service;
 - (v) two years of paid-up membership service if they are vested in PERS; or
 - (vi) one year of paid-up membership service if they are retired from PERS.
- b. Members may retire at any age when they have:
 - (i) 25 years of paid-up creditable service, the last five years of which are membership service;
 - (ii) 20 years of paid-up membership service;
 - (iii) 20 years of combined paid-up membership and Alaska Bureau of Indian Affairs service, the last five years of which are membership service; or
 - (iv) 20 years of combined paid-up part-time and full-time membership service.

Benefit Type

Lifetime benefits are paid to members. Eligible members may receive normal, unreduced benefits when they (1) reach normal retirement age and complete the service required; or (2) satisfy the minimum service requirements to retire at any age under (b) above. Members may receive early, actuarially reduced benefits when they reach early retirement age and complete the service required.

Members may select joint and survivor options and a last survivor option. Under these options and early retirement, benefits are actuarially adjusted so that members receive the actuarial equivalents of their normal benefit amounts.

Benefit Calculations

Retirement benefits are calculated by multiplying the average base salary (ABS) times the total TRS service times the percentage multiplier. The ABS is determined by averaging the salaries earned during the three highest school years. Members must earn at least 115 days of credit in a school year to include it in the ABS calculation. TRS pays a minimum benefit of \$25.00 per month for each year of service when the calculated benefit is less.

The percentage multipliers are 2% for the first 20 years and 2.5% for all remaining service. Service before July 1, 1990 is calculated at 2%.

Indebtedness

Members who terminate and refund their TRS contributions are not eligible to retire unless they return to TRS employment and pay back their refunds plus interest or accrue additional service which qualifies them for retirement. TRS refunds must be paid in full if the corresponding service is to count toward the minimum service requirements for retirement. Refunded TRS service is included in total service for the purpose of calculating retirement benefits. However, when refunds are not completely paid before retirement, benefits are actuarially reduced for life. Indebtedness balances may also be created when a member purchases qualified claimed service.

Reemployment of Retired Members

Retirees who return to work in a permanent full-time or part-time TRS position after a Normal Retirement are eligible to return under the Standard Option.

Under the Standard Option, retirement and retiree healthcare benefits are suspended while retired members are reemployed under TRS. During reemployment, members earn additional TRS service and contributions are withheld from their wages.

Members retired under the Retirement Incentive Programs (RIPs) who return to employment will:

- a. forfeit the three years of incentive credits that they received;
- b. owe TRS 110% of the benefits that they received under the RIP, which may include costs for health insurance, excluding amounts that they paid to participate; and
- c. be charged 7% interest from the date that they are reemployed until their indebtedness is paid in full or they retire again. If the indebtedness is not completely paid, future benefits will be actuarially reduced for life.

Employers make contributions to the unfunded liability of the plan on behalf of rehired retired members at the rate the employer is making contributions to the unfunded liability of the plan for other members.

Postemployment Healthcare Benefits

When pension benefits begin, major medical benefits are provided by TRS to (1) all employees first hired before July 1, 1990 (Tier 1) and their surviving spouses and (2) members and their surviving spouses who have 25 years of membership service, are disabled or age 60 or older, regardless of their initial hire dates. Employees first hired after June 30, 1990 (Tier 2) and their surviving spouses may receive major medical benefits prior to age 60 by paying premiums.

Medical, prescription drug, dental, vision, and audio coverage is provided through the AlaskaCare Retiree Health Plan. Health plan provisions do not vary by retirement tier or age, except for Medicare coordination. Participants in dental, vision, and audio coverage pay a full self-supporting rate and those benefits are not included in this valuation.

Starting in 2022, prior authorization will be required for certain specialty medications for all participants. There is no change to the medications that are covered by the plan.

Starting in 2022, certain preventive benefits for pre-Medicare participants will now be covered by the plan.

Surviving spouses continue coverage only if a pension payment form that provided survivor benefits was elected. Alternate payees (i.e. individuals who are the subject of a domestic relations order or DRO) are allowed to participate in the plan, but must pay the full cost.

Where premiums are required prior to age 60 (Tier 2), the valuation bases this payment upon the age of the retiree.

Participants in the defined benefit plan are covered under the following benefit design:

Plan Feature	Amounts
Deductible (single/family)	\$150 / \$450
Coinsurance (most services)	20%
Outpatient surgery/testing	0%
Maximum Out-of-Pocket (single/family, excluding deductible)	\$800 / \$2,400
Rx Copays (generic/brand/mail-order), does not apply to OOP max	\$4 / \$8 / \$0
Lifetime Maximum	\$2,000,000

The plan coordinates with Medicare on a traditional Coordination of Benefits Method. Starting in 2019, the prescription drug coverage is through a Medicare Part D EGWP arrangement.

Disability Benefits

Monthly disability benefits are paid to permanently disabled members until they die, recover, or become eligible for normal retirement. To be eligible, members must have at least five years of paid-up membership service.

Disability benefits are equal to 50% of the member's base salary at the time of disability. The benefit is increased by 10% of the base salary for each minor child, up to a maximum of 40%. Members continue to earn TRS service until eligible for normal retirement.

Members are appointed to normal retirement on the first of the month after they become eligible.

Death Benefits

Monthly death benefits may be paid to a spouse or dependent children upon the death of a member. If monthly benefits are not payable under the supplemental contributions provision or occupational and non-occupational death provisions, the designated beneficiary receives the lump sum benefit described below.

Occupational Death

When an active member dies from occupational causes, a monthly survivor's pension may be paid to the spouse, unless benefits are payable under the supplemental contributions provision (see below). The pension equals 40% of the member's base salary on the date of death or disability, if earlier. If there is no spouse, the pension may be paid to the member's dependent children. On the member's normal retirement date, the benefit converts to a normal retirement benefit. The normal benefit is based on the member's average base salary on the date of death and service, including service accumulated from the date of the member's death to the normal retirement date.

Non-Occupational Death

When a vested member dies from non-occupational causes, the surviving spouse may elect to receive a monthly 50% joint and survivor benefit or a lump sum benefit, unless benefits are payable under the supplemental contributions provision (see below). The monthly benefit is calculated on the member's average base salary and TRS service accrued at the time of death.

Lump Sum Benefit

Upon the death of an active member who has less than one year of service or an inactive member who is not vested, the designated beneficiary receives the member's contribution account, which includes mandatory contributions, indebtedness payments, and interest earned. Any supplemental contributions will also be refunded. If the member has more than one year of TRS service or is vested, the beneficiary also receives \$1,000 and \$100 for each year of TRS service, up to a maximum of \$3,000. An additional \$500 may be payable if the member is survived by dependent children.

Supplemental Contributions Provision

Members are eligible for supplemental coverage if they joined TRS before July 1, 1982, elected to participate in the supplemental provision, and made the required contributions. A survivor's allowance or spouse's pension (see below) may be payable if the member made supplemental contributions for at least one year and dies while in membership service or while disabled under TRS. In addition, the allowance and pension may be payable if the member dies while retired or in deferred vested status if supplemental contributions were made for at least five years.

- a. **Survivor's Allowance:** If the member is survived by dependent children, the surviving spouse and dependent children are entitled to a survivor's allowance. The allowance for the spouse is equal to 35% of the member's base salary at the time of death or disability, plus 10% for each dependent child up to a maximum of 40%. The allowance terminates and a spouse's pension becomes payable when there is no longer an eligible dependent child.
- b. **Spouse's Pension:** The spouse's pension is equal to 50% of the retirement benefit that the deceased member was receiving or the unreduced retirement benefit that the deceased member would have received if retired at the time of death. The spouse's pension begins on the first of the month after the member's death or termination of the survivor's allowance.

Death After Retirement

If a joint and survivor option was selected at retirement, the eligible spouse receives continuing, lifetime monthly benefits after the member dies. A survivor's allowance or spouse's pension may be payable if the member participated in the supplemental contributions provision. If a joint and survivor option was not selected and benefits are not payable under the supplemental contributions provision, the designated beneficiary receives the member's contribution account, less any benefits already paid and the member's last benefit check.

Postretirement Pension Adjustments

Postretirement pension adjustments (PRPAs) are granted annually to eligible benefit recipients when the consumer price index (CPI) for urban wage earners and clerical workers for Anchorage increases during the preceding calendar year. PRPAs are calculated by multiplying the recipient's base benefit including past PRPAs, but excluding the Alaska COLA, times:

- a. The lesser of 75% of the CPI increase in the preceding calendar year or 9% if the recipient is at least age 65 or on TRS disability; or
- b. The lesser of 50% of the CPI increase in the preceding calendar year or 6% if the recipient is at least age 60, or under age 60 if the recipient has been receiving benefits for at least eight years.

Ad hoc PRPAs, up to a maximum of 4%, may be granted to eligible recipients who were first hired before July 1, 1990 (Tier 1) if the CPI increases and the funded ratio is at least 105%.

In a year where an ad hoc PRPA is granted, eligible recipients will receive the higher of the two calculations.

Alaska Cost-of-Living Allowance (COLA)

Eligible benefit recipients who reside in Alaska receive an Alaska COLA equal to 10% of their base benefits. The following benefit recipients are eligible:

- a. members who were first hired under TRS before July 1, 1990 (Tier 1) and their survivors;
- b. members who were first hired under TRS after June 30, 1990 (Tier 2) and their survivors if they are at least age 65; and
- c. all disabled members.

Changes in Benefit Provisions Valued Since the Prior Valuation

Starting in 2022, prior authorization will be required for certain specialty medications for all participants, and certain preventive benefits for pre-Medicare participants will now be covered by the plan. There were no other changes in benefit provisions since the prior valuation.

Section 5.2: Description of Actuarial Methods and Valuation Procedures

The funding method used in this valuation was adopted by the Board in October 2006. Changes in methods were adopted by the Board in January 2019 based on the experience study for the period July 1, 2013 to June 30, 2017. The asset smoothing method used to determine valuation assets was changed effective June 30, 2014.

Benefits valued are those delineated in Alaska State statutes as of the valuation date. Changes in State statutes effective after the valuation date are not taken into consideration in setting the assumptions and methods.

Actuarial Cost Method

Liabilities and contributions shown in the report are computed using the Entry Age Normal Actuarial Cost Method, level percent of pay.

Effective June 30, 2018, the Board adopted a layered UAAL amortization method: Layer #1 equals the sum of (i) the UAAL at June 30, 2018 based on the 2017 valuation, plus (ii) the FY18 experience gain/loss. Layer #1 is amortized over the remainder of the 25-year closed period that was originally established in 2014¹. Layer #2 equals the change in UAAL at June 30, 2018 due to the experience study and EGWP implementation. Layer #2 is amortized over a separate closed 25-year period starting in 2018. Future layers will be created each year based on the difference between actual and expected UAAL occurring that year, and will be amortized over separate closed 25-year periods. The UAAL amortization continues to be on a level percent of pay basis. State statutes allow the contribution rate to be determined on payroll for all members, defined benefit and defined contribution member payroll combined.

Projected pension and postemployment healthcare benefits were determined for all active members. Cost factors designed to produce annual costs as a constant percentage of each member's expected compensation in each year from the assumed entry age to the assumed retirement age were applied to the projected benefits to determine the normal cost (the portion of the total cost of the plan allocated to the current year under the method). The normal cost is determined by summing intermediate results for active members and determining an average normal cost rate which is then related to the total payroll of active members. The actuarial accrued liability for active members (the portion of the total cost of the plan allocated to prior years under the method) was determined as the excess of the actuarial present value of projected benefits over the actuarial present value of future normal costs.

The actuarial accrued liability for retired members and their beneficiaries currently receiving benefits, terminated vested members and disabled members not yet receiving benefits was determined as the actuarial present value of the benefits expected to be paid. No future normal costs are payable for these members.

The actuarial accrued liability under this method at any point in time is the theoretical amount of the fund that would have been accumulated had annual contributions equal to the normal cost been made in prior years (it does not represent the liability for benefits accrued to the valuation date). The unfunded actuarial accrued liability is the excess of the actuarial accrued liability over the actuarial value of plan assets measured on the valuation date.

Under this method, experience gains or losses, i.e., decreases or increases in accrued liabilities attributable to deviations in experience from the actuarial assumptions, adjust the unfunded actuarial accrued liability.

¹ Layer #1 is referred to as "initial amount" in Sections 1.2 and 1.3.

Valuation of Assets

The actuarial asset value was reinitialized to equal Fair Value of Assets as of June 30, 2014. Beginning in FY15, the asset valuation method recognizes 20% of the gain or loss each year, for a period of five years. All assets are valued at fair value. Assets are accounted for on an accrued basis and are taken directly from financial statements audited by KPMG LLP.

Changes in Methods Since the Prior Valuation

There were no changes in the asset or valuation methods since the prior valuation.

Valuation of Retiree Medical and Prescription Drug Benefits

This section outlines the detailed methodology used in the internal model developed by Buck to calculate the initial per capita claims cost rates for the TRS postemployment healthcare plan. Note that the methodology reflects the results of our annual experience rate update for the period from July 1, 2020 to June 30, 2021.

Base claims cost rates are incurred healthcare costs expressed as a rate per member per year. Ideally, claims cost rates should be derived for each significant component of cost that can be expected to require differing projection assumptions or methods (i.e., medical claims, prescription drug claims, administrative costs, etc.). Separate analysis is limited by the availability and historical credibility of cost and enrollment data for each component of cost. This valuation reflects non-prescription claims separated by Medicare status, including eligibility for free Part A coverage. Prescription costs are analyzed separately as in prior valuations. Administrative costs are assumed in the final per capita claims cost rates used for valuation purposes, as described below. Analysis to date on Medicare Part A coverage is limited since Part A claim data is not available by individual, nor is this status incorporated into historical claim data.

Benefits

Medical, prescription drug, dental, vision and audio coverage is provided through the AlaskaCare Retiree Health Plan and is available to employees of the State and subdivisions who meet retirement criteria based on the retirement plan tier in effect at their date of hire. Health plan provisions do not vary by retirement tier or age, except for Medicare coordination for those Medicare-eligible. Dental, vision and audio claims (DVA) are excluded from data analyzed for this valuation because those are retiree-pay all benefits where rates are assumed to be self-supporting. Buck relies upon rates set by a third-party for the DVA benefits. Buck reviewed historical rate-setting information and views contribution rate adjustments made are not unreasonable.

Administration and Data Sources

The plan was administered by Wells Fargo Insurance Services (acquired by HealthSmart, in January 2012) from July 1, 2009 through December 31, 2013 and by Aetna effective January 1, 2014.

Claims incurred for the period from July 2019 through June 2021 (FY20 through FY21) were provided by the State of Alaska from reports extracted from their data warehouse, which separated claims by Medicare status. Monthly enrollment data for the same period was provided by Aetna.

Aetna also provided census information identifying Medicare Part B only participants. These participants are identified when hospital claims are denied by Medicare; Aetna then flags that participant as a Part B only participant. Buck added newly identified participants to our list of Medicare Part B only participants. Buck assumes that once identified as Part B only, that participant remains in that status until we are notified otherwise.

Aetna provided a snapshot file as of July 1, 2021 of retirees and dependents that included a coverage level indicator. The monthly enrollment data includes double coverage participants. These are participants whereby both the retiree and spouse are retirees from the State and both are reflected with Couple coverage in the enrollment. In this case, such a couple would show up as four members in the

monthly enrollment (each would be both a retiree and a spouse). As a result, the snapshot census file was used to adjust the total member counts in the monthly enrollment reports to estimate the number of unique participants enrolled in coverage. Based on the snapshot files from the last two valuations, the total member count in the monthly enrollment reports needs to be reduced by approximately 13% to account for the number of participants with double coverage.

Aetna does not provide separate experience by Medicare status in standard reporting so the special reports mentioned above from the data warehouse were used this year to obtain that information and incorporate it into the per capita rate development for each year of experience (with corresponding weights applied in the final per capita cost).

Methodology

Buck projected historical claim data to FY22 for retirees using the following summarized steps:

1. Develop historical annual incurred claim cost rates – an analysis of medical costs was completed based on claims information and enrollment data provided by the State of Alaska and Aetna for each year in the experience period of FY20 through FY21.
 - Costs for medical services and prescriptions were analyzed separately, and separate trend rates were developed to project expected future medical and prescription costs for the valuation year (e.g. from the experience period up through FY22).
 - Because the reports provided reflected incurred claims, no additional adjustment was needed to determine incurred claims to be used in the valuation.
 - An offset for costs expected to be reimbursed by Medicare was incorporated beginning at age 65. Alaska retirees who do not have 40 quarters of Medicare-covered compensation do not qualify for Medicare Part A coverage free of charge. This is a relatively small and closed group. Medicare was applied to State employment for all employees hired after March 31, 1986. For the “no-Part A” individuals who are required to enroll in Medicare Part B, the State is the primary payer for hospital bills and other Part A services. Claim experience is not available separately for participants with both Medicare Parts A and B and those with Part B only. For Medicare Part B only participants, a lower average claims cost was applied to retirees covered by both Medicare Part A and B vs. retirees covered only by Medicare Part B based upon manual rate models that estimate the Medicare covered proportion of medical costs. To the extent that no-Part A claims can be isolated and applied strictly to the appropriate closed group, actuarial accrued liability will be more accurate.
 - Based on census data received from Aetna, less than 1% of the current retiree population was identified as having coverage only under Medicare Part B. We assume that 5% of actives hired before April 1, 1986 and current retirees who are not yet Medicare eligible will not be eligible for Medicare Part A.
 - Based upon a reconciliation of valuation census data to the snapshot eligibility files provided by Aetna as of July 1, 2020, and July 1, 2021, Buck adjusted member counts used for duplicate records where participants have double coverage; i.e. primary coverage as a retiree and secondary coverage as the covered spouse of another retiree. This is to reflect the total cost per distinct individual/member which is then applied to distinct members in the valuation census.
 - Buck understands that pharmacy claims reported do not reflect rebates. Based on actual pharmacy rebate information provided by Optum, rebates were assumed to be 19.5% of prescription drug claims for FY20, 16.2% of pre-Medicare, and 14.3% of Medicare prescription drug claims for FY21.
2. Develop estimated EGWP reimbursements – Segal provided estimated 2022 EGWP subsidies, developed with the assistance of OptumRx. These amounts are applicable only to Medicare-eligible participants.

3. Adjust for claim fluctuation, anomalous experience, etc. – explicit adjustments are often made for anticipated large claims or other anomalous experience. FY19 and FY20 experience were compared to assess the impact of COVID-19 and whether an adjustment to FY20 claims was indicated for use in the June 30, 2020 valuation. A material decrease in medical claims during March 2020 to June 2020 was experienced due to COVID-19. Therefore, an adjustment was made for those months to adjust for the decrease that is not expected to continue in future years. There was an observed spike in prescription drug claims in March 2020; however, the FY20 prescription drug experience appears reasonable to use without adjustment for COVID-19. To adjust for the decrease in medical claims due to COVID-19 during the last 4 months of FY20, the per capita cost during the first 8 months was used as the basis for estimating claims that would have occurred in the absence of COVID-19. FY21 experience was also thoroughly reviewed to assess the impact of COVID-19 and whether an adjustment to FY21 claims was appropriate for use in the June 30, 2021 valuation. FY21 medical per capita claims were noticeably lower than expected, so a 4% load was added to the FY21 medical claims used in the per capita claims cost development to better reflect future expected long-term costs of the plan. Total prescription drug claims experience for FY21 was reasonable and consistent with FY19 and FY20 experience. Therefore, no adjustment was made to FY21 prescription drug claims. Due to group size and demographics, we did not make any additional large claim adjustments. We do blend both Alaska plan-specific and national trend factors as described below. Buck compared data utilized to lag reports and quarterly plan experience presentations provided by the State and Aetna to assess accuracy and reasonableness of data.
4. Trend all data points to the projection period – project prior years' experience forward to FY22 for retiree benefits on an incurred claim basis. Trend factors derived from historical Alaska-specific experience and national trend factors are shown in the table in item 5 below.
5. Apply credibility to prior experience – adjust prior year's data by assigning weight to recent periods, as shown at the right of the table below. The Board approved a change in the weighting of experience periods beginning with the June 30, 2017 valuation as outlined below. Note also that for FY20 to FY21 medical and both years of prescription drugs we averaged projected plan costs using Alaska-specific trend factors and national trend factors, assigning 75% weight to Alaska-specific trends and 25% to national trends. For FY21 to FY22 medical we applied 100% weight to national trends because the Alaska-specific trends were impacted by COVID-19:

Alaska-Specific and National Average Weighted Trend from Experience Period to Valuation Year			
Experience Period	Medical	Prescription	Weighting Factors
FY20 to FY21	6.3% Pre-Medicare / 5.2% Medicare	7.6%	50%
FY21 to FY22	8.1% Pre-Medicare / 4.8% Medicare	8.0%	50%

Trend assumptions used for rate development are assessed annually and as additional/improved reporting becomes available, we will incorporate into rate development as appropriate.

6. Starting in 2022, prior authorization will be required for certain specialty medications. There is no change to the medications that are covered by the plan. Segal provided an estimate of the impact of this change to the DB retiree health plan cost for calendar year 2022. The DB base claims costs for pre-Medicare prescription drug, Medicare prescription drug, and EGWP were adjusted to reflect this change. Additionally, starting in 2022, certain preventive benefits for pre-Medicare participants will now be covered by the plan. Segal provided an estimate of the impact of this change to the DB retiree health plan cost for calendar year 2022. The DB base claims cost for pre-Medicare medical was adjusted to reflect this change.
7. Develop separate administration costs – no adjustments were made for internal administrative costs. Third party retiree plan administration fees for FY22 are based upon total fees projected to 2022 by Segal based on actual FY21 fees. The annual per participant per year administrative cost rate for medical and prescription benefits is \$493.

Healthcare Reform

Healthcare Reform legislation passed on March 23, 2010 included several provisions with potential implications for the State of Alaska Retiree Health Plan liability. Buck evaluated the impact due to these provisions.

Because the State plan is retiree-only, and was in effect at the time the legislation was enacted, not all provisions of the health reform legislation apply to the State plan. Unlimited lifetime benefits and dependent coverage to age 26 are two of these provisions. We reviewed the impact of including these provisions, but there was no decision made to adopt them, and no requirement to do so.

Because Transitional Reinsurance fees are only in effect until 2016, we excluded these for valuation purposes.

The Further Consolidated Appropriations Act, 2020 passed in December 2019 repealed several healthcare-related taxes, including the Cadillac Tax.

The Tax Cuts and Jobs Act passed in December 2017 included the elimination of the individual mandate penalty and changed the inflation measure for purposes of determining the limits for the High Cost Excise Tax to use chained CPI. It is our understanding the law does not directly impact other provisions of the ACA. While the nullification of the ACA's individual mandate penalty does not directly impact employer group health plans, it could contribute to the destabilization of the individual market and increase the number of uninsured. Such destabilization could translate to increased costs for employers. We have considered this when setting our healthcare cost trend assumptions and will continue to monitor this issue.

We have not identified any other specific provisions of healthcare reform or its potential repeal that would be expected to have a significant impact on the measured obligation. We will continue to monitor legislative activity.

Data

In accordance with actuarial standards, we note the following specific data sources and steps taken to value retiree medical benefits:

The Division of Retirement and Benefits provided pension valuation census data, which for people currently in receipt of healthcare benefits was supplemented by coverage data from the healthcare claims administrator (Aetna).

Certain adjustments and assumptions were made to prepare the data for valuation:

- All records provided with retiree medical coverage on the Aetna data were included in this valuation and we relied on the Aetna data as the source of medical coverage for current retirees and their dependents.
- Some records in the Aetna data were duplicates due to the double coverage (i.e. coverage as a retiree and as a spouse of another retiree) allowed under the plan. Records were adjusted for these members so that each member was only valued once. Any additional value of the double coverage (due to coordination of benefits) is small and reflected in the per capita costs.
- Covered children included in the Aetna data were valued until age 23, unless disabled. We assumed that those dependents over 23 were only eligible and valued due to being disabled.
- For individuals included in the pension data expecting a future pension, we valued health benefits starting at the same point that the pension benefit is assumed to start.

We are not aware of any other data issues that would be expected to have a material impact on the results and there are no unresolved matters related to the data.

The chart below shows the basis of setting the per capita claims cost assumption, which includes both PERS and TRS.

A. Fiscal 2020

	Medical		Prescription Drugs (Rx)	
	Pre-Medicare	Medicare	Pre-Medicare	Medicare
1. Incurred Claims	\$ 229,531,664	\$ 89,497,345	\$ 64,442,660	\$ 188,022,328
2. Adjustments for Rx Rebates	0	0	(12,566,319)	(36,664,354)
3. Net incurred claims	\$ 229,531,664	\$ 89,497,345	\$ 51,876,341	\$ 151,357,974
4. Average Enrollment	19,354	44,965	19,354	44,965
5. Claim Cost Rate (3) / (4)	11,860	1,990	2,680	3,366
6. Trend to Fiscal 2022	1.149	1.103	1.162	1.162
7. Fiscal 2022 Incurred Cost Rate (5) x (6)	\$ 13,630	\$ 2,195	\$ 3,116	\$ 3,912

B. Fiscal 2021

1. Incurred Claims	\$ 196,566,470	\$ 86,512,435	\$ 60,691,609	\$ 207,822,858
2. Adjustments for Rx Rebates and COVID (Medical only)	7,862,659	3,460,497	(9,832,041)	(29,718,669)
3. Net incurred claims	\$ 204,429,129	\$ 89,972,933	\$ 50,859,568	\$ 178,104,189
4. Average Enrollment	18,106	47,025	18,106	47,025
5. Claim Cost Rate (3) / (4)	11,291	1,913	2,809	3,787
6. Trend to Fiscal 2022	1.081	1.048	1.080	1.080
7. Fiscal 2022 Incurred Cost Rate (5) x (6)	\$ 12,205	\$ 2,005	\$ 3,034	\$ 4,090

C. Incurred Cost Rate by Fiscal Year

1. Fiscal 2020 A.(7)	13,630	2,195	3,116	3,912
2. Fiscal 2021 B.(7)	12,205	2,005	3,034	4,090

D. Weighting by Fiscal Year

1. Fiscal 2020	50%	50%	50%	50%
2. Fiscal 2021	50%	50%	50%	50%

E. Fiscal 2022 Incurred Cost Rate

1. Rate at Average Age C x D	\$ 12,918	\$ 2,100	\$ 3,075	\$ 4,001
2. Average Aging Factor	0.822	1.271	0.832	1.124
3. Rate at Age 65 (1) / (2)	\$ 15,708	\$ 1,652	\$ 3,695	\$ 3,560

F. Development of Part A&B and Part B Only Cost from Pooled Rate Above

1. Part A&B Average Enrollment	46,602
2. Part B Only Average Enrollment	423
3. Total Medicare Average Enrollment B(4)	47,025
4. Cost ratio for those with Part B only to those with Parts A&B	3.300
5. Factor to determine cost for those with Parts A&B (2) / (3) x (4) + (1) / (3) x 1.00	1.021
6. Medicare per capita cost for all participants: E(3)	\$ 1,652
7. Cost for those eligible for Parts A&B: (6) / (5)	\$ 1,619
8. Cost for those eligible for Part B only: (7) x (4)	\$ 5,341

- Rate at Age 65
- Adjustment factor for plan changes
- Adjusted Rate at Age 65 (1) x [1 + (2)]

	Medical		Prescription Drugs (Rx)	
	Pre-Medicare	Medicare	Pre-Medicare	Medicare
1. Rate at Age 65	\$ 15,708	\$ 1,619	\$ 3,695	\$ 3,560
2. Adjustment factor for plan changes	1.39%	0.00%	-8.67%	-2.41%
3. Adjusted Rate at Age 65 (1) x [1 + (2)]	\$ 15,926	\$ 1,619	\$ 3,375	\$ 3,474

Following the development of total projected costs, a distribution of per capita claims cost was developed. This was accomplished by allocating total projected costs to the population census used in the valuation. The allocation was done separately for each of prescription drugs and medical costs for the Medicare eligible and pre-Medicare populations. The allocation weights were developed using participant counts by age and assumed morbidity and aging factors. Results were tested for reasonableness based on historical trend and external benchmarks for costs paid by Medicare.

Below are the results of this analysis:

**Distribution of Per Capita Claims Cost by Age
for the Period July 1, 2021 through June 30, 2022**

Age	Medical and Medicare Parts A & B	Medical and Medicare Part B Only	Prescription Drug	Medicare EGWP Subsidy
45	\$ 9,719	\$ 9,719	\$ 2,062	\$ 0
50	10,996	10,996	2,449	0
55	12,441	12,441	2,908	0
60	14,076	14,076	3,133	0
65	1,619	5,341	3,474	1,131
70	1,877	6,192	3,836	1,249
75	2,176	7,178	4,235	1,379
80	2,402	7,925	4,130	1,345

Section 5.3: Summary of Actuarial Assumptions

The demographic and economic assumptions used in the June 30, 2021 valuation are described below. Unless noted otherwise, these assumptions were adopted by the Board in January 2019 based on the experience study for the period July 1, 2013 to June 30, 2017.

Investment Return

7.38% per year, net of investment expenses.

Salary Scale

Salary scale rates based upon the 2013-2017 actual experience (see Table 1).

Inflation – 2.50% per year.

Productivity – 0.25% per year.

Payroll Growth

2.75% per year (inflation + productivity).

Total Inflation

Total inflation as measured by the Consumer Price Index for urban and clerical workers for Anchorage is assumed to increase 2.50% annually.

Mortality (Pre-Commencement)

Mortality rates based upon the 2013-2017 actual experience.

RP-2014 white-collar employee table, benefit-weighted, rolled back to 2006, and projected with MP-2017 generational improvement.

Deaths are assumed to result from occupational causes 15% of the time.

Mortality (Post-Commencement)

Mortality rates based upon the 2013-2017 actual experience.

93% of male and 90% of female rates of RP-2014 white-collar healthy annuitant table, benefit-weighted, rolled back to 2006, and projected with MP-2017 generational improvement.

Turnover

Select and ultimate rates based upon the 2013-2017 actual experience (see Table 2).

Disability

Incidence rates based upon the 2013-2017 actual experience (see Table 3).

Post-disability mortality in accordance with the RP-2014 disabled table, benefit-weighted, rolled back to 2006, and projected with MP-2017 generational improvement.

Retirement

Retirement rates based upon the 2013-2017 actual experience (see Table 4).

Deferred vested members are assumed to retire at their earliest unreduced retirement date.

The modified cash refund annuity is valued as a three-year certain and life annuity.

Spouse Age Difference

Males are assumed to be three years older than their wives. Females are assumed to be two years younger than husbands.

Percent Married for Pension

85% of male members and 75% of female members are assumed to be married at termination from active service.

Dependent Spouse Medical Coverage Election

Applies to members who do not have double medical coverage. 65% of male members and 60% of female members are assumed to be married and cover a dependent spouse.

Dependent Children

- Pension: For the participants who are assumed to be married, those between ages 25 and 45 are assumed to have two dependent children.
- Healthcare: Benefits for dependent children have been valued only for members currently covering their dependent children. These benefits are only valued through the dependent children's age 23 (unless the child is disabled).

Contribution Refunds

0% of terminating members with vested benefits are assumed to have their contributions refunded. 100% of those with non-vested benefits are assumed to have their contributions refunded.

Imputed Data

Data changes from the prior year which are deemed to have an immaterial impact on liabilities and contribution rates are assumed to be correct in the current year's client data. Non-vested terminations with appropriate refund dates are assumed to have received a full refund of contributions. Active members with missing salary and service are assumed to be terminated with status based on their vesting percentage.

Active Rehire Assumption

The Normal Cost used for determining contribution rates and in the projections includes a rehire assumption to account for anticipated rehires. The Normal Cost shown in the report includes the following assumptions (which were developed based on the five years of rehire loss experience through June 30, 2017). For projections, these assumptions were assumed to grade to zero uniformly over a 20-year period.

- Pension: 15.57%
- Healthcare: 12.03%

Re-Employment Option

All re-employed retirees are assumed to return to work under the Standard Option.

Active Data Adjustment

No adjustment was made to reflect participants who terminate employment before the valuation date and are subsequently rehired after the valuation date.

Alaska Cost-of-Living Adjustments (COLA)

Of those benefit recipients who are eligible for the Alaska COLA, 60% are assumed to remain in Alaska and receive the COLA.

Postretirement Pension Adjustment (PRPA)

50% and 75% of assumed inflation, or 1.25% and 1.875% respectively, is valued for the annual automatic PRPA as specified in the statute.

Expenses

The investment return assumption is net of investment expenses.

The Normal Cost as of June 30, 2021 was increased by the following amounts for administrative expenses (for projections, the percent increase was assumed to remain constant in future years):

- Pension: \$3,217,000
- Healthcare: \$1,604,000

Part-Time Status

Part-time employees are assumed to earn 0.75 years of credited service per year.

Sick Leave

4.5 days of unused sick leave for each year of service are assumed to be available to be credited once the member is retired, terminates or dies.

Service

Total credited service is provided by the State. This service is assumed to be the only service that should be used to calculate benefits. Additionally, the State provides claimed service (including Bureau of Indian Affairs Service). Claimed service is used for vesting and eligibility purposes as described in Section 5.1.

Final Average Earnings

Final Average Earnings is provided on the data for active members. This amount is used as a minimum in the calculation of the average earnings in the future.

Per Capita Claims Cost

Sample claims cost rates adjusted to age 65 for FY22 medical and prescription drugs are shown below. The prescription drug costs reflect the plan change to require prior authorization for certain specialty medications. The pre-Medicare medical cost reflects the coverage of additional preventive benefits.

	Medical	Prescription Drugs
Pre-Medicare	\$ 15,926	\$ 3,375
Medicare Parts A & B	\$ 1,619	\$ 3,474
Medicare Part B Only	\$ 5,341	\$ 3,474
Medicare Part D – EGWP	N/A	\$ 1,131

Members are assumed to attain Medicare eligibility at age 65. All costs are for the 2022 fiscal year (July 1, 2021 – June 30, 2022).

The EGWP subsidy is assumed to increase in future years by the trend rates shown on the following pages. No future legislative changes or other events are anticipated to impact the EGWP subsidy. If any legislative or other changes occur in the future that impact the EGWP subsidy (which could either increase or decrease the plan's Actuarial Accrued Liability), those changes will be evaluated and quantified when they occur.

Third Party Administrator Fees

\$493 per person per year; assumed to increase at 4.5% per year.

Medicare Part B Only

We assume that 5% of actives hired before April 1, 1986 and current retirees who are not yet Medicare eligible will not be eligible for Medicare Part A.

Healthcare Cost Trend

The table below shows the rate used to project the cost from the shown fiscal year to the next fiscal year. For example, 6.3% is applied to the FY22 pre-Medicare medical claims costs to get the FY23 medical claims costs.

	Medical Pre-65	Medical Post-65	Prescription Drugs / EGWP
FY22	6.3%	5.4%	7.1%
FY23	6.1%	5.4%	6.8%
FY24	5.9%	5.4%	6.4%
FY25	5.8%	5.4%	6.1%
FY26	5.6%	5.4%	5.7%
FY27-FY40	5.4%	5.4%	5.4%
FY41	5.3%	5.3%	5.3%
FY42	5.2%	5.2%	5.2%
FY43	5.1%	5.1%	5.1%
FY44	5.1%	5.1%	5.1%
FY45	5.0%	5.0%	5.0%
FY46	4.9%	4.9%	4.9%
FY47	4.8%	4.8%	4.8%
FY48	4.7%	4.7%	4.7%
FY49	4.6%	4.6%	4.6%
FY50+	4.5%	4.5%	4.5%

For the June 30, 2014 valuation and later, the updated Society of Actuaries' Healthcare Cost Trend Model is used to project medical and prescription drug costs. This model estimates trend amounts that are projected out for 80 years. The model has been populated with assumptions that are specific to the State of Alaska.

Aging Factors

Age	Medical	Prescription Drugs
0 – 44	2.0%	4.5%
45 – 54	2.5%	3.5%
55 – 64	2.5%	1.5%
65 – 74	3.0%	2.0%
75 – 84	2.0%	-0.5%
85 – 94	0.3%	-2.5%
95+	0.0%	0.0%

Retired Member Contributions for Medical Benefits

Currently contributions are required for TRS members who are under age 60 and have less than 25 years of service. Eligible Tier 1 members are exempt from contribution requirements. Annual FY22 contributions based on monthly rates shown below for calendar 2022 are assumed based on the coverage category for current retirees. The composite rate shown is used for current active and inactive members in Tier 2 who are assumed to retire prior to age 60 with less than 25 years of service and who are not disabled. For dependent children, we value 1/3 of the annual retiree contribution to estimate the per child rate based upon the assumed number of children in rates where children are covered.

Coverage Category	Calendar 2022 Annual Contribution	Calendar 2022 Monthly Contribution	Calendar 2021 Monthly Contribution
Retiree Only	\$ 8,448	\$ 704	\$ 704
Retiree and Spouse	\$ 16,896	\$ 1,408	\$ 1,408
Retiree and Child(ren)	\$ 11,940	\$ 995	\$ 995
Retiree and Family	\$ 20,388	\$ 1,699	\$ 1,699
Composite	\$ 12,552	\$ 1,046	\$ 1,046

Trend Rate for Retired Member Medical Contributions

The table below shows the rate used to project the retired member medical contributions from the shown fiscal year to the next fiscal year. For example, 0.0% is applied to the FY22 retired member medical contributions to get the FY23 retired member medical contributions.

Trend Assumptions	
FY22	0.0%
FY23+	4.0%

Graded trend rates for retired member medical contributions are consistent with the rates used for the June 30, 2020 valuation. Actual FY22 retired member medical contributions are reflected in the valuation.

Healthcare Participation

100% of system paid members and their spouses are assumed to elect healthcare benefits as soon as they are eligible. 20% of non-system paid members and their spouses are assumed to elect healthcare benefits as soon as they are eligible.

Changes in Assumptions Since the Prior Valuation

Healthcare claim costs are updated annually as described in Section 5.2. The amounts included in the Normal Cost for administrative expenses were changed from \$3,003,000 to \$3,217,000 for pension, and from \$1,362,000 to \$1,604,000 for healthcare (based on the most recent two years of actual administrative expenses paid from plan assets).

Section 6: Actuarial Standard of Practice No. 51

Funding future retirement benefits prior to when those benefits become due involves assumptions regarding future economic and demographic experience. These assumptions are applied to calculate actuarial liabilities, current contribution requirements, and the funded status of the plan. However, to the extent future experience deviates from the assumptions used, variations will occur in these calculated values. These variations create risk to the plan. Understanding the risks to the funding of the plan is important.

Actuarial Standard of Practice No. 51 (ASOP 51)¹ requires certain disclosures of potential risks to the plan and provides useful information for intended users of actuarial reports that determine plan contributions or evaluate the adequacy of specified contribution levels to support benefit provisions.

Under ASOP 51, risk is defined as the potential of actual future measurements deviating from expected future measurements resulting from actual future experience deviating from actuarially assumed experience.

It is important to note that not all risk is negative, but all risk should be understood and accepted based on knowledge, judgement, and educated decisions. Future measurements may deviate in ways that produce positive or negative financial impacts to the plan.

In the actuary's professional judgment, the following risks may reasonably be anticipated to significantly affect the pension plan's future financial condition and contribution requirements.

- Investment Risk – potential that the investment return will be different than the 7.38% expected in the actuarial valuation
- Contribution Risk – potential that the contribution actually made will be different than the actuarially determined contribution
- Long-Term Return on Investment Risk – potential that changes in long-term capital market assumptions or the plan's asset allocation will create the need to update the long-term return on investment assumption
- Longevity Risk – potential that participants live longer than expected compared to the valuation mortality assumptions
- Salary Increase Risk – potential that future salaries will be different than expected in the actuarial valuation
- Inflation Risk – potential that the consumer price index (CPI) for urban wage earners and clerical workers for Anchorage is different than the 2.5% assumed in the valuation
- Other Demographic Risk – potential that other demographic experience will be different than expected

The following information is provided to comply with ASOP 51 and furnish beneficial information on potential risks to the plan. **This list is not all-inclusive**; it is an attempt to identify the more significant risks and how those risks might affect the results shown in this report.

Note that ASOP 51 does not require the actuary to evaluate the ability or willingness of the plan sponsor to make contributions to the plan when due, or to assess the likelihood or consequences of potential future changes in law. In addition, this valuation report is not intended to provide investment advice or to provide guidance on the management or reduction of risk.

¹ ASOP 51 does not apply to the healthcare portion of the plan. Accordingly, all figures in this section relate to the pension portion.

Assessment of Risks

Investment Risk

Plan costs are very sensitive to the market return.

- Any return on assets lower than assumed will increase costs.
- The plan uses an actuarial value of assets that smooths gains and losses on market returns over a five-year period to help control some of the volatility in costs due to investment risk.
- Historical experience of actual returns is shown in Section 2.4 of this report. This historical experience illustrates how returns can vary over time.

Contribution Risk

There is a risk to the plan when the employer's and/or State's actual contribution amount and the actuarially determined contribution differ.

- If the actual contribution is lower than the actuarially determined contribution, the plan may not be sustainable in the long term.
- Any underpayment of the contribution will increase future contribution amounts to help pay off the additional Unfunded Actuarial Accrued Liability associated with the underpayment(s).
- As long as the Board consistently adopts the actuarially determined contributions, this risk is mitigated due to Alaska statutes requiring the State to contribute additional funds necessary to pay the total contributions adopted by the Board.

Long-Term Return on Investment Risk

Inherent in the long-term return on investment assumption is the expectation that the current rate will be used until the last benefit payment of the plan is made. There is a risk that sustained changes in economic conditions, changes in long-term future capital market assumptions, or changes to the plan's asset allocation will necessitate an update to the long-term return on investment assumption used.

- Under a lower long-term return on investment assumption, less investment return is available to pay plan benefits. This may lead to a need for increased employer contributions.
- The liabilities will be higher at a lower assumed rate of return because future benefits will have a lower discount rate applied when calculating the present value.
- A 1% decrease in the long-term return on investment assumption will increase actuarial accrued liability by approximately 11%.
- This risk may be increased due to the plan being closed to new entrants. As the plan continues to mature, the magnitude of negative cash flow discussed in the Plan Maturity Measures later in this section will grow, thereby creating a need for more liquid assets that may not garner the same long-term return as currently assumed.

Longevity Risk

Plan costs will be increased as participants are expected to live longer.

- Benefits are paid over a longer lifetime when life expectancy is expected to increase. The longer duration of payments leads to higher liabilities.
- Health care has been improving, which affects the life expectancy of participants. As health care improves, leading to longer life expectancies, costs to the plan could increase.

- The mortality assumption for the plan mitigates this risk by assuming future improvement in mortality. However, any improvement in future mortality greater than that expected by the current mortality assumption would lead to increased costs for the plan.
- The Postretirement Pension Adjustments and Alaska Cost-of-Living Allowance increase longevity risk because members who live longer than expected will incur more benefit payment increases than expected and therefore increase costs.

Salary Increase Risk

Plan costs will be increased if actual salary increases are larger than expected.

- Higher-than-expected salary increases will produce higher benefits.
- The higher benefits may be partially offset by increased employee contributions due to higher salaries.
- If future payroll grows at a rate different than assumed, contributions as a percentage of payroll will be affected.

Inflation Risk

Plan costs will be increased if the actual CPI for Anchorage is greater than the 2.5% assumed in the valuation.

- Retirement benefits will be greater than expected if the CPI is greater than the assumed rate, which will increase costs.
- This risk is mitigated by the 75% and 50% of CPI provisions and the 9% and 6% maximums.
- This risk is also mitigated by the age and time in payment requirements to receive an increase.
- Inflation risk may be associated with the interaction of inflation with other assumptions, but this is not significant as a standalone assumption, and therefore is considered as part of the associated assumption risk instead of being discussed here.

Other Demographic Risk

The plan is subject to risks associated with other demographic assumptions (e.g., retirement, termination, and retired members remaining in Alaska assumptions). Differences between actual and expected experience for these assumptions tend to have less impact on the overall costs of the plan. The demographic assumptions used in the valuation are re-evaluated regularly as part of the four-year experience studies to ensure the assumptions are consistent with long-term expectations.

Historical Information

Monitoring certain information over time may help understand risks faced by the plan. Historical information is included throughout this report. Some examples are:

- Funded Ratio History shown in the Executive Summary illustrates how the plan's funded status (comparison of actuarial accrued liabilities to actuarial value of assets) has changed over time.
- Section 1.6 shows historical analysis of financial experience including how contribution rates have changed over time.
- Section 2.4 shows the volatility of asset returns over time.
- Section 4 includes various historical information showing how member census data has changed over time.

Plan Maturity Measures

There are certain measures that may aid in understanding the significant risks to the plan.

Ratio of Retired Liability to Total Liability (\$'s in \$000's)	June 30, 2020	June 30, 2021
1. Retiree and Beneficiary Accrued Liability	\$ 5,570,625	\$ 5,657,056
2. Total Accrued Liability	\$ 7,447,036	\$ 7,471,887
3. Ratio, (1) ÷ (2)	74.8%	75.7%

A high percentage of liability concentrated on participants in pay status indicates a mature plan (often a ratio above 60% - 65%). Because the plan was closed to new entrants in 2006, we expect the percentage in item #3 to continue to increase over time. An increasing percentage may indicate a need for a less risky asset allocation, which may lead to a lower long-term return on asset assumption and increased costs. Higher percentages may also indicate greater investment risk as benefit payments may be greater than contributions creating an increased reliance on investment returns. This ratio should be monitored each year in the future.

Ratio of Cash Flow to Assets (\$'s in \$000's)	FYE June 30, 2020	FYE June 30, 2021
1. Contributions	\$ 207,899	\$ 196,748
2. Benefit Payments	<u>490,447</u>	<u>501,429</u>
3. Cash Flow, (1) - (2)	\$ (282,548)	\$ (304,681)
4. Fair Value of Assets	\$ 5,444,799	\$ 6,731,481
5. Ratio, (3) ÷ (4)	(5.2%)	(4.5%)

When this cash flow ratio is negative, more cash is being paid out than deposited in the trust. Negative cash flow indicates the trust needs to rely on investment returns to cover benefit payments and / or may need to invest in more liquid assets to cover the benefit payments. More liquid assets may not generate the same returns as less liquid assets, which can increase the investment risk. Currently, the low magnitude of the ratio implies there may already be enough liquid assets to cover the benefit payments, less investment return is needed to cover the shortfall, or only a small portion of assets will need to be converted to cash. Therefore, the investment risk is likely not amplified at this time. However, due to the plan being closed, we expect this measure to become increasingly negative over time. This maturity measure should be monitored in the future.

Contribution Volatility (\$'s in \$000's)	June 30, 2020	June 30, 2021
1. Fair Value of Assets	\$ 5,444,799	\$ 6,731,481
2. DB/DCR Payroll	\$ 741,090	\$ 750,334
3. Asset to Payroll Ratio, (1) ÷ (2)	734.7%	897.1%
4. Accrued Liability	\$ 7,447,036	\$ 7,471,887
5. Liability to Payroll Ratio, (4) ÷ (2)	1,004.9%	995.8%

Plans that have higher asset-to-payroll ratios experience more volatile employer contributions (as a percentage of payroll) due to investment return. For example, a plan with an asset-to-payroll ratio of 10% may experience twice the contribution volatility due to investment return volatility than a plan with an asset-to-payroll ratio of 5%. Plans that have higher liability-to-payroll ratios experience more volatile employer contributions (as a percentage of payroll) due to changes in liability. For example, if an assumption change increases the liability of two plans by the same percent, the plan with a liability-to-payroll ratio of 10% may experience twice the contribution volatility than a plan with a liability-to-payroll ratio of 5%.

Glossary of Terms

Actuarial Accrued Liability

Total accumulated cost to fund pension or postemployment benefits arising from service in all prior years.

Actuarial Cost Method

Technique used to assign or allocate, in a systematic and consistent manner, the expected cost of a pension or postemployment plan for a group of plan members to the years of service that give rise to that cost.

Actuarial Present Value of Projected Benefits

Amount which, together with future interest, is expected to be sufficient to pay all future benefits.

Actuarial Valuation

Study of probable amounts of future pension or postemployment benefits and the necessary amount of contributions to fund those benefits.

Actuary

Person who performs mathematical calculations pertaining to pension and insurance benefits based on specific procedures and assumptions.

GASB 67 and 68

Governmental Accounting Standards Board Statement Number 67 amends Number 25 effective for the fiscal year beginning after June 15, 2013 and defines new financial reporting requirements for public pension plans.

Governmental Accounting Standards Board Statement Number 68 amends Number 27 effective for fiscal years beginning after June 15, 2014 and defines new accounting and financial reporting requirements for employers sponsoring public pension plans.

GASB 74 and 75

Governmental Accounting Standards Board Statement Number 74 amends Number 43 effective for the fiscal year beginning after June 15, 2016 and defines new financial reporting requirements for public postemployment benefit plans.

Governmental Accounting Standards Board Statement Number 75 amends Number 45 effective for fiscal years beginning after June 15, 2017 and defines new accounting and financial reporting requirements for employers sponsoring public postemployment benefit plans.

Normal Cost

That portion of the actuarial present value of benefits assigned to a particular year in respect to an individual participant or the plan as a whole.

Rate Payroll

Members' earnings used to determine contribution rates.

Unfunded Actuarial Accrued Liability (UAAL)

The portion of the actuarial accrued liability not offset by plan assets.

Valuation Payroll

Members' earnings used to determine Normal Cost and Actuarial Accrued Liability.

Vested Benefits

Benefits which are unconditionally guaranteed regardless of employment.

Certification of Actuarial Valuation

Dear Members of The Alaska Retirement Management Board, The Department of Revenue and The Department of Administration:

This report summarizes the annual actuarial valuation results of the State of Alaska Teachers' Retirement System Defined Contribution Retirement (TRS DCR) Plan as of June 30, 2021 performed by Buck Global, LLC (Buck).

The actuarial valuation is based on financial information provided in the financial statements audited by KPMG LLP, member data provided by the Division of Retirement and Benefits, and medical enrollment data provided by the healthcare claims administrator (Aetna), as summarized in this report. The benefits considered are those delineated in Alaska statutes effective June 30, 2021. The actuary did not verify the data submitted, but did perform tests for consistency and reasonableness.

All costs, liabilities and other factors under TRS DCR were determined in accordance with generally accepted actuarial principles and procedures. An actuarial cost method is used to measure the actuarial liabilities which we believe is reasonable. Buck is solely responsible for the actuarial data and actuarial results presented in this report. This report fully and fairly discloses the actuarial position of TRS DCR as of June 30, 2021.

TRS DCR is funded by Employer Contributions in accordance with the funding policy adopted by the Alaska Retirement Management Board (Board). The funding objective for TRS DCR is to pay required contributions that remain level as a percent of TRS DCR compensation. The Board has also established a funding policy objective that the required contributions be sufficient to pay the Normal Costs of active plan members, plan expenses, and amortize the Unfunded Actuarial Accrued Liability as a level percent of TRS DCR compensation over closed layered 25-year periods. This objective is currently being met and is projected to continue to be met as required by the Alaska State statutes. Absent future gains/losses, actuarially determined contributions are expected to remain level as a percent of pay and the overall funded status is expected to remain at or above 100%.

The Board and staff of the State of Alaska may use this report for the review of the operations of TRS DCR. Use of this report for any other purpose or by anyone other than the Board or staff of the State of Alaska may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods or inapplicability of the report for that purpose. Because of the risk of misinterpretation of actuarial results, you should ask Buck to review any statement you wish to make on the results contained in this report. Buck will not accept any liability for any such statement made without the review by Buck.

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the actuarial assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions or applicable law. In particular, retiree group benefits models necessarily rely on the use of approximations and estimates and are sensitive to changes in these approximations and estimates. Small variations in these approximations and estimates may lead to significant changes in actuarial measurements. An analysis of the potential range of such future differences is beyond the scope of this valuation.

In our opinion, the actuarial assumptions used are reasonable, taking into account the experience of the plan and reasonable long-term expectations, and represent our best estimate of the anticipated long-term experience under the plan. The actuary performs an analysis of plan experience periodically and recommends changes if, in the opinion of the actuary, assumption changes are needed to more accurately reflect expected future experience. The last full experience analysis was performed for the period July 1, 2013 to June 30, 2017. Based on that experience study, the Board adopted new assumptions effective beginning with the June 30, 2018 valuation to better reflect expected future experience. Based on our annual analysis of recent claims experience, changes were made to the per capita claims cost rates effective June 30, 2021 to better reflect expected future healthcare experience. A summary of the actuarial assumptions and methods used in this actuarial valuation is shown in Sections 4.2 and 4.3. We certify that the assumptions and methods described in Sections 4.2 and 4.3 of this report meet the requirements of all applicable Actuarial Standards of Practice.

Governmental Accounting Standards Board (GASB) Statement No. 74 (GASB 74) was effective for TRS DCR beginning with fiscal year ending June 30, 2017, and GASB 75 was effective beginning with fiscal year ending June 30, 2018. Separate GASB 74 and GASB 75 reports have been prepared.

Assessment of Risks

Actuarial Standard of Practice No. 51 (ASOP 51) applies to actuaries performing funding calculations related to a pension plan. ASOP 51 does not apply to actuaries performing services in connection with other post-employment benefits, such as medical benefits. Accordingly, ASOP 51 does not apply to the retiree medical portion of TRS DCR. We also believe ASOP 51 does not apply to the occupational death & disability portion of TRS DCR. Therefore, information related to ASOP 51 is not included in this report. However, it may be beneficial to review the ASOP 51 information provided in the TRS valuation report for information on risks that may also relate to the occupational death & disability benefits provided by this plan.

Use of Models

Actuarial Standard of Practice No. 56 (ASOP 56) provides guidance to actuaries when performing actuarial services with respect to designing, developing, selecting, modifying, using, reviewing, or evaluating models. Buck uses third-party software in the performance of annual actuarial valuations and projections. The model is intended to calculate the liabilities associated with the provisions of the plan using data and assumptions as of the measurement date under the funding methods specified in this report. The output from the third-party vendor software is used as input to an internally developed model that applies applicable funding methods and policies to the derived liabilities and other inputs, such as plan assets and contributions, to generate many of the exhibits found in this report. Buck has an extensive review process in which the results of the liability calculations are checked using detailed sample life output, changes from year to year are summarized by source, and significant deviations from expectations are investigated. Other funding outputs and the internal model are similarly reviewed in detail and at a higher level for accuracy, reasonability, and consistency with prior results. Buck also reviews the third-party model when significant changes are made to the software. This review is performed by experts

within Buck who are familiar with applicable funding methods, as well as the manner in which the model generates its output. If significant changes are made to the internal model, extra checking and review are completed. Significant changes to the internal model that are applicable to multiple clients are generally developed, checked, and reviewed by multiple experts within Buck who are familiar with the details of the required changes.

Buck used manual rate models to determine relative plan values for the defined benefit (DB) retiree medical plan and the DCR retiree medical plan, and to reflect the different Medicare coordination methods between the two plans. The manual rate models are intended to provide benchmark data and pricing capabilities, calculate per capita costs, and calculate actuarial values of different commercial health plans. Buck relied on the models, which were developed using industry data by actuaries and consultants at OptumInsight.

COVID-19

The potential impact of the ongoing COVID-19 pandemic on costs and liabilities was considered and an adjustment was made in setting the medical per capita claims cost assumption. FY20 medical claims were adjusted for a COVID-19 related decline in claims during the last four months (March – June) of FY20. FY21 medical claims were adjusted for a COVID-19 related decline in those claims during the fiscal year. A more detailed explanation on these adjustments is shown in Sections 4.2 and 4.3 and in the valuation report for the DB plan.

This report was prepared under my supervision and in accordance with all applicable Actuarial Standards of Practice. I am a Fellow of the Society of Actuaries, an Enrolled Actuary, a Fellow of the Conference of Consulting Actuaries, and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

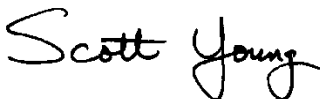

I am available to discuss this report with you at your convenience. I can be reached at 602-803-6174.

Respectfully submitted,

David J. Kershner, FSA, EA, MAAA, FCA
Principal
Buck

The undersigned actuary is responsible for all assumptions related to the average annual per capita health claims cost and the health care cost trend rates, and hereby affirms his qualification to render opinions in such matters in accordance with the Qualification Standards of the American Academy of Actuaries.

Scott Young, FSA, EA, MAAA, FCA
Director
Buck

Executive Summary

Overview

The State of Alaska Teachers' Retirement System Defined Contribution Retirement (TRS DCR) Plan provides occupational death & disability and retiree medical benefits to teachers and other eligible members hired after June 30, 2006 or who have elected participation in this plan. The Commissioner of the Department of Administration is responsible for administering the plan. The Alaska Retirement Management Board has fiduciary responsibility over the assets of the plan. This report presents the results of the actuarial valuation of TRS DCR as of the valuation date of June 30, 2021.

Purpose

An actuarial valuation is performed on the plan annually as of the end of the fiscal year. The main purposes of the actuarial valuation detailed in this report are:

1. To determine the Employer contribution necessary to meet the Board's funding policy for the plan;
2. To disclose the funding assets and liability measures as of the valuation date;
3. To review the current funded status of the plan and assess the funded status as an appropriate measure for determining actuarially determined contributions;
4. To compare actual and expected experience under the plan during the last fiscal year; and
5. To report trends in contributions, assets, liabilities, and funded status over the last several years.

The actuarial valuation provides a "snapshot" of the funded position of TRS DCR based on the plan provisions, membership data, assets, and actuarial methods and assumptions as of the valuation date.

Funded Status

Where presented, references to "funded ratio" and "unfunded actuarial accrued liability" typically are measured on an actuarial value of assets basis. It should be noted that the same measurements using market value of assets would result in different funded ratios and unfunded accrued liabilities. Moreover, the funded ratio presented is appropriate for evaluating the need and level of future contributions but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e. purchase annuities) for a portion or all of its liabilities.

Funded Status as of June 30 (\$'s in 000's)		2020	2021
Occupational Death & Disability			
a. Actuarial Accrued Liability	\$	223	\$ 205
b. Valuation Assets		<u>4,933</u>	<u>5,843</u>
c. Unfunded Actuarial Accrued Liability, (a) - (b)	\$	(4,710)	\$ (5,638)
d. Funded Ratio based on Valuation Assets, (b) ÷ (a)		2,212.1%	2,850.2%
e. Fair Value of Assets	\$	4,823	\$ 6,623
f. Funded Ratio based on Fair Value of Assets, (e) ÷ (a)		2,162.8%	3,230.7%

Funded Status as of June 30 (\$'s in 000's)		2020	2021
Retiree Medical			
a.	Actuarial Accrued Liability	\$ 40,634	\$ 44,396
b.	Valuation Assets	<u>49,554</u>	<u>59,380</u>
c.	Unfunded Actuarial Accrued Liability, (a) - (b)	\$ (8,920)	\$ (14,984)
d.	Funded Ratio based on Valuation Assets, (b) ÷ (a)	122.0%	133.8%
e.	Fair Value of Assets	\$ 48,413	\$ 67,278
f.	Funded Ratio based on Fair Value of Assets, (e) ÷ (a)	119.1%	151.5%
Total			
a.	Actuarial Accrued Liability	\$ 40,857	\$ 44,601
b.	Valuation Assets	<u>54,487</u>	<u>65,223</u>
c.	Unfunded Actuarial Accrued Liability, (a) - (b)	\$ (13,630)	\$ (20,622)
d.	Funded Ratio based on Valuation Assets, (b) ÷ (a)	133.4%	146.2%
e.	Fair Value of Assets	\$ 53,236	\$ 73,901
f.	Funded Ratio based on Fair Value of Assets, (e) ÷ (a)	130.3%	165.7%

The key reasons for the change in the funded status are explained below. The funded status for healthcare benefits is not necessarily an appropriate measure to confirm that assets are sufficient to settle health plan obligations as there are no available financial instruments for purchase. Future experience is likely to vary from assumptions so there is potential for actuarial gains or losses.

1. Investment Experience

The approximate FY21 investment return based on fair value of assets was 29.5% compared to the expected investment return of 7.38% (net of investment expenses of approximately 0.29%). This resulted in a gain of approximately \$12,235,000 to the plan from investment experience. The asset valuation method recognizes 20% of this gain (\$2,447,000) this year and an additional 20% in each of the next 4 years. In addition, 20% of the FY17 investment gain, 20% of the FY18 investment loss, 20% of the FY19 investment loss, and 20% of the FY20 investment loss were recognized this year. The approximate FY21 asset return based on actuarial value of assets was 11.3% compared to the expected asset return of 7.38% (net of investment expenses).

2. Salary Increases

Salary increases for continuing active members during FY21 were higher than anticipated based on the valuation assumptions, resulting in a liability loss of approximately \$1,000.

3. Demographic Experience

The number of active members increased 3.5% from 5,332 at June 30, 2020 to 5,521 at June 30, 2021. The average age of active members increased from 41.63 to 41.90 and average credited service increased from 6.03 to 6.34 years.

The demographic experience gains/losses are shown on page 4.

4. Retiree Medical Claims Experience

Please refer to the State of Alaska Teachers' Retirement System (TRS) Defined Benefit Plan Actuarial Valuation Report as of June 30, 2021 for a full description of the assumptions and costs of the retiree medical plan. Adjustments to these costs and assumptions are described in this report.

The recent claims experience described in Section 4.2 of this report (Section 5.2 of the TRS report) created an actuarial gain of approximately \$1,883,000.

5. Changes in Methods Since the Prior Valuation

There were no changes in actuarial methods since the prior valuation.

6. Changes in Assumptions Since the Prior Valuation

Healthcare claim costs are updated annually as described in Section 4.2. The amounts included in Normal Cost for administrative expenses were updated based on the last two years of actual administrative expenses paid from plan assets. There were no other changes in actuarial assumptions since the prior valuation.

7. Changes in Benefit Provisions Since the Prior Valuation

Starting in 2022, prior authorization will be required for certain specialty medications. This change created an actuarial gain of approximately \$528,000. There have been no other changes in benefit provisions valued since the prior valuation.

Comparative Summary of Contribution Rates

Occupational Death & Disability	FY 2023	FY 2024
a. Employer Normal Cost Rate	0.08%	0.08%
b. Past Service Cost Rate	<u>(0.10)%</u>	<u>(0.11)%</u>
c. Total Employer Contribution Rate, (a) + (b), not less than (a)	0.08%	0.08%

Retiree Medical	FY 2023	FY 2024
a. Employer Normal Cost Rate	0.87%	0.82%
b. Past Service Cost Rate	<u>(0.14)%</u>	<u>(0.22)%</u>
c. Total Employer Contribution Rate, (a) + (b), not less than (a)	0.87%	0.82%

Total	FY 2023	FY 2024
a. Employer Normal Cost Rate	0.95%	0.90%
b. Past Service Cost Rate	<u>(0.24)%</u>	<u>(0.33)%</u>
c. Total Employer Contribution Rate, (a) + (b), not less than (a)	0.95%	0.90%

The exhibit below shows the historical Board-adopted employer contribution rates for TRS DCR.

Total Employer Contribution Rate				
Valuation Date	Fiscal Year	Occupational Death & Disability	Retiree Medical	Total
June 30, 2010	FY13	0.00%	0.49%	0.49%
June 30, 2011	FY14	0.00%	0.47%	0.47%
June 30, 2012	FY15	0.00%	2.04%	2.04%
June 30, 2013	FY16	0.00%	2.04%	2.04%
June 30, 2014	FY17	0.00%	1.05%	1.05%
June 30, 2015	FY18	0.00%	0.91%	0.91%
June 30, 2016	FY19	0.08%	0.79%	0.87%
June 30, 2017	FY20	0.08%	1.09%	1.17%
June 30, 2018	FY21	0.08%	0.93%	1.01%
June 30, 2019	FY22	0.08%	0.83%	0.91%
June 30, 2020	FY23	0.08%	0.87%	0.95%
June 30, 2021	FY24	TBD	TBD	TBD

Summary of Actuarial Accrued Liability Gain/(Loss)

The following table shows the FY21 gain/(loss) on actuarial accrued liability as of June 30, 2021 (\$'s in 000's):

	Occupational Death & Disability	Retiree Medical	Total
Retirement Experience	\$ 0	\$ 550	\$ 550
Termination Experience	(7)	2,361	2,354
Disability Experience	219	(57)	162
Active Mortality Experience	107	(9)	98
Inactive Mortality Experience	(1)	(30)	(31)
Salary Increases	(1)	N/A	(1)
New Entrants	0	(581)	(581)
Rehires	1	(2,038)	(2,037)
Benefit Payments Different than Expected	18	(101)	(83)
Per Capita Claims Costs	N/A	1,883	1,883
Prescription Drug Plan Changes	N/A	528	528
Miscellaneous ¹	<u>8</u>	<u>195</u>	<u>203</u>
Total	\$ 344	\$ 2,701	\$ 3,045

¹ Includes the effects of various data changes that are typical when new census data is received for the annual valuation, as well as other items that do not fit neatly into any of the other categories.

Section 2.2: Changes in Fair Value of Assets During FY21 (\$'s in 000's)

Fiscal Year 2021	Occupational Death & Disability	Retiree Medical	Total
1. Fair Value of Assets as of June 30, 2020	\$ 4,823	\$ 48,413	\$ 53,236
2. Additions:			
a. Member Contributions	\$ 0	\$ 0	\$ 0
b. Employer Contributions	362	4,217	4,579
c. Interest and Dividend Income	70	707	777
d. Net Appreciation/(Depreciation) in Fair Value of Investments	1,415	14,279	15,694
e. Employer Group Waiver Plan	0	3	3
f. Other	0	2	2
g. Total Additions	\$ 1,847	\$ 19,208	\$ 21,055
3. Deductions:			
a. Medical Benefits	\$ 0	\$ 171	\$ 171
b. Death & Disability Benefits	24	0	24
c. Investment Expenses	14	138	152
d. Administrative Expenses	9	34	43
e. Total Deductions	\$ 47	\$ 343	\$ 390
4. Fair Value of Assets as of June 30, 2021	\$ 6,623	\$ 67,278	\$ 73,901
5. Approximate Fair Value Investment Return Rate during FY21 Net of Investment Expenses	29.5%	29.5%	29.5%

Section 2.3: Development of Actuarial Value of Assets (\$'s in 000's)

The actuarial value of assets and the fair value were \$0 at June 30, 2006. Investment gains and losses are recognized 20% per year over 5 years. In no event may valuation assets be less than 80% or more than 120% of fair value as of the current valuation date.

	Occupational Death & Disability	Retiree Medical	Total
1. Investment Gain/(Loss) for FY21			
a. Fair Value as of June 30, 2020	\$ 4,823	\$ 48,413	\$ 53,236
b. Contributions	362	4,217	4,579
c. Employer Group Waiver Plan	0	3	3
d. Benefit Payments	24	171	195
e. Administrative Expenses	9	34	43
f. Actual Investment Return (net of investment expenses)	1,471	14,850	16,321
g. Expected Return Rate (net of investment expenses)	7.38%	7.38%	7.38%
h. Expected Return	368	3,718	4,086
i. Investment Gain/(Loss) for the Year (f) - (h)	1,103	11,132	12,235
2. Actuarial Value as of June 30, 2021			
a. Fair Value as of June 30, 2021	\$ 6,623	\$ 67,278	\$ 73,901
b. Deferred Investment Gain/(Loss)	780	7,898	8,678
c. Preliminary Actuarial Value as of June 30, 2021, (a) - (b)	5,843	59,380	65,223
d. Upper Limit: 120% of Fair Value as of June 30, 2021	7,947	80,733	88,680
e. Lower Limit: 80% of Fair Value as of June 30, 2021	5,299	53,823	59,122
f. Actuarial Value at June 30, 2021, (c) limited by (d) and (e)	5,843	59,380	65,223
3. Ratio of Actuarial Value of Assets to Fair Value of Assets	88.2%	88.3%	88.3%
4. Approximate Actuarial Value Investment Return Rate during FY21 Net of Investment Expenses	11.4%	11.3%	11.3%

The tables below show the development of the gains/(losses) to be recognized in the current year (\$'s in 000's):

Occupational Death & Disability				
Fiscal Year Ending	Asset Gain / (Loss)	Gain / (Loss) Recognized in Prior Years	Gain / (Loss) Recognized This Year	Gain / (Loss) Deferred to Future Years

¹ 125 participants are expected to receive retiree medical benefits in a different plan and are included for OD&D benefits only.

² 128 participants are expected to receive retiree medical benefits in a different plan and are included for OD&D benefits only.

Section 3.4: Schedule of Active Member Data

Valuation Date	Number	Annual Earnings (000's)	Annual Average Earnings	Percent Increase in Average Earnings	Number of Participating Employers
June 30, 2021	5,521	\$ 408,805	\$ 74,045	4.1%	57
June 30, 2020	5,332	379,201	71,118	2.2%	57
June 30, 2019	4,998	347,957	69,619	2.2%	57
June 30, 2018	4,915	334,803	68,119	2.4%	57
June 30, 2017	4,694	312,347	66,542	2.0%	57
June 30, 2016	4,383	285,854	65,219	2.5%	58
June 30, 2015	4,095	260,584	63,635	2.7%	58
June 30, 2014	3,547	219,701	61,940	2.4%	58
June 30, 2013	3,272	197,944	60,496	3.5%	58
June 30, 2012	3,057	178,761	58,476	4.7%	58

Total and average annual earnings ("valuation pay") are the annualized earnings for the fiscal year ending on the valuation date.

Section 3.5: Active Member Payroll Reconciliation

Payroll Field	Payroll Data (000's)
a) DRB actual reported salaries FY21 in employer list	\$ 451,880
b) DRB actual reported salaries FY21 in valuation data	401,736
c) Annualized valuation data	408,805
d) Valuation payroll as of June 30, 2021	427,762
e) Rate payroll for FY22	423,783

- a) Actual reported salaries from DRB employer listing showing all payroll paid during FY21, including those who were not active as of June 30, 2021
- b) Payroll from valuation data for people who are in active status as of June 30, 2021
- c) Payroll from (b) annualized for both new entrants and part-timers
- d) Payroll from (c) with one year of salary scale applied to estimate salaries payable for the upcoming year
- e) Payroll from (d) with the part-timer annualization removed

Section 4: Basis of the Actuarial Valuation

Section 4.1: Summary of Plan Provisions

Effective Date

July 1, 2006, with amendments through June 30, 2021.

Administration of Plan

The Commissioner of Administration or the Commissioner's designee is the administrator of the Plan. The Attorney General of the state is the legal counsel for the Plan and shall advise the administrator and represent the Plan in legal proceedings.

The Alaska Retirement Management Board prescribes policies, adopts regulations, invests the funds, and performs other activities necessary to carry out the provisions of the Plan.

Employers Included

Currently there are 57 employers participating in TRS DCR, including the State of Alaska, 53 school districts, and three other eligible organizations.

Membership

An employee of a participating employer who first enters service on or after July 1, 2006, or a member of the defined benefit plan who works for an employer who began participation on or after July 1, 2006, and meets the following criteria is a member in the Plan:

- Permanent full-time or part-time elementary or secondary teachers, school nurses, or a person in a position requiring a teaching certificate as a condition of hire in a public school of the State of Alaska, the Department of Education and Early Development, or in the Department of Labor and Workforce Development.
- Full-time or part-time teachers at the University of Alaska or persons occupying full-time administrative positions requiring academic standing who are not in the University's Optional Retirement Plan.

Members can convert to TRS DCR if they are an eligible non-vested member of the TRS defined benefit plan whose employer consents to transfers to the defined contribution plan and they elect to transfer his or her account balance to TRS DCR.

Member Contributions

Other than the member-paid premiums discussed later in this section, there are no member contributions for the occupational death & disability and retiree medical benefits.

Retiree Medical Benefits

- Member must retire directly from the plan to be eligible for retiree medical coverage. Normal retirement eligibility is the earlier of a) 30 years of service or b) Medicare eligible and 10 years of service.
- No subsidized retiree medical benefits are provided until normal retirement eligibility. The member's and any covered dependent's premium is 100% until the member is Medicare eligible. Upon the member's Medicare-eligibility, the required contribution will follow the service-based schedule shown below.
- Coverage cannot be denied except for failure to pay premium.
- Members who are receiving disability benefits or survivors who are receiving monthly survivor benefits are not eligible until the member meets, or would have met if he/she had lived, the normal retirement eligibility requirements.
- The following is a summary of the medical benefit design adopted in July 2016. The plan description below is used for valuation purposes and indicates participant cost-sharing. Please refer to the benefit handbook for more details.

Plan Design Feature	In-Network ¹	Out-of-Network ^{1 2}
Deductible (single / family)	\$300 / \$600	
Medical services (participant share)	20%	40%
Emergency Room Copay (non-emergent use)	\$100	\$100
Medical Out-of-Pocket Maximum (single / family, including deductible)	\$1,500 / \$3,000	\$3,000 / \$6,000
Medicare Coordination	Exclusion	Exclusion
Pharmacy	No Deductible	No Deductible
Retail Generic (per 30-day fill)	20% \$10 min / \$50 max	40%
Retail Non-Formulary Brand (per 30-day fill)	25% \$25 min / \$75 max	
Retail Formulary Brand (per 30-day fill)	35% \$80 min / \$150 max	
Mail-Order Generic	\$20 copay	40%
Mail-Order Non-Formulary Brand	\$50 copay	
Mail-Order Formulary Brand	\$100 copay	
Pharmacy Out-of-Pocket Max (single / family)	\$1,000 / \$2,000	
Medicare Pharmacy Arrangement	Retiree Drug Subsidy / Employer Group Waiver Plan effective 1/1/2019	
Wellness / Preventative	100% covered, not subject to deductible	20%, after deductible

¹ Section 1.1 of the AlaskaCare Defined Contribution Retiree Benefit Plan states that this health plan shall be updated from time to time to reflect changes in benefits, including annual adjustments to the premium, deductible, coinsurance, medical out-of-pocket limit, and prescription drug out-of-pocket limit.

² OON applies only to non-Medicare eligible participants.

- Buck used manual rate models to determine relative plan values for the defined benefit (DB) retiree medical plan and the DCR retiree medical plan outlined above. We applied the ratio of the DCR retiree medical plan value to the DB retiree medical plan value to the per capita costs determined for each of pre/post-Medicare medical and pharmacy benefits to estimate corresponding values for the DCR retiree medical plan design. These factors are noted in Section 4.3. We further adjusted the Medicare medical manual rate to reflect the Medicare coordination method adopted. The estimated 2022 reimbursements under EGWP were provided by Segal Consulting (who worked with the EGWP administrator, Optum, to develop those estimates). We reflect estimated discounts and pharmacy rebates in the defined benefit medical cost so no further adjustment was needed for the DCR retiree medical plan. The medical network differential is reflected in the relative plan value adjustments.
- Starting in 2022, prior authorization will be required for certain specialty medications. There is no change to the medications that are covered by the plan.
- The retiree medical plan's coverage is supplemental to Medicare. Medicare coordination is described in the DCR Plan Handbook, referred to in the industry as exclusion coordination: Medicare payment is deducted from the Medicare allowable expense and plan parameters are applied to the remaining amount. Starting in 2019, the prescription drug coverage is through a Medicare Part D EGWP arrangement.
- The premium for Medicare-eligible retirees will be based on the member's years of service. The percentage of premium paid by the member is as follows:

Years of Service	Percent of Premium Paid by Member
< 15	30%
15 – 19	25%
20 – 24	20%
25 – 29	15%
30+	10%

- The premium for dependents who are not eligible for Medicare aligns with the member's subsidy. While a member is not Medicare-eligible, premiums are 100% of the estimated cost.
- Members have a separate defined contribution Health Reimbursement Arrangement account, which is not reflected in this valuation, that can be used to pay for premiums or other medical expenses.
- For valuation purposes, retiree premiums were assumed to equal the percentages outlined in the table above times the age-related plan costs. Future premiums calculated and charged to DCR participants will need to be determined reflecting any appropriate adjustments to the defined benefit (DB) plan data because current DB premiums were determined using information based upon enrollment with members who have double coverage.
- Coverage will continue for surviving spouses of covered retired members.

Occupational Disability Benefits

- Benefit is 40% of salary at date of disability.
- Disability Benefit Adjustment: The disability benefit is increased by 75% of the cost of living increase in the preceding calendar year or 9%, whichever is less.
- Member earns service while on occupational disability.
- Benefits cease when the member becomes eligible for normal retirement at Medicare-eligible age and 10 years of service, or at any age with 30 years of service.
- No subsidized retiree medical benefits are provided until normal retirement eligibility. The member's premium is 100% of the estimated cost until they are Medicare eligible. Medicare-eligible premiums follow the service-based schedule above.

Occupational Death Benefits

- Benefit is 40% of salary.
- Survivor's Pension Adjustment: A survivor's pension is increased by 50% of the cost of living increase in the preceding calendar year or 6%, whichever is less, if the recipient is at least age 60 on July 1, or under age 60 if the recipient has been receiving TRS benefits for at least 8 years as of July 1.
- Benefits cease when the member would have become eligible for normal retirement.
- The period during which the survivor is receiving benefits is counted as service credit toward retiree medical benefits.
- No subsidized retiree medical benefits are provided until the member would have been eligible for normal retirement. The surviving spouse's premium is 100% of the estimated cost until the member would have been Medicare eligible. Medicare-eligible premiums follow the service-based schedule above.

Changes Since the Prior Valuation

Starting in 2022, prior authorization will be required for certain specialty medications. There have been no other changes in TRS DCR benefit provisions valued since the prior valuation.

Section 4.2: Description of Actuarial Methods and Valuation Procedures

The funding method used in this valuation was adopted by the Board in October 2006, and was modified as part of the experience study for the period July 1, 2013 to June 30, 2017. The asset smoothing method used to determine valuation assets was implemented effective June 30, 2006.

Benefits valued are those delineated in Alaska State statutes as of the valuation date. Changes in State statutes effective after the valuation date are not taken into consideration in setting the assumptions and methods.

Actuarial Cost Method

Liabilities and contributions shown in the report are computed using the Entry Age Normal Actuarial Cost Method, level percent of pay. Each year's difference between actual and expected unfunded actuarial accrued liability is amortized over 25 years as a level percentage of expected payroll.

Cost factors designed to produce annual costs as a constant percentage of each member's expected compensation in each year for death & disability benefits and retiree medical benefits, from the assumed entry age to the last age with a future benefit were applied to the projected benefits to determine the normal cost (the portion of the total cost of the plan allocated to the current year under the method). The normal cost is determined by summing intermediate results for active members and determining an average normal cost rate which is then related to the total DCR Plan payroll of active members. The actuarial accrued liability for active members (the portion of the total cost of the plan allocated to prior years under the method) was determined as the excess of the actuarial present value of projected benefits over the actuarial present value of future normal costs.

The actuarial accrued liability for beneficiaries and disabled members currently receiving benefits (if any) was determined as the actuarial present value of the benefits expected to be paid. No future normal costs are payable for these members.

The actuarial accrued liability under this method at any point in time is the theoretical amount of the fund that would have been accumulated had annual contributions equal to the normal cost been made in prior years (it does not represent the liability for benefits accrued to the valuation date). The unfunded actuarial accrued liability is the excess of the actuarial accrued liability over the actuarial value of plan assets measured on the valuation date.

Under this method, experience gains or losses, i.e., decreases or increases in accrued liabilities attributable to deviations in experience from the actuarial assumptions, adjust the unfunded actuarial accrued liability.

Valuation of Assets

Effective June 30, 2006, the asset valuation method recognizes 20% of the investment gain or loss in each of the current and preceding four years. This method was phased in over five years. Fair Value of Assets was \$0 as of June 30, 2006. All assets are valued at fair value. Assets are accounted for on an accrued basis and are taken directly from financial statements audited by KPMG LLP. Valuation assets are constrained to a range of 80% to 120% of the fair value of assets.

Changes in Methods Since the Prior Valuation

There were no changes in the asset or valuation methods since the prior valuation.

Valuation of Retiree Medical and Prescription Drug Benefits

The methodology used for the valuation of the retiree medical benefits is described in Section 5.2 of the State of Alaska Teachers' Retirement System Defined Benefit Plan Actuarial Valuation Report as of June 30, 2021.

Starting in 2022, prior authorization will be required for certain specialty medications. There is no change to the medications that are covered by the plan. Segal provided an estimate of the impact of this change to the DB retiree health plan cost for calendar year 2022. The DB base claims costs for pre-Medicare prescription drug, Medicare prescription drug, and EGWP were adjusted to reflect this change. Those base claims costs were used for the DCR valuation with further adjustments as noted below. Additionally, starting in 2022, certain common preventive benefits will be covered for the DB plan. However, preventive benefits are already covered under the DCR plan so no adjustment is needed for that change. Therefore, the base claims cost for the DB plan prior to reflecting the addition of preventive benefits was used for the DCR valuation with further adjustments as noted below.

Due to the lack of experience for the DCR retiree medical plan, base claims costs are based on those described in the actuarial valuation as of June 30, 2021 for the Defined Benefit (DB) retiree medical plan covering TRS and PERS. The DB rates were used with some adjustments. The claims costs were adjusted to reflect the differences between the DCR medical plan and the DB medical plan. These differences include network steerage, different coverage levels, different Medicare coordination for medical benefits, and an indexing of the retiree out-of-pocket dollar amounts. To account for higher initial copays, deductibles and out-of-pocket limits, projected FY22 claims costs were reduced 3.1% for medical claims, and 8.9% for prescription drugs. In addition, to account for the difference in Medicare coordination, projected FY22 medical claims costs for Medicare eligible retirees were further reduced 29.5%.

To adjust for the decrease in medical claims due to COVID-19 during the last 4 months of FY20, the per capita cost during the first 8 months was used as the basis for estimating claims that would have occurred in the absence of COVID-19. FY21 experience was also thoroughly reviewed to assess the impact of COVID-19 and whether an adjustment to FY21 claims was appropriate for use in the June 30, 2021 valuation. FY21 medical per capita claims were noticeably lower than expected, so a 4% load was added to the FY21 medical claims used in the per capita claims cost development to better reflect future expected long-term costs of the plan.

No implicit subsidies are assumed. Employees projected to retire with 30 years of service prior to Medicare are valued with commencement deferred to Medicare eligibility, because those members will be required to pay the full plan premium prior to Medicare. Explicit subsidies for disabled and normal retirement are determined using the plan-defined percentages of age-related total projected plan costs, again with no implicit subsidy assumed.

The State transitioned to an Employer Group Waiver Program (EGWP) for DCR participants effective January 1, 2019. The estimated 2022 reimbursements under EGWP were provided by Segal Consulting (who worked with the EGWP administrator, Optum, to develop those estimates).

Healthcare Reform

Healthcare Reform legislation passed on March 23, 2010 included several provisions with potential implications for the State of Alaska Retiree Health Plan liability. Buck evaluated the impact due to these provisions.

Because the State plan is retiree-only, not all provisions are required. Unlimited lifetime benefits and dependent coverage to age 26 are two of these provisions. The adopted DCR plan does not place lifetime limits on benefits, but does restrict dependent child coverage.

The Further Consolidated Appropriations Act, 2020 passed in December 2019 repealed several healthcare-related taxes, including the Cadillac Tax.

The Tax Cuts and Jobs Act passed in December 2017 included the elimination of the individual mandate penalty and changed the inflation measure for purposes of determining the limits for the High Cost Excise Tax to use chained CPI. It is our understanding the law does not directly impact other provisions of the ACA. While the nullification of the ACA's individual mandate penalty does not directly impact employer group health plans, it could contribute to the destabilization of the individual market and increase the number of uninsured. Such destabilization could translate to increased costs for employers. We have considered this when setting our healthcare cost trend assumptions and will continue to monitor this issue.

We have not identified any other specific provisions of healthcare reform or its potential repeal that would be expected to have a significant impact on the measured obligation. We will continue to monitor legislative activity.

Section 4.3: Summary of Actuarial Assumptions

The demographic and economic assumptions used in the June 30, 2021 valuation are described below. Unless noted otherwise, these assumptions were adopted by the Board in January 2019 based on the experience study for the period July 1, 2013 to June 30, 2017.

Investment Return

7.38% per year, net of investment expenses.

Salary Scale

Salary scale rates based upon the 2013-2017 actual experience (see Table 1).

Inflation – 2.50% per year.

Productivity – 0.25% per year.

Payroll Growth

2.75% per year (inflation + productivity).

Total Inflation

Total inflation as measured by the Consumer Price Index for urban and clerical workers for Anchorage is assumed to increase 2.50% annually.

Mortality (Pre-Commencement)

Mortality rates based upon the 2013-2017 actual experience.

RP-2014 white-collar employee table, benefit-weighted, rolled back to 2006, and projected with MP-2017 generational improvement.

Deaths are assumed to result from occupational causes 15% of the time.

Mortality (Post-Commencement)

Mortality rates based upon the 2013-2017 actual experience.

93% of male and 90% of female rates of RP-2014 white-collar healthy annuitant table, benefit-weighted, rolled back to 2006, and projected with MP-2017 generational improvement.

Turnover

Select and ultimate rates based upon the 2013-2017 actual experience (see Table 2).

Disability

Incidence rates based upon the 2013-2017 actual experience (see Table 3).

Disabilities are assumed to be occupational 15% of the time.

Post-disability mortality in accordance with the RP-2014 disabled table, benefit-weighted, rolled back to 2006, and projected with MP-2017 generational improvement.

Retirement

Retirement rates based upon the 2013-2017 actual experience (see Table 4).

Spouse Age Difference

Males are assumed to be three years older than their wives. Females are assumed to be two years younger than husbands.

Percent Married for Occupational Death & Disability

85% of male members and 75% of female members are assumed to be married at termination from active service.

Dependent Spouse Medical Coverage Election

Applies to members who do not have double medical coverage. 65% of male members and 60% of female members are assumed to be married and cover a dependent spouse.

Part-Time Status

Part-time employees are assumed to earn 0.75 years of service per year.

Per Capita Claims Cost

Sample claims cost rates (before base claims cost adjustments described below) adjusted to age 65 for FY22 medical and prescription drugs are shown below. The prescription drug costs reflect the plan change to require prior authorization for certain specialty medications.

	Medical	Prescription Drugs
Pre-Medicare	\$ 15,708	\$ 3,375
Medicare Parts A & B	\$ 1,619	\$ 3,474
Medicare Part D – EGWP	N/A	\$ 1,131

Members are assumed to attain Medicare eligibility at age 65. All costs are for the 2022 fiscal year (July 1, 2021 – June 30, 2022).

The EGWP subsidy is assumed to increase in future years by the trend rates shown on the following pages. No future legislative changes or other events are anticipated to impact the EGWP subsidy. If any legislative or other changes occur in the future that impact the EGWP subsidy (which could either increase or decrease the plan's Actuarial Accrued Liability), those changes will be evaluated and quantified when they occur.

Third Party Administrator Fees

\$493 per person per year; assumed to increase at 4.5% per year.

Base Claims Cost Adjustments

Due to higher initial copays, deductibles, out-of-pocket limits and member cost sharing compared to the DB medical plan, the following cost adjustments are applied to the per capita claims cost rates above:

- 0.969 for the pre-Medicare plan.
- 0.674 for both the Medicare medical plan and Medicare coordination method (3.1% reduction for the medical plan and 29.5% reduction for the coordination method).
- 0.911 for the prescription drug plan.

Administrative Expenses

Beginning with the June 30, 2018 valuation, the Normal Cost is increased for administrative expenses expected to be paid from plan assets during the year. The amounts included in the June 30, 2021 Normal Cost, which are based on the average of actual administrative expenses during the last two fiscal years, are \$5,000 for occupational death & disability and \$22,000 for retiree medical.

Healthcare Cost Trend

The table below shows the rate used to project the cost from the shown fiscal year to the next fiscal year. For example, 6.3% is applied to the FY22 pre-Medicare medical claims costs to get the FY23 medical claims costs.

	Medical Pre-65	Medical Post-65	Prescription Drugs / EGWP
FY22	6.3%	5.4%	7.1%
FY23	6.1%	5.4%	6.8%
FY24	5.9%	5.4%	6.4%
FY25	5.8%	5.4%	6.1%
FY26	5.6%	5.4%	5.7%
FY27-FY40	5.4%	5.4%	5.4%
FY41	5.3%	5.3%	5.3%
FY42	5.2%	5.2%	5.2%
FY43	5.1%	5.1%	5.1%
FY44	5.1%	5.1%	5.1%
FY45	5.0%	5.0%	5.0%
FY46	4.9%	4.9%	4.9%
FY47	4.8%	4.8%	4.8%
FY48	4.7%	4.7%	4.7%
FY49	4.6%	4.6%	4.6%
FY50+	4.5%	4.5%	4.5%

For the June 30, 2014 valuation and later, the updated Society of Actuaries' Healthcare Cost Trend Model is used to project medical and prescription drug costs. This model estimates trend amounts that are projected out for 80 years. The model has been populated with assumptions that are specific to the State of Alaska.

Aging Factors

Age	Medical	Prescription Drugs
0 – 44	2.0%	4.5%
45 – 54	2.5%	3.5%
55 – 64	2.5%	1.5%
65 – 74	3.0%	2.0%
75 – 84	2.0%	-0.5%
85 – 94	0.3%	-2.5%
95+	0.0%	0.0%

Retiree Medical Participation

Decrement Due to Disability		Decrement Due to Retirement	
Age	Percent Participation	Age	Percent Participation*
< 56	75.0%	55	50.0%
56	77.5%	56	55.0%
57	80.0%	57	60.0%
58	82.5%	58	65.0%
59	85.0%	59	70.0%
60	87.5%	60	75.0%
61	90.0%	61	80.0%
62	92.5%	62	85.0%
63	95.0%	63	90.0%
64	97.5%	64	95.0%
65+	100.0%	65+	Years of Service
		< 15	75.0%
		15 – 19	80.0%
		20 – 24	85.0%
		25 – 29	90.0%
		30+	95.0%

* Participation assumption is a combination of (i) the service-based rates for retirement from employment at age 65+ and (ii) the age-based rates for retirement from employment before age 65. These rates reflect the expected plan election rate that varies by reason for decrement, duration that a member may pay full cost prior to Medicare eligibility, and availability of alternative and/or lower cost options, particularly in the Medicare market. This assumption is based on observed trends in participation from a range of other plans.

Imputed Data

Data changes from the prior year which are deemed to have immaterial impact on liabilities and contribution rates are assumed to be correct in the current year's client data. Non-vested terminations with appropriate refund dates are assumed to have received a full refund of contributions. Active members with missing salary and service are assumed to be terminated with status based on their vesting percentage.

Changes in Assumptions Since the Prior Valuation

The amounts included in the Normal Cost for administrative expenses were changed from \$0 to \$5,000 for occupational death & disability, and from \$8,000 to \$22,000 for retiree medical (based on the most recent two years of actual administrative expenses paid from plan assets). The per capita claims cost assumption is updated annually.

Table 1: Salary Scale

Glossary of Terms

Actuarial Accrued Liability

Total accumulated cost to fund pension or postemployment benefits arising from service in all prior years.

Actuarial Cost Method

Technique used to assign or allocate, in a systematic and consistent manner, the expected cost of a pension or postemployment plan for a group of plan members to the years of service that give rise to that cost.

Actuarial Present Value of Projected Benefits

Amount which, together with future interest, is expected to be sufficient to pay all future benefits.

Actuarial Valuation

Study of probable amounts of future pension or postemployment benefits and the necessary amount of contributions to fund those benefits.

Actuary

Person who performs mathematical calculations pertaining to pension and insurance benefits based on specific procedures and assumptions.

GASB 74 and 75

Governmental Accounting Standards Board Statement Number 74 amends Number 43 effective for the fiscal year beginning after June 15, 2016 and defines new financial reporting requirements for public postemployment benefit plans. Governmental Accounting Standards Board Statement Number 75 amends Number 45 effective for fiscal years beginning after June 15, 2017 and defines new accounting and financial reporting requirements for employers sponsoring public postemployment benefit plans.

Normal Cost

That portion of the actuarial present value of benefits assigned to a particular year in respect to an individual participant or the plan as a whole.

Rate Payroll

Members' earnings used to determine contribution rates.

Unfunded Actuarial Accrued Liability (UAAL)

The portion of the actuarial accrued liability not offset by plan assets.

Valuation Payroll

Members' earnings used to determine Normal Cost and Actuarial Accrued Liability.

Vested Benefits

Benefits which are unconditionally guaranteed regardless of employment.

**Re: Judicial Retirement System and National Guard and Naval Militia Retirement System
Roll-Forward Actuarial Valuations as of June 30, 2021**

Dear Members of The Alaska Retirement Management Board, The Department of Revenue and
The Department of Administration:

We have completed the roll-forward actuarial valuations for the State of Alaska Judicial Retirement System (JRS) and the National Guard and Naval Militia Retirement System (NGNMRS) as of June 30, 2021. The valuations have been performed by a projection or "roll forward" of results from the last valuation date of June 30, 2020 to June 30, 2021. Actual asset values as of June 30, 2021 were reflected. A summary of results and description of assumptions and methods are included in this report.

The purposes of these roll-forward valuations are to (i) determine the employer contributions necessary to meet the Board's funding policy for each System, (ii) disclose the funding assets and liability measures as of the valuation date, and (iii) review the current funded status of each System and assess the funded status as an appropriate measure for determining future actuarially determined contributions.

The Board and staff of the State of Alaska may use this report for the review of the operations of JRS and NGNMRS. Use of this report for any other purpose or by anyone other than the Board or staff of the State of Alaska may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the report for that purpose. Because of the risk of misinterpretation of actuarial results, you should ask Buck to review any statement you wish to make on the results contained in this report. Buck will not accept any liability for any such statement made without the review by Buck.

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the actuarial assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions or applicable law. In particular, retiree group benefits models necessarily rely on the use of approximations and estimates and are sensitive to changes in these approximations and estimates. Small variations in these approximations and estimates may lead to significant changes in actuarial measurements. An analysis of the potential range of such future differences is beyond the scope of these valuations.

Actuarial Assumptions and Methods

In lieu of collecting new participant data as of June 30, 2021 and performing a full actuarial valuation, the actuarial liabilities are projected or “rolled forward” from the June 30, 2020 valuation date to June 30, 2021 by assuming the actuarial assumptions during the year are exactly realized.

The actuarial value of assets was calculated as of June 30, 2021 using actual assets and cash flows during FY21. The asset valuation method recognizes 20% of the investment gain or loss each year, for a period of five years. Valuation assets are constrained to a range of 80% to 120% of the fair value of assets.

All data, actuarial assumptions, methods, and plan provisions are the same as those shown in the June 30, 2020 valuation reports dated May 20, 2021, with the following exceptions:

- For JRS, the amounts included in the Normal Cost for administrative expenses were changed from \$83,000 to \$102,000 for pension and from \$24,000 to \$31,000 for healthcare, based on the most recent two years of actual administrative expenses paid from plan assets.
- For NGNMRS, the amount included in the Normal Cost for administrative expenses was changed from \$256,000 to \$268,000, based on the most recent two years of actual administrative expenses paid from plan assets.
- For NGNMRS, the June 30, 2020 actuarial accrued liability used for the roll-forward valuation reflects a valuation system coding update that was recommended by the reviewing actuary. This update decreased the June 30, 2020 actuarial accrued liability by \$38,250.

In our opinion, the actuarial assumptions used are reasonable, taking into account the experience of each System and reasonable long-term expectations, and represent our best estimate of the anticipated long-term experience under each System.

Funded Status

Where presented, references to “funded ratio”, “funded status”, and “unfunded actuarial accrued liability” typically are measured on an actuarial value of assets basis. It should be noted that the same measurements using market value of assets would result in different funded ratios and unfunded actuarial accrued liabilities. Moreover, the funded ratio presented is appropriate for evaluating the need and level of future contributions but make no assessment regarding the funded status of the plans if the plans were to settle (i.e. purchase annuities) for a portion or all of their liabilities.

Summary of Results

The results of the June 30, 2021 roll-forward valuations are shown below (results from the June 30, 2020 valuations are shown for comparison purposes):

	June 30, 2020	June 30, 2021
Judicial Retirement System		
• Funded Status ¹		
o Pension	92.0%	98.6%
o Healthcare	207.6%	211.4%
o Total	100.5%	107.1%
• Employer/State Contribution Rates ²		
o Pension	63.6%	58.7%
o Healthcare	<u>6.5%</u>	<u>6.5%</u>
o Total	70.1%	65.2%
National Guard and Naval Militia Retirement System		
• Funded Status ¹	191.9%	196.9%
• Actuarially Determined Contribution, not less than zero ³	\$ 0	\$ 0

The following table summarizes the FY21 actuarial gains/(losses). Net actuarial gains/losses decrease/increase the unfunded actuarial accrued liability versus what was expected based on the previous valuation.

	JRS	NGNMRS
Asset Gain/(Loss)	\$ 9,349,000	\$ 1,040,000
Liability Gain/(Loss)	N/A	41,000 ⁴
Healthcare Benefit Payment Gain/(Loss)	(608,000)	N/A
Contribution Gain/(Loss)	4,665,000	0
Administrative Expense Gain/(Loss)	<u>(19,000)</u>	<u>(41,000)</u>
Total Gain/(Loss)	\$ 13,387,000	\$ 1,040,000

¹ The funded status shown is based on the actuarial value of assets. The funded status is different based on the fair value of assets.

² The June 30, 2020 valuation determined the contribution rates for FY23. The June 30, 2021 valuation determines the contribution rates for FY24. Total contribution rates are not less than the Normal Cost rate.

³ The June 30, 2020 valuation determined the contribution for FY23. The June 30, 2021 valuation determines the contribution for FY24.

⁴ The June 30, 2020 actuarial accrued liability used for the roll-forward valuation reflects a valuation system coding update that was recommended by the reviewing actuary. The amount shown includes interest to June 30, 2021.

Assessment of Risks

Actuarial Standard of Practice No. 51 (ASOP 51) applies to actuaries performing funding calculations related to a pension plan. ASOP 51 does not apply to actuaries performing services in connection with other post-employment benefits, such as medical benefits. Accordingly, ASOP 51 does not apply to the healthcare portion of JRS. See pages 16-18 of this report for further details regarding ASOP 51.

Use of Models

Actuarial Standard of Practice No. 56 (ASOP 56) provides guidance to actuaries when performing actuarial services with respect to designing, developing, selecting, modifying, using, reviewing, or evaluating models. Buck uses third-party software in the performance of annual actuarial valuations and projections. The model is intended to calculate the liabilities associated with the provisions of each plan using data and assumptions as of the measurement date under the funding methods specified in this report. The output from the third-party vendor software is used as input to internally developed models that apply applicable funding methods and policies to the derived liabilities and other inputs, such as plan assets and contributions, to generate many of the exhibits found in this report. Buck has an extensive review process in which the results of the liability calculations are checked using detailed sample life output, changes from year to year are summarized by source, and significant deviations from expectations are investigated. Other funding outputs and the internal models are similarly reviewed in detail and at a higher level for accuracy, reasonability, and consistency with prior results. Buck also reviews the third-party model when significant changes are made to the software. This review is performed by experts within Buck who are familiar with applicable funding methods, as well as the manner in which the model generates its output. If significant changes are made to the internal models, extra checking and review are completed. Significant changes to the internal models that are applicable to multiple clients are generally developed, checked, and reviewed by multiple experts within Buck who are familiar with the details of the required changes.

Additional models used in valuing health benefits for JRS are described in Section 4.2 of the June 30, 2020 report dated May 20, 2021.

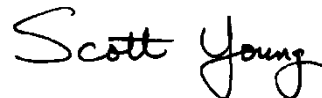

This report was prepared under our supervision and in accordance with all applicable Actuarial Standards of Practice. We are Fellows of the Society of Actuaries, Enrolled Actuaries, Fellows of the Conference of Consulting Actuaries, and Members of the American Academy of Actuaries. We meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Please let us know if you have any questions or if you would like to discuss these results in more detail. David can be reached at 602-803-6174 and Scott can be reached at 216-315-1929.

Sincerely,

David J. Kershner, FSA, EA, MAAA, FCA

Actuarial Standard of Practice No. 51

Funding future retirement benefits prior to when those benefits become due involves assumptions regarding future economic and demographic experience. These assumptions are applied to calculate actuarial liabilities, current contribution requirements, and the funded status of the plans. However, to the extent future experience deviates from the assumptions used, variations will occur in these calculated values. These variations create risk to the plans. Understanding the risks to the funding of the plans is important.

Actuarial Standard of Practice No. 51 (ASOP 51)¹ requires certain disclosures of potential risks to the plans and provides useful information for intended users of actuarial reports that determine plan contributions or evaluate the adequacy of specified contribution levels to support benefit provisions.

Under ASOP 51, risk is defined as the potential of actual future measurements deviating from expected future measurements resulting from actual future experience deviating from actuarially assumed experience.

It is important to note that not all risk is negative, but all risk should be understood and accepted based on knowledge, judgement, and educated decisions. Future measurements may deviate in ways that produce positive or negative financial impacts to the plan.

In the actuary's professional judgment, the following risks may reasonably be anticipated to significantly affect the pension plans' future financial condition and contribution requirements.

- Investment Risk – potential that the investment return will be different than the return expected in the actuarial valuation (7.38% for JRS and 7.00% for NGNMRS)
- Contribution Risk – potential that the contribution actually made will be different than the actuarially determined contribution
- Long-Term Return on Investment Risk – potential that changes in long-term capital market assumptions or the plan's asset allocation will create the need to update the long-term return on investment assumption
- Longevity Risk – potential that participants live longer than expected compared to the valuation mortality assumptions
- Salary Increase Risk² – potential that future salaries will be different than expected in the actuarial valuation
- Inflation Risk² – potential that the consumer price index (CPI) for urban wage earners and clerical workers for Anchorage is different than the 2.5% inflation rate assumed in the valuation
- Other Demographic Risk – potential that other demographic experience will be different than expected

The following information is provided to comply with ASOP 51 and furnish beneficial information on potential risks to the plan. **This list is not all-inclusive**; it is an attempt to identify the more significant risks and how those risks might affect the results shown in this report.

¹ ASOP 51 does not apply to the healthcare portion of JRS. Accordingly, all comments in this section relate to the pension portion of JRS.

² Salary increase risk and inflation risk apply to JRS only.

Note that ASOP 51 does not require the actuary to evaluate the ability or willingness of the plan sponsor to make contributions to the plans when due, or to assess the likelihood or consequences of potential future changes in law. In addition, this valuation report is not intended to provide investment advice or to provide guidance on the management or reduction of risk.

Assessment of Risks

Investment Risk

Plan costs are very sensitive to the market return.

- Any return on assets lower than assumed will increase costs.
- The plans use an actuarial value of assets that smooths gains and losses on market returns over a five-year period to help control some of the volatility in costs due to investment risk.
- Historical experience of actual returns is shown in Section 2.5 (JRS) and Section 2.4 (NGNMRS) of the June 30, 2020 reports dated May 20, 2021. This historical experience illustrates how returns can vary over time.

Contribution Risk

There is a risk to the plans when the employer's and/or State's actual contribution amount and the actuarially determined contribution differ.

- If the actual contributions are lower than the actuarially determined contributions, the plans may not be sustainable in the long term.
- Any underpayment of the contribution will increase future contribution amounts to help pay off the additional Unfunded Actuarial Accrued Liability associated with the underpayment(s).
- As long as the Board consistently adopts the actuarially determined contributions, this risk is mitigated due to Alaska statutes requiring the State to contribute additional funds necessary to pay the total contributions adopted by the Board.

Long-Term Return on Investment Risk

Inherent in the long-term return on investment assumption is the expectation that the current rate will be used until the last benefit payment of the plan is made. There is a risk that sustained changes in economic conditions, changes in long-term future capital market assumptions, or changes to the plans' asset allocations will necessitate an update to the long-term return on investment assumption used.

- Under a lower long-term return on investment assumption, less investment return is available to pay plan benefits. This may lead to a need for increased employer contributions.
- The liabilities will be higher at a lower assumed rate of return because future benefits will have a lower discount rate applied when calculating the present value.
- A 1% decrease in the long-term return on investment assumption will increase the actuarial accrued liability by approximately 11% for JRS and 9% for NGNMRS.

Longevity Risk

Plan costs will be increased as participants are expected to live longer.

- Benefits are paid over a longer lifetime when life expectancy is expected to increase. The longer duration of payments leads to higher liabilities.
- Health care has been improving, which affects the life expectancy of participants. As health care improves, leading to longer life expectancies, costs to the plans could increase.
- The mortality assumptions for the plans mitigates this risk by assuming future improvements in mortality. However, any improvement in future mortality greater than that expected by the current mortality assumptions would lead to increased costs for the plans.

JRS provides cost-of-living adjustments on retirement benefits (based on salary changes of sitting judges) that increase longevity risk, because members who live longer than expected will incur more benefit payment increases than expected and therefore increase costs.

Salary Increase Risk¹

Plan costs will be increased if actual salary increases are larger than expected.

- Higher-than-expected salary increases will produce higher benefits.
- The higher benefits may be partially offset by increased employee contributions due to higher salaries.
- If future payroll grows at a rate different than assumed, contributions as a percentage of payroll will be affected.

Inflation Risk¹

Inflation risk may be associated with the interaction of inflation with other assumptions, but this is not significant as a standalone assumption, and therefore is considered as part of the associated assumption risk instead of being discussed here.

Other Demographic Risk

The plans are subject to risks associated with other demographic assumptions (e.g., retirement and termination rates). Differences between actual and expected experience for these assumptions tend to have less impact on the overall costs of the plans. The demographic assumptions used in the valuations are re-evaluated regularly as part of the four-year experience studies to ensure the assumptions are consistent with long-term expectations.

¹ Salary increase risk and inflation risk apply to JRS only.

Alaska Retirement Management Board Actuarial Committee

Actuarial Review of June 30, 2021 Valuations

Paul Wood, ASA, FCA, MAAA

Bill Detweiler, ASA, EA, FCA, MAAA

March 16, 2022

Review of the June 30, 2021 Actuarial Valuation

- Claims and Enrollment Review
- Assumptions Review
- Test Life Review

Claims and Enrollment Review

- Buck provided a PowerPoint that showed the development of the Per Capita Claims Costs (PCCC)
- Overall, based on the data in the PowerPoint, there was favorable claims experience meaning the PCCC did not increase as much as was expected

Claims and Enrollment Review

PCCC Claims Development

- Overall, we found the development of the PCCC to be reasonable
- The table below shows the final PCCC used in the valuation, as confirmed through test life checking
- It also compares the PCCC used this year to those used last year

Per Capita Claims Cost (Age 65)						
	Medical			Prescription Drugs		
	<u>June 30, 2020</u> <u>Valuation</u>	<u>June 30, 2021</u> <u>Valuation</u>	<u>Change</u>	<u>June 30, 2020</u> <u>Valuation</u>	<u>June 30, 2021</u> <u>Valuation</u>	<u>Change</u>

Medicare Part D – EGWP	N/A	N/A	N/A	\$ 1,003	\$ 1,131	12.8%

Claims and Enrollment Review

PCCC Gains and COVID-19 Experience

- Large gains five years in a row
 - This is mostly due to positive experience on the medical claims
 - The gains this year would have been even larger, but Buck added a 4% load to the medical claims to account for COVID-19 experience
- Pre-Medicare costs were increased and Prescription Drugs costs were decreased this year due to plan changes
- Both of these items need to be carefully monitored going forward to see if claims swing back in the other direction

Assumptions Review

Gains and Losses

- Now have three years of experience under most recently adopted assumptions
- Can start to monitor any developing trends
 - New Medicare Part B Assumption causing consistent gains
 - Investment return expectations still continuing a downward trend around the country

Test Life Review

- For a sample group we examine the following:
 - Data inputs
 - Benefit amounts
 - Liability calculations
- The sample lives tell us if the assumptions are correctly employed
- They tell us if the plan provisions are valued correctly

Test Life Review - Findings

- Materiality Standards
 - Actuaries look to the Actuarial Standards of Practice
 - “An item or a combination of related items is material if its omission or misstatement could influence a decision of an intended user”
 - Relies heavily on the professional judgement of the actuary

Test Life Review - Findings

- We choose test lives each year that are different and contain unique characteristics
- In years with no assumption or plan changes, we first replicate the significant benefits (retirement/withdrawal), then dive deeper into small differences on the ancillary benefits (death/disability)
- As a result, we were able to identify some minor findings this year related to the valuation of certain ancillary benefits, or related to unique characteristics of the test lives chosen

Test Life Review - Findings

- **Finding #1 - Administration of Claimed Service**
 - An active PERS DB Peace Officer/Firefighter member who has 5 years of claimed service has this amount being included in credited service and excluded from eligibility service
 - Additionally, the early retirement reduction factors (ERFs) being used for this member are based on the credited service with the claimed service included
 - We recommend Buck confirm this treatment is consistent with how the Alaska DRB is administering the benefits for members that have claimed service.
- **Finding #2 - Retirement Benefit for PERS DB Peace Officer/Firefighter Occupational Disability**
 - Based on one of our agreed upon recommendations from last year, for DB PERS Peace Officer/Firefighter members, we expected to see an increase to the deferred retirement benefit for the occupational disability piece by the same accumulative PRPA percentage that was applied to the disability benefit
 - However, a DB PERS Peace Officer/Firefighter member is only having the benefit increased until age 55, rather than their assumed retirement age of 57
 - We recommend Buck increase this benefit until the assumed retirement age for each member.

Test Life Review - Findings

- **Finding #3 - Occupational Death COLA Benefit for PERS DB Peace Officer/Firefighter**
 - PERS DB Peace Officer/Firefighter members have a 10% Alaska COLA benefit amount (before applying any decrements, assumptions, or payment forms) for the deferred occupational married death benefit piece not equal to 10% of the regular benefit amount for this piece
 - We recommend Buck update this 10% Alaska COLA benefit component to be 10% of the regular benefit amount or provide an explanation as to why it is not.
- **Finding #4 - Service Eligibility for TRS DB**
 - A TRS DB member has different service amounts being used for death benefits eligibility.
 - We recommend Buck confirm which of these service amounts the Alaska DRB uses for eligibility and use that service amount consistently across all benefits.

Test Life Review - Findings

- **Finding #5 - Occupational Disability Benefit for PERS PF DCR OD&D**
 - A TRS DCR occupational disability member has their benefit being calculated assuming the service amount provided by the Alaska DRB is as of the date of disability.
 - We recommend Buck confirm with the Alaska DRB that this service amount is as of the date of disability, and not as of the valuation date.

Test Life Review – Findings

Communications with Buck

- We provided these findings to Buck
 - For the first four findings, Buck agreed they need to make some updates to their valuations
 - The fifth finding is still being reviewed
 - Both Buck and GRS agree these findings are immaterial and recommend they be included in the next valuation

Summary of Recommendations

- We recommend Buck examine experience under the current assumptions in the upcoming experience study to determine if they are working as intended or need to be modified.
- We recommend Buck continues to track the medical claims experience closely, particularly any further impact from the plan changes or COVID-19 experience.
- We recommend Buck review with the Board whether to implement a new entrant/rehire assumption in the DCR plan.
- We recommend Buck continue to disclose the nature and impact of all programming changes included in the valuation.
- We recommend Buck generate a new gain/loss item that tracks the experience of the EGWP savings assumption.
- We recommend that Buck implement the changes to their valuation methods as detailed in findings of the test life review.
- We recommend Buck make some small modifications to their valuation reports to improve communication and disclosures.

Questions?

Alaska Retirement Management Board

June 30, 2020 Valuations Replication Audit Follow Up

Paul Wood, ASA, FCA, MAAA

Bill Detweiler, ASA, EA, FCA, MAAA

March 17, 2022

Replication of the June 30, 2020 Actuarial Valuations

- Status update
- Additional test life findings
- Report content recommendations

Replication of the June 30, 2020 Actuarial Valuations

- We presented our initial findings at the December meeting
- We concluded:
 - Our results are within a reasonable range of the Buck valuations
 - It is our opinion that the Buck valuation conclusions accurately portray the actuarial status of the systems and are reflected in the required contribution rates
- We identified additional test lives to check to pinpoint any particular issues that can be incorporated into future valuations
- We issued a draft report detailing all of our findings and any recommendations

Replication of the June 30, 2020 Actuarial Valuations – Findings Related to Test Lives

- **Finding #1 - 415(b) Limit**
 - Benefits are currently being limited by the 415(b) limit
 - We recommend Buck confirm with Alaska staff if benefits in excess of the 415(b) limit are being paid (potentially through an excess benefit account), and if so, how
- **Finding #2 - Rate Used in Valuation Not Matching Rate Disclosed in Report**
 - The ultimate termination rate being used for a male in the PERS DCR retiree medical valuation appears to be using the age 64 rate instead of the age 65 rate shown in the report
 - We recommend Buck verify all decrement rates shown in the reports are consistent with those being used in the calculations

Replication of the June 30, 2020 Actuarial Valuations – Findings Related to Test Lives

- **Finding #3 - Retirement Rates Not Being Applied at All Eligible Ages**
 - A PERS DCR Peace Officer/Firefighter member is eligible to retire at age 44, but retirement rates do not appear to start until age 45, so no retirement rate or termination rate is being used for this member at age 44
 - We recommend Buck apply retirement rates at all eligible ages
- **Finding #4 - Spouse Age Assumption**
 - Benefits for a TRS DCR Occupational Death & Disability member appear to be assuming that male spouses are 3 years older
 - We recommend Buck update this assumption to be consistent with the most recently adopted assumption that male spouse are 2 years older

Replication of the June 30, 2020 Actuarial Valuations – Findings Related to Test Lives

- **Finding #5 - Contribution Refunds Assumption**
 - Death benefits for a TRS retiree medical non-occupational member appear to include a 95% assumption
 - We recommend Buck update this assumption to be consistent with the most recently adopted assumption that 0% of terminating members with vested benefits are assumed to have their contributions refunded
- **Finding #6 - Retiree Medical Children Premiums**
 - Retiree medical benefits for children in the PERS and TRS DB plans appear to be assuming that premiums will be paid after the retired member turns 60 years old
 - We recommend Buck update all DB spouse and children retiree medical benefit so that premiums are no longer paid when the retired member turns 60 years old

Replication of the June 30, 2020 Actuarial Valuations – Findings Related to Test Lives

- We provided these findings to Buck
 - The first and fifth findings are still being reviewed
 - For the other four findings, Buck agreed they need to make some updates to their valuations
 - The third finding does not impact the current valuations, but may impact future valuations
 - Both Buck and GRS agree these findings are immaterial and recommend they be included in the next valuation

Replication of the June 30, 2020 Actuarial Valuations – Report Content

- We made some small recommendations on the contents of the report
- In general, the actuarial valuation reports complied with the applicable Actuarial Standards of Practice and thoroughly communicated the assumptions, methods and plan provisions incorporated into the June 30, 2020 actuarial valuations

Questions?

State of Alaska Retirement Systems

Presentation to ARMB Actuarial Committee

2021 Experience Study – Demographic Assumptions,
Updated Economic Assumptions

March 16, 2022

Contents

	Slide
Background	4-6
Demographic Assumptions	
- Background	8-10
- Mortality	12-25
- Retirement	27-34
- Withdrawal	36-46
- Other	48-51
Updated Economic Assumptions	53-57
Cost Effects of Proposed Assumptions	59-65
Appendix (A/E Ratios, Current and Proposed Decrements)	67-86
Actuarial Certification	88-89

Background

Background

- Under AS 37.10.220(a)(9), the ARMB requests the plan actuary to conduct an experience analysis of the retirement systems at least once every four years (except healthcare costs and trend rates are analyzed annually)
- The last experience study covered the experience for the 4-year period July 1, 2013 to June 30, 2017
 - New assumptions adopted by the ARMB were effective beginning with the June 30, 2018 valuations
- The current experience study covers the experience for the 4-year period July 1, 2017 to June 30, 2021
 - New assumptions adopted by the ARMB will be effective beginning with the June 30, 2022 valuations
- The experience study covers *economic* and *demographic* assumptions
 - Proposed economic assumptions were initially discussed at the December 2021 meeting
 - Today's presentation includes an analysis of the demographic assumptions, along with updated economic assumptions

Background (cont'd)

- Each assumption used in the valuation should represent the actuary's **best estimate of reasonable long-term expectations**
 - An assumption is considered reasonable if it is not anticipated to result in significant cumulative gains or losses over time
 - Each assumption should be evaluated considering its materiality on the valuation results
 - The assumptions should be consistent with each other
 - Typically, a range of reasonableness applies for each assumption
 - Past experience should be considered, but not given undue influence if future expectations differ
- Although the analysis of experience during the last 4-year period involves a lot of numbers and data, the overall process of setting assumptions is a blend of art and science

Background (cont'd)

- Actuarial Standard of Practice No. 51 (ASOP 51) requires the actuary to identify risks that, in his/her professional judgment, may reasonably be anticipated to significantly affect the plan's future financial condition
- The more significant risk factors affecting future funded ratios and contribution rates of the plans are:
 - Investment Risk – future investment returns will be different than the assumed rate
 - Contribution Risk – the actuarially determined contribution is not deposited to the trust each year
 - Long-Term Return on Investment Risk – changes in capital market assumptions or the asset allocation will create the need to update the long-term investment return assumption
 - Longevity Risk – mortality rates of participants and beneficiaries will be different than assumed
 - Salary Increase Risk – future salary increases will be different than assumed
 - Inflation Risk – changes in the CPI will be different than assumed
 - Other Demographic Risk – retirement and withdrawal patterns will be different than assumed
- An experience study is performed every 4 years to assess whether the assumptions being used in the annual actuarial valuations should be changed to better match future experience, thereby managing these risk factors

Demographic Assumptions

Demographic Assumptions - Background

- Demographic assumptions are used to predict expected patterns of behavior of plan participants
 - Mortality
 - Retirement
 - Withdrawal (termination of employment)
 - Disability
 - Occupational-related death and disability
 - Withdrawal of contributions upon termination
 - Rehires
 - Unused sick days (TRS)
 - Population growth rate
 - Alaska residency for COLA
 - Part-time service
 - Percent electing lump sums (NGNMRS)
 - Healthcare dependent assumptions
 - Medicare Part B only
 - Healthcare participation
 - Healthcare morbidity

Demographic Assumptions – Background (cont'd)

- We analyzed plan experience for the 4-year period July 1, 2017 to June 30, 2021
- Data used is the same as the data from the annual valuations
- Actual experience (A) was compared to expected experience (E) based on the current demographic assumptions
 - A/E ratios were developed for each assumption that had credible experience
 - See Appendix for further details
- For some decrements (e.g., disability) or small groups (e.g., JRS), there was insufficient experience; in these cases, we are proposing no changes to the current assumptions

Demographic Assumptions – Background (cont'd)

- Experience was analyzed on a *liability*-weighted basis for mortality (pension), retirement and ultimate withdrawal; and on a *headcount* basis for other assumptions
- Differences between headcount-weighted and liability-weighted analysis:
 - On a headcount-weighted basis, each person who decrements (changes status) counts equally
 - On a liability-weighted basis, those who decrement are treated differently depending on their respective liabilities
- Example
 - Two people from the same tier retire with unreduced benefits – one at age 50 and the other at age 62
 - They both have the same average salary and the same benefit service (i.e., the *amount* of their retirement benefit is the same)
 - On a *headcount*-weighted basis, each person counts as one in terms of changing from active to retired status
 - The 50-year old has significantly higher liabilities than the 62-year old because benefits are expected to be paid over a longer period of time
 - The *liability*-weighted impact of the 50-year old is much different than the *liability*-weighted impact of the 62-year old

Mortality Assumption

Mortality Assumption

- A mortality assumption typically includes
 - A *base table* with mortality rates that typically differ by gender, age, and occupation
 - A *mortality improvement scale* projects future changes in mortality rates; most recently developed improvement scales project future changes in mortality by age and year of birth (those born more recently are expected to live longer); these are called *generational* mortality improvement scales
 - The Society of Actuaries publishes annual updates to standard mortality improvement scales
- The current mortality assumption was set based on the 2017 experience study
 - Base Table: RP-2014
 - Generational Mortality Improvement Scale: MP-2017
 - Percentages of base table rates are used for certain groups to match plan experience
- Credibility factors were applied if mortality experience was partially statistically credible
- Since the 2017 experience study was completed, the Society of Actuaries has published mortality tables that are specific to the public sector, including separate tables for Safety employees, Teachers, and General employees (these public sector-specific mortality tables are referred to as Pub-2010)

Mortality Assumption (cont'd)

- We propose Pub-2010 mortality tables that differ by plan/group:
 - PERS and PERS DCR
 - Peace/Fire – Pub-2010 *Safety*
 - Others – Pub-2010 *General*
 - TRS and TRS DCR
 - Pub-2010 *Teachers*
 - JRS
 - Pub-2010 *General Above-Median*
 - NGNMRS
 - Pub-2010 *Safety*
- For the mortality improvement scale, we propose updating to the most recently-published generational mortality improvement scale as of the date of each annual valuation

Pre-Commencement Mortality Experience – PERS/PERS DCR

Headcounts – Peace/Fire

Headcounts – Others

Not enough experience to be statistically credible

Proposed rates for pension: Pub-2010 employee benefit-weighted table (Safety for Peace/Fire; General for Others)

Proposed rates for healthcare: Pub-2010 employee headcount-weighted table (Safety for Peace/Fire; General for Others)

Pre-Commencement Mortality Experience – TRS/TRS DCR

Headcounts

Not enough experience to be statistically credible

Proposed rates for pension: Pub-2010 employee benefit-weighted Teachers table

Proposed rates for healthcare: Pub-2010 employee headcount-weighted Teachers table

Post-Commencement Mortality Experience – PERS/PERS DCR

Peace/Fire - Retirees

Headcounts

Liability-Weighted Rates

Experience was partially credible

Proposed rates for pension:
Pub-2010 Retiree Benefit-
Weighted Safety Table

Proposed rates for
healthcare: Pub-2010
Retiree Headcount-
Weighted Safety Table

A/E Ratios:

- Current = 92%
- Proposed = 96%

A/E Ratios:

- Current = 81%
- Proposed = 99%

Other Demographic Assumptions

Other Demographic Assumptions

- Disability
 - Insufficient disability experience, so we propose no changes to the current disability rates

- Occupational-related death and disability

	Current	Actual	Proposed
PERS – P/F	75%	72%	70%
PERS – Others	40%	36%	35%
TRS	15%	n/a	15%

- Withdrawal of contributions upon termination

	Current	Actual	Proposed
PERS – P/F	10%	5%	5%
PERS - Others	5%	4%	5%
TRS	0%	1%	0%

- Rehires (percentage load to Normal Cost)

	Current	Actual	Proposed
PERS – pension	18.77%	15.33%	15.30%
PERS – healthcare	17.09%	2.36%	2.40%
TRS – pension	15.57%	11.98%	12.00%
TRS - healthcare	12.03%	0.20%	0.20%

Comments regarding the rehire assumption:

- The current rehire loads for the DB plans, which were developed based on the 5 years of experience ending in 2017, were too high based on the most recent 4 years of rehire experience. The actual liabilities from rehires during the last 4 years were compared to the current rehire loads, and adjustments were made to the current rehire loads to better match recent experience.
- With lower proposed rehire loads for healthcare, a greater portion of the fixed employer contributions (22% for PERS and 12.56% for TRS) will be deposited to the DB pension trusts rather than the DB healthcare trusts. Based on the comparative funded ratios of the DB pension and DB healthcare trusts, we believe it is more prudent to deposit more contributions to the DB pension trusts.
- There have been recent suggestions to implement rehire loads for the DCR plans. Doing so would increase the portion of the fixed employer contributions being deposited to the DCR trusts. Because the DCR trusts are so well funded, they are able to absorb any reasonable losses due to rehires. Therefore, we believe it is more prudent to deposit more contributions to the DB trusts. Accordingly, we are proposing no rehire loads for the DCR plans at this time.

Other Demographic Assumptions (cont'd)

- Unused sick days (TRS)
 - Current: 4.5 days

Updated Economic Assumptions

Updated Economic Assumptions

- At the December meeting, we discussed proposed changes to the economic assumptions
- The proposed inflation rate was originally 2.0%, but it was felt that this is too low. So, we have modified the proposed inflation rate to 2.25% (it is currently 2.5%).
- The new proposed inflation rate also affects the salary increase rates, healthcare trend rates, and payroll growth rate
- Updated proposed economic assumptions are shown on the next four slides

Economic Assumptions – Current and Proposed

PERS/TRS/JRS

	Current	Proposed
Nominal Return, net of investment expenses	7.38%	7.00%
Inflation Rate	2.50%	2.25%
Real Rate of Return	4.88%	4.75%
Payroll Growth Rate	2.75%	2.50%

NGNMRS

	Current	Proposed
Nominal Return, net of investment expenses	7.00%	5.75%
Inflation Rate	2.50%	2.25%
Real Rate of Return	4.50%	3.50%

FY28	5.70%	5.20%	5.95%
FY29	5.50%	5.15%	5.65%
FY30	5.25%	5.10%	5.35%
FY31-FY38	5.05%	5.05%	5.05%
FY39	5.00%	5.00%	5.00%
FY40	4.95%	4.95%	4.95%
FY41	4.85%	4.85%	4.85%
FY42	4.80%	4.80%	4.80%
FY43	4.70%	4.70%	4.70%
FY44	4.65%	4.65%	4.65%
FY45	4.55%	4.55%	4.55%
FY46	4.50%	4.50%	4.50%
FY47	4.45%	4.45%	4.45%
FY48	4.35%	4.35%	4.35%
FY49	4.30%	4.30%	4.30%
FY50+	4.25%	4.25%	4.25%

The trend rates for the 6/30/21 valuations are not being changed.

The proposed assumption illustrates lowering the ultimate trend rate from 4.50% to 4.25%. Short-term trend rates were also modified to achieve a gradual decline to the 4.25% ultimate rate.

Cost Effects of Proposed Assumptions

Cost Effects of Proposed Assumptions

- The cost effects shown in this presentation are based on the most recent valuations that have been reviewed and adopted by the ARMB (i.e., the June 30, 2020 valuations)
- The cost effects are shown in two steps
 - 1st step: Changing just the demographic assumptions
 - 2nd step: Changing all of the assumptions

Actuarial Certification

Use of Models

Actuarial Standard of Practice No. 56 (“ASOP 56”) provides guidance to actuaries when performing actuarial services with respect to designing, developing, selecting, modifying, using, reviewing, or evaluating models. For this presentation, Buck used the following:

- internally developed and third-party model to compare actual versus assumed experience and determine proposed assumptions to use for valuing the liabilities in the third-party software
- models to analyze investment returns as previously described in the December 2021 presentation
- third-party software to calculate the liabilities associated with the plans based on current and proposed assumptions
- an internally developed model that applies applicable funding methods and policies to the liabilities derived from the output of the third-party software and other inputs, such as plan assets and contributions, to determine the contribution rates

Buck has an extensive review process for annual valuations whereby the results of the liability calculations are checked using detailed sample output, changes from year to year are summarized by source, and significant deviations from expectations are investigated. Other outputs and the internal model are similarly reviewed in detail and at a high level for accuracy, reasonability and consistency with prior results. The models used for annual valuations are used for this presentation and any adaptations for this presentation are checked and reviewed by experts within the company who are familiar with applicable funding methods as well as the manner in which the model generates its output. If significant changes are made to the internal model, extra checking and review are completed.

Actuarial Certification

The purpose of this presentation is to provide the ARMB Actuarial Committee with an analysis of proposed changes to the demographic and economic assumptions that are used in the actuarial valuations of the State of Alaska's retirement systems for discussion with the actuary at the March 2022 ARMB meeting. Use of this presentation, for any other purpose or by anyone other than the ARMB or staff of the State of Alaska may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the presentation for that purpose. Because of the risk of misinterpretation of results, you should ask Buck to review any statement you wish to make on the results contained in this presentation. Buck will not accept any liability for any such statement made without the review by Buck.

The cost effects of the proposed assumptions are based on the June 30, 2020 valuations, and are meant to show the estimated impact of the assumptions changes. They are not to be used for determining actual funding contributions.

Please see the draft June 30, 2021 actuarial valuation reports for a more detailed description of risk factors related to future funding of the plans (ASOP 51).

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the economic and demographic assumptions, increases or decreases expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions or applicable law.

The results were prepared under the direction of David Kershner and Scott Young, both of whom meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein. These results have been prepared in accordance with all applicable Actuarial Standards of Practice.

Unprecedented Shock to Global Capital Markets—But It Was Over in a Flash!

V-shaped recovery in equity—back in black by mid-August 2020, up 119% from market bottom!

S&P 500 Cumulative Returns

Market Peak-to-Trough for Recent Corrections vs. Current Path of COVID-19 Correction Through 12/31/21

- Sharpest and fastest equity market decline ever: 16 trading days to reach bear market; -34% after just 23 days
- S&P 500 recovered all its pandemic-related losses by Aug. 10, 2020, only 97 days from the bottom.
- S&P 500 up 28.7% in 2021.
- **Fun fact:** As of Dec. 31, 2021, or 472 trading days, the S&P is up over 45% from the previous market peak on 2/19/20. In contrast, during the GFC the market was still down 31% from the previous market peak after 472 trading days (Aug. 24, 2009).

Stock Market Returns by Calendar Year

2021 performance in perspective: History of the U.S. stock market (232 years of returns)

GDP Recovered Pre-Pandemic Level in 2Q21 After Deepest Drop in 75 Years

Seasonally Adjusted Real GDP in Billions of Dollars

- After the Global Financial Crisis, it took 2½ years before real GDP reclaimed its pre-recession highs.
- GFC peak to trough down 4%
- 2Q20 real GDP level was down over 10% from 4Q19.
- Pre-pandemic peak level of GDP reached in 2Q21: \$19.368T vs. \$19.202T for 4Q19
- 2021 GDP showed annual growth of 5.7%, with consensus estimates just north of 4.0% for 2022, followed by return to trend.

The Fed's New Inflation Framework

Targeting core Personal Consumption Expenditures Index

PCE Excluding Food and Energy (Chain-Type Price Index)

- Inflation worries are in the headlines, and the data are clearly signaling a sharp rise in the short term.
- Inflation had consistently undershot the Fed's 2% target, prompting the Fed to change its inflation framework.
- Fed's aim is to achieve an average of 2% inflation over the medium term, which is not specifically defined.
- Personal Consumption Expenditures (PCE) Index is the Fed's target, different from and typically lower than CPI-U, which had a year-over-year gain of 7.0% in December 2021.

Sources: Federal Reserve Bank of St. Louis, U.S. Bureau of Economic Analysis

Inflation Rebounds and Spurs Headline Concerns

CPI and PPI up sharply again in 4Q21

Inflation fell dramatically at the onset of the pandemic, starting in February 2020.

- The recovery to pre-pandemic levels in the Consumer Price Index required a 2.6% year-over-year change.
- 7% jump in 4Q CPI-U represents kinks in supply chains and labor markets after a year of global economic disruption and shutdown.
- Producer prices had been tumbling for more than a year prior to the pandemic; recovery to 2018 price **levels** generated eye-popping year-over-year percentage changes through 2Q, and the sharp rise continued through the second half of 2021.
- Prices for transportation goods, energy, and food drove the Producer Price Index's rise.

Consumer and Producer Price Indices – Inflation Year-Over-Year

Contributors to Recent Inflation: Primary Categories

Transportation, including new and used cars, parts, and gasoline, saw a spike in inflation.

- Year-over-year prints are more than three times higher than any other category.
- With a meaningful 15% weight in the index, transportation also has the highest weighted contribution to headline CPI.

Housing and food and beverage have also been significant contributors to headline CPI.

- Inflation within these categories has been far lower than transportation, but their large index weights make them meaningful contributors to overall inflation.

- Subcategories highlighted in blue were the biggest contributors to December YOY headline CPI due to a combination of high index weights and high inflation within the subcategory.
- These components combined make up over 70% of the index weight.
- Other subcategories, such as men's and boy's apparel, jewelry, and watches, as well as tobacco and smoking products, have also seen high inflation but do not contribute as much to headline inflation due to lower index weights.

Source: U.S. Bureau of Labor Statistics

Contributors to Recent Inflation: Weighted Contribution Over Time

Contribution to YOY Inflation (YTD through December 2021)

Looking at the six subcategories highlighted before, and combining the remaining 20, shows how impactful those few areas have been in driving inflation.

- Combining those 20 subcategories would only make them the third-largest contributor to inflation over the last few months even if they were a single category.

Private transportation stands out because the category has not seen inflation readings this high since 1980.

- If private transportation were at its long-term average of 2.2%, December's headline inflation would have dropped from 7.0% to 4.2%.

Wages and Employment

Unemployment Rate

Labor Force Participation Rate

Job Openings (in thousands)

Average Hourly Earnings

- Unemployment continues to fall even as the labor force participation rate has trended slightly upward.
- Job openings are significantly elevated but appear to have paused their rapid ascension, at least temporarily.
- Average hourly earnings rose about 4.7% for the YOY period ending in December.
- Wage-related inflation could persist if the labor force does not expand to fill open jobs.

Resurgent U.S. Equity Market in 4Q21

Strong performance across both growth and value strategies during 2021

U.S. equity 2021 returns are eye-popping:

- S&P 500: +28.7%
- U.S. Small Cap: +14.8%

Global ex-U.S. markets lagged:

- MSCI World ex USA: +12.6%
- Emerging Markets: -2.5%
- Economic data recovered in 4Q after softening in 3Q. Tight labor market and mismatch between jobs and job seekers is vexing employers.
- Inflation spiked and recorded 7% for the first time in decades.
- 4Q GDP hit a robust 6.9%, after dropping in 3Q. Growth for the year was 5.7%. The recovery is still solid. Supply chain issues and sentiment surrounding the end of fiscal stimulus, the Omicron variant, and the Fed taper vex investors as we head into 2022.

Returns for Periods ended 12/31/21

U.S. Equity Performance: 4Q21

Returns grind higher despite mounting concerns

- S&P 500 posted a strong 11.0% gain in 4Q21; large cap growth (Russell 1000 Growth) was the top performer, which contrasted with the worst-performing asset class, small cap growth (Russell 2000 Growth).
- The new Omicron variant, continued supply chain disruptions, and renewed fears of persistent inflation pushed investors into the perceived safety of the largest stocks during the quarter.
- S&P 500 sector results were mixed, with Real Estate (+17.5%) posting the top returns alongside Technology (+16.7%) and Materials (+15.2%); Communication Services (0.0%) and Financials (+4.6%) lagged broad returns.
- In 2021, small value outperformed small growth by over 2,500 bps (RUS2V 28.3% vs. RUS2G 2.8%), a stark reversal from 2020 and a pattern consistent with periods of robust GDP growth.

U.S. Equity Market Overview

Index concentration driving positive returns...

- Ten largest stocks in the S&P 500 comprised 30.5% of index but accounted for 65% of 2021 return.*
- During 4Q21, top 10 weights accounted for ~40% of return.

• ...but outsized contribution of largest stocks may be hiding underlying weakness

- Nearly 10% of Russell 3000 stocks fell by 35% or more in 2021, which is unusual for a year when market returns were in excess of 25%.

Share of poorly performing stocks vs overall market return

*Top 10 stocks: Apple, Microsoft, Amazon, Facebook, Google, Tesla, Berkshire Hathaway, JPMorgan, Johnson and Johnson, and Visa.

U.S. Equity Market Overview

Market capitalization and style driving divergence in returns

- Mega-cap growth (Russell Top 200 Growth) was the strongest performer in both 4Q21 and 2021.
- Growth style returns highly correlated with market capitalization in both 4Q21 and 2021 (higher market capitalization = high return)
 - *Within micro-, small-, and smid-cap growth, Health Care (especially biotech/pharma) was the biggest detractor to returns and is a larger weight in benchmark compared to mid- and large-cap growth.*
- Value returns correlated with market capitalization in 4Q21; full year 2021, value returns did not experience much divergence
 - *Biggest contributor to value style returns were Energy holdings across market capitalizations.*

4Q21

Size	TR (%)	Style		
		Growth	Core	Value
Mega		13.7	11.0	7.4
Large		11.6	9.8	7.8
Mid		2.8	6.4	8.5

Global ex-U.S. Equity Performance: 4Q21

Omicron takes center stage

- A recovery-driven market shifted back to COVID favorites, boosting Information Technology stocks.
- Small cap underperformed large amid global growth concerns.
- Emerging markets struggled relative to developed markets as China experienced significant pressure from an economic slowdown and its regulatory crackdown.

Stalled recovery

- As the new variant took hold, Energy and Communication Services lagged on fear of restrained growth.
- Japan suffered from both supply chain issues and economic constraints from COVID-19.
- Growth and momentum factors outperformed in developed markets but not in emerging markets.

U.S. dollar vs. other currencies

- The U.S. dollar rose against other major currencies as tapering accelerated alongside the expectation for 2022 rate hikes, which notably detracted from global ex-U.S. results.

Growth vs. value

- Inflationary pressures and the ultimate rebound from COVID-19 supported value's leadership for the full year, despite the shift to growth in 4Q21.

Global Equity: Quarterly Returns

Global Equity: One-Year Returns

U.S. Fixed Income Performance: 4Q21

Treasury yields again unchanged

- 10-year at 1.52% at 9/30 and 12/31, up from 1.45% on 6/30
- TIPS outperformed nominal Treasuries and 10-year breakeven spreads widened to 2.56%.
- Real yields remain solidly in negative territory.

Bloomberg Aggregate was literally flat in 4Q

- Spread sectors (Agencies, ABS, CMBS, MBS, and Credit) all underperformed UST by a modest amount (but positive YTD).
- One of four years with negative returns for the Agg dating back to 1976
- Yield curve flattened; curve positioning had a meaningful impact on returns in 4Q.

High yield and leveraged performed relatively well

- Spreads remain near historic tights.
- High yield issuers' default rate declined to a record low in December (J.P. Morgan).
- New issuance hit a record for the second year in a row as issuers looked to finance at relatively low rates.

Munis outperformed Treasuries

- Lower-quality bonds continued their trend of outperformance as investors sought yield.

U.S. Private Real Estate Market Trends

Continued strong performance across the asset class

Strongest gains for ODCE in history

- ODCE posted its best return ever in 4Q21; Industrial was the best performer.
- Income returns were positive across sectors.
- Appraisers are pricing in a recovery due to strong fundamentals in Industrial and Multifamily.
- Return dispersion by manager within the ODCE Index was due to the composition of underlying portfolios.
- Niche sectors such as self-storage and life sciences continued to be accretive.

Private Equity Performance

Huge gains over the last year, outpacing public equity

- Significant outperformance over one-year period with private equity exceeding the public markets by 18 to 20 percentage points
- Private equity 3Q21 gains ahead of those of public equity by 5 percentage points
- Private equity consistently ahead of public equity by ~2 to 4 percentage points across all longer-term time horizons, except over the last 10 years
- Volatility in recent public markets performance yet to translate to private markets performance

Private Equity Global Fundraising

2021 fundraising holds steady

- 2021 fundraising lagging 2019's peak by 13%, but remains consistent with 2020 fundraising
- While a large number of funds were raising in 2021, many did not hold final closes until 2022 due to LP capital budgeting constraints. Fundraising timelines have consequently become extended.
- As a result, a surge in fundraising stats is expected in 1Q22.

Private Equity	1,812,911	14.7%	14.0%	0.7%	84,107
Total	12,348,606	100.0%	100.0%		

PERS is used as illustrative throughout the presentation.

The other plans exhibit similar modest and understandable variations from strategic target allocations.

Asset Allocation vs. Public Funds (PERS)

Callan Public Fund Database

Asset Class Weights vs Callan Public Fund Sponsor Database

- Asset class allocations are in line with targets after the asset allocation update and associated rebalancing.
- Weightings to real assets and alternatives are relatively high in comparison to other public funds.

Notes: Real Assets includes Private Real Estate, REITs, Farmland, Timber, Energy, and Infrastructure. Other Alternatives represents private equity.

Total Fund Return vs Public Funds (PERS)

Callan Public Fund Database

Gross of Fee Returns
for Periods Ended December 31, 2021
Group: Callan Public Fund Sponsor Database

- Despite the recent change to the asset allocation, longer-term performance reflects ARMB's prior orientation toward capital growth as opposed to income generation.
- Performance was above the Public Funds median for the one-, three-, five-, and ten-year periods.

Total Fund Sharpe Ratio Rankings vs Public Funds (PERS)

Callan Public Fund Database

Gross of Fee Sharpe Ratio
for Periods Ended December 31, 2021
Group: Callan Public Fund Sponsor Database

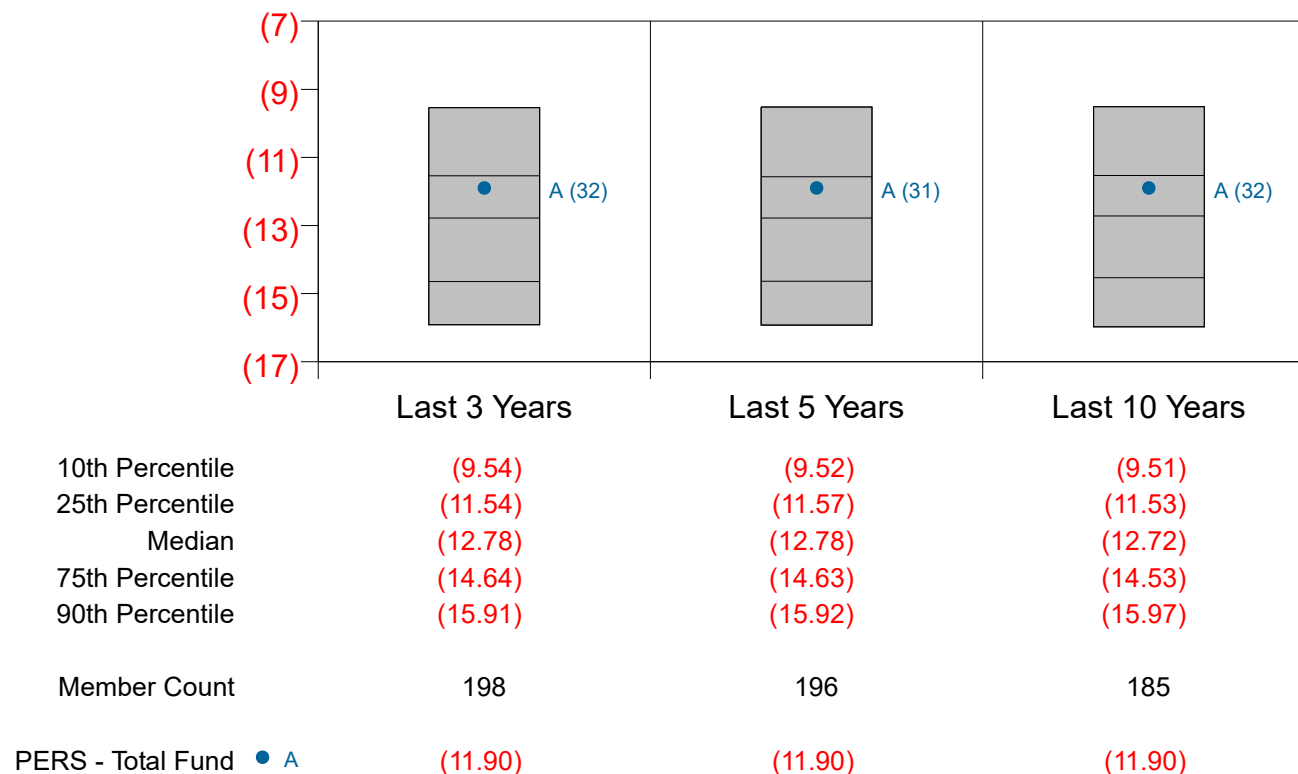

- “Sharpe ratio” is a risk-adjusted measure of excess return above the risk-free rate.
- ARMB’s risk-adjusted return (Sharpe ratio) was above the Public Funds median for the one-, three-, five-, and ten-year periods.

Total Maximum Drawdown Rankings vs Public Funds (PERS)

Callan Public Fund Database

Gross of Fee Maximum Drawdown
for Periods Ended December 31, 2021
Group: Callan Public Fund Sponsor Database

- “Maximum drawdown” is a measure of the largest loss from peak to trough in a given period.
- Lower rankings reflect larger drawdowns (i.e. bigger losses). ARMB’s drawdown rankings for all periods have reflected better than average drawdowns (i.e. lower losses) and have improved over time.
- The drawdown experienced in the first quarter of 2020 is the largest of the last 10 years.

Standard Deviation Ranking vs Public Funds (PERS)

Callan Public Fund Database

Gross of Fee Standard Deviation
for Periods Ended December 31, 2021
Group: Callan Public Fund Sponsor Database

- “Standard deviation” measures variability of returns. It is one measurement of investment risk.
- Less standard deviation results in lower rankings. A lower ranking of standard deviation suggests lower variability.
- ARMB’s portfolio diversification has resulted in volatility that is lower than median compared to peers.

PERS Long-Term Total Fund Performance as of 12/31/2021

Cumulative Returns Actual v.s Target

- Each Fund has two targets: the asset allocation policy return and the actuarial return.
- Total Fund returns continue to closely track the strategic allocation target.
- Market correction setbacks in 3Q15, 4Q18, and 1Q20 have hindered the Total Fund's progress toward closing the gap versus the actuarial return following the Global Financial Crisis of 2008/2009.

Annualized Total Fund Returns as of 12/31/21

- PERS and TRS have outperformed their target for the last quarter, one-year, two-year and three-year periods.

10th Percentile	5.25	17.92	15.89	17.26
25th Percentile	4.64	16.13	14.55	16.12
Median	4.12	13.72	13.09	14.82
75th Percentile	3.53	12.43	12.05	13.64
90th Percentile	2.92	11.23	10.87	12.77
PERS Total Plan ● A	5.19	19.27	15.69	16.24
TRS Total Plan ■ B	5.19	19.28	15.69	16.25
Target Index ◆ C	3.29	14.67	13.28	15.33
Public Market Proxy ▲ D	4.67	13.36	14.63	17.19

The Public Market Proxy consists of 45% Russell 3000 Index, 30% MSCI ACWI ex US IMI (Net), and 25% Bloomberg Aggregate Index.

Longer-Term Total Fund Returns as of 12/31/21

- Five-, six-, and ten-year performance is above target and median.
- 30 year and one quarter return for PERS beat the target by 27 basis points.

Calendar Period Total Fund Performance

- PERS and TRS rank at or above median in eight of the 10 periods shown.
- Peer group range of returns during 2016, 2015, and 2014 were very tight.
- Wide range of peer group returns during calendar 2013 due to varying fixed-income allocations within the Public Fund universe.

Total Domestic Equity through 12/31/21

Performance vs Public Fund - Domestic Equity (Gross)

10th Percentile	10.04	28.60	26.16	18.66	17.68	16.58

Russell 2000 Index	2.14%	14.82%	20.02%	12.02%	13.23%

- The large cap composite trailed its benchmark (the Russell 1000 Index) for the trailing 3-, 5-, and 10-year periods and outperformed over the last quarter and year.
- The small cap composite has outperformed its benchmark (the Russell 2000 Index) over all periods shown in the table.

Domestic Equity Portfolio Characteristics

Portfolio Characteristics Percentile Rankings Rankings Against Public Fund - Domestic Equity as of December 31, 2021

10th Percentile	218.73	21.87	4.55	20.89	1.30	0.11
25th Percentile	149.54	21.58	4.44	20.44	1.29	0.02
Median	94.91	20.83	3.84	20.01	1.20	(0.02)
75th Percentile	63.40	19.72	3.54	19.14	1.11	(0.05)
90th Percentile	47.98	18.49	3.04	18.28	1.05	(0.22)

Domestic Equity Pool	●	101.70	20.03	3.83	19.11	1.29	(0.11)
Russell 3000 Index	▲	138.25	22.06	4.20	20.25	1.24	(0.00)

- ARMB's overall domestic equity portfolio's market capitalization is smaller than 44% of public funds (first column).
- Overall, ARMB's domestic equity portfolio tilts decidedly "value" versus peers (last column on right).
 - "MSCI Combined Z-Score" measures Growth and Value characteristics of individual stocks within managers' portfolios.
 - A low Z-Score rank (i.e.– the dot appears towards the top of the floating bar) indicates a Growth bias.
 - A high Z-Score rank (i.e. – the dot appears towards the bottom of the floating bar) indicates a Value bias.

Large Cap Domestic Equity through 12/31/21

Performance vs Callan Large Capitalization (Gross)

10th Percentile	11.58	31.91	33.77	26.27	21.99	20.06

Large Cap Domestic Equity as of 12/31/21

Relative Return vs Russell 1000 Index

Callan Large Capitalization (Gross)
Annualized Five Year Risk vs Return

- Large Cap Domestic Equity returns outperformed the Russell 1000 index by 63bps in the fourth quarter of 2021.
- Long-term performance exhibits market-like returns with similar risk.
- Underperformance vs. the Russell 1000 Index in 4Q19 through 4Q20 was driven by Scientific Beta, which trailed the broad benchmark by between 2% and 4% in each of those quarters.
- Passive implementation also detracted as the S&P 900 Index trailed the Russell 1000 Index by 1.1% in 2Q20, 0.8% in 3Q20, and 0.9% in 4Q20.

Intro to Investments - Learn the Fundamentals

This course is for institutional investors, including trustees and staff members of public plans, corporate plans, and nonprofits. This session familiarizes trustees and staff with basic investment theory, terminology, and practices.

Join our next VIRTUAL session via Zoom (3 sessions, 2-3 hours each):
March 1-3, 2022

Join our next LIVE session in San Francisco (1½-day session):
July 26-27, 2022

Introductory Workshop for DC Plan Fiduciaries

This one-day workshop centers on the fundamentals of administering a defined contribution (DC) plan. Designed primarily for ERISA fiduciaries and supporting staff members, attendees will gain a better understanding of the key responsibilities of an ERISA fiduciary and best practices for executing those responsibilities.

Join our LIVE session in San Francisco:
March 23, 2022

ALASKA RETIREMENT MANAGEMENT BOARD

Risk Reporting

March 2022

Shane Carson, CAIA, CFA
State Investment Officer

Key Board Decisions

Determine Investment Objective

- Fund's Purpose
- Governance – who makes which decisions?

Determine Asset Allocation

- Strategic
- Tactical

Oversee Implementation

- Manager Structure – number and types of manager allocations.
- Manager Selection

Monitor Results

- Are the fund, asset classes and mandates performing as expected?
- Are they achieving objectives?

Risk and the Retirement System

What does risk mean to the ARMB?

- At the most comprehensive level, risk is anything that could impact the objectives of the retirement systems.
- The defined benefit systems' primary objective is to pay all benefits when they are due.
- Risk encompasses both assets and liabilities.
- Defined benefit systems are designed to be able to take risks – pooling market, longevity, and other risks across time and a broad pool of participants.
- Setting and monitoring investment risks is one of the primary roles of the ARMB.

Risk Monitoring Tool: truView

- The ARMB is using truView for portfolio risk analytics. truView is State Street Global Exchange's risk measurement platform.
- truView analytics are run semi-annual, at month-end in June and December.
- We use truView to help answer the following questions:
 - Is the portfolio risk positioned according to the ARMB's asset allocation?
 - What is the probability and magnitude of potential losses?
 - Is the ARMB taking more or less risk than the strategic benchmark by asset class?
 - Are specific investment mandates or managers adding to or reducing risk?
 - Does the ARMB have unexpected risk exposures or concentration?
 - How would the ARMB's current portfolio perform in historic market events or scenarios?

Volatility Decomposition

- Total portfolio volatility is dominated by public equities at 60%.
- Public and private equities contribute 78% of total volatility.
- Portfolio volatility has increased from 13.1% in June to 13.4% in December but is still within Callan's long-term forecast of 13.9% for ARMB's target asset allocation.

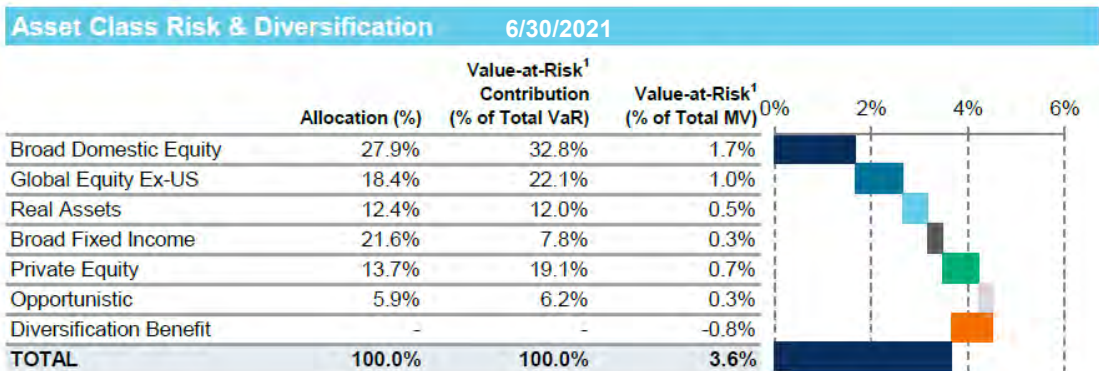

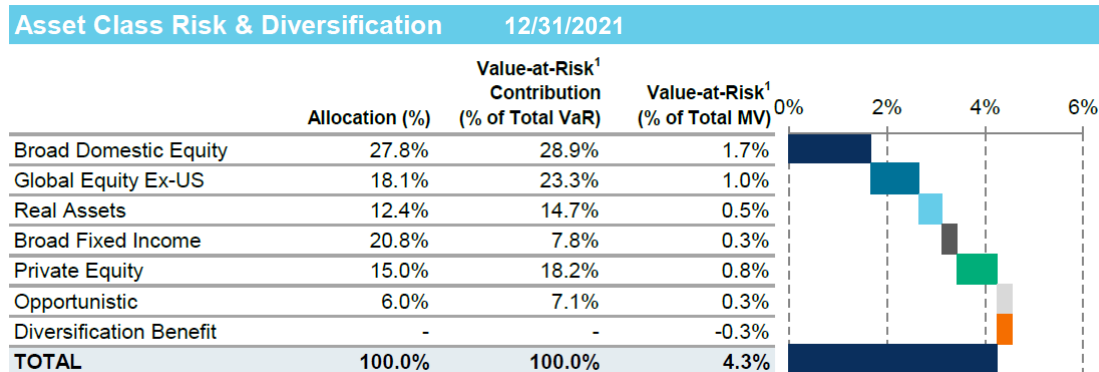

Volatility Decomposition 12/31/2021				
	Market Value (Millions)	Allocation (%)	Volatility ¹ (% per annum)	Volatility Contribution (% of Total Vol)
Broad Domestic Equity	9,543	27.8%	18.3%	37.6%
Global Equity Ex-US	6,216	18.1%	16.6%	22.1%
Real Assets	4,270	12.4%	14.2%	11.4%
Broad Fixed Income	7,134	20.8%	3.4%	3.4%
Private Equity	5,139	15.0%	16.9%	18.7%
Opportunistic	2,049	6.0%	15.4%	6.8%
TOTAL	34,350	100.0%	13.4%	100.0%

Volatility Decomposition 6/30/2021				
	Market Value (Millions)	Allocation (%)	Volatility ¹ (% per annum)	Volatility Contribution (% of Total Vol)
Broad Domestic Equity	9,298	27.9%	17.9%	37.4%
Global Equity Ex-US	6,132	18.4%	16.6%	22.9%
Real Assets	4,128	12.4%	14.7%	11.6%
Broad Fixed Income	7,192	21.6%	3.3%	3.7%
Private Equity	4,562	13.7%	16.6%	17.2%
Opportunistic	1,977	5.9%	16.0%	7.2%
TOTAL	33,290	100.0%	13.1%	100.0%

Volatility at the asset class level is calculated using parametric Value-at-Risk at 84th percentile, expressed as a percentage of the market value of each asset class.

Asset Class Risk & Diversification

- The monthly value-at-risk is 4.3%.
- Broad Domestic Equity and Global Equity ex-US contributed 52% of VaR.
- VaR increased from June's report by approximately 0.7%
- The value-at-risk increase from June's report was mainly driven by a decrease in the Diversification Benefit.

Equity Beta

- Equity betas are within expectations for 12/31/2021.
- ARMB's Domestic and Global ex-US portfolios should closely parallel their respective benchmarks.
- Slight increase in total equity beta in the 12/31/2021 report.

Total Equity

State of Alaska

Sub Asset Class Beta Analysis

Asset Class / [Benchmark]	Market Value (Millions)	Allocation (%)	Beta ¹ 1Y to the Benchmark	Beta ¹ 5Y to the Benchmark
Broad Domestic Equity / [Russell 3000]	9,543	60.6%	0.98	1.02
Large Cap Pool (AYQK)	8,780	55.7%	0.99	1.00
Small Cap Pool (AYQC)	763	4.8%	0.81	1.27
Global Equity Ex-US / [MSCI ACWI Ex US IMI]	6,216	39.4%	0.84	0.98
Emerging Markets Pool (AYSC)	1,079	6.8%	0.74	0.93
IE Large Cap Pool (AYRC)	5,136	32.6%	0.86	0.99
TOTAL Equity / [MSCI ACWI]	15,759	100.0%	1.00	1.05

1. Beta is the regression coefficient generated by a linear regression of the percent return time series of position on an explanatory time series. This explanatory time series is often composed of the returns from a broader market index, the Benchmarks of each of the Equity Asset Classes.

International Equity Country Exposure

- For Fiscal Year 2022, the target allocation to International Equities is 18% of the total ARMB portfolio
- The International Equity asset class invests in a diversified market basket across more than 60 countries
- In aggregate, asset class level active country weights exist due to active management and factor exposures but are generally not concentrated and track reasonably close to the benchmark

International				International			
Country	Portfolio	Benchmark	Difference	Country	Portfolio	Benchmark	Difference

ARMB Global ex-US benchmark is MSCI ACWI ex-US IMI

Data as of 1/31/2022

Source: Custody and Bloomberg holdings and benchmark weights

Stress Tests

- Stress tests reveal no significant change in expected outcomes.

Summary

- Risk metrics are within expectations.
- Public equity allocation is the largest driver of portfolio volatility and value-at-risk as expected.
 - Overall portfolio volatility increased from the June report and is approaching long-term risk expectations.
- truView models several historical and predictive scenarios.
 - ARMB's portfolio sensitivity to the stress tests has been little changed over time indicating there are no sudden or unexpected exposures to assets that are sensitive to the scenarios provided.

What is Value-at-Risk?

- Value-at-risk (VaR)
 - A commonly used measure of potential loss.
 - VaR represents a return threshold over a given time horizon whereby worse outcomes are only expected with some small and specific probability.
 - VaR can be estimated parametrically using the mean and standard deviation, but this ignores fat tails (kurtosis, skewness).
 - VaR also can be estimated using historic market information, which includes past fat tails – this is the approach truView takes.
- Expected shortfall (conditional VaR or cVaR) is the average loss contained in the left tail.
- Why are VaR and cVaR important?
 - They quantify the risk of loss for the portfolio.
 - Differences between historical and parametric-based VaR calculations suggest impact of fat tails.

Fixed Income Investment Team

ARMB Target Asset Allocation Fiscal Year 2022

Fixed Income Market Outlook

10 Year US Treasury Yields

Source: Bloomberg

- US treasury rates remained low by historical standard despite recent selloffs spurred by Fed tapering announcement and expectation of Fed hikes.
- Rates have been volatile and tend to be influenced by pandemic headlines, Fed announcement, and concern over Russian invasion on Ukraine.

Inflation and Fed

- Inflation has been spurred by material shortages, tight labor conditions, global shipping and supply-chain issues. Core PCE reached as high as 4.9% as of December 2021, exceeding Fed's 2% target.
- Fed has turned hawkish with their announcement of tapering and markets pricing in multiple hikes in the near future.

Profitability And Leverage

- Company fundamentals remained robust, supported by strong profit margin and healthy balance sheets.
- Gross leverage as measured by Total Debt to EBITDA has improved significantly as companies bolstered their cash reserves during the pandemic period.

Corporate Fundamentals

Source: Moody's Investors Service

Source: Moody's Investors Service

- Defaults inched higher in the most recent quarter but remained at seven year low with a total of four defaults in Q4.
- Default rate, however, is expected to modestly rise as strong growth and earnings gradually normalize.
- Upgrades continue to outpace downgrades.

Corporate Bond Net Issuance

Source: Sifma

- Corporate Investment Grade and High Yield bond issuance remained strong and well supported as investors continue to search for yield in the low interest rate environment.

Investment Grade Corporate Spreads

Source: Bloomberg

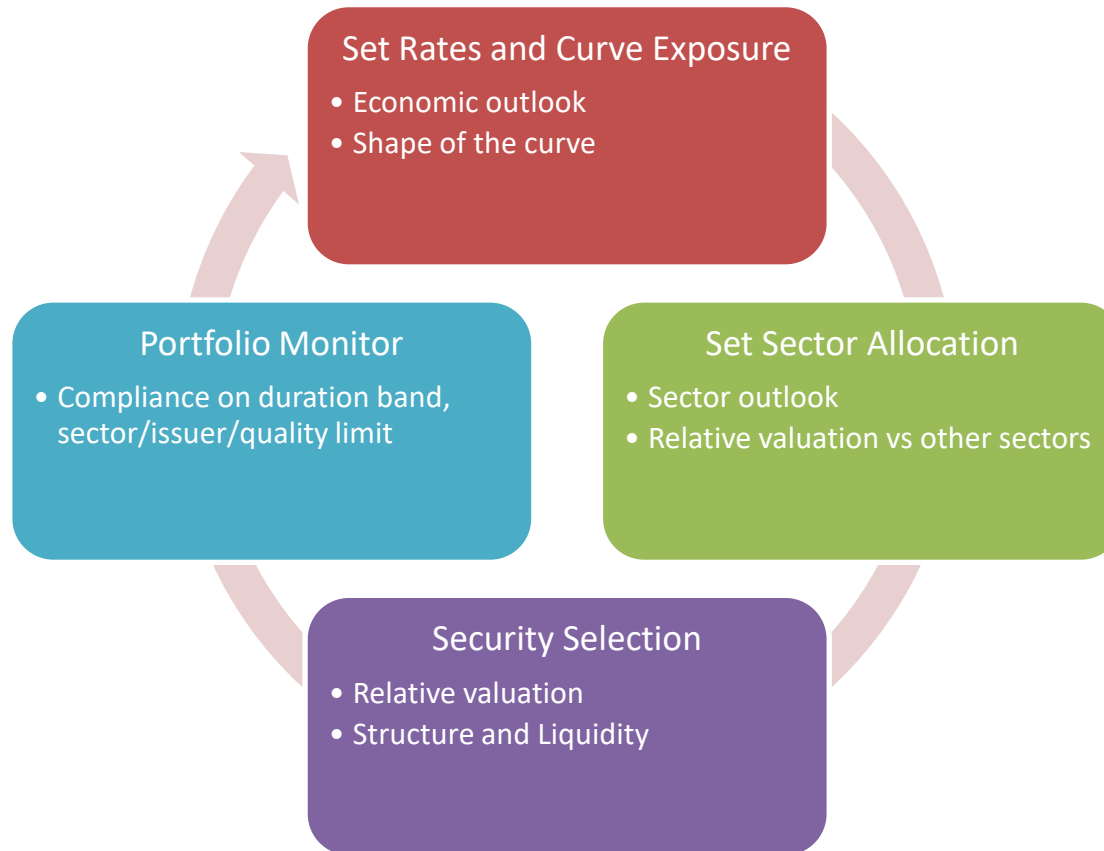

- Strong investor demand, coupled with improving fundamentals continue to support Investment Grade spreads despite recent hawkish Fed and waning secondary liquidity.

Internal Fixed Income Process

Investment Objectives

- Generate excess return relative to the index over time.
- Provide liquidity as required.
- Serve as a diversifier to reduce risk as part of asset allocation.

Fixed Income Investment Process

Investment Approach

- Identify a broad range of potential movements in the yield curve from one to three months into the future.
- Position portfolios to attempt to outperform modestly over a broad range of scenarios.
- Manage trading costs and give liquidity sparingly.
- Seek yield in non-Treasury holdings:
 - Position portfolio in higher conviction securities.
 - Diversify positions.

Risks to Investment Approach

- Future yield curve changes and the implied volatility of interest rates may be different than what we forecast.
- Changes in risk tolerance in the market are not explicitly incorporated, so this could detract from performance.
- Idiosyncratic, bond-specific, credit and structural risk are also present.

Dependence on Technology and Generalizations

Bloomberg Aggregate Index

- Market value: \$25.8tn
- 12,300+ securities
- Treasuries, agencies, MBS, Corporates, CMBS, ABS
- Maturity: 1 to 100 years
- 900+ issuers

ARMB Fixed Income

- Market value: \$5.1bn
- 850+ securities
- Treasuries, agencies, MBS, Corporates, CMBS, ABS
- Maturity: 0 (cash) to 38 years
- 200+ issuers

- Managing and constructing fixed income portfolios is a complex task as it involves working with a large number of securities with different characteristics.
- Sophisticated analytic tools such as YieldBook and Bloomberg are utilized to map general characteristics of the index and portfolio.
- Active exposures are then created in an attempt to generate excess return relative to the index.

Alaska Retirement Management Board

Short-Term Fixed Income AY70

March 2022

**Emily Howard, CFA
State Investment Officer**

Investment Objectives

- AY70 is the Short-Term Fixed Income investment pool
- \$4.006bn assets under management as of 12/31/21
- AY70 is the only pool that invests funds on behalf of both Treasury and ARMB accounts
- Investment Objectives:
 - 1) Earn the highest possible return
 - 2) Meet significant liquidity requirements
 - 3) Take very low principal risk
- Benchmark: 3-Month U.S. Treasury Bill
- All Short-Term investment requirements are met through AY70. For example:
 - Funds just received from or awaiting disbursement to eligible ARMB beneficiaries
 - Investment cash held by participating manager accounts
 - State government obligations including payroll, school funding, vendor payables

Sector Exposure as of 12/31/21; AUM \$4.006bn

- To ensure adequate liquidity, AY70 owns Treasury Bills and Overnight Repurchase Agreements (Cash)

- To achieve the highest possible return, AY70 owns spread product including ABS, Corporate and Suprasovereign bonds, in place of Tbills

ABS Exposure in AY70 as of 12/31/21

- <1.17/3yr Weighted Average Life (fixed/floating)
- AAA by two ratings agencies
- Public or Private Issuance

ABS By WAL

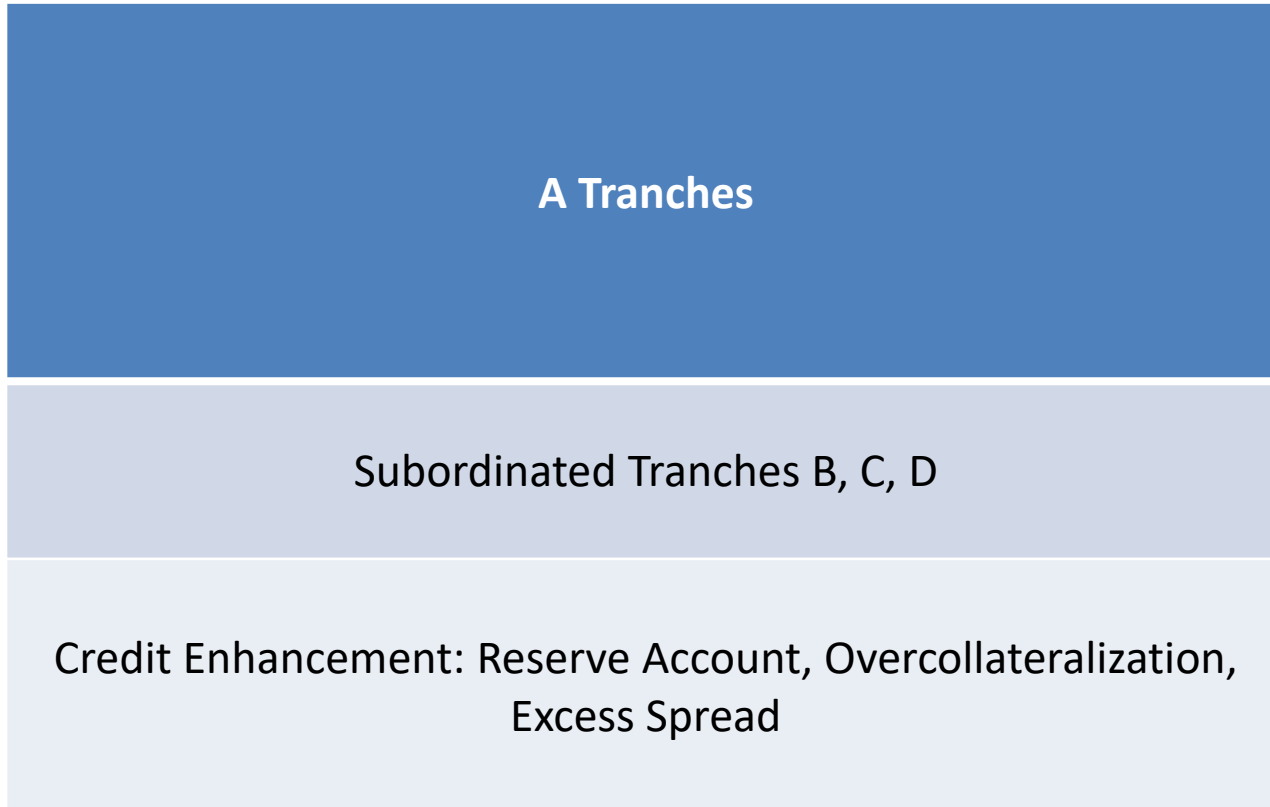

Asset Backed Securities

- Opportunity for Increased Yield → Higher Returns
 - As of 12/31, Yield to Call of AY70's ABS holdings ~.232% vs 3mo tbill ~.039%
- Robust Principal Protection → AAA ratings due to Credit Enhancement
- Good liquidity in normal market conditions, less liquidity in market stress
- Risks:
 - Collateral may decrease in value
 - Timing of Cashflows is uncertain, can be either faster or slower than expected
 - Credit quality of sponsor
 - Liquidity

ABS Structure – Low Principal Risk

Principal Payments

A Tranches

Subordinated Tranches B, C, D

Credit Enhancement: Reserve Account, Overcollateralization,
Excess Spread

Principal Losses

Auto Loan: General Structure

Principal
Payments

Source: Prospectus

CARMX 2020-2	Size	Rating (S&P/Fitch)	% of Initial Principal Balance
A-1	223,000	A-1+/F1+	19.27%
A2-A	258,385	AAA/AAA	22.33%
A2-B Floating	65,000	AAA/AAA	5.62%
A-3	388,134	AAA/AAA	33.55%
A-4	106,731	AAA/AAA	9.23%
B	37,600	AA/AA	3.25%
C	31,820	A/A	2.75%
D	39,330	BBB/BBB	3.40%
Overcollateralization	6,942		0.60%
Aggregate Principal Balance	1,156,942		100%
Reserve Account	11,569		1.00%
Excess Spread			~ 3.86% per annum

CE = 11.0%

Losses

- Bonds are backed by the principal balance on a pool of auto loans
- Subordinated Tranches → Lower Credit Enhancement → Lower Ratings
- Hard Credit Enhancement for A tranches is 11.0%
- Rating Agency Loss Expectations: S&P = 2.90% ; Fitch = 2.80%

Corporate Exposure in AY70 as of 12/31/21

- Limit: <14 months/3yr to maturity for Fixed/FRN
 - ~92% floating as of 12/31/21
- Credit Rating: Long Term at least “A3”, Short Term at least “P1” or equivalent
- Concentration limits: if the corporate bond is rated AAA, it may be no more than 1% of the portfolio. Lower ratings have lower concentration limits.
- Risks:
 - Credit Downgrade
 - Spread widening
 - Liquidity

Corporates by Years to Maturity

Suprasovereigns (SSA)

- International Development Banks
 - AAA Rated
 - Capital is provided by regional and non-regional member countries
 - Regional members are those in the geographic target area
 - Non-regional members generally include the United States, United Kingdom, Canada, Japan, France and Germany, among others
- Regional Development Banks, Canadian Provinces
- Risks
 - Liquidity
 - Limited credit risk due to high quality sovereign ownership and conservative risk profiles

Examples:

African Development Bank (AFDB)
Asia Development Bank (ASIA)
Inter-American Development Bank (IADB)
European Investment Bank (EIB)
International Bank for Reconstruction and Development (IBRD)

Developments of Note

LIBOR Transition

- AY70 Floating Rate Exposure as of 12/31/21:
 - 92% of Corporates
 - 15% of ABS
- LIBOR was discontinued for most tenors as of 12/31/21. US Dollar 1-month and 3-month tenors will still be published through June 2023.
- SOFR (Secured Overnight Financing Rate) is the heir apparent to LIBOR
 - SOFR is based on overnight transactions in the USD Treasury repo market
 - The Treasury Repo market is based on “risk free” transactions, so SOFR has been a less than natural fit for pricing products that contain inherent credit risk
- Corporate Bonds have in large part adopted SOFR as the reference rate for Floaters
- ABS has been slow to shift to SOFR referenced floaters
 - Floating rate tranches of ABS have declined to only 5% of total issuance in 2021

Investment Performance

ALASKA RETIREMENT MANAGEMENT BOARD

SUBJECT: Callan General Consulting Contract

ACTION: X

DATE: March 17-18, 2022

INFORMATION:

BACKGROUND:

Callan LLC (Callan) currently serves as the Performance Measurement and Investment Advisory Consultant for the Alaska Retirement Management Board (ARMB).

Contractual services include the following:

- 1) Asset Liability Study,
- 2) Asset Allocation,
- 3) Manager Selection,
- 4) Performance Measurement,
- 5) Investment Management; and
- 6) General Consulting

The period of performance for this contract began July 1, 2019, and ends June 30, 2022, with two optional one-year extensions.

The contract was awarded to Callan in 2019 after going through a public RFP process.

STATUS:

Callan has served as the general investment consultant for 30 years and continues to do a good job.

Staff does not believe the cost/benefit of going through a new RFP process at this time is warranted.

The compensation terms of the arrangement will continue as agreed upon in the current contract.

RECOMMENDATION:

The Alaska Retirement Management Board direct staff to exercise the first of two, one-year contract extensions to extend Callan's general consulting contract until June 30, 2023.

ALASKA RETIREMENT MANAGEMENT BOARD

SUBJECT: Callan Real Assets Consulting Contract

ACTION: X

DATE: March 17-18, 2022

INFORMATION:

BACKGROUND:

Callan LLC (Callan) serves as the Real Assets Consultant for the Alaska Retirement Management Board (ARMB).

Contractual services include the following:

- 1) Strategic Consulting,
- 2) Sourcing and Due Diligence,
- 3) Monitoring and Performance Measurement; and,
- 4) Other special projects as needed.

The period of performance for this contract began July 1, 2019, and ends June 30, 2022, with two optional one-year extensions.

The contract was awarded to Callan in 2019 after going through a public RFP process.

STATUS:

Callan replaced the former real estate consultant in 2019 and has done a good job providing consulting services across the broader real assets landscape. Having the same firm provide both general consulting and real assets consulting also helps streamline portfolio analysis and reporting to staff and ARMB.

Staff does not believe the cost/benefit of going through a new RFP process at this time is warranted.

The compensation terms of the arrangement will continue as agreed upon in the current contract.

RECOMMENDATION:

The Alaska Retirement Management Board direct staff to exercise the first of two, one-year contract extensions to extend Callan's real assets consulting contract until June 30, 2023.

Fidelity Institutional Asset Management

Mandate: Tactical Allocation

Hired: 2018

Firm Information	Investment Approach	Total ARMB Mandate
<p>Fidelity Investments was founded in 1946 by Edward C. Johnson II. Fidelity is one of the largest independently owned investment management organizations in the world. The Johnson family owns 49% of the firm; Fidelity employees own the remainder.</p> <p>As of 12/31/2021, the firm's total institutional assets under management were \$324.2 billion.</p> <p>Key Executives: <i>Jordan Alexiev</i>, Portfolio Manager <i>Kyan Nafissi</i>, Investment Director <i>Kristin Shofner</i>, Senior Vice President <i>Melissa Moesman</i>, VP, Account Executive</p>	<p>The Fidelity Signaling strategy is a multi-asset, tactical allocation strategy based on Fidelity's proprietary business cycle models, taking the premise that the stage of the business cycle is an important driver of asset class performance and risk. Consequently, overall portfolio risk and allocation decisions are made depending on the specific assessment of the business cycle.</p> <p>Benchmark: Blended Benchmark 60% MSCI ACWI IMI and 40% Bloomberg US Aggregate Bond Index until 3/31/2021 then, 70% MSCI ACWI, and 30% Bloomberg US Aggregate Bond Index</p>	<p>Assets Under Management (\$millions): 12/31/2021: \$661</p>

Process/Positioning

Components of Alaska RMB Investment Process

Uncorrelated sources of return

BUSINESS CYCLE

- Asset prices are influenced by the constant flow from economic expansion to contraction and back
- Early | Mid | Late | Recession

VALUE

- Assets tend to mean-revert over time towards their Fair Value levels
- Leverage long-term capital market assumptions to harvest secular themes

MOMENTUM

- Assets that are outperforming tend to continue to outperform, and vice versa
- Generates active weights using 12-1 momentum signal

DISCRETION

- Cycles rhyme but carry important nuances
- Portfolio Managers incorporate additional macroeconomic and fundamental information

Correlation of Signal Returns

Jan '01 - Sep '21

	Business Cycle	Value	Momentum
Business Cycle	1.0		
Value	0.1	1.0	
Momentum	0.1	-0.3	1.0

For illustrative purposes only. Past performance is no guarantee of future results. Diversification does not ensure a profit or guarantee against a loss. Fidelity proprietary analysis based on data from Bloomberg Finance L.P, FactSet., as of 9/30/21.

- Rationale for Key Changes/Explanation for Large Active Positions
 - Business cycle transitioned from early to mid-cycle in the beginning of 2021. While both early and mid-cycle promote an OW to equities and an UW to Core Bonds, we tend to hold more High Yield bonds earlier in the cycle and transition to international equities as the cycle progresses.
 - Reduction in EM equities OW throughout 2021 was due to momentum and discretion of GIS PM team regarding concerns about Chinese slowdown.
 - Inflation protection (Commodities and TIPS OW) increased during 2021 largely due to momentum and PM discretion that the market was underestimating the longevity of higher inflation. Also, a rising late cycle signal contributed to increased inflation protection in October 2021.
 - Tracking error and beta was reduced starting in September 2021 while duration was increased due to a rising late-cycle signal and our discretionary view that chances of a mid-cycle correction were increasing due to weakness in China and concerns around inflation.

Capital Markets Update

Mid-Cycle recovery continues while signs of late-cycle emerge

Services and Manufacturing PMIs

Mid-Cycle with hints of Late

- Despite Omicron cases rising at the end of the year, the economy remained in a mid-cycle recovery mode as we flipped to a new calendar year. Economic activity levels, the job market, consumer balance sheets, and corporate earnings all improved or remained on stable footing throughout the year, typical of a mid-cycle environment.
- As we look forward to 2022, we think most of the key pieces to extend the cycle remain in place, but we are watching some emerging signs of moving into more a late cycle environment. Peaking economic and corporate earnings growth and signs of inflation being more than transitory are early signs of late cycle.

S&P 500 Return Decomposition

Earnings Drive Prices in 2021

- S&P 500 returns were driven higher primarily by multiple expansion in 2020. 2020 multiple expansion was likely due to the market's prediction that earnings would improve in the following year, which panned out in 2021 and prices were driven by earnings.
- With earning estimates coming down and the potential for higher rates to put pressure on multiples, it may be hard for 2022 to produce as strong of a year for stocks as 2021. Given our view that a large portion of historical mid-cycle returns have already been realized by equities, we are entering the year by taking a balanced approach to risk.

Inflation Expectations: CPI Swaps

Don't Say the T Word

- The fed has retired "transitory" from its vernacular when talking about inflation and for good reason, while inflation coming out of the worst of the pandemic was driven by elevated prices in durable goods like used cars, inflation is now being driven by housing, wages, and food prices all of which are viewed as more long-lasting inflationary forces.
- Breakeven forecasts have moved higher as a result of this shift in the composition of the drivers of inflation, but we think estimates may still be too low. As a result, we have continued to prefer TIPs over nominal bonds.

China Industrial Production

China Growth Recession

- China's industrial production has seemed to have bottomed but there are still reasons to be concerned with the Chinese economy as the property sector has not yet shown signs of improvement. Credit growth has also remained muted as the focus on deleveraging has continued.
- There is normally some lag in how China's economic activity impacts industrial activity in the rest of the world, adding to the reasons to believe why global economic activity may have peaked during this recovery cycle.

As of 12/31/21

Current Opportunities and Risks

Opportunities

Strong consumer + infrastructure spend

- **Wealth effects:** The dramatic rise in consumer net worth, coupled with higher savings post-pandemic, could continue to propel higher spending and GDP growth.
- **Relatively easy financial conditions:**
Despite the recent hawkishness of the Fed, financial conditions remain very accommodative and bank lending is starting to pick up.
- **Re-opening:** The potential of COVID to evolve into a less severe situation can improve global reopening and extend the duration of the current cycle.

Risks

Deceleration in growth and declining liquidity

- **Peak Growth/Stimulus:** The reopening effect on earnings is starting to fade. There is also risk is that the baton pass from stimulus to income as people get back to work won't be smooth and there might have been some pull forward of demand.
- **Policy Error:** Potential for policy mistakes on both sides - premature withdrawal of monetary stimulus could hinder recovery on one side, while non-transitory inflation could destabilize inflation expectations on the other side and challenge Fed's credibility.
- **China Policy Tightening:** relatively subdued Chinese monetary and fiscal response may not be enough to offset ongoing weakness in real estate sector and prospects for falling exports.

For illustrative purposes only.

202202-29921

Past Peak Growth, but Global Expansion Should Persist

The global economy likely passed its peak rate of growth, but a sustained expansion appears likely. The trajectory of the pandemic will be crucial to the global outlook, with emerging-market economies generally more susceptible to health setbacks. China may be at the trough of its growth recession. Despite some signs of late-cycle pressures in the labor markets, we expect the U.S. mid-cycle backdrop to prevail in 2022.

BUSINESS CYCLE FRAMEWORK

A growth recession is a significant decline in activity relative to a country's long-term economic potential. Note: The diagram above is a hypothetical illustration of the business cycle, the pattern of cyclical fluctuations in an economy over a few years that can influence asset returns over an intermediate-term horizon. There is not always a chronological, linear progression among the phases of the business cycle, and there have been cycles when the economy has skipped a phase or retraced an earlier one. Source: Fidelity Investments (AART), as of 12/31/21.

U.S. Consumers Well-Positioned But Inflation Is Painful

The U.S. consumer is bolstered by record-high net worth, pent-up savings, and strong employment markets. However, high inflation has weighed on sentiment as the percentage of consumers viewing the current backdrop as a good time to purchase large household goods hit its lowest point in four decades. Consumer strength supports the mid-cycle backdrop, but more persistent inflation may inhibit real economic growth.

U.S. HOUSEHOLD WEALTH AND CONSUMER SENTIMENT

Gray bars indicate U.S. recessions. Sources: Federal Reserve Board, University of Michigan, Haver Analytics, Fidelity Investments (AART), as of 11/30/21.

Fiscal Drag in 2022, But Higher Multi-Year Multiplier Mix

After nearly \$3 trillion of emergency stimulus in FY 2021, the budget deficit is set to shrink considerably and offer less fiscal support in 2022. Legislation approved in Q4 provides more than half a trillion dollars of extra multi-year spending on infrastructure, which traditionally has a high multiplier effect on near-term growth. Any additional multi-year spending or tax increases will depend on negotiations among Congressional Democrats.

FISCAL DEFICIT AS A PERCENTAGE OF GDP

FISCAL MULTIPLIERS

LEFT Dashed line projection represents updated deficit baseline from the Committee for a Responsible Federal Budget (CRFB) using CBO July GDP forecasts. Sources: CRFB, Congressional Budget Office, Haver Analytics, Fidelity Investments (AART), as of 11/15/21.

RIGHT: R&D: Research and development. Multipliers are rough estimates of how much a dollar of spending or tax changes would impact GDP based on historical averages. Sources: Congressional Budget Office, Richmond Federal Reserve, Fidelity Investments (AART), as of 9/30/21.

Inventory Buildup Suggests Cooling Manufacturing Activity

The lagged impact of China's slowdown implies the peak in global industrial activity is behind us. Inventories relative to sales are rising, suggesting developed-market (DM) manufacturing may decelerate from decade-high activity levels. Bullwhips—leading indicators measuring the gap between new-order demand and the supply of inventories—remain positive but have shrunk and likely represent a mid-cycle headwind for DM.

GLOBAL MANUFACTURING VS. INVENTORY CYCLE

PMI: Purchasing managers' index. **Graph:** I/S: Inventory relative to sales. Six-month moving average of U.S. industries with contracting inventory to sales ratios. Sources: Census Bureau, IHS Markit, Haver Analytics, Fidelity Investments (AART), as of 10/31/21. **Table:** Sources: IHS Markit, Haver Analytics, Fidelity Investments (AART), as of 12/31/21.

Industrial Trough in China, but Property Remains a Risk

China's industrial cycle appears to be bottoming, and monetary and fiscal policies are gradually shifting to a more accommodative stance. Activity continues to decelerate in the all-important real estate sector, where slowing construction activity and weak sales remain a key source of risk. As officials attempt to limit leverage and address financial imbalances, the strength of any economic recovery may remain muted.

Corporate Profits Beat Expectations, Upside Now Harder

The nearly 50% rebound in corporate earnings during 2021 far exceeded expectations amid accelerating sales growth and greater corporate pricing power. With profit margins back to all-time highs and having already outpaced typical mid-cycle gains—and facing unusually high wage pressures—it may prove more challenging to expand them going forward. Investors expect slower, but still solid, high single-digit profit growth in 2022.

202202-29921

Inflation Rates to Moderate, But Pressures More Persistent

Base-year effects will help mechanically reduce inflation rates from current 30-year highs, and we see initial signs that some of the most extreme supply-related pressures are easing. However, categories where price changes tend to be more persistent, such as housing and food, now account for a larger portion of inflationary pressure. Demand-side factors—where the Federal Reserve can exert its influence—are major contributors to price pressure.

Fidelity Investments (AART), as of 11/30/21.

The Federal Reserve Signals Tightening Ahead

During Q4, the Fed signaled its intent to begin reducing the extraordinary monetary accommodation that has facilitated extremely easy financial conditions. Fed members raised their rate-hike guidance during Q4 on inflation concerns. Market expectations are in line with Fed projections for roughly three hikes in 2022, but investors foresee fewer hikes thereafter and a long-term future that never reaches positive real rates.

Central Bank Normalization May Strain Liquidity, Markets

Trillions of dollars of asset purchases by global central banks resulted in abundant financial market liquidity, supporting asset prices and subduing volatility in 2021. However, global monetary policy is shifting toward normalization, as 16 central banks raised interest rates and the Fed accelerated the end of its QE program to early 2022. Liquidity growth may switch to a headwind during 2022, raising the odds of higher market volatility.

CENTRAL BANK BALANCE SHEETS

■ U.S. ■ Eurozone ■ Japan — Total

Billions (12-Month Change)

Gray bar represents projected balances. QE: Quantitative easing. Dashed line and shaded area represent estimates based on the U.S. Federal Reserve tapering its QE and ending asset purchases in March 2022, the European Central Bank purchasing EUR50B of Pandemic Emergency Purchase Program in Q1 2022 and €20B in ordinary QE in Q1 and €40B of ordinary QE in Q2 2022, and the Bank of Japan purchasing assets at an average of prior 12 months. Sources: Federal Reserve, Bank of Japan, European Central Bank, Haver Analytics, Fidelity Investments (AART), as of 11/30/21. TABLE: Emerging-market countries include Brazil, Peru, Poland, Russia, South Africa, and others as of 12/31/21.

Stock-Bond Diversification Highest When Inflation Is Tame

Over the past 20 years, U.S. core inflation rarely stayed above 2%. In this environment, correlations between U.S. stocks and Treasury bonds were negative, providing strong portfolio diversification. Historically, higher inflation—such as during the period lasting roughly from 1966 to 2000—generated headwinds for both stocks and bonds and led to higher return correlations and diminished diversification benefits.

STOCK AND TREASURY BOND CORRELATIONS VS. INFLATION

Past performance is no guarantee of future results. Fidelity Investments proprietary analysis of historical asset class performance is not indicative of future performance. Sources: Bureau of Labor Statistics, Haver Analytics, Bloomberg Finance L.P., Fidelity Investments (AART), as of 11/30/21.

Inflation-Sensitive Assets Can Help Provide Diversification

The potential for higher inflation represents a risk factor for a multi-asset portfolio. Inflation-resistant assets, including commodities and commodity-producer equities, can help hedge against surprise increases in inflation while providing potential for capital appreciation in a higher nominal-growth environment. In fixed income, inflation-hedging assets, such as TIPS, have provided better diversification than Treasury bonds.

RETURN SENSITIVITY TO INFLATION SURPRISES (1972–2020)

RETURN SENSITIVITY TO GROWTH SURPRISES (1972–2020)

Past performance is no guarantee of future results. Inflation sensitivity measured relative to CPI, an index that tracks the percentage change in the price of a specified "basket" of consumer goods and services. Growth sensitivity measured relative to the Purchasing Manager's Index (PMI) that shows the prevailing trends in the manufacturing and service sectors. Beta is a measure of a variable's sensitivity (response) relative to changes (volatility) in a reference (benchmark), which has a beta of 1. Indexes: U.S. Equity—Dow Jones U.S. Total Stock Market IndexSM; Non-U.S. Equity (EM+DM)—MSCI ACWI ex USA Index; Commodities—Bloomberg Commodity Index Total ReturnSM. Commodity sectors represent categories within the Bloomberg Commodity Index Total ReturnSM. Equity sectors represent categories within MSCI All Country World Index (ACWI) as defined by the Global Industry Classification Standard (GICS[®]). Sources: Bureau of Labor Statistics, Fidelity Investments; data 1/1/72 through 10/31/20.

Dollar Strengthened, Non-U.S. Assets Relatively Attractive

Cyclically adjusted P/E (CAPE) ratios for non-U.S. equities remained below U.S. valuations. During 2022, the U.S. dollar rose against most major developed-market currencies, and the valuation of the dollar's real exchange rate remains expensive. These valuation metrics indicate a relatively favorable long-term backdrop for non-U.S. stocks and currencies.

Rates and Spreads Ticked Higher But Remained Very Low

Both interest rates and credit spreads for most bond categories ended Q4 little changed but slightly higher. Bond yields remained in the bottom decile relative to history across all major fixed income categories, and spreads remained tight relative to history. During 2021, falling credit spreads helped offset the negative dynamic of rising bond yields for most categories.

FIXED INCOME YIELDS AND SPREADS (1993–2021)

Stock Market Corrections Common in Mid Cycle

The mid-cycle phase of the U.S. business cycle historically has provided a positive backdrop for the performance of riskier asset classes. However, stock market corrections (drawdowns of between 10% and 20%) have occurred more frequently in mid cycle. This volatility often has been relatively short-lived, with the market typically recovering and going on to surpass its prior peak.

Business Cycle Approach to Equity Sectors

A disciplined business cycle approach to sector allocation seeks to generate active returns by favoring industries that may benefit from cyclical trends. Economically sensitive sectors historically have performed better in the early- and mid-cycle phases of an economic expansion. Meanwhile, companies in defensive sectors with relatively more stable earnings growth have tended to outperform in weaker environments.

BUSINESS CYCLE APPROACH TO SECTORS

Sector	EARLY CYCLE Rebounds	MID CYCLE Peaks	LATE CYCLE Moderates	RECESSION Contracts
 Financials	+			
 Real Estate	++			--
 Consumer Discretionary	++	-	--	
 Information Technology	+	+	--	--
 Industrials	++			--
 Materials	+	--	+	
 Consumer Staples			++	++
 Health Care	--		++	++
 Energy	--		++	
 Communication Services		+		-
 Utilities	--	-	+	++
	Economically sensitive sectors have tended to outperform, while more defensive sectors have tended to underperform.	Making marginal portfolio allocation changes to manage drawdown risk with sectors may enhance risk-adjusted returns during this cycle.	Defensive and inflation-resistant sectors have tended to perform better, while more cyclical sectors underperform.	Since performance generally has been negative during recessions, investors should focus on the most defensive, historically stable sectors.

Past performance is no guarantee of future results. Sectors as defined by GICS. White line is a theoretical representation of the business cycle as it moves through early, mid, late, and recession phases. Green- and red-shaded portions above respectively represent over- or underperformance relative to the broader market; unshaded (white) portions suggest no clear pattern of over- or underperformance. Double +/- signs indicate that the sector is showing a consistent signal across all three metrics: full-phase average performance, median monthly difference, and cycle hit rate.

A single +/- indicates a mixed or less consistent signal. Return data from 1962 to 2020. Source: Fidelity Investments (AART), as of 12/31/21.

Performance Attribution (Gross)

1 Year Period Ending December 31, 2021

Attribution Themes

- Total alpha was positive for the one-year period, both active allocation and underlying managers contributed positively.
- Active allocation (measured by the sum of "Extended Alpha" and "Positioning Alpha") was positive for the one-year period. An underweight to Investment Grade bonds and an overweight to U.S. equities made the largest impact.
- Underlying manager alpha was positive for the period as well. FIAM Broad Market Duration contributed the most to underlying manager alpha, but positive performance was broad based, with U.S. equity and non-U.S. equity managers contributing positively as well.

Biographies

Jordan Alexiev, CFA *Portfolio Manager*

Jordan Alexiev is a portfolio manager in the Global Institutional Solutions (GIS) group at Fidelity Investments. Fidelity Investments is a leading provider of investment management, retirement planning, portfolio guidance, brokerage, benefits outsourcing, and other financial products and services to institutions, financial intermediaries, and individuals. GIS is an investment team within Fidelity's Asset Management Solutions division, an integrated investment, distribution, and client service organization dedicated to meeting the unique needs of the institutional marketplace.

In this role, Mr. Alexiev manages custom multi-asset class mandates for institutional investors and financial intermediaries. The team is dedicated to serving the needs of institutional asset owners that seek strategic support, guidance, customization, and active allocation.

Prior to assuming his current role in January 2021, Mr. Alexiev was a team leader in the Asset Allocation Research Team (AART) and was responsible for analyzing and synthesizing investment perspectives across Fidelity's asset management unit to generate insights on macroeconomic and financial market trends and their implications for asset allocation.

Prior to joining Fidelity in 2011, Mr. Alexiev was vice president and head of currency research at State Street. In this role, Mr. Alexiev was responsible for quantitative asset allocation research and was involved with managing active currency programs. He has been in the financial industry since 2003.

Mr. Alexiev earned his bachelor of science degree in economics and marketing from West Virginia Wesleyan College and his master of business administration and master of science in finance degrees from Boston College. He is also a CFA® charterholder.

Biographies

Kristin Shofner

Senior Vice President, Business Development

Kristin Shofner is senior vice president of business development within the Asset Management Solutions division at Fidelity Investments. Fidelity Investments is a leading provider of investment management, retirement planning, portfolio guidance, brokerage, benefits outsourcing, and other financial products and services to institutions, financial intermediaries, and individuals. The Fidelity Asset Management Solutions division is an integrated investment, distribution, and client service organization dedicated to meeting the unique needs of the institutional marketplace.

In this role, Ms. Shofner leads the development of relationships with public pension plans.

Prior to joining Fidelity in 2013, Ms. Shofner served as director of institutional sales and marketing at Lord, Abbett & Co. LLC. Previously, she served as manager of institutional sales and client services and as a manager research associate at Asset Strategy Consulting, later acquired by InvestorForce. She has been in the financial industry since 1998.

Ms. Shofner earned her bachelor of arts degree in history and sociology from the University of California at Santa Barbara where she ran Division I Cross Country and Track & Field. She was also a member of our United States Ekiden Relay Team in China and ran in the US Olympic Trials Women's Steeplechase in Atlanta.

Important Information

Please read this information carefully. Speak with your relationship manager if you have any questions.

This document does not make an offer or solicitation to buy or sell any securities or services, and is not investment advice. FIAM does not provide legal or tax advice and we encourage you to consult your own lawyer, accountant, or other advisor before making an investment.

Information provided in this document is for informational and educational purposes only. To the extent any investment information in this material is deemed to be a recommendation, it is not meant to be impartial investment advice or advice in a fiduciary capacity and is not intended to be used as a primary basis for you or your client's investment decisions. Fidelity and its representatives may have a conflict of interest in the products or services mentioned in this material because they have a financial interest in, and receive compensation, directly or indirectly, in connection with the management, distribution and/or servicing of these products or services including Fidelity funds, certain third-party funds and products, and certain investment services.

Risks

Past performance is no guarantee of future results. Investors should be aware that an investment's value may be volatile and involves the risk that you may lose money. Performance for individual accounts will differ from performance for composites and representative accounts due to factors, including but not limited to, portfolio size, trading restrictions, account objectives and restrictions, and factors specific to a particular investment structure. Representative account information is based on an account in that strategy's composite that generally reflects that strategy's management and is not based on performance of that account.

The value of a strategy's investments will vary in response to many factors, including adverse issuer, political, regulatory, market, or economic developments. The value of an individual security or a particular type of security can be more volatile than and perform differently from the market as a whole. Nearly all accounts are subject to volatility in non-U.S. markets, either through direct exposure or indirect effects on U.S. markets from events abroad, including fluctuations in foreign currency exchange rates and, in the case of less developed markets, currency illiquidity. Events such as natural disasters, pandemics, epidemics, and social unrest in one country, region, or financial market may adversely impact issuers in a different country, region, or financial market. Performance could be negatively impacted if the value of a portfolio holding were harmed by such political or economic conditions or events. Moreover, such negative political and economic conditions and events could disrupt the processes necessary for investment operations.

The performance of fixed income strategies will change daily based on changes in interest rates and market conditions and in response to other economic, political, or financial developments. Debt securities are sensitive to changes in interest rates depending on their maturity, and may involve the risk that their prices may decline if interest rates rise or, conversely, if interest rates decline, their prices may increase. Debt securities carry the risk of default, prepayment risk, and inflation risk. Changes specific to an issuer, such as its financial condition or its economic environment, can affect the credit quality or value of an issuer's securities. Lower-quality debt securities (those rated or considered below investment-grade quality, also referred to as high-yield debt securities) and certain types of other securities are more volatile, speculative and involve greater risk due to increased sensitivity to adverse issuer, political, regulatory, and market developments, especially in periods of general economic difficulty. The value of mortgage securities may change due to shifts in the market's perception of issuers and changes in interest rates, regulatory, or tax changes.

Derivatives may be volatile and involve significant risk, such as credit risk, currency risk, leverage risk, counterparty risk, and liquidity risk. Using derivatives can disproportionately increase losses and reduce opportunities for gains in certain circumstances.

These materials contain statements that are "forward-looking statements," which are based on certain assumptions of future events. FIAM does not assume any duty to update any forward-looking statement. Actual events may differ from those assumed. There can be no assurance that forward-looking statements, including any projected returns, will materialize or that actual market conditions and/or performance results will not be materially different or worse than those presented.

Important Information, continued

Performance Data

Unless otherwise indicated performance data shown is client data. Performance data is generally presented gross of any fees and expenses, including advisory fees, which when deducted will reduce returns. All results reflect realized and unrealized appreciation and the reinvestment of dividends and investment income, if applicable. Taxes have not been deducted.

FIAM claims compliance with the Global Investment Performance Standards (GIPS®). In conducting its investment advisory activities, FIAM utilizes certain assets, resources and investment personnel of Fidelity Management & Research Company LLC and its affiliates, which do not claim compliance with GIPS®. Performance for individual accounts will differ from performance for composites and representative accounts due to factors, including but not limited to, portfolio size, trading restrictions, account objectives and restrictions, and factors specific to a particular investment structure. If representative account information is shown, it is based on an account in the subject strategy's composite that generally reflects that strategy's management and is not based on performance.

PineBridge Global Dynamic Asset Allocation Investment Outlook

Presented By:

Michael Kelly, CFA
Managing Director
Global Head of Multi-Asset
PineBridge Investments

Sunny Ng, CFA
Managing Director
Portfolio Manager
PineBridge Investments

Team Biographies

Michael J. Kelly, CFA
Managing Director,
Global Head of Multi-
Asset
PineBridge Investments,
New York

Mr. Kelly joined the firm in 1999 and is responsible for overseeing the firm's global multi-asset business. Mr. Kelly founded the firm's Multi-Asset investment process and integrated several formerly independent regional balanced teams into one global team focused on total return oriented asset allocation, as well as manager selection. Today, the team's flagship total return strategy has one of the longest track records focused on CPI + 5% oriented investing (over rolling 5 year periods) versus a relative return investment strategy. Mr. Kelly also serves as a member of the firm's Governance Committee and Management Committee and chairs the firm's Stewardship Committee. Prior to joining the firm, he spent 15 years in various equity research and portfolio management roles at JPMorgan Investment Management. During his last five years at JPMorgan, he also chaired their US Asset Allocation Committee. Prior to that, he spent several years in economic research at the economic consulting firm Townsend-Greenspan & Co. He holds an MBA from the Wharton Graduate School of Business. He also is a CFA charterholder.

Sunny Ng, CFA
Managing Director,
Portfolio Manager, Global
Multi-Asset
PineBridge Investments,
New York

Mr. Ng joined the firm in 2016 and is a portfolio manager for several of the teams' accounts and funds and is responsible for the Global Multi-Asset Team's client-facing activities globally. Prior to joining the firm, Mr. Ng was a Managing Director and Head of Asia ex Japan Portfolio Strategists at State Street Global Advisors (SSGA), where he was responsible for leading the regional team representing SSGA investment views and strategies to clients across Asia. Prior to that, Mr. Ng was Research Director for Morningstar Asia, where he was responsible for overseeing and building out the firm's funds research platform in Hong Kong, Singapore, and Taiwan. Prior to that, Mr. Ng held positions at AllianceBernstein and Pavilion Advisory Group, where he founded the quantitative strategies group. Mr. Ng has been active in industry research and has multiple articles published in the Journal of Portfolio Management, including "A Constant Volatility Framework for Managing Tail Risk," which received the AIMA Hillsdale Research award for best paper in 2010. He holds Bachelor of Commerce and MBA degrees from Concordia University in Montreal. He also is a CFA charterholder.

Executive Summary

A Global Team Approach

Experienced and Stable Team Leverages PineBridge’s Ecosystem

Multi-Asset Solutions Meet Different Portfolio Needs

GDAAs: An Alternative to Growth Assets

	PineBridge GDAAs		
	Alternatives to Growth Assets	Strategic Mixes	Alternatives to Capital Preservation Assets
Nature of Return ▶	Total Return	Relative Return	Absolute Return
Description ▶	Target equity-like returns but with lower volatility	60/40 replacement with various risk management approaches, e.g. Diversified Growth Funds, Levered Risk Parity, Levered Risk Premia	Target volatility of fixed income but with potential for higher returns and low interest rate sensitivity
Objective Return (p.a.) ▶	CPI ¹ plus 5-6%	Relative Return Benchmark	CPI ¹ plus 2-3%
Objective Risk (Volatility p.a.) ▶	8-10% p.a.	5-7% p.a.	3-4% p.a.
Role in Portfolio Context ▶	Dynamically manage risk between equities and fixed income	Diversify by introducing additional asset classes	Structurally balance risks to mitigate short-term downdrafts and reduce interest rate sensitivity
	<ul style="list-style-type: none"> • ‘Liquid alternatives’ strategy • Outcomes-based • Diversifier for traditional equity/fixed income portfolios 		
	Common Characteristics		

As of 31 January 2022. There is no assurance that any investment objective or target will be achieved. Please refer to the Sound Basis Disclosure. The targeted returns provided are used as an estimated guideline or comparative measure regarding annual performance returns averaged over a time horizon. They reflect a guideline which the investment manager considers reasonable having considered the current industry and interest rate environment as well as quantitative and qualitative analyses. If one or more of the assumptions used in the formulation of the targeted returns turns out to be incorrect, the target may not be achieved. Targeted returns do not take into account unanticipated material changes in the market and/or other economic conditions affecting the investments, transaction costs that may arise, the imposition of taxes and the actual sale or trade of investments. Targeted returns should not be relied upon. Strategic Mixes and Alternatives to Capital Preservation Assets do not represent PineBridge products and are offered for purposes of comparison only. ¹CPI is defined as US CPI ex-food & energy.

As of December 31, 2021. For illustrative purposes only. We are not soliciting or recommending any action based on this material. Reflects the performance of the PineBridge Multi-Asset Composite (the "Composite"). The performance returns in this presentation do not reflect the deduction of management and incentive fees and expenses and would be reduced by such fees and other expenses. The performance results presented are gross of fees and do not reflect the deduction of investment advisory fees and expenses. **There is no assurance that any investment objective or target will be achieved.** Please refer to the Sound Basis Disclosure in the Appendix. For further performance information, as well as the Composite's complete benchmark information, please see the Schedule of Rates of Return and Notes to the Schedule of Rates of Return. **Past performance is not indicative of future results.** *Annualized Returns and Annualized Volatility are shown since inception of the PineBridge Multi-Asset Composite. The inception date of the Composite is 1 January 2005. ¹PineBridge Multi-Asset Composite. ²The 60/40 Risk Budget represents 60% MSCI ACWI (Net) Index/40% FTSE World Government Bond Index (USD Unhedged) from 1 January 2005 to 31 July 2018 and 60% MSCI ACWI (Net) Index/40% Bloomberg Barclays Global Treasury Total Return Index (USD Unhedged) from 1 August 2018 to date. Risk budget is the overall portfolio's risk which seeks to average to the risk of 60/40 global equity/global bond mix over full cycles. Effective 1 October 2019, the primary benchmark was retroactively switched to CPI+5% and renamed the primary objective, and the secondary benchmark was retroactively changed to 60/40 and renamed the risk budget. ³CPI measured as the 5 year rolling average US Consumer Price Index ("CPI") Urban Consumers, less Food and Energy, plus 5% annualized ("CPI+5%"); rebalanced monthly.

Alaska Retirement Management Board

As of 31 December 2021

Performance Returns						
	Market Value	Inception Date	QTD	YTD	3 Year	Since Inception (Annualized)
Alaska Retirement (Gross)	\$ 629,881,991	10/31/2018	2.80%	9.79%	13.16%	11.02%
Risk Budget (1)			4.29%	9.78%	13.97%	12.65%
CPI +5% (2)			1.76%	7.09%	7.04%	7.04%
Over/Under Performance vs CPI +5% (2)			1.04%	2.70%	6.12%	3.98%

(1) The risk budget is 70% MSCI All Country World IMI Index (Net) + 30% Bloomberg US Aggregate Index from 3/31/2021 to present. The risk budget for the portfolio from inception through 3/31/2021 was 60% MSCI All Country World Index (Net) + 40% Bloomberg Global Treasury Total Return Index Value Unhedged. Performance for periods less than one year is not annualized. Past performance is not indicative of future results.

(2) CPI measured as the 5 year rolling average US Consumer Price Index ("CPI") Urban Consumers, less Food and Energy, plus 5% annualized ("CPI+5%"); rebalanced monthly. The CPI is a measure of the average change overtime in the prices paid by urban consumers for a market basket of consumer goods and services.

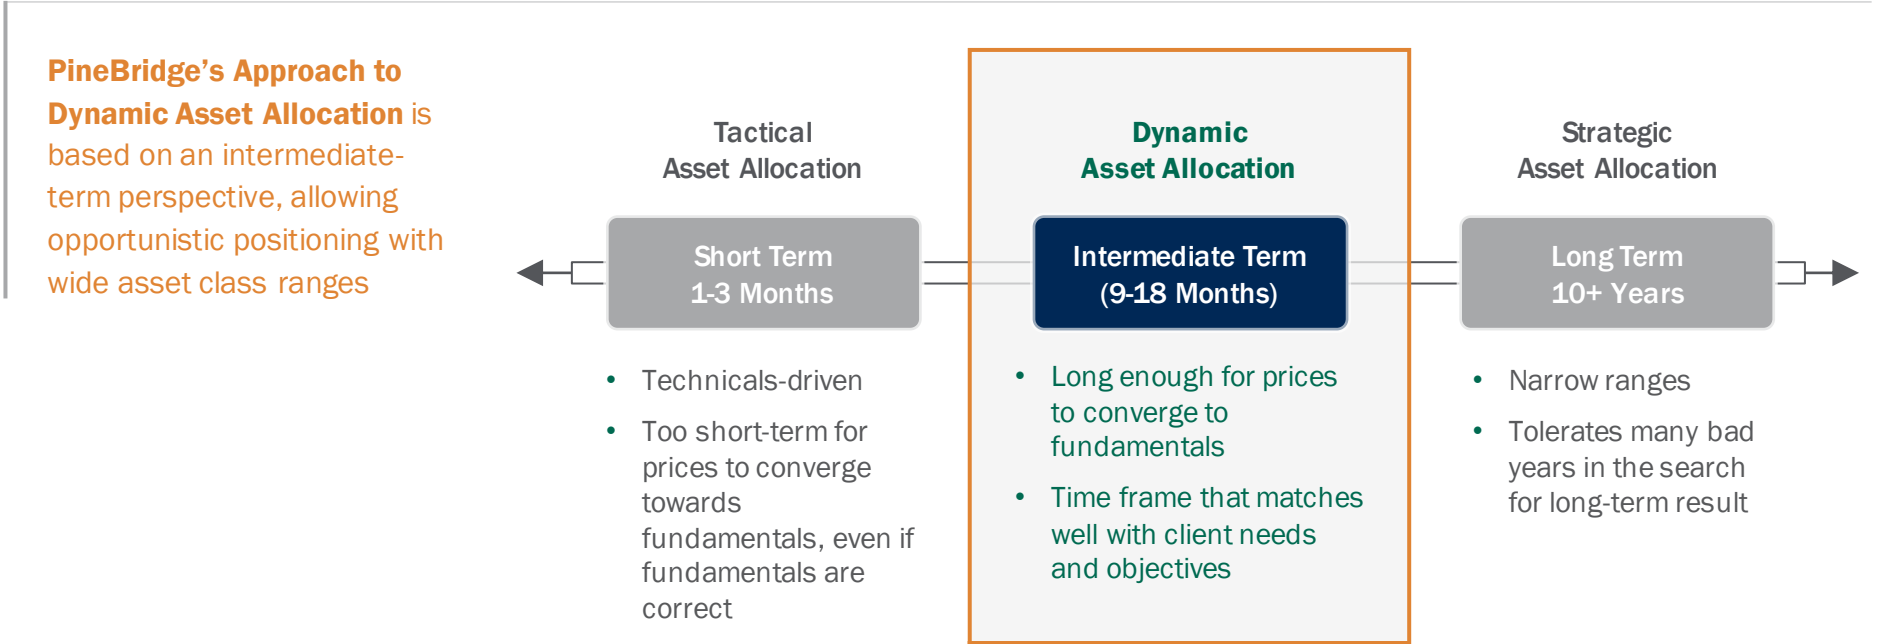

*Performance includes the period October 31, 2018 – Current report date.

Section III

Our Solution & Approach

Investment Philosophy

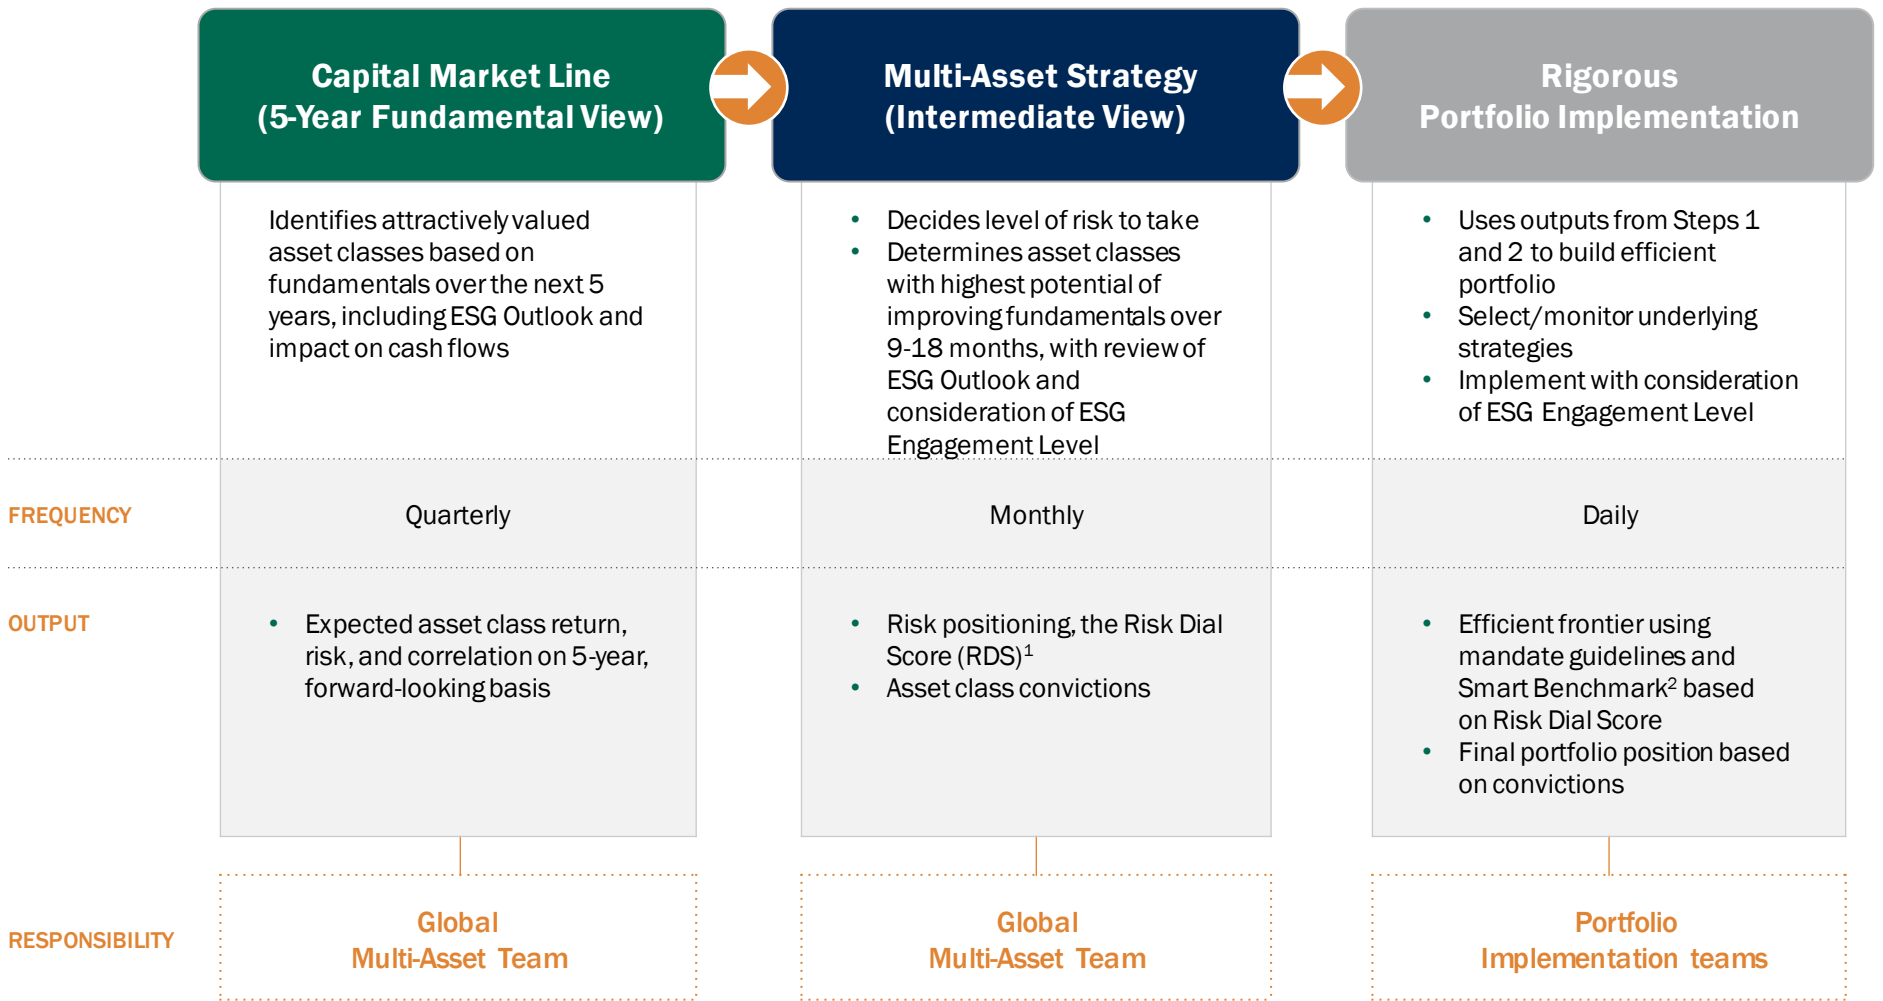

We Believe					
Fundamentals ultimately drive markets	An intermediate time horizon allows market prices to converge towards fundamentals	Each cycle is unique	A culture that supports and encourages differences in opinion drives better investment outcomes	Risk and return are equally important	Diversification alone fails to protect during periods of stress

Any views represent the opinion of the investment manager and are subject to change. There is no assurance that any investment objective will be achieved.

Investment Process

Time-Tested, Methodical, and Repeatable Process

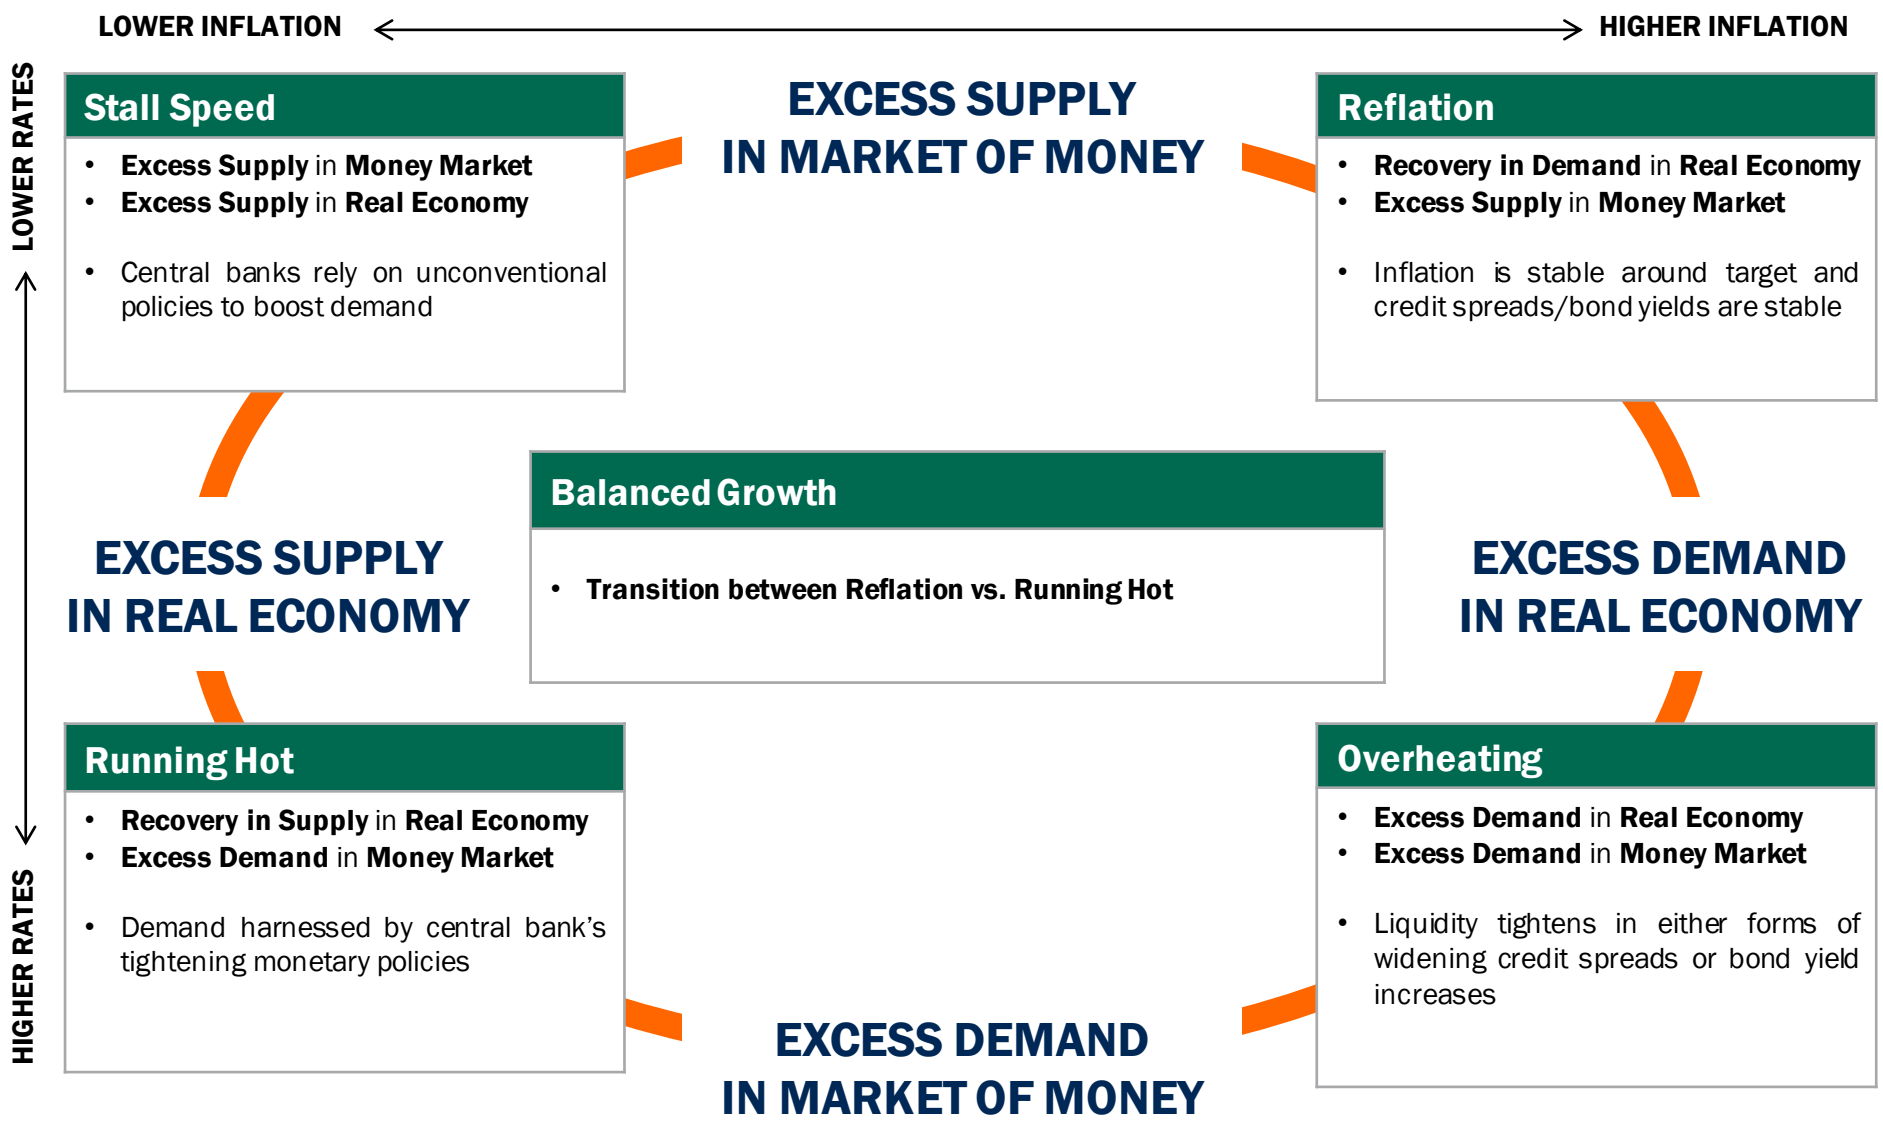

¹Numeric score determined by Investment Team indicative of its relative preference towards risk; 1 – most risk-seeking; 3 – neutral; 5 – most risk-averse. ²Smart Benchmark is the selected point on the efficient frontier that reflects the Risk Dial Score; it is the most efficient portfolio that the portfolio implementation step uses as a basis prior to over or underweighting this portfolio based on intermediate term asset class convictions.

Section IV

US Quality

As we move to the next stage of the cycle, quality stocks will lead

Key Drivers:

- Quality companies are defined as companies with strong balance sheets, high RoE levels and stable earnings
- Our basket targets companies that exhibit strong/stable margins and those with low wage costs
- Companies with these attractive characteristics can be found across sectors
- Pricing power will be an important driver of earnings as the cycle matures
- These companies derated during the pandemic leaving valuations attractive

PB US Quality % Breakdown by Sector

PB US Quality Relative Performance Returns vs. S&P 500 by PMI phase

Relative PE of Quality and Pricing Power Basket indicates good entry points

Productivity Basket

Reflects Rising Business Investment in Corporate-Focused Technology Sectors

Key Drivers:

- Rising global business investment activity intentions are reflected in corporate-focused technology sectors such as cloud computing, software as a service, and cyber security.
- While these concepts have existed for many years, we believe this has reached critical mass and are now prioritized in IT spending budgets to protect margins and counter disruption in several industries.
- Confirmation of this is reflected in the clear upward inflection in sales growth for these sub-sectors.
- While the longer-term impacts of Covid-19 are not certain, these companies are well placed to benefit from any increase in working from home. Cloud computing in particular should remain resilient.
- ESG has been trending positive over the last year. Software companies are setting carbon emission targets. Increased focus on using renewable energy when selecting data providers.

Central & South America	1.0%
Middle East	0.5%

CIO Survey: External IT Spending Expectations

Baseline ESG Rank Trend²

Japan Equities

Attractively valued with high beta to global growth

Key Drivers:

- Semiconductor availability will help all auto makers going forward, but Japan Index is more heavily weighted in auto manufacturing than others
- Recent viral outbreak caused a pullback and an interesting entry point as valuations look attractive
- Japan's vaccination rate has climbed more rapidly than almost any other. This drag should end.
- When change does come in Japan it does early on in a Prime Minister's tenure. This new PM has big fiscal stimulus plans.
- Japan maintains the highest operational leverage to global growth
- On the ESG front, Japan equities has lagged behind but carbon neutral targets are very ambitious

Sector breakdown highlights cyclical nature¹

Japan equities ESG Risk falls in medium risk³

Earnings Momentum & Valuation²

China Property Bond

No over-tightening but no significant easing either

Key Drivers:

- China's high yield credit market is still marked by high levels of distress among many property companies, but the market is clearly starting to differentiate between names
- Property sales volumes are expected to stabilize from Q2 next year
- Policy risk seems to have peaked, and policies are being slightly eased, which will help mainly the highest quality names
- Valuation are currently pricing in significant default risks providing a good entry point into potentially attractive risk/ return opportunities.
- The allocation will be actively and dynamically managed by our bottom-up specialist to protect against unexpected outcomes as well as take advantage of quick repricing moves across the market
- Net Increase of Property Loans guided to stay 30% of new loans for the sector

Current valuation is pricing in much higher default rate¹

Property sector loan growth decelerated²

Incremental easing to support higher quality names¹

EM LATAM Local Currency Bonds

Signs of peaking inflation

Key Drivers:

- In 2021, emerging markets faced an early spike in inflation and central banks responded swiftly and forcefully. This was particularly the case in Latin America, which is more vulnerable to food and energy prices
- Looking ahead, we see good prospects for inflation to peak and decline rapidly as supply issues fade and substantial rate hikes take effect.
- Meanwhile, the Fed wishes to move only modestly until later this year, hoping for the best, yielding an intermediate-term period during which the US dollar's strength should stabilize
- Subdued economic growth and improving inflationary outlook will pressure central banks to cut policy rates

Disclosures

Global Disclosure Statement (page 1 of 2)

PineBridge Investments is a group of international companies that provides investment advice and markets asset management products and services to clients around the world. PineBridge Investments is a registered trademark proprietary to PineBridge Investments IP Holding Company Limited.

Readership: This document is intended solely for the addressee(s) and may not be redistributed without the prior permission of PineBridge Investments. Its content may be confidential, proprietary, and/or trade secret information. PineBridge Investments and its subsidiaries are not responsible for any unlawful distribution of this document to any third parties, in whole or in part.

Opinions: Any opinions expressed in this document represent the views of the manager, are valid only as of the date indicated, and are subject to change without notice. There can be no guarantee that any of the opinions expressed in this document or any underlying position will be maintained at the time of this presentation or thereafter. We are not soliciting or recommending any action based on this material.

Risk Warning: All investments involve risk, including possible loss of principal. If applicable, the offering document should be read for further details including the risk factors. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio, the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved.

Performance Notes: Past performance is not indicative of future results. There can be no assurance that any investment objective will be met. PineBridge Investments often uses benchmarks for the purpose of comparison of results. Benchmarks are used for illustrative purposes only, and any such references should not be understood to mean there would necessarily be a correlation between investment returns of any investment and any benchmark. Any referenced benchmark does not reflect fees and expenses associated with the active management of an investment. PineBridge Investments may, from time to time, show the efficacy of its strategies or communicate general industry views via modeling. Such methods are intended to show only an expected range of possible investment outcomes, and should not be viewed as a guide to future performance. There is no assurance that any returns can be achieved, that the strategy will be successful or profitable for any investor, or that any industry views will come to pass. Actual investors may experience different results.

Information is unaudited unless otherwise indicated, and any information from third-party sources is believed to be reliable, but PineBridge Investments cannot guarantee its accuracy or completeness.

This document and the information contained herein does not constitute and is not intended to constitute an offer of securities or provision of financial advice and accordingly should not be construed as such. The securities and any other products or services referenced in this document may not be licensed in all jurisdictions, and unless otherwise indicated, no regulator or government authority has reviewed this document or the merits of the products and services referenced herein. This document and the information contained herein has been made available in accordance with the restrictions and/or limitations implemented by any applicable laws and regulations. This document is directed at and intended for institutional and qualified investors (as such term is

defined in each jurisdiction in which the security is marketed). This document is provided on a confidential basis for informational purposes only and may not be reproduced in any form. Before acting on any information in this document, prospective investors should inform themselves of and observe all applicable laws, rules and regulations of any relevant jurisdictions and obtain independent advice if required. This document is for the use of the named addressee only and should not be given, forwarded or shown to any other person (other than employees, agents or consultants in connection with the addressee's consideration thereof).

Disclosures by location:

Australia: PineBridge Investments LLC is exempt from the requirement to hold an Australian financial services license under the Corporations Act 2001 (Cth) in respect of the financial services it provides to wholesale clients, and is not licensed to provide financial services to individual investors or retail clients. Nothing herein constitutes an offer or solicitation to anyone in or outside Australia where such offer or solicitation is not authorised or to whom it is unlawful. This information is not directed to any person to whom its publication or availability is restricted.

Brazil: PineBridge Investments is not accredited with the Brazilian Securities Commission - CVM to perform investment management services. The investment management services may not be publicly offered or sold to the public in Brazil. Documents relating to the investment management services as well as the information contained therein may not be supplied to the public in Brazil.

Chile: PineBridge Investments is not registered or licensed in Chile to provide managed account services and is not subject to the supervision of the Comisión para el Mercado Financiero of Chile ("CMF"). The managed account services may not be publicly offered or sold in Chile.

Colombia: This document does not have the purpose or the effect of initiating, directly or indirectly, the purchase of a product or the rendering of a service by PineBridge Investments ("investment adviser") to Colombian residents. The investment adviser's products and/or services may not be promoted or marketed in Colombia or to Colombian residents unless such promotion and marketing is made in compliance with decree 2555 of 2010 and other applicable rules and regulations related to the promotion of foreign financial and/or securities related products or services in Colombia. The investment adviser has not received authorisation of licensing from The Financial Superintendency of Colombia or any other governmental authority in Colombia to market or sell its financial products or services in Colombia. By receiving this document, each recipient resident in Colombia acknowledges and agrees that such recipient has contacted the investment adviser at its own initiative and not as a result of any promotion or publicity by the investment adviser or any of its representatives. Colombian residents acknowledge and represent that (1) the receipt of this presentation does not constitute a solicitation from the investment adviser for its financial products and/or services, and (2) they are not receiving from the investment adviser any direct or indirect promotion or marketing of financial products and/or services. Uruguay: The sale of the securities qualifies as a private placement pursuant to section 2 of Uruguayan law 18.627. The issuer represents and agrees that it has not offered or sold, and will not offer or sell, any securities to the public in Uruguay, except in circumstances which do not constitute a public offering or distribution under Uruguayan laws and regulations. The securities are not and will not be registered with the Central Bank of Uruguay to be publicly offered in Uruguay. The securities correspond to investment funds that are not investment funds regulated by Uruguayan law 16,774 dated 27 September 1996, as amended.

Where applicable, the Manager may determine to terminate any arrangements made for marketing the Shares in one or more jurisdictions in accordance with the AIFM Directive and UCITS Directive respectively, as may be amended from time to time.

Investors and potential investors can obtain a summary of investor rights and information on access to collective redress mechanisms at www.pinebridge.com/investorrights.

Alaska Retirement Management Board

Peers | Time Horizon | Risk

Zachary Hanna, CFA
Chief Investment Officer

Key Board Decisions

Determine Investment Objective

- Fund's Purpose
- Governance – who makes which decisions?

Determine Asset Allocation

- Strategic
- Tactical

Oversee Implementation

- Manager Structure – number and types of manager allocations.
- Manager Selection

Monitor Results

- Are the fund, asset classes and mandates performing as expected?
- Are they achieving objectives?

Peers | Time Horizon | Risk

- The ARMB is in the process of undertaking annual asset allocation work and adopting economic assumptions for a periodic actuarial experience study.
- Reviewing peer defined benefit assumptions and relative investment risk is part of this process.
- Evaluating the plan's time horizon is also increasingly important since the systems are closed and maturing.

ARMB Actuarial Assumption History

Peer Assumptions – Nominal Returns

2020 Histogram Detail

Peer Assumptions – Inflation

2020 Histogram Detail

Peer Assumptions – Real Returns

ARMB and Peer Assumption History

Investment Risk Posture

- The ARMB's risk posture is higher than the median plan.
- Plan sponsor risk postures vary due to differing time horizons, asset/liability relationships, and other unique circumstances.
- The ability to bear risk is influenced by loss aversion, prudent investor considerations, liquidity, and other factors.

Time Horizon – Benefit Payments

- The PERS and TRS defined benefit systems are closed and mature but expected payments don't peak for over 10 years and extend 96 years into the future.
- The plans are expected to pay out \$113 billion in nominal payments or \$71 billion in inflation-adjusted payments using Callan's inflation assumption of 2.25%. Forward contributions of \$8 billion offset some of these payments, leaving \$63 billion.
- The systems are heavily reliant on investment earnings to bridge the ~\$30 billion gap between these payments and current assets.
- Establishing an appropriate time horizon for the investment earnings assumption is important.

Time Horizon Matters

- Time horizon is important with respect to both return and inflation expectations.
- Currently, return expectations are increasing with time horizon – the longer the appropriate time horizon, the more you would generally expect to earn over time.
- Inflation expectations are generally trending downward over time currently due to higher expected shorter-term inflation.
- Most open defined benefit plans have a very long time horizon, generally well in excess of 30 years.

Buck – December 2021 GEMS Modeling:

	10-year	20-year	30-year
Approach #1			
- expected value	6.02%	6.60%	6.86%
- 65 th percentile	7.54%	7.81%	7.88%
- 35 th percentile	4.81%	5.50%	5.96%

Callan – 2022 Capital Market Assumptions:

	2022-2031 10-Year Annualized Return	2022-2041 20-Year Annualized Return	2022-2051 30-Year Annualized Return
AssetClass			
Broad US Equity	6.60%	7.10%	7.55%
Large Cap US Equity	6.50%	7.00%	7.45%

Private Equity	8.00%	8.45%	8.90%
Cash Equivalents	1.20%	1.70%	2.15%

ARMB Time Horizon – Benefit Payments Over Time

- The full expected time horizon of the retirement systems is 96 years, but payments decrease to a low level well before that point.
- The percentage of total benefit payments remaining decrease fairly quickly over time:
 - In 20 years ~50% the payments have been paid out and remain.
 - In 30 years ~25% of the payments remain.
 - In 40 years ~10% of the payments remain.

ARMB Time Horizon – Weighted Average Life

- The approach staff uses to estimate time horizon for the systems is to calculate the weighted average life of the net benefit payments over time.
- This average life decreases over time as you approach the last benefit payments.
- In inflation-adjusted real terms, the weighted average life of the systems is currently 20 years.
- This is a reasonable estimate of the average investment time horizon of the funds.

Weighted-Average back to 1999

- For some historical context, staff calculated the weighted average life back to 1999 using actual prior benefit payments and forward payments as currently projected.
- At the start, the average life was ~40 years and has been decreasing steadily as the number of retirees increases and the plans become more mature.
- It is worth noting that this would not have been the perspective of the plans back in 1999 since at that time they were presumed to remain open with a somewhat perpetual life.

Economic Assumptions and Asset Allocation

- Positioning a portfolio to achieve ~5% real return has required increasing levels of risk and complexity.

Source: Callan LLC

- Like most institutional investors, the ARMB's risk has generally risen over time, while real returns have remained relatively static.
- In 2019, the ARMB moved to a 20-year asset allocation time horizon to better align assets and liabilities and moderate annual asset allocation changes.

Summary and Callan Initial Asset Allocation

- The ARMB moved to a 20-year asset allocation time horizon in 2019 after the prior experience study.
- 20 years remains a reasonable planning time horizon for both the liabilities and the assets.
- At the upcoming June ARMB meeting, the board will discuss asset allocation.
- The ARMB could consider aligning the experience study economic assumptions with the adopted asset allocation.

Process Overview

Why Make Capital Markets Projections?

Guiding objectives and process

A long-term strategic investment plan is the cornerstone of a prudent process.

- Capital markets projections are key elements to set reasonable return and risk expectations for the appropriate time horizon.
- Projections represent our best thinking regarding the long-term (10-year) outlook, recognizing our median projections represent the midpoint of a range, rather than a specific number.
- Develop results that are readily defensible both for individual asset classes and for total portfolios
- Be conscious of the level of change suggested in strategic allocations for long-term investors: DB plan sponsors, foundations, endowments, trusts, DC participants, families, and individuals
- Reflect common sense and recent market developments, within reason

Callan's forecasts are informed by current market conditions, but are not built directly from them.

- Balance recent, immediate performance and valuation against long-term equilibrium expectations

How are Capital Market Projections Constructed?

Guiding objectives and process

Underlying beliefs guide the development of the projections:

- An initial bias toward long-run averages
- A conservative bias
- An awareness of risk premiums
- A presumption that markets are ultimately clear and rational

Reflect our beliefs that long-term equilibrium relationships between the capital markets and lasting trends in global economic growth are key drivers to setting capital market expectations

Long-term compensated risk premiums represent “beta”—exposure to each broad market, whether traditional or “exotic,” with limited dependence on successful realization of alpha

The projection process is built around several key building blocks:

- Advanced modeling at the individual asset class level (e.g., a detailed bond model, an equity model)
- A path for interest rates and inflation
- A cohesive economic outlook
- A framework that encompasses Callan beliefs about the long-term operation and efficiencies of the capital markets

2022 Risk and Returns

Current Market Conditions

Resurgent U.S. Equity Market in 4Q21

Strong performance across both growth and value strategies during 2021

- 2021 returns for U.S. equity markets are eye-popping:
 - S&P 500: +28.7%
 - U.S. Small Cap: +14.8%
 - Non-U.S. equity markets lagged:
 - MSCI World ex USA: +12.6%
 - Emerging Markets: -2.5%
- Economic data recovered in 4Q after softening in 3Q. Tight labor market and mismatch between jobs and job seekers is vexing employers.
- Inflation spiked and recorded 7% for the first time in decades.
- 4Q GDP hit a robust 6.8% (estimate), after dropping in 3Q. Growth for the year is 5.7% (estimate). The economic recovery is still solid. Supply chain issues and sentiment surrounding the end of fiscal stimulus, the Omicron variant, and the Fed taper vex investors as we head into 2022.

Returns for Periods ended 12/31/21

	1 Quarter	1 Year	5 Years	10 Years	25 Years

Unprecedented Shock to Global Capital Markets—But It Was Over in a Flash!

V-shaped recovery in equity—back in black by mid-August 2020, up 119% from market bottom!

S&P 500 Cumulative Returns

Market Peak-to-Trough for Recent Corrections vs. Current Path of COVID-19 Correction Through 12/31/21

Sharpest and fastest equity market decline ever: 16 trading days to reach bear market; -34% after just 23 days

- S&P 500 recovered all its pandemic-related losses by Aug. 10, 2020, only 97 days from the bottom.
- S&P 500 up 28.7% in 2021.

Fun fact: As of Dec. 31, 2021, or 472 trading days, the S&P is up over 45% from the previous market peak on 2/19/20. In contrast, during the GFC the market was still down 31% from the previous market peak after 472 trading days (Aug. 24, 2009).

GDP Recovered Pre-Pandemic Level in 2Q21 After Deepest Drop in 75 Years

Seasonally Adjusted Real GDP in Billions of Dollars

After the Global Financial Crisis, it took 2.5 years before real GDP reclaimed its pre-recession highs.

- GFC peak to trough down 4%

2Q20 real GDP level was down over 10% from 4Q19.

- Pre-pandemic peak level of GDP reached in 2Q21: \$19.368T vs. \$19.202T for 4Q19

2021 GDP on track for annual growth of 5.7%, with consensus estimates just north of 4.0% for 2022, followed by return to trend.

Economic Outlook

Role of economic variables

GDP and inflation

- GDP forecasts provide a very rough estimate of future earnings growth
- Inflation forecasts provide an approximate path for short-term yields
- Inflation is added to the real return forecasts for equity and fixed income

GDP forecasts

- 2% to 2.5% for the U.S.
- 1.5% to 2.0% for developed ex-U.S. markets
- 4% to 5% for emerging markets
- All forecasts are below long-term averages
- Path to longer-term growth will include cycles with recessions

Inflation forecasts

- 2.0% to 2.5% for the U.S.
- 1.75% to 2.25% for developed ex-U.S. markets
- 2.40% to 2.90% for emerging markets

Callan

Detour: Special Focus on Inflation

The Fed's New Inflation Framework

Targeting core Personal Consumption Expenditures Index

Personal Consumption Expenditures Excluding Food and Energy (Chain-Type Price Index)

- Inflation worries are in the headlines, and the data are clearly signaling a sharp rise in the short term.
- Inflation had consistently undershot the Fed's 2% target, prompting the Fed to change its inflation framework.
- Fed's aim is to achieve an average of 2% inflation over the medium term, which is not specifically defined.
- PCE is the Fed's target, different from and typically lower than CPI-U, which had a year-over-year gain of 7.0% in December 2021.

Sources: Federal Reserve Bank of St. Louis, U.S. Bureau of Economic Analysis

Inflation Rebounds and Spurs Headline Concerns

CPI and PPI up sharply again in 4Q21

Inflation fell sharply at the onset of the pandemic, starting in February 2020.

- The recovery to pre-pandemic levels in the Consumer Price Index required a 2.6% year-over-year change.
- 7% jump in 4Q CPI-U represents kinks in supply chains and labor markets after a year of global economic disruption and shutdown.
- Producer prices had been tumbling for more than a year prior to the pandemic; recovery to 2018 price **levels** generated eye-popping year-over-year percent change through 2Q, and the sharp rise continued through the second half of 2021.
- Driving the PPI's rise were prices for transportation goods, energy and food.

Consumer and Producer Price Indexes – Inflation Year-Over-Year

Source: Federal Reserve Bank of St. Louis

Inflation Rebounds and Spurs Headline Concerns

Fixed income market: rising short- to medium-term inflation expectations

5-Year Breakeven Inflation Rate

Fixed income market expecting inflation to rise in the near term.

- The five-year breakeven inflation rate has recovered from near zero, and is now above 2.5%—substantially lower than current level.
- Five-year breakeven inflation rate is the difference between five-year nominal and five-year Treasury Inflation-Protected Securities (TIPS) yields.
- Actual breakeven rate not as important as markets forecasting neither deflation nor high inflation

Source: Federal Reserve Bank of St. Louis

Gasoline Prices Are Top of Mind for Consumers, but Still Below Early 2010s Peaks

A highly visible inflation measure; feeds expectations

Average Price: Gasoline, Unleaded Regular (Cost per Gallon / 3.785 Liters) in U.S. City Average

Source: Federal Reserve Bank of St. Louis

So When Does Inflation Become a Problem?

The majority of the working-age and younger population has no experience with sustained inflation.

- Last spurt above 5% happened in 2007, when oil prices spiked to above \$100 per barrel; this spike evaporated with the GFC.
- Last **sustained** bout of inflation was wrung out of the U.S. economy by serial recessions in 1980 and 1981. Inflation had reached double-digits in the late 1970s, and short interest rates were hiked to just below 20%, twice!
- Decades of policy error, both monetary and fiscal, led to the build-up of inflation during the late 1960s and into the 1970s—the wage-price spiral of the 1970s did not materialize out of thin air.
- Current global monetary and fiscal policies were enacted to combat an unprecedented pandemic, the shutdown of production, transportation, and distribution, and severe interruption in consumer and business activities that led to the steepest recession in 75 years.
- The policies were key to the incredible economic recovery seen in the U.S. and around the world.
- The interruption of supply chains, labor markets, manufacturing processes, and the delivery of goods and services was substantial; the working-out of these kinks was both expected and actually better/faster than projected just a year ago.
- This recession was also the first to feature substantial job loss but no decline in aggregate income, which suggests substantial pent-up demand.
- The current spike in inflation was completely expected; there are no surprises. Inflation is working itself out at different rates and at different levels of pervasiveness across commodities, materials, goods, manufacturing, and services. The labor market suffered some of the greatest disruption and will take the longest to iron out the kinks.
- While the current spike is alarming, the return toward normal markets means that underlying demand will return to normal, and pressures on prices will abate, likely toward the second half of 2022 and in the following years.

History

U.S. savings rate

Personal Savings as a Percentage of Disposable Personal Income

Does saving drive the stock and bond markets?

Savings rate declined from mid-1970s to GFC then increased

- Americans less fiscally prudent before GFC? Aging population spending accumulated savings?
- Americans more fiscally prudent after GFC? Long-term trend?

Source: Federal Reserve Bank of St. Louis

History

U.S. government debt

Federal Debt: Total Public Debt as a Percentage of Gross Domestic Product

So far government debt has not crowded out private debt

- Foreign demand for U.S. debt
- Equity hedging?
- Financial repression would seem to argue against holding Treasuries

Source: Federal Reserve Bank of St. Louis

Inflation versus Interest Rates Over the Long Term

Federal Funds vs. Consumer Price Index

We are a long way from the inflation and interest rate spike of 1980–1981, and even the last rise in inflation from 2005–2008.

Yield Curve Path

Smoothed Yield Curve Paths

	Long Term Premium	Final Yield	Premium Over
Inflation	0.00%	2.25%	N/A
90 Day T-Bill	0.50%	2.75%	Inflation
TIPS	1.50%	4.25%	Cash
1-3 Year Treasury	0.55%	3.30%	
Intermediate Treasury	1.00%	3.75%	
Aggregate Treasury	1.25%	4.00%	
10-Year Treasury	1.70%	4.45%	
Long Treasury	2.25%	5.00%	
30-Year Treasury	2.35%	5.10%	

We updated the bond model this year to extend our yield forecast horizon over 30 years.

- Allows for a longer-term view on reversion to equilibrium rates, durations, convexity, and spreads.
- We used a smoothing approach where yields rise faster early in the horizon and reach equilibrium at year 30.

Cash at the end of the 30-year horizon is 2.75%.

- Reflects a 50 basis point premium over projected inflation, which is consistent with long-term U.S. interest rate history.

Term premiums are consistent with long-term historical medians.

- For example, in Year 30 the 10-Year Treasury yield is 4.45%, or 1.70% above cash.

Rate Movement in the Last Year

(9/30/20 to 9/30/21)

Treasury Yield Curve Change

Net Yield Changes After Spread Tightening

The Treasury yield curve rose meaningfully in the last year.

- However, spreads also tightened and absorbed some of the rise in rates.
- In the case of high yield, spreads tightened so much the overall yield on the sector dropped by over 1.7%.

Sources: Bloomberg, Federal Reserve

Core Fixed Income Return Components

Total Return Attribution

Higher yields relative to last year are offset by capital losses from our rising rate projection.

- We project rates to rise faster early in the forecast, leading to larger capital losses and lower total returns.
- As rates stabilize, the carry from yield outweighs capital losses, leading to positive total returns.

Key Assumption Changes for 2022: High Yield

Historical High Yield OAS

Data represents Jan 1994 to Sept 2021

	High Yield OAS
Minimum	2.35
25th	3.38
50th	4.39
75th	6.08
Maximum	18.33
Average	4.99
Spread as of 9/30/20	5.17
Percentile as of 9/30/20	64%
Spread as of 9/30/21	2.89
Percentile as of 9/30/21	8%

- Last year spreads were above median at the time we prepared assumptions.
- This year spreads were in the bottom decile.
- Assuming spreads rise back to long-term medians, in addition to rising risk-free rates, will create a stronger headwind to performance.

Source: Bloomberg

Key Assumption Changes for 2022: High Yield

High yield starting yield vs. forward 10-year return

- There have only been a few periods where the subsequent 10-year return beat the starting yield.
- The performance gap represents downgrade and default drag.
- Our high yield projection reflects this relationship, with the starting yield acting as a constraint on our return expectation.

Key Assumption Changes for 2022: TIPS

- This year we updated the model to use real duration for TIPS instead of nominal duration.
- Since our inflation assumption is flat, that implies our rising yield forecast equates to rising real yields.
- Median TIPS real duration is 7.8 historically vs. a median of 5.5 for nominal duration.
- The higher duration translates to higher capital losses compared to the 2021 forecast, more than offsetting the higher starting yield.

Callan

Equity

U.S. Equity Assumptions

Dividend yields

Dividend Yield for 15 Years Ended December 31, 2021

- COVID-19 caused a decline in yields around the world.
- Yields have turned up but have still not reached their pre-pandemic levels.
- Forecast yields are expected to return to approximately their longer-term averages.

Price appreciation

S&P 500 Price Index

- The S&P has more than doubled since the pandemic low.
- Appreciation has outpaced forward earnings estimates and valuations have increased above pre-pandemic levels.

Source: Federal Reserve, Standard & Poor's

U.S. Equity Assumptions

Large cap valuations

S&P 500 Index: Forward P/E Ratio

- All valuation measures in excess of one standard deviation above 25-year averages.
- Forward P/E has stalled even with exceptional forecast returns for 2022.
- Return to more normal earnings growth in future years limits price appreciation without further valuation expansion.

Source: FactSet, FRB, Robert Shiller, Standard & Poor's, Thomson Reuters, J.P. Morgan Asset Management

U.S. Equity Assumptions

Mid and small cap relative valuations

- Large capitalization stocks have relatively high valuations.
- Historically, smaller cap stocks have had higher valuations than large caps.
 - Investors buying future rather than historical earnings
- The small cap S&P 600 P/E is only 69% of the S&P 500 P/E.
- The mid cap S&P 400 P/E is only 76% of the S&P 500 P/E.
- Lower valuations improve the potential for higher returns relative to large cap going forward.

S&P 600/S&P 500 Relative Forward P/E Ratios

S&P 400/S&P 500 Relative Forward P/E Ratios

Source: Standard & Poor's

U.S. Equity Assumptions

Risk premium

- Over the very long term, the equity risk premium (ERP) vs. cash is around 6%.
- Callan equity projection is at T-bills + 5.3%, consistent with long-term history.
 - Over the past 20 years ERP vs. cash has been 5.5%.
- Cash at 1.2%, ERP at 5.3% = Equity Return of 6.50%

Rolling 40 Quarter Relative Returns Relative To 3 Month T-Bill for 20 Years Ended December 31, 2021

Source: Standard & Poor's

Global ex-U.S. Equity Assumptions

Developed markets valuations and dividend yield

Price Earnings Ratio

Dividend Yield

Valuations are generally high in developed markets.

- Valuations have changed only modestly over the past year.
- U.S. continues to have the highest valuations.

Low dividend yields have a direct impact on returns.

- Dividend yields have generally stayed the same or fallen since last year.

Source: MSCI (Dec. 31, 2021)

Global ex-U.S. Equity Assumptions

Emerging markets valuations and dividend yield

Price Earnings Ratio

Dividend Yield

Emerging markets also have elevated valuations.

- Among the BRICs, India has the highest valuation metrics while Brazil has fallen dramatically.
- Asia has the highest regional valuations, Latin America the lowest.

Significant dilution is realized as growing companies issue more shares.

^ Assumes cash return of 1.2%.

^^ Assumes Aggregate forecast is 1.75%.

Callan

Alternatives

Private Equity

Background

The private equity market in aggregate is driven by many of the same economic factors as public equity markets. Buyout valuations appear reasonable while venture/growth equity valuations are high.

Consequently, the private equity performance expectations did not change relative to where they were last year.

We see tremendous disparity between the best- and worst-performing private equity managers.

The ability to select skillful managers could result in realized returns significantly greater than projected here.

2022 private equity return projection: 8.00% (unchanged)

Return Projections

Real Estate

Background

The foreseeable low interest rate environment should help to ensure that real estate continues to garner interest from investors seeking income, supporting returns.

Weakening expectations for some real estate sectors, such as office and retail may continue to be offset by other sectors such as industrial and residential. Non-traditional sectors like medical office and data centers continue to grow in institutional portfolios.

No change to the outlook for real estate returns compared to last year.

2022 real estate return projection:
5.75% (unchanged)

Return Projections

Hedge Funds

Background

Hedge funds can be evaluated in a multi-factor context using the following relationship:

$$\text{Expected Return} = \text{Cash} + \text{Equity Beta} \times (\text{Equity} - \text{Cash}) + \text{Exotic Beta} + \text{Net Alpha}$$

Callan's 10-year cash forecast is 1.2%.

Diversified hedge fund portfolios have historically exhibited equity beta relative to the S&P 500 of about 0.4.

Combined with our equity risk premium forecast, this results in an excess return from equity beta of just over 2%.

Return from hedge fund exotic beta and illiquidity premia is forecast to be 0.5% to 1.0%, to arrive at an overall expected return of 4.1%.

2022 hedge fund return projection:
4.1% (up 10 bps)

Return Projections

Private Credit

Background

Return projection is anchored on middle market direct lending where yields have returned to pre-COVID lows.

While banks are no longer major investors in this market, there is strong appetite from institutional and retail investors.

~160 bps is a reasonable return premium relative to high yield (3.9%) and leveraged loans.

A portfolio with more distressed and specialty finance exposure would have a higher return though with a lower current yield and higher volatility and higher correlation to public and private equity.

2022 private credit return projection: 5.5% (down 75 bps)

Return Projections

Risk Projections: Major Asset Classes

1989–2022

Source: Callan

7% Expected Returns Over Past 30 Years

Increasing Complexity

1992

Return: 7.0%
Risk: 3.2%

2007

Return: 7.0%
Risk: 9.4%

2022

Return: 7.0%
Risk: 16.8%

Increasing Risk

In 1992, our expectations for cash and broad U.S. fixed income were 6.2% and 7.9%, respectively

Return-seeking assets were not required to earn a 7% projected return

15 years later, an investor would have needed over half of the portfolio in public equities to achieve a 7% projected return, with approximately 3x the portfolio volatility of 1992

Today an investor is required to include 96% in return-seeking assets (including 30% in private market investments) to earn a 7% projected return at over 5x the volatility compared to 1992

Source: Callan

5% Expected Real Returns Over Past 30 Years

Increasing Complexity

1992

Inflation: 4.50%
Real Return: 5.0%
Risk: 7.2%

2007

Inflation: 2.75%
Real Return: 5.0%
Risk: 14.6%

Increasing Risk

2022

Inflation: 2.25%
Real Return: 5.0%
Risk: 17.8%

Despite a 4.5% inflation projection, an investor could have over two-thirds of the portfolio in low-risk assets (fixed income) and still earn a 5% projected real return in 1992

15 years later, an investor would have needed 86% in public equities to achieve a 5% projected real return with over 2x the portfolio volatility of 1992

Today an investor must have 100% of the portfolio in return-seeking assets to earn a 5% projected real return at approximately 2.5x the volatility compared to 1992

Expanding the Length of the Forecast Horizon

10-Year vs. Equilibrium Capital Market Expectations

- As the time horizon grows beyond 10 years, our capital market expectations increasingly incorporate “equilibrium returns”. Equilibrium returns reference **long-term historical mean results**, with an overlay of informed judgment. Key elements to consider:
 - Nominal returns
 - Inflation
 - Real returns
 - Risk premium – bonds over cash, stocks over bonds, long duration over short
 - Long-term underlying economic growth (real GDP)
- 10-Year expectations:
 - Large Cap Stocks: 6.5% nominal, 4.25% real, 4.75% premium over bonds
 - Bonds: 1.75% nominal, -0.50% real, 0.50 % premium over cash
 - Cash: 1.2% nominal, -1.05% real
 - Inflation: 2.25%
 - Underlying economic growth (real GDP) – 2 to 2.5% per year
- Equilibrium expectations:
 - Large Cap Stocks: 8.40% nominal, 6.15% real, 3.45% premium over bonds
 - Bonds: 5.1% nominal, 2.85% real, 2.05% premium over cash
 - Cash: 3.05% nominal, 0.80% real
 - Inflation: 2.25%
 - Underlying economic growth (real GDP) – 3% per year

As Time Horizon Increases, Expected Returns Increase

Transition from 10-Year to 20-Year Horizon – Heading Toward LT Equilibrium

Focus on 20-Year Horizon – PERS (\$22.8 b) & TRS (\$10.8 b at 1/31/22)

Achieve 4.88% Real Return over 20-Year Horizon

ARMB adopted new target portfolio following the 2019 asset-liability study, and refined the target in the 2021 asset allocation review

- Duration, cash flows and demographic forecasts suggest the investment time horizon for PERS and TRS remains long
- Current 10-year capital market forecasts can lead investors to take on substantial risk to meet a fixed return goal
- Extending the forecast horizon enabled the plans to moderate exposure to risk assets while still meeting the return target over this longer horizon
- The target represents the risk posture of the plans and acknowledges future liquidity needs

Portfolios optimized using broad US and non-US equity, broad US fixed income, real assets and private equity

- Opportunistic is modeled as 60/40 exposure to public market stocks and bonds
- Real assets modeled using current target weights to each component within the total real asset composite
 - 35% *Real estate*
 - 10% *Timber*
 - 25% *Farmland*
 - 15% *Private Infrastructure*
 - 15% *REITs*

Fixed income modeled as 95% broad market (BB Aggregate) and 5% cash

Projection set customized to reflect specific ARMB strategies:

- Real assets, opportunistic and fixed income

Current target projected to generate a return of 6.88% compounded over 10 years, at a risk (standard deviation) of 13.83%. This return is comparable to that projected last year for the same target (6.88%).

Source: Callan LLC

Focus on 20-Year Time Horizon

Compare Return and Risk for 2022 vs. 2021 Capital Market Assumptions

- Target adopted in 2021 represents a portfolio designed to meet the goal of 7.13% nominal/4.88% real return over 20 years
- Inflation assumption is 2.25%, up from 2.0% projected in 2021
 - As a result, the real return goes down for the same asset allocation and the same nominal return projection
- 2022 assumptions suggest a nominal return gap of 25 basis points versus 7.13%, with a comparable real return gap
- Actuary's effective long term real return target is 4.88%
- Target shown at right is expected to generate a long-term (20-year) return that is close to (but just below) the plan's real return target ($6.88\% - 2.25\% = 4.63\%$)
- Target expected to generate a greater return for the same level of risk as a portfolio restricted to the public markets

UFCW CalSTRS Public Comments – Bob's Discount Furniture (Bain Fund X)

1. Tabitha Niemann

My name is Tabitha Niemann, I'm with the United Food & Commercial Workers International Union, and I'm here to apprise you of an escalating labor dispute that may pose a risk to your investment. Several of our local unions, representing hundreds of employees, have spent several months negotiating contracts with Bob's Discount Furniture, which is majority owned by Bain Capital Fund X, a fund in which the Alaska Retirement Management Board invested 1.3 million dollars.

In November, we reached out to your CIO to lay out the issues and give you advance notice about how contentious these negotiations were likely to be, given Bob's actions on the ground. Four months later, over 250 workers at 9 stores are still without a settled contract. Instead of working toward resolution of outstanding issues, Bob's has encouraged workers to decertify the union, Bob's refuses to settle contracts at two newly unionized stores, and the company still has pricy anti-union lawyers on their payroll – after spending over \$400,000 on consultants in attempts to convince workers they didn't need a union in 2019. The union has won 2 decertification elections in the last few months at unionized Bob's stores and won union elections at 2 new stores in the last 2 years, illustrating that Bob's is on the wrong track with its workers.

These steps are not normal negotiation tactics and cost customers and investors money. They anger workers, who are the heart of customer service. Workers have already borne the brunt of a public health crisis, supply chain disruptions, and surging demand. They have served customers at personal risk to their own health. They quite literally pay for supply chain disruptions, because their pay is dependent on delivery of furniture.

Labor disruptions add risk to retail operations and could add worker dislocations to an already strained labor environment. A labor crisis is not the answer to a successful exit plan for your investment, rather it is an impediment.

We ask you to determine whether Bain is acting in your best interest with your investment, and to urge Bain to resolve its labor issues, abandon its aggressive anti-union program, and get to work solving delivery problems for its customers. We hope you consider their answers in your future investments. Thank you.

2. Ian Malowitz

My name is Ian Malowitz, I've worked for Bob's Discount Furniture in Poughkeepsie NY for two years, and I'm on the negotiation committee for UFCW local 888. This past September, after a very brutal campaign by Bob's, my coworkers and I voted to join the UFCW and have been negotiating our first contract for almost 6 months now. During this time, Bob's has been negotiating aggressively and then pointing to slow progress at the table as a way to push to decertify the union in our stores.

From the start of negotiations, Bob's has insisted on negotiating separate contracts for both the Poughkeepsie and Paramus store, who has been working on a contract since 2019, and the other stores who have already been in the union. Negotiating separate contracts doesn't do anything but force Bob's to shell out more money on its lawyers - and this is after spending over \$200,000 on an anti-union consultant during our store's election, according to an HR rep.

Additionally, in the stores we're constantly seeing the reasons we voted to join the union in the first place. We work on a draw and only get paid commission on delivery, meaning that we pay Bob's to be in the store selling, we do not get paid hourly. Our stock issues have been so bad that our sales are taking 3-4 months to be delivered, which leads to a lot of cancellations, meaning we aren't getting paid on them for months, if at all - not only are we not getting paid for the work we did, but we actually owe the company money for the time we spent with that customer. Many reps are falling into deficit with the company while still having 50k or more in sales that is waiting on delivery. Why should anyone with that amount of sales waiting on delivery fall into deficit?

We're not asking for anything crazy in our negotiations. This has been a crazy time dealing with the pandemic and a lot of us sales reps have been hit hard as our only source of income comes from the company being able to deliver our sales, which they have not been able to do. The company says they've had some of the best years ever despite the pandemic, they're opening new stores in new regions despite these issues, but meanwhile Bob's workers are struggling.

We thank you for taking your time to listen to us and ask that you urge Bain to resolve its labor issue, abandon its anti-union campaign, and get back to selling furniture and making money. Thank you.

3. Mario Cacace

My name is Mario Cacace & I'm a sales associate at Bob's Discount Furniture in Yonkers, New York, represented by the UFCW local 888. I've been at the store in Yonkers for almost 14 years.

Sales associates at Bob's work off of commission on delivered sales, at an industry low of 5%. Throughout the history of Bobs, this commission rate has not increased. In fact, they have lowered our commission in the outlet, and are taking it away altogether on certain web orders.

In the past, it was common for my store to do more than a quarter million dollars in sales over the weekend. Nowadays, we are lucky to hit half that. The managers don't even bother to print our numbers anymore.

In my experience, 40% or more of our sales are canceled due to lack of merchandise. We often spend hours with a customer, only to lose them due to stock issues. Customers that do make a purchase often cancel anyway, due to further delays on their original delivery dates. We are often working for many hours, not just for free - but at a loss, because we have to pay our draw back. We spend more time trying to work out customer delivery issues than we do selling new products.

When we aren't working out customer delivery issues, managers pressure us to push customer credit cards - management would rather us have a customer open a Bob's card than make a sale. Managers aggressively push us to run customers' credit, or else we are reprimanded, or forced to have awkward conversations with managers in front of the customer.

Managers have also been disciplining us for minor things or for issues out of our control - attendance policies that haven't been enforced before, problems with technology that isn't our fault - this discipline drives down morale in the stores, and is worsened by the faulty technology Bobs continues to invest in. Each time they overhaul their tech, everyone winds up suffering due to slow and glitchy programs. This inefficient tech wastes more time and makes it even harder for us to make a living. That

Over the past 14 years, my experience trying to make sales has deteriorated. Now we have to bargain with the company over things like sick time in a health crisis. For two years, we have risked our own lives and health to come to work because customer service is what we do. Bob's and Bain should honor us and protect your investment with solutions, not more crisis. You can protect your investment and honor our sacrifice by taking our concerns seriously and urging Bain to solve its problems, not try to bust our union. Thank you.

4. Tony Laing

Good morning, thank you for hearing our comments. My name is Tony Laing, I'm a sales associate at Bob's Discount Furniture in Glendale, New York, and a shop steward for the UFCW local 888.

I want to emphasize today that Bob's negotiating tactics have been aggressive with the goal of deterring, denying, and decertifying our union.

Over the past two years, workers at Bob's stores in Poughkeepsie and Paramus voted to join our local, which represents workers at six additional Bob's stores in New York and New Jersey. Despite the voices of these workers, Bob's management – with the help of corporate anti-union lawyers – has not reached a first contract with these stores, insisting on separate contracts for the two newly organized stores in spite of ongoing negotiations for our long-standing master agreement, which is also expired.

This doesn't make sense for anyone, except for maybe the lawyer charging legal fees. Not only is it a waste of time in bargaining, it will also be more difficult for the company to administer separate contracts with different provisions. It adds to the potential for continuing labor & company internal disputes, instead of resolving labor issues in the midst of the broader health crisis and supply challenges.

Meanwhile, the company has distributed information on decertifying the union across various stores, and our union has won 2 decertification elections already. In another store, where a decertification election result is being disputed after the company's aggressive campaign, the company distributed information to members stating that the cost of coverage would increase by 43%, even though the terms of employee contributions to the plan had not even been agreed upon – let alone disclosed to members as part of this campaign. In the past 10 years, Bob's has covered these insurance increases in full, yet portrayed these costs in a union proposal as a detriment to members in an effort to decertify the location.

At my own store, we have filed two unfair labor practice charges with the National Labor Relations Board against the company, including one relating to the company's offer of tuition reimbursement for non-union workers only. This is a clear attempt to divide workers and lure members away from union benefits, rather than materially improving its own contract offer: despite 30-year high inflation rates, we've been offered no monetary increase in wages; in fact, we will lose wages through web orders over time. Bob's is paying lawyers to undermine us, who are the direct producers of company revenues and the face of customer service at Bob's and who have also risked our health to work throughout this pandemic. Wouldn't it be better for your investment and our jobs if Bob's focused on solving the many real-world problems of selling furniture right now, instead of provoking its workers into an escalating dispute with an expired contract, no real monetary proposal, and with no end or agreement in sight? I thank you for your time.

Thank you to the members of the Alaska Retirement Management Board for taking the time to review my comments. My name is Happy Allen, and I worked at PetSmart for nearly 5 years as a Pet Training Instructor.

The Alaska Retirement Management Board is invested in PetSmart through BC Partners, which bought the company in 2015. Recently, I shared my experience about how much the company changed after BC Partners purchased it with Lauren Kaori Gurley, who published an alarming exposé in VICE. The story is called "[Some Understaffed PetSmarts Are Dealing With Freezers Overflowing With Dead Pets](#)," and I'd recommend that you read it to understand the kind of abuses that Alaskan retirees are unknowingly funding.

I'm writing today to encourage you to reach out to BC Partners and ask them to meet with the committee of workers organizing with United for Respect. We've been asking them to meet with us for two years, and it was their repeated silence that forced us to go to the press.

At PetSmart, workers and innocent pets have paid the price for BC Partners' cost-cutting measures. After acquiring PetSmart in 2015, I saw firsthand how BC Partners eliminated middle management, but the work still had to get done, so associates began to see bigger workloads. Hours were cut and full time positions became rare.

BC Partners seemed to want to put as much work on as few people as possible. As a result, I was also doing training at three other stores 85 miles apart, from Chattanooga to Nashville, and I often had to help in stocking, petcare, and work the register on top of that. I felt like I was working three or four jobs instead of one. My co-workers were in the same boat.

We went from having a workplace that we loved, to feeling stressed and overworked. The level of expectation was unmanageable for us, which really hurt the pets in the end. There simply wasn't enough staff, and to be honest, many times we did not have enough supplies, to provide proper care for the pets in our charge.

There have been reports that PetSmart is looking to sell the company. At this point, the best way to fix PetSmart's problems is for BC Partners to start meeting with workers who intimately know the issues at the company and invest more in the business through providing proper equipment, adequate staffing, and decent pay as well as benefits.

Thank you for considering reaching out to BC Partners about workers' requests to meet with them and improve conditions.

Sincerely,

Happy Allen
